

## How To Learn And Memorize Math Numbers Equations Simple Arithmetic Magnetic Memory Series Anthony Metivier

*If you'd like to improve your ability to learn and memorize medical terminology by as much as 100%, 200%, even 300% (or more) ... using simple memory techniques that you can learn in 15-20 minutes (or less), then this may be the most important book that you will ever read. Believe it or not, it really doesn't matter if you think you have a good memory or not. The information in this book will teach you: \* Why memory is like a bicycle everyone can ride (with some minor personal adjustments). \* The real reason why you should never be squeamish about using memorization techniques so that you can recall medical terminology with ease. \* Why and how some of the most famous memory skills are applicable to learning any subject, especially medicine. \* How you can easily create a 26 "letter location" memory system based around the alphabet to establish "medical fluency." \* Unique techniques that will have you literally "tuning in" on medicine and its terminology. \* How to separate and organize medical terminology in the most effective manner for memorization. \* Two secret ways you can use relaxation to aid the memorization process. These two methods alone are worth the price of this book because they will literally eliminate the stress and apprehension as you study, learn and memorize medical terminology. \* And much, much more ... These techniques have been used by real medical students to make real strides in their professional careers as medical experts, most of whom previously considered themselves owners of a "bad memory." Don't worry! None of these techniques are rocket science. Frankly, if you can memorize a short email address or the name of a movie, then you can use this system to memorize medical terminology. But there's really no time to lose. Every day that you are not using this simple memorization system, you are literally stealing from yourself the joy of being able to recall an abundance of medical terminology as you easily expand the natural abilities of your mind.*

*In the tradition of *The Power of Habit and Thinking, Fast and Slow* comes a practical, playful, and endlessly fascinating guide to what we really know about learning and memory today—and how we can apply it to our own lives. From an early age, it is drilled into our heads: Restlessness, distraction, and ignorance are the enemies of success. We're told that learning is all self-discipline, that we must confine ourselves to designated study areas, turn off the music, and maintain a strict ritual if we want to ace that test, memorize that presentation, or nail that piano recital. But what if almost everything we were told about learning is wrong? And what if there was a way to achieve more with less effort? In *How We Learn*, award-winning science reporter Benedict Carey sifts through decades of education research and landmark studies to uncover the truth about how our brains absorb and retain information. What he discovers is that, from the moment we are born, we are all learning quickly, efficiently, and automatically; but in our zeal to systematize the process we have ignored valuable, naturally enjoyable learning tools like forgetting, sleeping, and daydreaming. Is a dedicated desk in a quiet room really the best way to study? Can altering your routine improve your recall? Are there times when distraction is good? Is repetition necessary? Carey's search for answers to these questions yields a wealth of strategies that make learning more a part of our everyday lives—and less of a chore. By road testing many of the counterintuitive techniques described in this book, Carey shows how we can flex the neural muscles that make deep learning possible. Along the way he reveals why teachers should give final exams on the first day of class, why it's wise to interleave subjects and concepts when learning any new skill, and when it's smarter to stay up late prepping for that presentation than to rise early for one last cram session. And if this requires some suspension of disbelief, that's because the research defies what we've been told, throughout our lives, about how best to learn. The brain is not like a muscle, at least not in any straightforward sense. It is something else altogether, sensitive to mood, to timing, to circadian rhythms, as well as to location and environment. It doesn't take orders well, to put it mildly. If the brain is a learning machine, then it is an eccentric one. In *How We Learn*, Benedict Carey shows us how to exploit its quirks to our advantage.*

*Develop the Skills to Learn Anything Faster, Easier, and More Effectively* Written by the creators of the #1 bestselling course of the same name, this book will teach you how to "hack" your learning, reading, and memory skills, empowering you to learn everything faster and more effectively. *What Would You Do If You Could Learn Anything 3 Times Faster?* In our rapidly changing and information-driven society, the ability to learn quickly is the single most important skill. Whether you're a student, a professional, or simply embarking on a new hobby, you are forced to grapple with an ever-increasing amount of information and knowledge. We've all experienced the frustration of an ever-growing reading list, struggling to learn a new language, or forgetting things you learned in even your favorite subjects. *This Book Will Teach You 3 Major Skills: Speed reading with high (80%+) comprehension and understanding Memory techniques for storing and recalling vast amounts of information quickly and accurately Developing the cognitive infrastructure to support this flood of new information long-term* However, the SuperLearning skills you'll learn in this course are applicable to many aspects of your every day life, from remembering phone numbers to acquiring new skills or even speaking new languages.

