BPP Learning Media is proud to be the official publisher for CTH. Our CTH Study Guides provide the perfect tailor-made learning resource for the CTH examinations and are also a useful source of reference and information for those planning a career in the hospitality and tourism industries.

Create your own colorful world atlas with the 21 maps in "The Map Coloring Book," and learn fun facts about each country as you explore the pages. Each hand-drawn map includes illustrations of wildlife, famous buildings, cultural traditions, and other iconic features of the region. Kids can color in each page as they learn, and each map is perforated so that it can be displayed on the wall. Two pages of flags from around the world are included, with color prompts so that kids can color the illustrations and learn to recognize the symbol of each nation.

Geography, Science and Cultures Activities with Answer Key Grades 6-8

Our elementary, middle, and high school teaching about Jews, Judaism, and Israel is driven by textbook misstatements about Jewish theology, social structure, and the history of Israel that comprise an unsavory picture of Jews and Israel. This book will be an extremely valuable reference tool for educators and members of the public interested in religion and the Middle East.

Michael Kuby's 6th edition of Human Geography in Action is comprised of 14 stimulating, concept-based chapters. The text aims to develop geographic problem-solving skills that prove valuable to readers. Each chapter begins with an introduction to a concept, followed by a case study tying the concept into the real world and wraps up with an activity. These engaging activities featured throughout the text further its "Do Geography" approach. Human Geography in Action provides the opportunity to: use GIS to investigate ethnic distributions and culture regions, track the AIDS epidemic over space and time, model interstate migration flows, simulate India's demographic future, add new baseball franchises, animate past urban growth and assess future growth areas.

The Trouble with Textbooks

Under the Map of Germany

At the close of the First World War, propaganda mapping played a crucial role in the creation of a consensus about German national territory. Under the Map of Germany provides a detailed and vivid analysis of the history and techniques of nationalist mapping in inter-war Germany. Using extensive archival documentation - including many previously undiscovered maps - the author charts the development of new concepts of national territory and the establishment of an effective propaganda mapping network. His research demonstrates that a consensus about the extent of the Greater German nation was not created by skillful Nazi propagandists, but by the collaborate efforts of

respected scholars and nationalist activists during the Weimar Republic. Challenging the belief that national self-determination is a just cause, Under the Map of Germany reveals that national territories are not tangible entities that can be clearly delimited, but are artificial constructs open to a wide range of interpretations.

Argues that maps can be manipulated to distort the truth, and shows how they have been used for propaganda in international affairs, political districting, and finding toxic dump sites

The Complete Book of Maps & Geography provides 352 pages of fun exercises that focus on developing necessary skills such as map interpretation, identifying geography, global navigation, and more! --Over 4 million in print! Designed by leading experts, books in the Complete Book series help children in grades preschool-6 build a solid foundation in key subject areas for learning success. Complete Books are the most thorough and comprehensive learning guides available, offering high-interest lessons to encourage learning and fun, full-color illustrations to spark interest. Each book also features challenging concepts and activities to motivate independent study, and a complete answer key to measure performance and guide instruction.

Planetary scientist and educator Ken Coles has teamed up with Ken Tanaka from the United States Geological Survey's Astrogeology team, and Phil Christensen, Principal Investigator of the Mars Odyssey orbiter's THEMIS science team, to produce this all-purpose reference atlas, The Atlas of Mars. Each of the thirty standard charts includes: a full-page color topographic map at 1:10,000,000 scale, a THEMIS daytime infrared map at the same scale with features labeled, a simplified geologic map of the corresponding area, and a section describing prominent features of interest. The Atlas is rounded out with extensive material on Mars' global characteristics, regional geography and geology, a glossary of terms, and an indexed gazetteer of up-to-date Martian feature names and nomenclature. This is an essential guide for a broad readership of academics, students, amateur astronomers, and space enthusiasts, replacing the NASA atlas from the 1970s.
