At the age of forty-four, Jan Vallone is everything her Italian American parents brought her up to be—a lawyer, wife and mother who owns a vintage home and takes European vacations. But instead of feeling happy and successful, she's consumed by frustration and anxiety that threaten to shatter her marriage and have dimmed her faith. Discarding prosperity and prestige, she takes a job teaching English at a yeshiva—an Orthodox Jewish high school—though she was raised Catholic. There, she opens her heart to her students, who bloom under her tutelage and teach her the meaning of faith and

After three decades, the literature of Oceania has become much more complex, in terms of style as well as content; and authors write in a multiplicity of styles and voices. It focuses on commentary and scholarship concerned with the poetry, fiction, and drama written in English by indigenous peoples of the Pacific Islands, New Zealand, and Australia. The criticisms have appeared in academic books and journals since the mid-1960s. They have developed to the point at which critical

artisans claimed a place in society that would shape the following centuries. But the capitalist elite did not form the working class—the workers shaped their own creations, developing a shared identity in the process. Despite their lack of power and the indignity forced upon them by the upper classes, the working class emerged as England ' s greatest cultural and political force. Crucial to contemporary trends in all aspects of society, at the turn of the nineteenth century, these workers united into the class that we recognize all across the Western world today. E. P. Thompson ' s magnum opus, *The Making of the English Working Class* defined early twentieth-century English social and economic history, leading many to consider him Britain ' s greatest postwar historian. Its publication in 1963 was highly controversial in academia, but the work has become a seminal text on the history of the working class.

Asking students to write journals that reflect on their learning has become a widespread pedagogical practice in recent years. However, the scholarly literature does not address certain key questions about how journal writing aids learning:

- * Is there something inherent in journal writing that encourages students to write reflectively?
- * What psycholinguistic or cognitive factors help to explain the power of journal writing?
- * Why do some students use journals to write prolifically and creatively while others limit their responses to summarizing the assigned course reading?
- * Why do teachers find some journal entries so much more engaging than others?
- * How do teachers' ways of

This book addresses such questions through a careful analysis of the journal writing of the students in the author's ESL classes at a large urban college. To teachers of composition for both first- and second-language students and to teachers of graduate courses in education and qualitative research, this book offers a contextualized description of journal writings as a complex social activity.