*Anyone Can Develop Super-Learning Skills* This course is about improving your ability to learn new skills or information quickly and effectively. We go far beyond the kinds of "speed reading" (or glorified skimming) you may have been exposed to, diving into the actual cognitive and neurological factors that make learning easier and more successful. We also give you advanced memory techniques to grapple with the huge loads of information you'll soon be able to process. "This book should be the go-to reference for anyone looking to upgrade their mind's firmware!" -Benny Lewis, Language Learning Expert *Learn How to Absorb and Retain Information in a Whole New Way - A Faster, Better Way* The Authors' Proprietary Method for Teaching Speed Reading & Memory Improvement You may have even taken a normal speed reading course in the past, only to realize that you didn't retain anything you read. The sad irony is that in order to properly learn things like speed reading skills and memory techniques in the past, you had to read dozens of books and psychological journals to decode the science behind it. Or, you had to hire an expensive private tutor who specializes in SuperLearning. That's what I did. And it changed my life. Fortunately, my co-authors (experts and innovators in the fields of superlearning, memory improvement, and speed reading) agreed to help me transform their materials into the first ever digital course. Over 25,000 satisfied students later, we have transformed our course into a book you can enjoy anywhere. Our teaching methodology relies heavily on at-home exercises. The chapters themselves are only part of what

***you're buying. You will be practicing various exercises and assignments on a regular basis over the course a 7 week schedule. In addition to the lectures, there are hours of supplemental video and articles which are considered part of the curriculum. "This vital book contains all the tools needed to learn, memorize, and reproduce anything you want with the joy that ease brings. Don't take another class until you've read it!" -Dr. Anthony Metivier, Author & Memory Expert If you wish to improve memory and concentration, learn more effectively, read faster, and learn the techniques of memory champions - look no further! An awesome read that will push the limits of your brain. Levi does an incredible job of guiding you through, to bring your brain from average to UNSTOPPABLE!" -Nelson Dellis, 4-Time USA Memory Champion***

***By targeting key brain functions, this guide leads readers through the memory maze, beginning with a detailed and clear explanation of how memory works. Exercises are suggested to help readers train their memories to be more effective. 150 color images throughout.***

***A Mind for Numbers***

***The Surprising Truth About When, Where, and Why It Happens***

***How We Learn***

***Dumbing Us Down***

***Science-Based Tools to Become Better at Anything***

***How to Learn and Memorize Arabic Vocabulary***

***Transform Your Memory Skills***

This book consists of two titles, which are the following: Book 1: Do you want to learn more and faster? Would you like to have a better memory? Then look no further! In this guide, you will be given several answers as to how to do those things. For example, we will cover the importance of memorizing things to boost your brain 's capacity for retaining information. You will also learn about the importance of learning another language, which stimulates brain activity and creativity more than people realize. On top of that, many questions will be answered regarding teaching children another language or raising them in a bilingual home. Book 2: Many people underestimate the value of awareness and consciousness when it comes to learning. Keeping information in that big brain of yours can be challenging if you don ' t apply the right methods to do so. For you to learn how to learn, or to remember what you have observed, it ' s mandatory that you trigger your senses to retain information faster and more efficiently. This can be done by understanding the topics in this book, which include using the said awareness to take in information at a faster pace, and using visual means to support you. Do you use flashcards, computer games, or other studying techniques? These will all be addressed.

Kings and queens, British prime ministers, American presidents, countries of Europe... We should all know these things - but like me, you're probably resigned to being the kind of person that just never will. Now Grandmaster of Memory Ed Cooke offers up his memory secrets with a fun, quick and completely unforgettable way to remember the things you thought you never could. But this is no boring Willy, Willy, Harry, Ste. With Ed leading the way on unlikely adventures through people and places, Abraham Lincoln may become a circle of bra-wearing hams linking arms in your mind, and you may well encounter a fridge wearing Calvin Klein underpants. You could also soon find yourself rattling off the prime ministers to a rapt audience and adding, in a knowing tone, 'ah yes, Marquess of Rockingham, Whig I believe?'. What is for sure is that you ' ll be bursting with knowledge that will stick in your mind and impress your friends for ever.

