Written by a practicing emergency physician, The White Coat Investor is a high-yield manual that specifically deals with the financial issues facing medical students, residents, physicians, dentists, and similar high-income professionals. Doctors are highly-educated and extensively trained at making difficult diagnoses and performing life saving procedures. However, they receive little to no training in business, personal finance, investing, insurance, taxes, estate planning, and asset protection. This book fills in the gaps and will teach you to use your high income to escape from your student loans, provide for your family, build wealth, and stop getting ripped off by unscrupulous financial professionals. Straight talk and clear explanations allow the book to be easily digested by a novice to the subject matter yet the book also contains advanced concepts specific to physicians you won't find in other financial books. This book will teach you how to:

- Graduate from medical school with as little debt as possible
- Escape from student loans within two to five years of residency graduation
- Purchase the right types and amounts of insurance
- Decide when to buy a house and how much to spend on it
- Learn to invest in a sensible, low-cost and effective manner with or without the assistance of an advisor
- Avoid investments which are designed to be sold, not bought
- Select advisors who give great service and advice at a fair price
- Become a millionaire within five to ten years of residency graduation
- Use a "Backdoor Roth IRA" and "Stealth IRA" to boost your retirement funds and decrease your taxes
- Protect your hard-won assets from professional and personal lawsuits
- Avoid estate taxes, avoid probate, and ensure your children and your money go where you want when you die
- Minimize your tax burden, keeping more of your hard-earned money
- Decide between an employee job and an independent contractor job
- Choose between sole proprietorship, Limited Liability Company, S Corporation, and C Corporation

Bill and Mary Toohey are average middle income people from a small Iowa town. Bill has been employed for 23 years as a Vocational Rehabilitation Counselor and Mary has worked for 20 years as an Office Manager for a small psychological firm. They started saving and investing in 1991 when their net worth was \$63,000. Eight years later their net worth was \$467,000. In other words, their assets increased by an average of more than \$50,000 per year during that period while their income (not counting dividends and capital gains) averaged about \$65,000 per year. But it wasn't always easy. They have three children, Colleen (24), Tim (22), and Meghann (14). Tim has been severely disabled since birth and despite the challenges of helping Tim cope with his chronic illnesses, the Toohey family has been able to achieve financial freedom on a modest income. They were able to build a sizable nest egg in eight years while encountering some of life's biggest expenses during the period. They helped to pay for their daughter's college education and wedding, paid cash for a new car, and made several expensive home improvements. Despite those major expenses the Tooheys still managed to save 46% of their gross income and were listed among the "Best Personal Finance Managers in America" in the December 1994 issues of *Money* magazine. The Tooheys' story, in an article written by Bill, appeared in the April 1997 issue of *Money* magazine. Mary co-authored an article published in the February 1998 issue of *McCall's* magazine. In May, 1997 Bill was invited to speak at *Money* magazine's Elgin Project seminar series. *Money* magazine "adopted" Elgin, Illinois and brought in speakers with expertise in personal finance. Former President Bush kicked off the event. How did they do it? How do they think? How do they live? Is it possible to save so much and still have a decent life? Can my family do this? Get the answers to all these questions and more in a book written specifically for families with children who don't earn big bucks.

Having a good relationship with money is tough—whether you have millions in the bank or just a few bucks to your name. Why? Because just like any other relationship, your life with money has its ups and downs, its twists and turns, its breakups and makeups. And just like other relationships, living happily with money really comes down to love—which is why love is the basis of money maven Kate Northrup's book. After taking the Money Love Quiz to see where on the spectrum your relationship with money stands—somewhere between "on the outs" and "it's true love!"—Northrup takes you on a rollicking ride to a better understanding of yourself and your money. Step-by-step exercises that address both the emotional and practical aspects of your financial life help you figure out your personal perceptions of money and wealth and how to change them for the better. You'll learn about thought patterns that may be holding you back from earning what you're worth or saving what you can. You'll learn how to chart your current financial life and create a plan to get you to where you want to be—whether that's earning enough to live in a penthouse in Manhattan or a cabin in the Rockies. Using client stories and her own saga of moving from \$20,000 of debt to complete financial freedom by the age of 28, Northrup acts as a guide in your quest for personal financial freedom. She'll teach you how to shift your beliefs about money, create a budget, spend in line with your values, get out of debt, and so much more. In short, she'll teach you to love your money, so you can love your life.

