Aleister Crowley's ascension into the pantheon of alternative gurus was cemented by his appearance on The Beatles' Sgt. Pepper's Lonely Hearts Club Band album cover. Unfortunately, he was known more for his reputation as "The Beast 666" and "The Wickedest Man in the World." All well and good for publicity, but this infamy eclipsed his teachings, as did his technical and opaque writing style, making his works more inaccessible to adepts contemporary to him than the average modern reader. Enter Lon Milo DuQuette to decipher and explain Crowley's texts and important rituals. Formerly titled *The Magick of Thelema*, this revised edition features extensive corrections, a new introductory ritual, "The Rites of Eleusis." This is the perfect introductory text for readers who wonder what the works--rather than the rituals--of Crowley are all about. DuQuette takes the mystery out of both the rituals themselves and Crowley's writing in this modern guide. In each step, he presents a course of study in plain English, with examples of rituals and explanations of their significance. DuQuette's course of study for Crowley's original works with an extensive bibliography and fastidious footnotes.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Monsters known as y?kai have long haunted the Japanese cultural landscape. This history of the strange and mysterious in Japan seeks out these creatures in folklore, encyclopedias, literature, art, science, games, manga, magazines and movies, exploring their meanings in the Japanese imagination over three centuries.

Michael Onfray passionately defends the potential of hedonism to resolve the dislocations and disconnections of our melancholy age. In a sweeping survey of history's engagement with and rejection of the body, he exposes the sterile conventions that prevent us from realizing a more immediate, ethical, and embodied life. He then lays the groundwork for both a radical and constructive politics of the body that adds to debates over morality, equality, sexual relations, and social engagement, demonstrating how philosophy, and not just modern scientism, can contribute to a humanistic ethics. Onfray attacks Platonic idealism and its manifestation in Judaic, Christian, and Islamic belief. He warns of the lure of attachment to the purportedly eternal, immutable truths of idealism, which detracts from the immediacy of the world and our bodily existence. Insisting that philosophy is a practice that operates in a real, material space, Onfray enlists Epicurus and Democritus to undermine idealist and theological metaphysics; Nietzsche, Bentham, and Mill to dismantle idealist ethics; and Palante and Bourdieu to collapse crypto-fascist neoliberalism. In their place, he constructs a positive, hedonistic ethics that enlarges on the work of the New Atheists to promote a joyful approach to our lives in this, our only, world.

As mainstream music consumers wait with baited breath for the next musical upheaval, a small core of tech-savvy individuals are re-shaping the aural landscape without the assurance of being part of any larger movement. Their ideologies and creative approaches differ wildly, but they share a desire to take sound beyond the realm of mere entertainment. Drawing on extensive

and exciting encounters from London to Los Angeles, and from Sydney to Stockholm.

This simultaneously funny and serious book provides the easiest, fastest way for readers to painlessly attune themselves to the mysteries of the Hebrew alphabet and immerse themselves in the fundamentals of practical Qabalah. It is a road map from the Godhead to your head—a clear and lucid guide to an extremely complex, mystical topic. By performing the exercises and rituals in the book, the reader can complete the self-initiatory process comprising the three main degrees of Rabbi Lamed Ben Clifford's Practical Qabalah course.

An exploration of the 93 spirits or "star demons" as revealed in the medieval grimoires and classical esoteric texts, and their correspondences in magic and astrology Stellas Daemonum offers an in-depth analysis of the spirits that appear in several late medieval and early modern grimoires. The book unravels these texts' mythical, etymological, magical, and religious meanings, and draws out their astrological correspondences. The author shows how the spirit entities featured in these Goetic grimoires can be best understood by studying the celestial nature apparent in the ancient concept of the daimon and through an extensive study of 93 of spirits featured in medieval and renaissance texts. The book also explores how traditional Judeo-Christian religion ultimately demonised such expressions due to their polytheistic roots and made punishable by death any attempts to reconnect with them. The nature of this work is strongly influenced by the author's own magical practices, but its presentation does not resort to subjective or personal experiences, having a style that is more formal and research-based.

Based on an innovative blend of Kabbalah and magic, a step-by-step program toward spiritual attainment guides readers through each level of the the Golden Dawn system of ritual magic and its corresponding sphere in the Kabbalah Tree of Life. Original. 10,000 first printing.