Easy-to-apply, scientifically-based approaches for engaging students in the classroom Cognitive scientist Dan Willingham focuses his acclaimed research on the biological and cognitive basis of learning. His book will help teachers improve their practice by explaining how they and their students think and learn. It reveals-the importance of story, emotion, memory, context, and routine in building knowledge and creating lasting learning experiences. Nine, easy-to-understand principles with clear applications for the classroom Includes surprising findings, such as that intelligence is malleable, and that you cannot develop "thinking skills" without facts How an understanding of the brain's workings can help teachers hone their teaching skills "Mr. Willingham's answers apply just as well outside the classroom. Corporate trainers, marketers and, not least, parents -anyone who cares about how we learn-should find his book valuable reading." —Wall Street Journal

THE INTERNATIONAL BESTSELLER 'Truly fascinating.' Steve Wright, BBC Radio 2 - Have you ever forgotten the name of someone you ' ve met dozens of times? - Or discovered that your memory of an important event was completely different from everyone else ' s? - Or vividly recalled being in a particular place at a particular time, only to discover later that you couldn ' t possibly have been? We rely on our memories every day of our lives. They make us who we are. And yet the truth is, they are far from being the accurate record of the past we like to think they are. In The Memory Illusion, forensic psychologist and memory expert Dr Julia Shaw draws on the latest research to show why our memories so often play tricks on us – and how, if we understand their fallibility, we can actually improve their accuracy. The result is an exploration of our minds that both fascinating and unnerving, and that will make you question how much you can ever truly know about yourself. Think you have a good memory? Think again. 'A spryly paced, fun, sometimes frightening exploration of how we remember – and why everyone remembers things that never truly happened.' Pacific Standard

Believe it or not, it really doesn't matter if you think you have a good memory or not. The information in this book will teach you: \* Why memory is like a bicycle everyone can ride (with some minor personal adjustments). \* The real reason why no one should ever be squeamish about memorization or learning a language. \* Why and how some of the most famous memory skills are applicable to learning any language, especially Latin. \* How you can easily create a "letter location" memory system based on the Latin alphabet. \* Unique techniques that will have you literally "tuning in" on the Latin language. \* How to separate Latin words in the most effective manner for memorization. \* Two secret ways you can use relaxation to aid the memorization process. These two methods alone are worth the price of this book because they will literally eliminate your stress and apprehension as you learn Latin. \* And much, much more ... These techniques have been used by real language learners, most of whom previously considered themselves owners of a "bad memory," to make real strides in learning Latin vocabulary. Don't worry! None of these techniques involve rocket science! Frankly, if you can memorize a short email address or the name of a movie, then you can use this system to memorize a language as rich and diverse as Latin. Plus, everything you'll learn in this book applies to every other language that shares the same alphabet with English. And with a little imagination, the ideas are easily transferable to other alphabet systems too. But there's really no time to lose. Every day that you are not using this simple vocabulary memorization system, you are literally stealing from yourself the joy of being able to read, speak and recall an abundance of Latin vocabulary as you easily expand the natural abilities of your mind.

We all want to learn new skills but, in this fast-paced world, how can any of us find the time? In How to Learn (Almost) Anything in 48 Hours, three-time Australian Memory Champion Tansel Ali reveals the secret to learning new skills fast - memory techniques. Whether you'd like to study for exams efficiently, learn a foreign language, confidently make a speech, learn to play a new musical instrument, or improve your general knowledge, memory-training expert Tansel will show you how to do it quickly and effectively with the aid of a few memory tricks. Packed with practical exercises to help you hone your memory and train your brain to learn well and learn fast, this is the ultimate book for anyone ready to sharpen their mind and expand their knowledge.

I have an addictive personality. It's why I can juggle, why I'm not allowed to gamble, why I've seen every episode of the new Doctor Who, and why I hate my boss. This is all his fault. But thanks to him buying a Rubik's cube for the company to enjoy at break time, this book exists. Take a similar journey to my own. You don't even need a Rubik's cube. This book isn't about solving puzzles. Instead, it teaches how to turn your mind into a Memory Palace that can store anything. What do you need to learn? Phone numbers, random facts, the names of people you've met, every state and its capital, or the precise order of a randomly shuffled deck of cards? I give you the keys to the items you need to remember. Whether it's to impress somebody, to stop relying so much on smart phones for remembering, or just to enjoy the parts where I talk about Star Wars and Doctor Who, there's something here for everyone.

