What is the difference between an academic and professional qualification? Who should get a professional qualification? Did you know that some professions can not be legally practised with a degree alone? Why get a UK qualification? Is it expensive to gain a British qualification? What is a chartered institute or society, and is it better than a non-chartered body? What is the difference between a professional body and a trade union? These are all questions answered in this book which is designed to help individuals choose a career path and the right professional organisation. In today's world it isn't enough to

have a qualification, you need to be able to meet with peers and use the valuable networks that are already in place to foster your profession. Your Professional Qualification provides a comprehensive survey of the qualifications available in the UK along with guidance on where they lead, entry requirements, where to apply and where to study. Derived from the vast and authoritative British Qualifications database, this important publication provides the first easily accessible guide to qualifications and how to get them in the UK. Built around a comprehensive directory of professional qualifying bodies each professional area is described in depth and its qualifications identified and explained. The book is supported by a simple website, which ensures

Collaboration is interwoven in the writing process in both obvious and subtle ways--from a writer using the language that he or she inherited, to referring to the works of other writers both explicitly and implicitly, to writing together with a colleague. In this book, the author explains that collaborative writing can be a useful pedagogical tool professors can use to help students actively learn about the subject matter and about themselves.

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals

in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope

Timed to coincide with the ICC Cricket World Cup 2003 in South Africa this book begins with an account of the 2003 final in Johannesburg. Edward Griffiths then goes back to the beginning - the genesis of the one-day game with the launch of the Gillette Cup in 1963 and traces the development of the game over four decades. There are some accounts of the first and subsequent Cricket World Cup tournaments which highlight the changes in the game over the years, heroic performances, triumphs and defeats.

The changes in teaching, learning, and assessment brought about by the introduction of the National Certificate in Scotland were assessed. Data were collected through interviews with and a survey of 511 teaching staff (398 responses) and 1,646 students (1,277 responses) in a number of colleges throughout Scotland and a survey of 344 employers (68 usable responses). Teaching staff and employers also made additional comments on

the National Certificate. Findings indicated that employers liked the emphasis on practical and applied learning. Staff and students indicated the importance of teaching more than was covered in the learning outcomes, but few staff believed that it was being achieved. Employers liked the flexibility of negotiating programs to meet their needs, but small employers seemed to find it difficult to take advantage of flexibility. Some data suggested that employers and employees were less than enthusiastic about being involved in training. Employers believed that in-

house training met present and future needs of the company and college-based training was geared to future needs. Staff claimed to be using student-centered techniques and welcomed the wider use of a variety of teaching methods. Students felt that the teaching methods used were interesting and motivating. Some employers were concerned that the assessment system did not pose a sufficient challenge to students. Students liked the diagnostic approach to assessment. Staff had some reservations about assessment. (YLB)

The book is a study of intergenerational class mobility and the process of socioeconomic status attainment in contemporary Japan. The idea of 'Japan as an educational credential society' has been debated for a long time in Japan. The book empirically evaluates this idea within the framework of a cross-national comparison with the United States and Britain. The author also examines the patterns of class mobility in Japan within a cross-national perspective and reports similarities and differences in the mobility patterns among the three societies.
