This book presents theories and case studies for corporations in developed nations, including Japan, for designing strategies to maximize opportunities and minimize threats in business expansion into developing nations. The case studies featured here focus on Asia, including China and India, and use examples of Japanese manufacturers. Five case studies are provided, including Hitachi Construction Machinery and Shiseido in China

and Maruti Suzuki in India. These cases facilitate the reader's understanding of the business environments in emerging economies. This volume is especially recommended for business people responsible for international business development, particularly in China and India. In addition, the book serves as a useful resource for students in graduate-level courses in international management. Service Design and Delivery provides a comprehensive overview of the increasingly

important role played by the service industry. Focusing on the development of different processes employed by service organizations, the book emphasizes management of service in relation to products. It not only explores the complexity of this relationship, but also introduces strategies used in the design and management of service across various sectors, highlighting where tools, techniques and processes applicable to one sector may prove useful in another. The implementation methods introduced in the book also

illustrate how and why companies can transform themselves into service organizations. While the book is primarily intended as a text for advanced-level courses in service design and delivery, it also contains theoretical and practical knowledge beneficial to both practitioners in the service sector and those in manufacturing contemplating moving towards service delivery.

Can one car transform a nation? The Ford Model T did do so a century ago when it replaced the horse, brought about a revolution in agriculture, became a stimulus to urbanization that eventually changed the landscape of America. Though the Maruti 800, the Tata Indica, the Hyundai Santro and the Maruti Alto, became engines of growth for India, these cars neither drove away the cow nor changed the way Indians travelled. Tata ' s Nano was expected to change all that and become the ultimate people ' s car, capturing the imagination of the middle class across nations and

cultures. In spite of its petite dimensions, the Nano was meant to stand tall. Yet it did not. What caused it to fail and fall from grace despite being lauded as the ‘ right product at the right time ’ and ‘ the most significant new car since the Ford Model T was introduced 100 years ago ’ ? But is it really all over or is there still hope for India ’ s ‘ little wonder ’ ? What will the people ’ s cars of tomorrow be like? A Million Cars for a Billion People delves into the questions, concerns and doubts, as well as the many misconceptions and myths, that have gathered momentum over the years about India ’ s automotive history and the industry ’ s mission to create a true ‘ people ’ s car ’ . The very

will cover the complete range of American and foreign cars as the car buyer's earliest single source for just-released data on the newest models and independent road tests. Full-color photos. In 1987, leather-clad tourist Blanca Nul goes missing in small-town New Zealand. Local reporter Ray Moody, washed-up and over-imbibing, gets a scoop the foreigner modelled for a pornographic magazine. He chases the story but crashes his car and loses his job. A year to the day after she was reported missing, Blanca is mysteriously sighted a second time. Ray sees a chance to revisit the missing person story and revive his career. The doppelganger death is identified as local goth Amber Drake and labelled a suicide, but Ray is not convinced. He discovers Amber was a risk-taker with a darker purpose. She frequented the