How to Learn and Memorize Greek Vocabulary ... Using a Memory Palace Specifically Designed for Greek (and adaptable to many other languages too) If you'd like to improve your ability to learn Greek vocabulary by as much as 100%, 200%, even 300% (or more) ... using simple memory techniques that you can learn in 15-20 minutes (or less), then this may be the most important book that you will ever read. Believe it or not, it really doesn't matter if you think you have a good memory or not. The information in this book will teach you: \* Why memory is like a bicycle everyone can ride (with some minor personal adjustments). \* The real reason why no one should ever be squeamish about memorization or learning a language. \* Why and how some of the most famous memory skills are applicable to learning any language, especially Greek. \* How you can easily create a "letter location" memory system based on the Greek alphabet. \* How to quickly and easily learn and memorize the sounds of the Greek alphabet. \* Unique techniques that will have you literally "tuning in" on the Greek language. \* How to separate Greek words in the most effective manner for memorization. \* Two secret ways you can use relaxation to aid the memorization process. *Products, technologies, and workplaces change so quickly today that everyone is continually learning. Many of us are also teaching, even when it's not in our job descriptions. Whether it's giving a presentation, writing documentation, or creating a website or blog, we need and want to share our knowledge with other people. But if you've ever fallen asleep over a boring textbook, or fast-forwarded through a tedious e-learning exercise, you know that creating a great learning experience is harder than it seems. In Design For How People Learn, you'll discover how to use the key principles behind learning, memory, and attention to create materials that enable your audience to both gain and retain the knowledge and skills you're sharing. Using accessible visual metaphors and concrete methods and examples, Design For How People Learn will teach you how to leverage the fundamental concepts of instructional design both to improve your own learning and to engage your audience.*

*Becoming a more effective learner and boosting your productivity will help you earn better grades - but it'll also cut down on your study time. This is a short, meaty book that will guide you through ten steps to achieving those goals: Pay better attention in class, Take more effective notes, Get more out of your textbooks, Plan like a general, Build a better study environment, Fight entropy and stay organized, Defeat Procrastination, Study smarter, Write better papers, Make group projects suck less, Whether you're in college or high school, this book will probably help you. But not if you're a raccoon. I want to be very clear about that; if you're a raccoon, please buy a different book. This one will do absolutely nothing for you. How did you even learn to read, anyway?*

*This lively and stimulating book offers an enlightening new approach to effective study. Without minimising the importance of good organisation and hard work, the author stresses throughout that study must and can be fun. Delivered with characteristic humour and wisdom, Richard Palmer updates and reinvigorates a classic, best-selling book with new sections on computers and the internet, as well as chapters covering important areas such as: memory and review essay planning and writing note-taking time management using resources exam techniques and preparation. This is an inspiring, essential read for all students studying for A Levels and undergraduate degrees who want to find the key to achieving success both in coursework and*

exams.

An instant New York Times bestseller and #1 Wall Street Journal bestseller. JIM KWIK, the world's #1 brain coach, has written the owner's manual for mental expansion and brain fitness. Limitless gives people the ability to accomplish more--more productivity, more transformation, more personal success and business achievement--by changing their Mindset, Motivation, and Methods. These "3 M's" live in the pages of Limitless along with practical techniques that unlock the superpowers of your brain and change your habits. For over 25 years, Jim Kwik has worked closely with successful men and women who are at the top in their fields as actors, athletes, CEOs, and business leaders from all walks of life to unlock their true potential. In this groundbreaking book, he reveals the science-based practices and field-tested tips to accelerate self learning, communication, memory, focus, recall, and speed reading, to create fast, hard results. Learn how to: FLIP YOUR MINDSET Your brain is like a supercomputer and your thoughts program it to run. That's why the Kwik Brain process starts with unmasking assumptions, habits, and procrastinations that stifle you, redrawing the borders and boundaries of what you think is possible. It teaches you how to identify what you want in every aspect of your life, so you can move from negative thinking to positive possibilities. IGNITE YOUR MOTIVATION Uncovering what motivates you is the key that opens up limitless mental capacity. This is where Passion + Purpose + Energy meet to move you closer to your goals, while staying focused and clear. Your personal excitement will be sustainable with self-renewing inspirations. Your mind starts strong, stays strong, and drives further exponentially faster. MASTER THE METHOD We've applied the latest neuroscience for accelerated learning. Our process, programs, podcasts, and products unleash your brain's own superpowers. Finish a book 3x faster through speed reading (and remember every part of it), learn a new language in record time, and master new skills with ease. These are just a few of the life-changing self-help benefits. With Kwik Brain, you'll get brain-fit and level-up your mental performance. With the best Mindset, Motivation and Method, your powers become truly limitless.

