A brilliant blend of Shop Class as Soulcraft and The Orchid Thief, Earl Swift's wise, funny, and captivating Auto Biography follows an outlaw auto dealer as he struggles to save a rusted '57 Chevy—a car that has already passed through twelve pairs of hands before his—while financial ruin, government bureaucrats and the FBI close in on him. Slumped among hundreds of other decrepit hulks on a treeless, windswept moor in eastern North Carolina, the Chevy evokes none of the Jet Age mystique that made it the most beloved car to ever roll off an assembly line. It's open to the rain. Birds nest in its seats. Officials of the surrounding county consider it junk. To Tommy Arney, it's anything but: It's a fossil of the twentieth-century American experience, of a place and a people utterly devoted to the automobile and changed by it in myriad ways. It's a piece of history—especially so because its flaking skin conceals a rare asset: a complete provenance, stretching back more than fifty years. So, hassled by a growing assortment of challengers, the Chevy's thirteenth owner—an orphan, grade-school dropout and rounder, a felon arrested seventy-odd times, and a man who's been written off as a ruin himself--embarks on a mission to save the car and preserve long record of human experience it carries in its steel and upholstery. Written for both gearheads and Sunday drivers, Auto Biography charts the shifting nature of the American Dream and our strange and abiding relationship with the automobile, through an iconic classic and an improbable, unforgettable hero.

Project Street Rod is a complete guide to restoring a vintage car, written by auto-restoration guru Larry Lyles, a regular contributor to Auto Restorer magazine. In this 21-chapter volume, Lyles walks the car owner through every step of the modification, from the disassembly of the car and to the finish touches, all with detailed instructions. "Lyles transforms a beat-up 1946 Ford into a car that 'looks nice, is very dependable, and is decked out with many of the [necessary] modern-day trappings.'" The title of each chapter is straightforward and tells the restorer exactly which step Lyles is explaining. The contents includes: beginning the disassembly, exterior and interior, and taking proper measurements of each component; installing the front suspension; installing the engine; shocks, spring and metal lines; floor pan installation, "suicide" doors, chopping and completing the top chop, seats, air-conditioning, and brake pedal; first project mock-up; working with body filler; color selection; new parts and fresh primer; ordering and installing the final clear coats; buildup; interior trim; headliner and center console; and finishing touches. Each step in every chapter is photographed as the author progresses and includes captions to spell out exactly what has to happen. The book offers helpful advice about choice of tools and tips to make even beginners feel confident about tackling the steps involved. With nearly forty years experience in repairing, rebuilding, and restoring classic cars (and lots of unclassic ones like this 1946 Ford!), Lyles emphasizes the reader's need to organize his or her project by determining the course of the project, researching suppliers, making lists of parts and their conditions, creating spreadsheets for estimated and actual costs, and photographing each component as a reference for later in case the restoration goes off track. Each chapter ends with a "notes" page for the reader to record his or her progress, making this manual a practical workbook as well. When the reader gets to the final pages of the book and reads the sections "Street Rod" and "The Walk Around," there will be a true sense of accomplishment. An appendix of part suppliers and an index complete the book.
