

How To Grow A Dinosaur

A little boy wants to be a dinosaur when he grows up. He doesn't understand why his family keeps making other suggestions.

Upset that the plants he is growing are the smallest in the class, four-year-old dinosaur Brendan switches his name to another container but then regrets what he has done.

It's not easy being a big sister - especially when your baby brother is a roaring dino-baby! There are just so many "Be gentles," "Be quiets" and "Please shares." But, before long, this big sister grows to love teaching her brother all the grown-up things she knows and, very quickly, life in the dino family is as fun and chaotic as ever. The perfect book for older siblings, parents and dinosaur fans. Brilliantly read by Lenny Henry. Please note that audio is not supported by all devices, please consult your user manual for confirmation.

Explores the history of dinosaurs and the discoveries that have been made about them, including how dinosaurs lived, why they went extinct, and what fossil evidence explains about them.

Dear Dinosaur: T. Rex on Tour

A little girl is shopping in a grocery store when--surprise --she meets a dinosaur. Don't worry. The dinosaur is very friendly. She's polite, too. In this funny story, told in lilting read-aloud rhyme, the girl has numerous opportunities to be helpful to the clumsy shopping dino and

demonstrate when to say "thank you," "excuse me," "I'm sorry," "You're welcome," and other niceties of life. Tim Bowers's whimsical illustrations bring an extra dimension of fun to Judy Sierra's hilarious picture book fantasy. Altogether, Suppose You Meet a Dinosaur is an entertaining and painless way to show preschoolers why basic manners are a good thing to have.

A world-renowned paleontologist reveals groundbreaking science that trumps science fiction: how to grow a living dinosaur. Over a decade after Jurassic Park, Jack Horner and his colleagues in molecular biology labs are in the process of building the technology to create a real dinosaur. Based on new research in evolutionary developmental biology on how a few select cells grow to create arms, legs, eyes, and brains that function together, Jack Horner takes the science a step further in a plan to "reverse evolution" and reveals the awesome, even frightening, power being acquired to recreate the prehistoric past. The key is the dinosaur's genetic code that lives on in modern birds- even chickens. From cutting-edge biology labs to field digs underneath the Montana sun, How to Build a Dinosaur explains and enlightens an awesome new science.

How do you hide a pet dinosaur? Taking care of a baby dinosaur is hard work. And it's even harder when you can't tell anyone about him! Frank and Sam are good at feeding, cleaning, and walking Peanut. But their grandma has found a new fossil and it looks just like Peanut's horn . . . only a thousand times bigger! Will baby Peanut grow to be that huge, too? How do you hide a dinosaur when he becomes as big as a house? It won't be easy. Especially when scientists come to the dig site to make a movie about the new fossil. The hilarious Dino Files chapter book series follows a nine-year-old dinosaur expert, his paleontologist grandparents, a cat named Saurus, and fossils that might not be so extinct!

After a trip to the museum, Max writes a letter to his favourite dinosaur, the mighty T. Rex - and the T. Rex writes back! As Max and T. Rex learn about each other's lives, a very unusual friendship develops in this funny and touching story from an award-winning duo. Dinosaur fans will love this interactive picture book with letters and cards to open, and dinosaur facts to discover along the way.

Amazing Dinosaur Facts, Photos, Quiz and More

A fun introduction to prehistoric creatures that are not dinosaurs, and why! Everyone knows what a dinosaur is, right? Well, maybe not. Dinosaurs are actually just one type of extinct animal from prehistoric times. So, what sets them apart? Here, readers are introduced to ten prehistoric animals. Each one looks like a dinosaur. But it's missing at least one key characteristic of all true dinosaurs. Animal by animal, each of those characteristics is added to a growing list, until, by the end of the book, readers know just what makes a dinosaur a dinosaur! A dinosaur by any other name is . . . not a dinosaur, of course!

"A boy keeps a toy dinosaur in his pocket to help him be brave like his dad--but when the dinosaur goes missing, Dad knows just what to do"--

I Don't Want to Be Big

This is a New York Public Library Outstanding Reference Book of 1998. While the inhabitants of the lost world have long held sway over our imaginations, in recent years dinosaur science has experienced an explosive growth. More books on dinosaurs have been published in the past decade than in all the previous 150 years since Richard Owen named these 'fearfully great lizards' (correctly, 'reptiles'), and dinosaur research continues to make headlines. Reporting the latest discoveries and research, this book is an exuberant celebration of dinosaurs and of our ongoing fascination with them. Here, in one volume, is the single, most-authoritative account of dinosaur paleontology for the general reader. So rapidly has the field expanded that no individual can hope to master all the aspects of dinosaur paleontology. For this book, the editors have brought together forty-six experts in subjects ranging from functional morphology and paleobiology to biogeography and systematics to present a thorough survey of the dinosaurs from the earliest discoveries through the contemporary controversies over their extinction. Where contention exists, as over the question of whether dinosaurs were warm-blooded or cold-blooded, the editors have let the experts agree to disagree. Throughout technical jargon is kept to a minimum, and there is also a glossary of less familiar terms. Readers will find a wealth of information on the study and classification of dinosaurs, on each of the dinosaur groups, and on dinosaur biology and evolution. Not the least among these riches are the more than 350 illustrations (including 16 pages of color plates), many prepared especially for this volume. The volume concludes with a survey of dinosaurs in the media and a chronology of the history of dinosaur science. This is the single most authoritative account of dinosaur paleontology for the general public, all in one volume. Sumptuously illustrated, with up-to-the-minute information, it features: more than 350 illustrations, including 16 pages in full color; each chapter written by an expert in dinosaur studies; includes the latest dinosaur discoveries; new information on the warm-blooded/cold-blooded debate; new insights on the possibility of isolating dinosaur DNA; what dinosaurs ate and how we know about it; dinosaurs in the media; a time-line of the history of dinosaur science; and much, much more!
