

## Home Economics Syllabus Caribbean Examinations Council

This collection of papers presents the critical reflections on the management and planning of education of 18 senior officials working in 12 small island nations. The papers are a result of their participation in the Postgraduate Diploma in Educational Planning and Management in Small States program at the University of Malta. The book is divided into two sections. After an introductory essay and two papers on generic management and administration issues in small states, the papers in the first section deal with educational management, addressing the education process from its internal organizational or operational perspective. This section addresses such topics as resource allocation, Total Quality Management, staff recruitment, job satisfaction, and the role of principals. The second section of the book discusses educational planning, focusing on education as a tool for national development. This section discusses such topics as school-business linkages, the general role of educational planning, and specific developmental challenges facing primary, secondary, vocational, and adult education in small countries. Each chapter begins with a brief summary of the key arguments of the paper and ends with a discussion point based on the contents. (Contains a subject and author index.) (WFA).

Caribbean Home Economics has been designed to equip students with all the essential skills needed for successful home making. The three course books are each divided into a series of sections which consider the following basic topics: the family, food and nutrition, textiles and clothing, consumer education, entertaining. The complete course covers all the requirements of the CXC Home Economics syllabus.

CXC Home Economics

This textbook follows the structure of the Bristol Project (OCR Syllabus C). It can be used as a stand-alone resource or alongside the core book as the pagination is identical. The text has been simplified to make it suitable for low-ability students, and covers skills, techniques and coursework.

Can Career, Technical and Vocational Education and Training (CTVET) serve as a tool for poverty alleviation and solve economic problems for nations? CTVET include a wide range of learning experiences which are relevant to the world of work and which may occur in a variety of learning contexts, including educational institutions and the workplace.

These include learning designed to develop the skills for practicing particular occupations and careers, as well as learning designed to prepare for entry or re-entry into the world of work in general. (Adopted from Morris, 2015 and UNESCO, 2006)

Critical Issues for Developing Countries

Suitable for students studying for CSEC examinations, this book includes features such as: written for the latest CSEC syllabus; learning objectives stated for each chapter; keywords highlighted in the margins form a glossary; and, diagrams and pictures that encourage understanding.

The conventional literature on public administration is dominated by the patterns and concerns of large countries. It does not address the needs of small countries, which have very different organisational and managerial frameworks. For example, what degree of specialisation is possible in a ministry which has only a small group of professional staff? And what are the implications for management of highly personalised societies in which everybody seems to know everybody else? This book presents 14 studies written by people who are actually grappling with the issues about which they write. The book thus has both authenticity and practical value. The book is an amplification of a companion work, and will be of value to academics as well as to administrators and trainers. The companion book is also available from the Commonwealth Secretariat. It is entitled Making Small Practical: The Organisation and Management of Ministries of Education in Small States.

The new edition of Home Economics in Action has been extensively revised and updated to take account of recent curriculum developments throughout the Caribbean region. This three-book course provides a firm foundation in Home Economics to all lower second

Reports of natural disasters fill the media with regularity. Places in the world are affected by natural disaster events every day. Such events include earthquakes, cyclones, tsunamis, wildfires – the list could go on for considerable length. In the 1990s there was a concentrated focus on natural disaster information and mitigation during the International Decade for Natural Disasters Reduction (IDNDR). The information was technical and provided the basis for major initiatives in building structures designed for seismic safety, slope stability, severe storm warning systems, and global monitoring and reporting. Mitigation, or planning in the event that natural hazards prevalent in a region would suddenly become natural disasters, was a major goal of the decade-long program. During the IDNDR, this book was conceptualized, and planning for its completion began. The editors saw the need for a book that would reach a broad range of readers who were not actively or directly engaged in natural disasters relief or mitigation planning, but who were in decision-making positions that provided an open window for addressing natural disaster issues. Those people were largely elected public officials, teachers, non-governmental organization staff, and staff of faith-based organizations. Those people, for the most part, come to know very well the human and physical characteristics of the place in which they are based. With that local outreach in mind, the editors intended the book to encourage readers to: 1.