If you think financial health is beyond your reach, think again. *I Will Teach You To Be Rich* is the modern money classic that has revolutionised the lives of countless people all over the world, teaching them how to effectively manage their finances, demolish their debt, save better and get the most out of their bank accounts, credit cards and investments. Now, Ramit Sethi, who has been described by Forbes as a 'wealth wizard' and by Fortune as 'the new finance guru', is back with a completely revised second edition of *I Will Teach You To Be Rich*, updating it with new tools and insights on money and psychology, along with fantastic stories of how previous readers have used the book to enrich their lives. From crushing your debt and student loans to talking your way out of late fees, to dead simple investment strategies and negotiating that big raise at work, this is the no-guilt, no-excuses, no-BS 6-week programme that will help you get your finances where you want them to be.

Learn to start open, productive talks about money with your parents as they age As your parents age, you may find that you want or need to broach the often-difficult subject of finances. In *Mom and Dad, We Need to Talk: How to Have Essential Conversations with Your Parents About Their Finances*, you'll learn the best ways to approach this issue, along with a wealth of financial and legal information that will help you help your parents into and through their golden years. Sometimes parents are reluctant to address money matters with their adult children, and topics such as long-term care, retirement savings (or lack thereof), and end-of-life planning can be particularly touchy. In this book, you'll hear from others in your position who have successfully had "the talk" with their parents, and you'll read about a variety of conversation strategies that can make talking finances more comfortable and more productive. Learn conversation starters and strategies to open the lines of communication about your parents' finances Discover the essential financial and legal information you should gather from your parents to be prepared for the future Gain insight from others' stories of successfully talking money with aging parents Gather the courage, hope, and motivation you need to broach difficult subjects such as care facilities and end-of-life plans For children of Baby Boomers and others looking to assist aging parents with their finances, *Mom and Dad, We Need to Talk* is a welcome and comforting read. Although talking money with your parents can be hard, you aren't alone, and this book will guide you through the process of having fruitful financial conversations that lead to meaningful action.

Struggling with debt? Get realistic help that's actually useful, from Liz Weston, one of the most popular and respected personal finance experts! Today, people struggling with debt have far fewer options: lenders are stingier, which makes it harder to avert disaster, or to recover from setbacks like foreclosure, short sales, or bankruptcy. (Meanwhile, people with good credit have more options than ever, including some of the lowest interest rates in decades.) You need an up-to-date guide that can help you assess options, find help, discover opportunities, and take action that works. Liz Weston's Deal with Your Debt, Updated and Revised Edition is that guide. You'll learn which debts can actually help build wealth over time, and which are simply toxic. Weston offers practical guidelines for assessing how much debt is safe -- and compassionate, realistic guidance if you've gone beyond the safety zone. Today, a good credit score is essential for getting decent terms on credit--or for getting credit at all. But that's just the beginning: Your credit score rating can be reviewed by everyone from employers to cell phone carriers. Your Credit Score, Fourth Edition thoroughly covers brand-new laws changing everything from how your credit score can be used to how you can communicate with collectors. This edition also adds simple graphics revealing exactly how much skipped payments, bankruptcies, and other actions will lower your credit ratings, and how long it takes to rebound. Weston updates her expert guidance on using FICO 08 to raise your score, fighting lower limits and higher rates, maintaining the right mix of cards and balances, bouncing back from bad credit, choosing credit "solutions" that help, not hurt... and much more!

Would you take action to find financial freedom, peace, and joy if you only had to spent 5

