The distillation of the wisdom, insight, and practical advice gathered during Nancy London’s years as a support-group leader, “Hot Flashes, Warm Bottles” is the first guidebook written for the multitudes of older moms. London recognizes that the concerns of these moms are unique; they are from older mothers with grown children. The story she has to impart is her own, both in its surprises and challenges, delights and triumphs, and it’s one that no midlife mother should be without. At the age of thirty-three, Michelle Heaton, singer, TV presenter, star of the hit ITV show The Real Full Monty, mother and wife underwent a double mastectomy and hysterectomy to reduce the risk of cancer caused by the BRCA gene mutation. The journey that Michelle’s body took during the menopause in her mid-thirties. In Hot Flush, Michelle traces her path from pop stardom with Liberty X through her burgeoning television career and how she came to discover the truth about the gene mutation and its consequences for her. Though her story is undoubtedly one of dealing with the menopause as a hardworking mother and wife, and it is this wisdom that she wants to share with other women - over 13 million women in the UK - estimated to be experiencing the menopause. Candid and honest, Hot Flush details Michelle’s struggles with death, her marriage, family life and the work place. She details the emotional and physical challenges she has faced - the explosive moods, the hot flushes and the mourning of the loss of a woman’s sex appeal. Along the way, she offers real help and advice on how to stay healthy in menopause. Hot Flush is a candid approach to introducing your body to its next chapter.

A NEW YORK TIMES NOTABLE BOOK OF THE YEAR • A “furious and addictive new novel” (The New York Times) about mothers and daughters, and one woman’s midlife reckoning as she flees her suburban life. “A virtuosoic, singular and very funny portrait of a woman seeking sanity in a New York Times Book Review “Riddled with insights into aging, womanhood, and discontent, Wayward is as elegant as it is raw, and almost as funny as it is sad.” —Philadelphia Inquirer “A comic, vital new novel.” —The New Yorker Samantha Raymond’s life has begun to come apart at the seams, increasingly remote, and at fifty-two she finds herself staring into “the Mids”—that hour of supreme wakefulness between three and four in the morning in which women of a certain age suddenly find themselves contemplating motherhood, mortality, and, in this case, the state of the world. A beautiful, decrepit house in a hardscrabble neighborhood in Syracuse, she buys it on a whim and flees her suburban life—and her family—as she grapples with how to be a wife, a mother, and a daughter, in a country that is coming apart at the seams. Dana Spiotta’s Wayward is a bold and about female complexity in contemporary America. Probing and provocative, brainy and sensual, it is a testament to our weird times, to reforms and resistance and utopian wishes, and to the beauty of ruins.

A memoir of mothers and daughters, hoarding, and healing. Judy Batalion grew up in a house filled with endless piles of junk and layers of crumbs and dust; suffocated by tuna fish cans, old papers and magazines, swivel chairs, tea bags, clocks, cameras, printers, VAHS tapes, ballpoint pens...obsessively gathered and stored by her hoarder mother. The first chance she had, she escaped the clutter to create a new identity—one made of order, regimen, and clean white walls. Until, one day, she found herself enmeshed in life’s biggest chaos: motherhood. Confronted with the daunting task of raising a daughter after her own dysfunctional childhood, Judy reflected on not only her own upbringing but the lives of her mother and grandmother, Jewish Polish immigrants who had escaped the Holocaust. What she discovered astonished her. The women in her family, despite their differences, were even more closely connected than she ever knew—from her grandmother Zelda to her daughter of the same name. And, despite the hardships of her own mother-daughter relationship, it was that bond that was slowly healing her old wounds. Told with heartbreaking honesty and humor, this is Judy’s poignant account of her trials negotiating the messiness of motherhood and the indelible marks that mothers and daughters make on each other’s lives.

You might have earned your wrinkles if: You are married to a Wrinkle Maker, like I am. Like me, you bought the best bathing suit of your life, then saw a maternity tag on it, and it fit! You called your gynecologist by mistake to make a dental appointment, and then told her it was an emergency and you had a large cavity to fill. If so, we must be related. Your husband asked the plastic surgeon if he charges per wrinkle. Then he asked for a payment plan. You've reached the point where all of your children look alike. You run through the list of kid’s names until one finally answers. Your brow has furrowed so long and hard while you tried to remember why you came to the store that you gave yourself new wrinkles. (Only to realize that you were there for wrinkle cream!) Sound familiar? If so, join me and let's celebrate a life filled with laughter, joy, fury, love, memory loss, pure confusion, estrogen, and lack of estrogen, hot flashes, and I forget what else. I hope you enjoy the ride!"