Economics for CSEC® Examinations

***"This volume presents a collection of papers which, with perspectives from Africa and the Caribbean, raise critical issues in the management of solid waste. It is intended to offer a basis for discussion among the wide range of disciplines and sectors involved in solid waste management and suggest directions for future work in the theoretical and practical dimensions of the challenge with which developing countries are confronted"--Back cover.***

***Caribbean Food and Nutrition is the new edition of the market leading text by Anita Tull and Antonia Coward. It has been revised to provide comprehensive coverage of the latest CSEC syllabus in Home Economics: Food and Nutrition. With Caribbean examples, statistics, and photographs, it is the perfect text for students who need a thorough foundation in food and nutrition.***

*Study Guides for CAPE have been developed and written by CXC to provide CAPE candidates in schools and colleges with resource materials to help them prepare for their exams. Matching the topics in the syllabus, the student-friendly structure and content enable students to develop their skills and confidence as they approach the examination.*

*A comprehensive survey of the education systems of 170 countries and an equivalence evaluation of the qualifications they offer. This handbook is intended for admissions departments, administrators and teaching staff in universities, colleges and schools worldwide.*

*Case Studies of Organisation and Management*

*Dual Legacies in the Contemporary Caribbean*

*Education and Health*

*The Caribbean*

*The Sociology of Health Care in a Developing Nation*

*CAPE Law Unit 1*

*This edited volume examines the thrust towards equity in education for marginalized and out-of-school youth, as well as youth with disabilities, in countries located in the Global South. Using a critical cross-cultural lens to interrogate the historical, empirical, and theoretical discourses associated with achieving UNESCO's equity in education agenda, the book showcases the work of scholars from developed and developing nations in examining inclusive education. Drawing attention to the nature, impact, and effects of marginalization, the book ultimately demonstrates the ability of education systems in the Global South to be innovative and agile despite current resource challenges. This text will benefit scholars, academics, and students in the fields of international and comparative education, education policy, and inclusion and special educational needs education more broadly. Those involved with Caribbean and Latin American studies, the sociology of education, and diaspora studies in general will also benefit from this volume.*

*Needlework for Schools provides the guidance needed to sew successfully, whatever the level of skill.*

*Lessons for the Caribbean*

*Report on the Education Division*

*Home Economics Syllabus : Effective for Examinations from May/June 2004*

*Tourism and Hospitality Education and Training in the Caribbean*

*Clothing Textiles*

*Select Bibliography of Education in the Commonwealth Caribbean, 1976-1985*

*This comprehensive text is vital reading for managers, academics, consultants, and students involved in the growing tourism and hospitality sector in the Caribbean. In twenty-four articles, the book analyzes significant initiatives, trends and the challenges facing education and training institutions in the Caribbean. Chapters on sustainable tourism, environmental management and national resource development cover a wide variety of critical topics facing the industry. Case studies from The Bahamas, Barbados, Belize, Dominica, the Dominican Republic, Grenada, Guyana, Jamaica, Mexico, Trinidad and Tobago, and Turks and Caicos Islands provide a diverse perspective for academics, policymakers and the regional tourism sector.*

*This volume gives a holistic, dynamic and positive approach to the concept of health and to the teaching/learning processes in schools and elsewhere. It examines precisely what is meant by health, its contribution to the quality of life and how this should influence health education. Environmental aspects of health, traditional styles of medicine, modern technologies, topical issues and the educational aspects of certain diseases of global importance are also discussed. The outcome is the emergence of new ideas, new approaches and new ways of teaching about health. Numerous case studies and workshops are discussed to show how these new concepts can be introduced to both teachers and pupils.*

*Workshop on Home Economics Management--Family Planning Component*

*Home Economics Teacher Education*

*Nutrition Committee News*

*International Guide to Qualifications in Education*

*This study represents a first attempt of providing a comprehensive quantification of educational outcomes in the Caribbean region. Its main objectives are: (a) to define a set of operationally relevant education indicators (b) to provide a database of comparable education indicators in Caribbean countries where data is available, namely Belize, Dominica, Dominican Republic, Grenada, Guyana, Jamaica, St Kitts and Nevis, St Lucia, St Vincent and the Grenadines and Trinidad and Tobago and (c) to propose methods on how the common set of indicators can be used for analyses of the education sectors. This exercise is all the more important within the framework of the current Education For All (EFA) and Millenium Development Goals (MDGs) initiatives which require the identification and monitoring of relevant indicators to establish where the countries stand in relation to the target of universal primary education. After a systematic review of educational indicators in coverage, efficiency and quality which leads to specific recommendations on the type of indicator relevant to operational diagnostics of the education sectors, the study provides a detailed review of the Caribbean status in producing education indicators and demonstrates how a new database can be used to depict where the education sectors stand. Building on these methods and findings, its final section presents a*

*set of specific recommendations to the Caribbean countries on how to improve the diagnostics of their education sectors.*
