The Inquiry of Ugra (Ugrapariprccha) is one of the most influential Mahayana sutras, preserved and transmitted in both India and China over many centuries and actively quoted in treatises on the bodhisattva path. It is, nevertheless, one of the most neglected texts

in Western treatments of Buddhism. The Ugra appears to be one of the earliest bodhisattva scriptures to come down to us, and as such it offers a particularly valuable window on the process by which the bodhisattva path came to be seen as a distinct vocational alternative within certain Indian Buddhist communities. The Bodhisattva Path is a study and translation of the Ugra that will fundamentally alter previous perceptions of the way in which Mahayana was viewed and practiced by its earliest adherents. To achieve a better understanding of the universe of ideas, activities, and institutional structures within which early self-proclaimed bodhisattvas lived, the author first considers the Ugra as a literary document, employing new methodological tools to examine the genre to which it belongs, the age of its extant versions, and their relationships to one another. She goes on to challenge the dominant notions that the Mahayana emerged as a reform of earlier Buddhism and offered lay people an easier option. On the contrary, the picture that emerges is of the early Mahayana as a more difficult and demanding vocation, initially limited to a small contingent of monastic males. Combining a detailed critical study and translation of an important Buddhist scripture with a sweeping re-examination of the relationship between the Buddha and the practitioners alike and other interested in the history of Indian Buddhism and the formation of Mahayana.

The One Mind: C. G. Jung and the Future of Literary Criticism explores the implications of C. G. Jung's unus mundus by applying his writings on the metaphysical, the paranormal, and the quantum to literature. As Jung knew, everything is connected because of its participation in universal consciousness, which encompasses all that is, including the collective unconscious. Matthew A. Fike argues

that this principle of unity enables an approach in which psychic functioning is both a subject and a means of discovery—psi phenomena evoke the connections among the physical world, the psyche, and the spiritual realm. Applying the tools of Jungian literary criticism in new ways by expanding their scope and methodology, Fike discusses the works of Hawthorne, Milton, Shakespeare, Wordsworth, and lesser-known writers in terms of issues from psychology, parapsychology, and physics. Topics include the case for monism over materialism, altered states of consciousness, types of psychic functioning, UFOs, synchronicity, and space-time relativity. The One Mind examines Goodman Brown's dream, Adam's vision in Paradise Lost, the dream sequence in "The Wanderer," the role of metaphor in Robert A. Monroe's metaphysical trilogy, Orfeo Angelucci's work on UFOs, and the stolen boat episode in Wordsworth's The Prelude. The book concludes with case studies on Robert Jordan and William Blake. Considered together, these readings bring us a significant step closer to a unity of psychology, science,

and spirituality. The One Mind illustrates how Jung's writings contain the seeds of the future of literary criticism. Reaching beyond archetypal criticism and postmodern theoretical approaches to Jung, Fike proposes a new school of Jungian literary criticism based on the unitary world that underpins the collective unconscious. This book will appeal to scholars of C. G. Jung as well as students and readers with an interest in psychoanalysis, literature, literary theory, and the history of ideas. I intend to leave this book my to children and grandchildren. I hope it is received in the same spirit that I give it. I love every one of them with all my heart. They are all precious individuals, and I am very proud of each one. May God bless them. Times have changed. I miss the 1940's when things were simple. Today kids are smarter than we were. They are on strange electronic games that I do not understand. I suspect they are addictive and perhaps even harmful, depending on content. The temptations today are many times more problematic than when I grew up. These young

people are high-tech, intelligent, and far ahead of me at their age. They are all very smart and are, or will be, well educated. They show signs of becoming very successful in this world. However, my concerns are related to the spiritual side of life and reality. What about life hereafter? Have I prepared them for the next life? I fear I have failed in that regard and I write in order to leave them something about God's word that may take up the slack in things where I have failed. I want to be sure that my kids and grandkids become believing, studious Christians as adults. If there is an afterlife, and I believe there is, it must be of great importance for all so, get ready, I believe we will all have an afterlife. We, in America, are fortunate in that we have freedom of religion and there are churches on every corner teaching the basic principles of our Lord and Savior. My Dad raised me on the bible and denominational doctrine because that's what he knew. He gave me a good start but I have discovered that there is much more to learn than denominational tradition. I believe an open mind is

absolutely necessary and denominational training is a closed down system loyal to only one view. I want my children to study God's word. Unfortunately, many churches and church people do not study, but accept a particular traditional doctrine that has been handed down to them. I am now in my late seventies. I am not an academic and hold no degrees in theology. One might say I have a degree in hard knocks, experience, big mistakes, and corrections. I hope that my years of study and faith are enough. After years of doubting, study, research, and prayer I have come to believe that the bible is the most valuable word of wisdom on earth, The Most Treasured of All books on the planet. Very intelligent men and women have tried to disprove the bible but the more they attack, the better the old book looks. It is still the world's best seller. I believe we can base our whole life in this world and the life hereafter on the bible. I intend to convince my children and grandchildren of that, and I pray they read what I have left them.