Architects who engaged with cybernetics, artificial intelligence, and other technologies poured the foundation for digital interactivity. In Architectural Intelligence, Molly Wright Steenson explores the work of four architects in the 1960s and 1970s who incorporated elements of interactivity into their work. Christopher Alexander, Richard Saul Wurman, Cedric Price, and Nicholas Negroponte and the MIT Architecture Machine Group all incorporated technologies—including cybernetics and artificial intelligence—into their work and influenced digital design practices from the late 1980s to the present day. Alexander, long before his famous 1977 book A Pattern Language, used computation and structure to visualize design problems; Wurman popularized the notion of “ information architecture ” ; Price designed some of the

first intelligent buildings; and Negroponte experimented with the ways people experience artificial intelligence, even at architectural scale. Steenson investigates how these architects pushed the boundaries of architecture—and how their technological experiments pushed the boundaries of technology. What did computational, cybernetic, and artificial intelligence researchers have to gain by engaging with architects and architectural problems? And what was this new space that emerged within these collaborations? At times, Steenson writes, the architects in this book characterized themselves as anti-architects and their work as anti-architecture. The projects Steenson examines mostly did not result in constructed buildings, but rather in design processes and tools, computer programs, interfaces, digital environments. Alexander, Wurman, Price, and Negroponte laid the foundation for many of our contemporary interactive practices, from information architecture to interaction design, from machine learning to smart cities.

Sketching out a fascinating network of historic figures, cults, and Christendom, this book by an occult studies expert and respected authority on magic and sorcery takes western spiritual traditions seriously - but examines them with common sense and self-effacing humour. Working backward from the Freemasons to one of their original orders, the 14th-century Knights Templar, the account considers sorcery, heresy, and intrigues; explores the legend that the Knights possessed a powerful secret dangerous to the Church of Rome; and finds an essential clue to the order's practices in their connection to the biblical Solomon, king of Israel in the 10th century BC.

Are angels and demons real? What makes the New Age the New Age? Does consciousness survive death? Writing from the perspective of a practicing ceremonial magician, one of America's most knowledgeable and engaging authorities on Western Hermeticism answers these questions and many more with humor and personal anecdotes. Illustrated and with color fold-out.

Having mastered the arts and sciences of his age, Elizabethan magus Dr. John Dee (1527 – 1608) resolved that worldly knowledge could no longer provide him the wisdom he desired, and as did so many other learned men of the day, he turned his attention to magick. In 1582 he and his clairvoyant partner Edward Kelley made magical contact with a number of spiritual entities who identified themselves as angels—the same that communicated with Enoch and the patriarchs of the Old Testament. Over the next 3 years they revealed to Dee and Kelley three distinct magical systems of vision magick. The third and last of these incorporated a series of “ calls ” to be recited in an angelic language in order to raise the consciousness of the magician to a level where angelic contact is possible. In Enochian Vision Magick, Lon Milo DuQuette introduces the origins of Enochian magick and offers the expert and novice alike the opportunity not only to see the big picture of the full system but also the practical means by which he or she can

become attuned in the same step-by-step manner that first prepared Dee and Kelley. First published by Weiser in 2008, this new edition includes a new introduction and new back matter by the author as well as a new foreword by Jason Louv. Replaces ISBN 978-1-57863-382-1

The Qabalah Workbook for Magicians is the perfect guide for the practicing magician who wants a greater understanding of Qabalah concepts and practice. Created by Anita Kraft, one of the world's most respected Qabalist teachers, this workbook teaches readers how to practice Qabalah using tarot, plants, stones, perfumes, the zodiac, and other magical sources. Kraft shows how to work through the Sephiroth—the ten attributes or emanations of Qabalah—for greater understanding and illumination. Drawing on occult works, including those of Israel Regardie, Aleister Crowley, Dion Fortune, and Lon Milo DuQuette, as well as dozens of Herbrew texts and manuscripts, the practicing magician can understand the Tree of Life and other Qabalistic concepts. Kraft has spent more than twenty years creating and perfecting a method by which "Qabalah is experiential as is mysticism and magick. If all you do is read, you are not a mystic, magician, or Qabalist. You must do!" writes Kraft.

Many consider Enochiana the most powerful and least understood system of Western Occult practice. This

book makes it truly accessible and easy to understand. Crowley's work was the launching pad for all that followed. Originally published in 1912, it rent the veil of the Inner Order of the Golden Dawn and revealed its most precious jewel for all to see. And now, for the first time, the reader is provided with instructions that bridge the gap between the material and spiritual worlds by integrating Enochiana with Sex Magick. Mr Duquette and Dr Hyatt bring over forty years of practical experience in the field to show you how to start using this powerful system right now. It also includes an Enochian dictionary.
