

During her sophomore year at Middlebury College, Emily meets Max—“you” as she intimately refers to him in the book. Not exactly a tomboy, but not quite a girly girl either, Emily is intent on finding a masculine boyfriend to assuage a deeply rooted fear that she may not be quite feminine enough. Max—a boisterous class clown beloved by his many straight guy friends—has recently come out as gay and is embracing his newly claimed identity. Initially, Max and Emily dislike each other, but end up growing close after a make-out dare on Halloween. Then one night, Max reveals an unexpected physical attraction that catches them both by surprise. The relationship begins, playfully and in secret, and then spirals into something more. Max and Emily’s journey takes many forms—they experiment with drugs; they travel abroad; they try sleeping with other people (together), and everything in between—all in the name of “this bizarre, beautiful thing” they call love.

You have what it takes to be a CIO. Do you have a strategy for getting there? Now you do. "Gregory Smith has written the definitive work on how to achieve leadership success in IT. This well-written and carefully researched book is a must-read for any IT professional with aspirations toward the top IT spot. Years from now, seasoned IT leaders will be crediting Smith's book with playing a role in their success." —Martha Heller, Managing Director, IT Leadership Practice, Z Resource Group, and cofounder, CIO Executive Council "Wow! Put all the tips, advice, and strategies in this book to use now. The road to the top is rarely straight—follow Gregory's advice and the path will reveal itself to you!" —John R. Sullivan, CIO, AARP "While most professions have a distinct road map to the top, there is no standard career path to becoming a CIO. Smith addresses this unique challenge and provides aspiring CIOs with encouragement, advice, and essential skills based on years of his own and other CIOs' cumulative experience – an important effort for the profession that Smith's fellow members in the CIO Executive Council embrace and applaud." —Mark Hall, General Manager of the CIO Executive Council "Teaching students what a CIO really does has been tough. We've had to choose between anecdotal treatments based on trade press articles and integrated academic frameworks that offer little in the way of lived experiences. Greg's book fixes that. By organizing interviews with leading technology executives, trade press reports, and his own experiences as a CIO, he provides an organized and comprehensive view of the job and its important role in modern organizations." —Fred Collopy, PhD, Professor and Chair of Information Systems and Professor of Cognitive Science, Case Western Reserve University

Practical reasoning and clear thinking are essential for everyone if we are to make sense of the information we receive each day. Being able to quickly know the difference between valid and invalid arguments, the contradictory versus the contrary, vagueness and ambiguity, contradiction and self-contradiction, the truthful and the fallacious, separates clear thinkers from the crowd. How to Think Straight lays the foundation for critical reasoning by showing many ways in which our thinking goes awry. Celebrated philosopher Antony Flew entertainingly instructs on the many and varied faults that occur in argument, the power of reason, how to challenge assertions and find evidence, and how not to be persuaded by half-truths. Flew also examines poor reasoning, and why we should be concerned with finding the truth. Lucid, terse, and sensible, with study questions and exercises to help along the way, this enlightening second edition will help you develop the skills necessary to argue and reason effectively by following a few simple, easy-to-remember directions.