A diagnosis of autism spectrum disorder (ASD) can be startling news for any parent. Professional homeopath Pierre Fontaine CCH provides hope for a permanent-and natural-solution. Disputing that most ASD is not reversible, Fontaine empowers parents with the knowledge needed to seek alternative care. Through explanations of both ASD and homeopathy, he presents cases from his own practice that demonstrate how autism can be reversed when paired together. Fontaine outlines how he looks into both the child's history and the parents' experience of their child in order to go beyond simply treating the symptoms of the disorder. He ultimately seeks to find what is at the core of the child's suffering-and how parents can help. One Heart, One Mind

Dan Quayle -- once a mere heartbeat away from the leadership of the free world -- amuses, puzzles, and often frightens the country and the world with his verbal misadventures. "What a waste it is to lose one's mind, or not to have a mind is being very wasteful. How true that is." Originally issued in April 1992, when it sold over 20,000 copies, the book has been updated to include all of Quayle's most infamous quotations. From his seemingly perpetual youth, to his rise to the most ridiculed office in the land, to his recent political renaissance, this is Dan's story. Sort of.

*It is not a question that marriages today, especially in this country, are under attack. The sacred union between man and woman through the lenses of our nation has seemingly lost its value and respect amid a growing culture that has degraded its significance—this is an epidemic in its own right. Like-Minds: Two Hearts, One Mind, One God—Rediscovering the Value of Marriage is a book that attempts to act as a clarion call; to refocus man's attention and heart back to biblical principles carried out by both husband and wife. God is the Creator of all things, including marriage. Like any creation, God has in Mind the purpose of the creation before He creates it. Minister Julien Folks passionately shares insight on helping young singles and married couples understand that God has a methodology in revealing His plan and purpose within His marriage covenant. Throughout this book, readers will identify one underlining principle: "How the marriage thinks as one in Christ propels them through every difficulty with a new perspective in God." In his first book, Like-Minds: Two Hearts, One Mind, One God—Rediscovering the Value of Marriage, the author shares solid scriptural support, personal challenges, and experiences to outline the process and spiritual journey both husband and wife must commit to in ensuring an overall healthy, sustaining, and successful*

*In Of One Mind and Of One Government Kevin Kokomoor examines the formation of Creek politics and nationalism from the 1770s through the Red Stick War, when the aftermath of the American Revolution and the beginnings of American expansionism precipitated a crisis in Creek country. The state of Georgia insisted that the Creeks sign three treaties to cede tribal lands. The Creeks objected vigorously, igniting a series of border conflicts that escalated throughout the late eighteenth century and hardened partisan lines between pro-American, pro-Spanish, and pro-British Creeks and their leaders. Creek politics shifted several times through historical contingencies, self-interests, changing leadership, and debate about how to best preserve sovereignty, a process that generated national sentiment within the nascent and imperfect Creek Nation. Based on original archival research and a revisionist interpretation, Kokomoor explores how the state of Georgia's increasingly belligerent and*

In *One Mind*, New York Times best-selling author Larry Dossey, M.D., proposes an inspiring view of consciousness that may reshape our destiny. Dossey's premise is that all individual minds are part of an infinite, collective dimension of consciousness he calls the One Mind. This state—which we can all access—explains phenomena as diverse as epiphanies, creative breakthroughs, premonitions of danger or disaster, near-death experiences, communication with other species and with the dead, reincarnation, the movement of herds, flocks, and schools, and remote healing. Dossey presents his theory in easily digestible, bite-sized vignettes. Through engaging stories, fascinating research, and brilliant insights from great thinkers throughout history, readers

The result is a rich new understanding of what it means to be human and a renewed hope that we can successfully confront the challenges we face at this crossroads in human history. Even before publication One Mind drew praise from the finest minds of our time. It has been heralded as "landmark," "a brilliant synthesis," a "magnum opus," a "feast" of ideas, "compelling," "gripping," and "a major shift in our understanding of consciousness."**

**In this powerful book of quotations, Byron Katie talks about the most essential issues that face us all—love, sex, and relationships; health, sickness, and death; parents and children; work and money; and self-realization. The profound, lighthearted wisdom embodied within is not theoretical; it is absolutely authentic. Not only will this book help you on many specific issues, but it will point you toward your own wisdom and will encourage you to question your own mind, using the four simple yet incredibly powerful questions of Katie's process of self-inquiry, called The Work. Katie is a living example of the clear, all-embracing love that is our true identity. Because she has thoroughly questioned her own mind, her words shine with the joy of understanding. "People used to ask me if I was enlightened," she says, "and I would say, 'I don't know anything about that. I'm just someone who knows the difference between what hurts and what doesn't.' I'm someone who wants only what is. To meet as a friend each concept that arose turned out to be my freedom."**

Imagine a united consciousness, an awareness of which all of our minds are a part. . . and a potential way out of the division, greed, and destruction that threaten to engulf our world. In the 20th century, we were introduced to several subdivisions of the mind: the conscious, unconscious, subconscious, preconscious, and so on. But what we didn't know was that there was another level of consciousness, an all-encompassing, infinite dimension of shared intelligence: the One Mind. This universal consciousness connects all of us through space and time. Even now, as you read these words, you are participating in the One Mind. Emerging studies have shown that the One Mind isn't just an idea; it's a reality. In this book, Larry Doss shares compelling research that supports the One Mind concept. These cases include experiences of:

- Shared thoughts, emotions, and physical sensations with a distant individual
- Communication between humans and sentient nonhumans, such as pets
- Large groups of animals-flocks, schools, herds-behaving in highly coordinated ways
- Acquisition of previously unknown knowledge from a person who has died
- Hidden or lost objects found through mental means alone