Discourses of menopause are varied and complex, just as the lives of women themselves are diverse and multifaceted. Traditionally, menopause has signalled the end of the child-bearing years and the “change of life,” a time when women might experience a great deal of change, in many ways. But menopause can also be understood as a natural physical change, or a time of hormonal change, or as a passage from one way of life to a different one, often accompanied by emotional flux and changes in ways women think about themselves. For this study of menopause and women s lives, using life story methodology I have gathered information, anecdotes, poems, and personal revelations through interviews conducted with ten women. Drawing on the stories of their lives, I have explored the ways women think about their experience of menopause and related aspects of their lives. The feminist poststructuralist framework I have used consists of two elements, poststructuralism and feminism. The poststructuralist framework uses theories of language and concepts of discourse, dualisms, subjectivity and consciousness, power, diversity, and context. Taking a feminist approach to poststructuralism enables women s voices to be recognized as meaningful within this framework, while acknowledging the possible restrictions of society s structures as well as women s agency in their personal lives and within society.

From a poststructuralist perspective, the aim is to increase understanding through a multiplicity of methods, from exploring the historical background and existing research on menopause, and presenting the data in a variety of ways. In this research, the data is displayed in a form that enables readers to read and reflect on what the women say and on their creative writing, with minimum input from the researcher. Separately, the data is examined from the perspective of feminist sociology. The research process, for myself, was one of learning through talking with other women, delving into different forms of knowledge, and coming to think in new ways.

A tantric guide to discovering the hidden gifts of menopause • Explains why Tantra works for menopausal women and how their bodies are naturally entering a more tantric phase focused on creative, spiritual energy • Details tantric practices and tools to connect with the body’s inner intuitive wisdom, remove the “performance pressure” of conventional sex, and set the stage for passion and pleasure to thrive both in the bedroom and beyond • Explores what to expect physically, emotionally, and spiritually, and in relationships As women, we live so closely to the body—through menstruation, pregnancy, birthing, motherhood, and then menopause. Each of these transitions changes a woman in a multitude of ways, most of which are celebrated. Yet menopause often causes women to feel despondent, as if our bodies are broken or deficient, especially when it comes to sex and intimacy. However, as tantric teachers Diana Richardson and Janet McGeever show, menopause has many hidden gifts to offer if we learn to embrace rather than suppress the changes this natural transition brings. Shining the light of tantric intelligence on menopause, the authors reveal how to explore and experience menopause in a radically positive fashion, suffused with a sense of vital awakening and “re-wilding” of a woman’s sexuality, creativity, and spirituality. Explaining what to expect physically, emotionally, and spiritually, as well as what it means for relationships, they detail tantric practices and tools to connect with the body’s inner intuitive wisdom and heart energies, remove the “performance pressure” of conventional sex, and set the stage for passion and pleasure to thrive both in the bedroom and beyond. They explain why Tantra works for menopausal women and how their bodies are naturally entering a more tantric phase focused on creative, spiritual energy. They explore how, in Tantra, sex is practiced not for the sake of sex itself but as an instrument for going “beyond” sex, for better health, improved relationships, enhanced self-control and emotional balance, and even higher states of consciousness. They also offer many self-help practices, exercises, and meditations to reinforce a positive attitude toward menopause and overcome many of the physical and sexual problems, such as pain, dryness, loss of interest, and loss of libido. Providing a guide for women who are approaching, experiencing, or have gone through menopause, the authors show how a more informed, tantric approach to menopause allows each woman to deepen her trust in the perfect functioning of the female body, embrace her natural sexual response, and reconnect with her inner self.