In Unlimited Memory, you'll learn how the world's best memory masters get themselves to concentrate at will, anytime they want. When you can easily focus and concentrate on the task at hand, and store and recall useful information, you can easily double your productivity and eliminate wasted time, stress, and mistakes at work.*

*A heartbreaking and powerful story about a black boy killed by a police officer, drawing connections through history, from award-winning author Jewell Parker Rhodes. Only the living can make the world better. Live and make it better. Twelve-year-old Jerome is shot by a police officer who mistakes his toy gun for a real threat. As a ghost, he observes the devastation that's been unleashed on his family and community in the wake of what they see as an unjust and brutal killing. Soon Jerome meets another ghost: Emmett Till, a boy from a very different time but similar circumstances. Emmett helps Jerome process what has happened, on a journey towards recognizing how historical racism may have led to the events that ended his life. Jerome also meets Sarah, the daughter of the police officer, who grapples with her father's actions. Once again Jewell Parker Rhodes deftly weaves historical and socio-political layers into a gripping and poignant story about how children and families face the complexities of today's world, and how one boy grows to understand American blackness in the aftermath of his own death.*

*NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally*

*make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller Guitar Zero At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.*

Discusses the best methods of learning, describing how rereading and rote repetition are counterproductive and how such techniques as self-testing, spaced retrieval, and finding additional layers of information in new material can enhance learning.

There has been a shift of policy at board level. Cash is needed and Alex Rogo's companies are to be put on the block. Alex faces a cruel dilemma. If he successfully completes the turnaround of his companies they can be sold for the maximum return: if he fails they will be closed down. Either way Alex and his team will be out of work. It looks like lose-lose, both for Alex and for his team. And as if he doesn't have enough to deal with, his two children have become teenagers. As Alex grapples with problems at work and at home, we begin to understand the full scope of Eli Goldratt's powerful techniques. It's Not Luck reveals more of the Thinking Process-techniques that consistently produce win-win solutions to seemingly impossible problems.

?Buy the Paperback version of this book and get the ebook version included for FREE? Do you wish you could accelerate your learning abilities and improve your memory instantly? Do you want to effortlessly stay focused and absorb info like a human sponge? If you answered YES to any of those questions, then the solution is right in front of you. Scientifically-proven methods for accelerated learning to save your valuable time How to Learn Faster is not a boring textbook - it's a simple yet effective guidebook for your journeys in learning. It will help you to use your brain to its fullest potential by showing you the most effective methods, the pitfalls you must avoid, and the habits you must develop. Not only is this book an essential learning tool, it is also going to give you insight into how your brain works with easy to understand explanations and tips that anyone can naturally work into their day-to-day life. It will also give you the skills you need to strengthen your brain, improve your memory and achieve all your learning goals. Here's Just a Quick Preview of What You'll Learn in this Book: \* How to hack your belief system and convince yourself that you CAN be a fast learner \* Four different types of learners and how to find out which one is yours. \* The reading mistakes you are probably committing right now and what to do about them. \* How to double your reading speed within just a few days. \* Surprising facts about your brain and memory and how to make your brain work for you. \* The learning techniques that are proven to work - such as mind-mapping, link method, and method of Loci. \* Top strategies for taking better notes for effective learning. \* How to develop laser-like focus and greater concentration. \* The secret no one ever tells you about memory retention. \* How to use the superpower of spaced repetition. \* Daily habits you must cultivate to develop unlimited memory. \* And much, much more! Learning how to learn is one of the most valuable skills you will ever possess. How to Learn and Memorize English Vocabulary ... Using a Memory Palace Specifically Designed for the English Language (and adaptable to many other languages too) Special Edition for Teachers of ESL & EFL If you'd like to improve the ability of your students to learn English vocabulary by as much as 100%, 200%, even 300% (or more) ... using simple memory techniques that they can learn in 15-20 minutes (or less), then this may be the most important book that you as a teacher of English will ever read. Believe it or not, it doesn't matter if your students have a good memory or not. The information in this book will teach you: \* Why memory is like a bicycle everyone can ride (with some minor personal adjustments). \* The real reason why no one should ever be squeamish about memorization or learning a language. \* Why and how some of the most famous memory skills are applicable to learning any language, especially English. \* How your students can create a 26 "letter location" memory system based on the English alphabet. \* Unique techniques that will have your students literally "tuning in" on the English language. \* How to separate English words in the most effective manner for memorization. \* Two secret ways your students can use relaxation to aid the memorization process. These two methods alone are worth the price of this book because they will literally eliminate the stress and apprehension English learners face as they struggle to learn English vocabulary. \* And much, much more ... These techniques have been used by real language learners, most of whom previously considered themselves owners of a "bad memory" to make real strides in learning English vocabulary. Don't worry! None of these techniques are rocket science. Frankly, if your students can memorize a short email address or the name of a movie, then they can use this system to memorize a language as rich and diverse as English. Plus, everything you'll learn in this book applies to every other language that shares the same alphabet with English. And with a little imagination, the ideas are easily transferable to other alphabet systems too. But there's really no time to lose. Every day that you are not teaching your students this simple vocabulary memorization system, you are literally stealing from yourself the joy of having students who read, speak and recall an abundance of English vocabulary thanks to how you've easily expanded the natural abilities of their minds.

