The sweetest lies are the most seductive... Eleven years ago, I fell in love with Alex Thorne. He was beautiful, charming, sexy, and the best lover I'd ever had. He's also a bloody liar. Every word that comes out of his mouth is a half-truth, a con, or an evasion. Now I find out my dream job at a university in America is his way of pulling me back into his world. I will never, never fall under the spell of the British Bastard again. Catriona MacTaggart is the one that got away. The Scottish lass has fire in her soul and in her eyes, especially when she punches me. I can handle that. Maybe the truth and I do have a different sort

of relationship, but I've never lied about my feelings for Cat. I'll do whatever it takes to get her back, even if it means deceiving her. Alex still knows exactly how to get under my skin, and despite all my intentions, I still can't resist that body and that smile. Maybe it's time I turn the tables and seduce the seducer, to finally solve the mystery he doesn't want me to unravel. Who is Alex Thorne?

Irresistible in a Kilt

It is well known that the horse naturally carries more weight on his forehead than on his hindquarters. This forward center of gravity, combined with an often unrecognized, inborn crookedness from poll to tail, can greatly inhibit training and ultimately affect the horse's

physical soundness and willingness to perform. In fact, Gabriele Rachen-Schoneich and Klaus Schoneich attribute 95 percent of all locomotive problems, in both sport and leisure horses, to this inherent crookedness. For over 25 years, Rachen-Schoneich and Schoneich—along with expert riders, trainers, veterinarians, and other specialists—have concentrated specifically on this theory at their international training center in Germany. There they have worked with—and successfully "cured" through appropriate gymnastic training—more than 4,000 horses with straightness problems related to: incorrect or insufficient training; bad riding; veterinary misdiagnosis; poorly fit tack and equipment, and other causes. Now, the couple describe their techniques, not only for addressing the symptoms of crookedness in an already schooled horse, but also for dealing with the "innate problem" in unbroken youngsters. Readers learn how using groundwork with green horses can "straighten" them and increase their "carrying power" before they are backed. You'll see how, with sufficient attention to gymnastic training on the longe and in hand, the eventual transition to work under saddle can be handled smoothly, easily, and without ever sacrificing correct locomotion.