“The Hormone Myth is a bracing, accurate breath of fresh air. It turns conventional wisdom about hormones on its head, and provides a far more liberating view of women’s health than what we’ve all been taught.” —Christiane Northrup, MD, author of Women’s Bodies, Women’s Wisdom? “Is it that time of month?” “Is your biological clock ticking?” “You’re so emotional lately—are you going through menopause?” We’ve all heard it before. From the moody menstrual monster to the menopausal maniac, the idea that women become raving lunatics when their hormones fluctuate is firmly entrenched in American culture—anddeeply fueled by the media. But where exactly did this stereotype come from? How has it hurt women? And how can we move past it once and for all? In this breakthrough book, Robyn Stein DeLuca fearlessly exposes and debunks pervasive myths about women’s hormones, and reveals how flawed, outdated research and sexism have joined forces throughout history to keep women “in their place.” With a revolutionary exploration of women’s hormonal lives—from menstruation to childbirth to menopause—DeLuca shines a much-needed light on the lies that have impacted women. Now more than ever, it’s time to resist the myth that women are ruled by their hormones. It’s time for women to take charge of their lives. And it’s time for women to own their emotions in a healthy and realistic way.

It's rightly said that Motherhood is one of the greatest blessings from God. To give birth to a Healthy Baby right from the day a woman conceives through almost a year, i.e., nine months is indeed a tough job! However, this job can be simplified by eating the right foods, consuming the right drinks and adopting the right and healthy habits. This book is a complete guide for a pregnant woman. It gives all the important facts, such as, Prior to Conception and after it, All the develop-ments and changes that occur in the body during the First, Second and Third Trimesters of Pregnancy, The Three Stages of Labour, Breast and Breast-feeding, How to prevent a Pregnant woman from getting affected from AIDS or other Vaginal and Infectious Diseases, etc. Planning for a baby is a matter of pleasure and joy but on the other hand, a big duty or responsibility. Therefore, correct knowledge about pregnancy and how to deal with it provides an expectant woman, not only a painless delivery but also a healthy and jubilant baby. This is the sole aim of the book and hope it serves as a helpful guide for all women, especially the ones who are becoming a mother for the first time!

An Instant New York Times, Washington Post, USA Today, San Francisco Chronicle, and Publishers Weekly Bestseller! #1 Canadian Bestseller Just as she did in her groundbreaking bestseller The Vagina Bible, Dr. Jen Gunter, the internet’s most fearless advocate for women’s health, brings you empowerment through knowledge by countering stubborn myths and misunderstandings about menopause with hard facts, real science, fascinating historical perspective, and expert advice. “I feel more equipped to care for my patients, challenge the patriarchy, and empower & educate thanks to her work and advocacy.” —Dr. Danielle Jones (Mama Doctor Jones) “An exhilarating read and a comprehensive review of all things menopause.” —North American Menopause Society “Gynecologist Gunter (The Vagina Bible) helps women navigate the ins and outs of menopause in this delightfully conversational and strongly feminist guide. Readers looking to separate menopausal fact from fiction should take note.” —Publishers Weekly “Gunter mixes sound medical information with a bit of humor and a lot of candor...[this] frank and expert guide provides an informative and reassuring look at a long, often baffling and infuriating phase of life.” —Booklist The only thing predictable about menopause is its unpredictability. Factor in widespread misinformation, a lack of research, and the culture of shame around women’s bodies, and it’s no wonder women are unsure what to expect during the menopause transition and beyond. Menopause is not a disease—it’s a planned change, like puberty. And just like puberty, we should be educated on what’s to come years in advance, rather than the current practice of leaving people on their own with bothersome symptoms and too much conflicting information. Knowing what is happening, why, and what to do about it is both empowering and reassuring. Frank and funny, Dr. Jen debunks misogynistic attitudes and challenges the over-mystification of menopause to reveal everything you really need to know about: \*Perimenopause \* Hot flashes \* Sleep disruption \* Sex and libido \* Depression and mood changes \* Skin and hair issues \* Outdated therapies \* Breast health \* Weight and muscle mass \* Health maintenance screening \* And much more! Filled with practical, reassuring information, this essential guide will revolutionize how women experience menopause—including how their lives can be even better for it! “Read this book immediately.” —New York Times bestseller Ayelet Waldman, author of A Really Good Day and Love & Treasure “This is the new ‘it’ book for women who want to prepare for or understand what menopause is (and isn’t).” —Dr. Jennifer Lincoln

**Coney destroys the myth that menopause is a disease with inevitable symptoms like depression, osteoporosis, and low sex drive. She explains what is really known about midlife health, explores the effect of society’s negative views of aging, and examines the benefits and risks of common medical interventions like hormone replacement therapy, mammography, and cervical screening. After you read The Menopause Industry, you will be aware, informed, and able to make the right choices for you.**