An engineering professor who started out doing poorly in mathematical and technical subjects in school offers tools and techniques to learning the creative and analytical thought processes that will lead to achievement in math and science. A book for learners of all ages containing the best and most updated advice on learning from neuroscience and cognitive psychology. Do you spend too much time learning with disappointing results? Do you find it difficult to remember what you've learned? Do you put off studying because it's boring and you're easily distracted? This book is for you. Dr. Barbara Oakley and Terrence Sejnowski have both struggled in the past with their learning. But they have found techniques to help them master any subject. Building on insights from neuroscience and cognitive psychology, they give you a crash course to improve your ability to learn, no matter what the subject is. Through their decades of writing, teaching, and research on learning, the authors have developed strong connections with experts from a vast array of disciplines. And it's all honed with feedback from thousands of students who themselves have gone through the trenches of learning. Successful learners gradually add tools and techniques to their mental toolbox and they think critically about their learning to determine when and how to best use their mental tools. That allows them to make the best use of their brains, whether those brains seem "naturally" geared toward learning or not. This book shows you how you can do the same.

"Highly entertaining." —Adam Gopnik, The New Yorker "Funny, curious, erudite, and full of useful details about ancient and modern techniques of training memory." —The Boston Globe The blockbuster phenomenon that charts an amazing journey of discovery while revolutionizing our concept of memory An instant bestseller that is poised to become a classic, Moonwalking with Einstein recounts Joshua Foer's yearlong quest to improve his memory under the tutelage of top "mental athletes." He draws on cutting-edge research, a surprising cultural history of remembering, and venerable tricks of the mentalist's trade to transform our understanding of human memory. From the United States Memory Championship to deep within the author's own mind, this is an electrifying work of journalism that reminds us that, in every way that matters, we are the sum of our memories.

**It's Not Luck**

This unique and brilliant book is a history of human knowledge. Before the invention of printing, a trained memory was of vital importance. Based on a technique of impressing 'places' and 'images' on the mind, the ancient Greeks created an elaborate memory system which in turn was inherited by the Romans and passed into the European tradition, to be revived, in occult form, during the Renaissance. Frances Yates sheds light on Dante's Divine Comedy, the form of the Shakespearian theatre and the history of ancient architecture; The Art of Memory is an invaluable contribution to aesthetics and psychology, and to the history of philosophy, of science and of literature.

With over 70,000 copies of the first edition in print, this radical treatise on public education has been a New Society Publishers' bestseller for 10 years! Thirty years in New York City's public schools led John Gatto to the sad conclusion that compulsory schooling does little but teach young people to follow orders like cogs in an industrial machine. This second edition describes the wide-spread impact of the book and Gatto's "guerrilla teaching." John Gatto has been a teacher for 30 years and is a recipient of the New York State Teacher of the Year award. His other titles include A Different Kind of Teacher (Berkeley Hills Books, 2001) and The Underground History of American Education (Oxford Village Press, 2000).

A repertoire of ways to enhance memory - by training it to be more effective, and by following various tried and tested practical techniques and systems to combat forgetfulness by the six times current World Memory Champion.