**Penny Budoff became recognized as a pioneer in women’s medical care when she wrote her now classic book No More Hot Flashes and Other Good News. Twenty years later, she has become even more convinced that women need medical care and health information that is right for them, not watered down versions of what is right for men. Today we see daily headlines trumpeting the results of the efforts begun by her and the other physicians concerned specifically about women: headlines about heart disease in women, breast cancer, Alzheimer’s, hormone replacement therapy, osteoporosis, sexuality -- and, yes, menopause, the once unspoken word. These are the issues of her newest book, incorporating Dr. Budoff’s own vast experience and the expertise of additional physicians specializing in each area of womens health. In this one volume, the reader can learn the most up-to-date knowledge about what to expect in one’s middle years: why hormone replacement therapy can solve the side effects of menopause and giveva woman freedom from osteoporosis, heart disease and even Alzheimer’s disease; why natural estrogens and vitamins are essential; why the brain is our most important organ -- and can be kept healthy for decades; why cervical cancer is a sexually transmitted disease. All this information is accessible in this one valuable book.**

From the bestselling author of Between Husbands and Friends and An Act of Love comes a wise, wonderful, and delightfully witty “coming of age” novel about four intrepid women who discover themselves as they were truly meant to be: passionate, alive, and ready to face the best years of their lives. Meet Faye, Marilyn, Alice, and Shirley. Four women with skills, smarts, and secrets—all feeling over the hill and out of the race. But in a moment of delicious serendipity, they meet and realize they share more than raging hormones and lost dreams. Now as the Hot Flash Club, where the topics of motherhood, sex, and men are discussed with double servings of chocolate cake, they vow to help each other . . . and themselves. Faye, the artist. A determinedly cheerful widow and connoisseur of control-top pantyhose, she’s struggling with creative block and an empty, lonely house. Now she’s got a tricky problem to bring to the club’s table: how can they catch her perfect son-in-law cheating on her only daughter Laura? Shirley, the healer. Though her yoga-slender body belie her years, decades of dating losers and the strain of being broke make her feel her age. Shirley has a secret dream: a wellness spa that nurtures body and soul. But first she needs to believe in herself, in her abilities, and in her friends at the club. Marilyn, the brain. A paleontologist who has spent so many years looking at dried-up fossils, she’s almost become one herself. Worried that her brilliant but nerdy son is about to marry the very wrong woman, she gets some help from the HFC, who transform her from a caterpillar to a butterfly, with amazing results. Alice, the executive. Black and regal, she soared to the top of the corporate ladder. Now her shoes are murder on her arthritic back and the younger jackals are circling in for the kill. But as the inspiration behind the HFC, she’s about to discover something extraordinary: contentment. For Faye, Shirley, Marilyn, and Alice, the time has come to use it or lose it—be it their bodies, their brains, their spirits, and their sense of fun. Together they realize that they can have it all, perhaps for the first time in their lives. And though what sags may never rise again, feeling sexy has no expiration date—and best of all, with a little help from her friends, a woman can always start over . . . and never, ever, give up what matters most. Every menopause has its own story. It's time we told them . . . The menopause. What even is it? One big theme unites Still Hot!’s 42 stories - that, somehow, the world doesn't ready us for this. The menopause - let alone the perimenopause - simply isn't talked

about; instead, it's reduced to a comic hot flush. More and more of us are proudly stepping free of the menopausal closet, but the Big M is still a conversation whispered below the radar. No one tells you it will be like this. No one prepares you for it. That silence is lifting, slowly. So let's be bold, let's overshare. Let's find solidarity among Still Hot!'s myriad voices - wise, rebellious, measured, fierce, upfront - telling how the menopause is not just one story, but many. Telling, in fact, that this is not the menopause, it is YOUR menopause. Everything You Need to Know to Stay Healthy in the Decade Before Menopause

Stories, Sayings, and Scriptures to Encourage and Inspire

When Nina Collins entered her forties she found herself awash in a sea of hormones. As symptoms of perimenopause set in, she began to fear losing her health, looks, sexuality, sense of humor-perhaps all at once. Craving a place to discuss her questions and concerns, and finding none, Nina started a Facebook group with the ironic name, "What Would Virginia Woolf Do?," which has grown exponentially into a place where women-most with strong opinions and fierce senses of humor--have surprisingly candid, lively, and intimate conversations. Mid-life is a time when women want to think about purpose, about how to be their best selves, and how to love themselves as they enter the second half of life. They yearn to acknowledge the nostalgia and sadness that comes with aging, but also want to revel in their hard-earned wisdom. Part memoir and part resource on everything from fashion and skincare to sex and surviving the empty nest, What Would Virginia Woolf Do? is a frank and intimate conversation mixed with anecdotes and honesty, wrapped up in a literary joke. It's also a destination, a place where readers can nestle in and see what happens when women feel comfortable enough to get real with each other: defy the shame that the culture often throws their way, find solace and laugh out loud, and revel in this new phase of life.

"The Wisdom of Menopause offers an honest look at the menopausal transition. . . . If you are looking for realistic, positive, and constructive solutions to the inevitable challenges of life, then look no further—you have found your sourcebook." —The North American Menopause Society A #1 New York Times bestseller when first published, this groundbreaking book has inspired more than a million women with a dramatically new vision of midlife—and will continue to do so for generations to come. As Dr. Christiane Northrup explains, the "change" is not simply a collection of physical symptoms to be "fixed," but a mind-body revolution that brings the greatest opportunity for growth since adolescence. The choices a woman makes now—from the quality of her relationships to the quality of her diet—have the power to secure vibrant health and well-being for the rest of her life. In this fully revised and updated fourth edition, Dr. Northrup draws on the current research and medical advances in women's health, including · up-to-date information on hormone testing and hormone therapy · a completely new take on losing weight and training your mind to release extra pounds · new insights on the relationship between thyroid function, Hashimoto's disease, and Epstein-Barr virus, with a new program for healing thyroid issues · all you need to know about perimenopause and why it's critical to your well-being · the latest on new, less invasive and more effective fibroid treatments · information on which supplements are better than Botox for keeping your skin looking youthful · additional advice on dealing with pelvic health issues, including pelvic prolapse With this trusted resource, Dr. Northrup shows that women can make menopause a time of personal empowerment—emerging wiser, healthier, and stronger in both mind and body than ever before.

Surgical menopause is a different beast when compared to natural menopause. No worse, no better, just different. It involves removing a sizeable chunk of our endocrine system, and yet the majority of us are sent on our way after surgery with little more advice or information than: 'lift nothing heavier than a kettle of water for six week, and refrain from sex for the same duration'. Not Your Typical Menopause is a unique collection of narratives from women with lived experience of surgical menopause. Open, honest, courageous and brutally frank. If a surgical menopause is looming for you, this book will help ensure you are better informed and better able to meet some of the unique challenges that will likely ensue. Because, when it comes to our health, forewarned is indeed forearmed, and knowledge is power.

Authors, moms, and fitness enthusiasts Kara Douglass Thom and Laurie Kocanda work to balance motherhood and fitness. They know other moms struggle to make exercise a priority in their lives because they speak with similarly minded women at seminars and on their blogs. It was from these conversations—and the interest in them—that the idea for Hot (Sweaty) Mamas was born. This book is perfect for every mom or mom-to-be thinking about starting an exercise program, as well as moms already pursuing their fitness goals. Hot (Sweaty) Mamas reaches a wider audience than other fitness books that merely focus on "getting your prebaby body back" by presenting advice on how to pursue fitness despite a busy schedule, how to carve out time with or without kids to work out, and how to get the support needed to pursue fitness goals. Moms who find it difficult to start or stick with an exercise program will learn how to reframe their thinking. Women who continue to work out and struggle with the guilt sometimes associated with taking "me time" will be reassured. Mothers-to-be will feel better prepared to pass a legacy of health and fitness to their children and make fitness and motherhood coexist. Thom and Kocanda reveal the secrets to being a fit mom inside Hot (Sweaty) Mamas.

Too many women think of menopause as the beginning of the end After all, hot flashes, night sweats, insomnia, brain fog, memory lapses, vaginal dryness, lack of libido, weight gain, irritability, and greater risk for heart disease and osteoporosis aren't exactly things to look forward to, right? When she launched the Megs Menopause website, it quickly became the trending online destination for pre- and menopausal women all over the world. Now, in The New Hot, Mathews offers the results of all her research and discussions: the latest information about hormone treatments (hormone replacement therapy and bioidentical hormone therapy), her best tips and techniques for coping with menopausal symptoms (there are officially thirty-four possible symptoms; Mathews has dealt with thirty-two), and dishy, girlfriend-to-girlfriend advice about what to really expect when you're aging. **“Many days I believe menopause is the new (if long overdue) frontier for the most compelling and necessary philosophy; Darcey Steinke is already there, blazing the way. This elegant, wise, fascinating, deeply moving book is an instant classic. I'm about to buy it for everyone I know.”—Maggie Nelson, author of The Argonauts A brave, brilliant, and unprecedented examination of menopause Menopause hit Darcey Steinke hard. First came hot flashes. Then insomnia. Then depression. As she struggled to express what was happening to her, she came up against a culture of silence. Throughout history, the natural physical transition of menopause has been viewed as something to deny, fear, and eradicate. Menstruation signals fertility and life, and childbirth is revered as the ultimate expression of womanhood. Menopause is seen as a harbinger of death. Some books Steinke found promoted hormone replacement therapy. Others encouraged acceptance. But Steinke longed to understand menopause in a more complex, spiritual, and intellectually engaged way. In Flash Count Diary, Steinke writes frankly about aspects of Menopause that have rarely been written about before. She explores the changing gender landscape that comes with reduced hormone levels, and lays bare the transformation of female desire and the realities of prejudice against older women. Weaving together her personal story with philosophy, science, art, and literature, Steinke reveals that in the seventeenth century, women who had hot flashes in front of others could be accused of being witches; that the model for Duchamp's famous Étant donné was a post-reproductive woman; and that killer whales—one of the only other species on earth to undergo menopause—live long post-reproductive lives. Flash Count Diary, with its deep research, open play of ideas, and reverence for the female body, will change the way you think about menopause. It's a deeply feminist book—honest about the intimations of mortality that menopause brings while also arguing for the ascendancy, beauty, and power of the post-reproductive years.**

Mischief, Miracles, Motherhood, and Menopause shares the stories of where author Julie B.s life has taken her and what she has learned from each experience. Dubbing herself The Maverick Messenger, she is a therapist, artist, singer-songwriter, author, wife, mother, and recovering alcoholic. She tells humorous and touching tales of being the baby of her family, dealing with the realities of flat-chestedness, surviving the pregnancy and birth of twins, and dating again after a divorce. She offers her take on being an overwhelmed mother of three teenagers while mired in the hormonal hell of menopause. Julie also candidly shares painful and heartfelt stories about her rape at age twelve, her experiences with drinking through the ten years that covered her twenties, and her journey through recovery and divorces as well as two miscarriages, a house-fire, three hurricanes, and her fathers death. Although each experience was devastating in its own right, as a whole they have given her a down-to-earth perspective on love, faith, and relationships. She hopes to inspire others to reevaluate their own lives and relationships with an open mind and heart. Her light-hearted, humorous perspective on a variety of subjects from adolescence to alcoholism will keep you laughing and crying at the same time.

**Dr Sarah McKay is a neuroscientist who knows everything worth knowing about women's brains, and shares it in this fascinating, essential book. This is not a book about the differences between male and female brains, nor a book using neuroscience to explain gender-specific behaviours, the 'battle of the sexes' or 'Mars-Venus' stereotypes. This is a book about what happens inside the brains and bodies of women as they move through the phases of life, and the unique - and often misunderstood - effects of female biology and hormones. Dr McKay give insights into brain development during infancy, childhood and the teenage years (including the onset of puberty) and also takes a look at mental health as well as the ageing brain. The book weaves together findings from the research lab, case studies and interviews with neuroscientists and other researchers working in the disciplines of neuroendocrinology, brain development, brain health and ageing. This comprehensive guide explores the brain during significant life stages, including: In utero Childhood Puberty The Menstrual Cycle The Teenage Brain Depression and Anxiety Pregnancy and Motherhood Menopause The Ageing Brain**

*This book imagines a meeting between Charles Darwin and Hippocrates, the ancient Greek father of medicine, supposing that any dialogue between these two great thinkers should be quite sensational. It presents a short dialogue at the start of each chapter to act as an introduction to the topic discussed. With the help of Darwin and Hippocrates, it covers some of the main areas of the large topic of nutritional medicine, and especially some of the more controversial topics such as the use of nutritional supplements, the efficacy of probiotics and when to categorise a food as "junk food." Any reader who wants to know what constitutes nutritional medicine (as opposed to homeopathy and herbalism) will find this book a useful introduction to the subject. For those wanting to read up on the subject in greater detail, the appendix of the text includes a comprehensive reading list.*