minutes a day on something? Would you spend 300 seconds a day to reduce financial stress in your life? If you answered yes to the above, I say kudos to you for taking action to read this book! Carving time out of your schedule to further educate yourself on something that has the potential to change your life will be rewarding! You get 'double brownie points' especially since: * Personal finance can be a very boring subject to learn about. * Personal finance is not talked about openly in our society (it is like discussing one's underwear in public). Being that personal finances is a hush, hush subject in our society, it probably explains why many people today are living in such pain, embarrassment and shame around their finances. It seems strange when you step back to think about the incredible impact finances can have on our lives, our community and our work. Yet knowing this, we still don't talk about it, we don't take time to learn about it, and frankly, the thought of doing so can give many of us the shiver me timbers. Why do I know all this? I use to be one of "those people" who: * Didn't talk about my finances. * Didn't have time to learn about it * Didn't have any inclination to learn about it. (Just between you and me, I would have been horrified at taking a class or reading a book on personal finances. Yuck and double yuck.) Why then am I writing a book about personal finances? Simply put, I never want you to go through the pain, shame, and stress that out of control finances can bring to your life. Sadly, financial struggles are much more common than most people would think. * A shocking 70% of Americans today are living paycheck to paycheck. * Financial issues continue to be the number one cause of divorce. Most people think financial disaster will never happen to them. I know we sure didn't. Our world was turned upside down when we experienced it. It wasn't long ago that my family went through a very painful time in our lives where we found ourselves emotionally and financially devastated. It seemed like literally overnight we found ourselves drowning in debt and living a life full of fear, embarrassment and shame. We spent many hours stressing about money and had many sleepless nights. Fast forward to today, and our family now lives with peace, joy, happiness, and financial abundance. We no longer worry about debt collectors calling our home, unexpected bills lurking in our mailbox, or how we are going to pay for our groceries. I am proud to say that even with four kids and putting our family first, in just three years we have: * Paid off over \$150,000 worth of debt. * Paid over \$30,000 worth of medical related expenses. * Learned how to live beyond rich using simple and easy steps that we can now do in about 5 minutes each day. Think you can't learn how to get a handle on your finances? Well you can. If a person like me who HATED the word budget and who MAYBE checked their bank accounts once a year can learn how to get a handle on their finances, YOU can too. This blunt, to the point, no nonsense book will show you how to get your finances under control and get you on the path to living with peace and joy in your finances. The best part is, you only have to spend 5 minutes a day working on your finances with the simple and easy incremental steps I will lay out for you. Really, 5 minutes is all I need to learning how to live beyond rich? Yep, if you spend 5 minutes a day paying attention and taking action to gain control of your finances, you will accomplish much more than hours of worrying each day. Are you tired of worrying about finances? Well then...let's get going! Know this before we start...I am delighted that you're starting down your own path to learning how to live beyond rich. Remember, if I can do it, YOU can too! Live Beyond Rich! Live Beyond Awesome! Jen McDonoug

"The newbie investor will not find a better guide to personal finance." —Burton Malkiel, author of A RANDOM WALK DOWN WALL STREET TV analysts and money managers would have you believe your finances are enormously complicated, and if you don't follow their guidance, you'll end up in the poorhouse. They're wrong. When University of Chicago professor Harold Pollack interviewed Helaine Olen, an award-winning financial journalist and the author of the bestselling Pound Foolish, he made an offhand suggestion: everything you need to know about managing your money could fit on an index card. To prove his point, he grabbed a 4" x 6" card, scribbled down a list of rules, and posted a picture of the card online. The post went viral. Now, Pollack teams up with Olen to explain why the ten simple rules of the index card outperform more complicated financial strategies. Inside is an easy-to-follow action plan that works in good times and bad, giving you the tools, knowledge, and confidence to seize control of your financial life.

**A Refinery29 Best Book of 2018* *One of Real Simple's Most Inspiring Books for Graduates* *Indie Personal Finance Bestseller* How to get good with money, even if you have no idea where to start. The Financial Diet is the personal finance book for people who don't care about personal finance. Whether you're in need of an overspending detox, buried under student debt, or just trying to figure out how to live on an entry-level salary, The Financial Diet gives you tools to make a budget, understand investments, and deal with your credit. Chelsea Fagan has tapped a range of experts to help you make the best choices for you, but she also knows that being smarter with money isn't just about what you put in the bank. It's about everything—from the clothes you put in your closet, to your financial relationship habits, to the food you put in your kitchen (instead of ordering in again). So The Financial Diet gives you the tools to negotiate a raise and the perfect cocktail recipe to celebrate your new salary. The Financial Diet will teach you:*

- how to get good with money in a year.
- the ingredients everyone needs to have a budget-friendly kitchen.
- how to talk about awkward money stuff with your friends.
- the best way to make (and stick to!) a budget.
- how to take care of your house like a grown-up.
- what the hell it means to invest (and how you can do it).

An illustrated, practical guide to navigating your financial life, no matter your financial situation "a potent mix of deeply practical and wonderfully empathetic" —Erin Lowry, author of Broke Millennial "one of the most approachable financial books I've ever read." —Refinery 29 We are all weird about money. Whether you have a lot or a little, your feelings and beliefs about money have been shaped by a combination of silence (or even shame) around talking about money, personal experiences, family and societal expectations, and a whole big complex system rigged against many of us from the start. Begin with that baseline premise and it's no surprise so many of us find it so difficult to save enough money (but way too easy to get trapped in ballooning credit card debt), emotionally draining to deal with student loans, and nearly impossible to understand the esoteric world of investing. Unlike most personal finance books that focus on skills and behaviors, FINANCE FOR THE PEOPLE asks you to examine your beliefs and experiences around money—blending extremely practical exercises with mindfulness, and including more than 50 illustrations and diagrams to make the concepts accessible (and even fun). With deep insider expertise from years spent in many different corners of the financial industry, Paco de Leon is a friendly, approachable, and wise guide who invites readers to change their relationship with money. With her holistic approach you'll learn how to:

- root out your unconscious beliefs about money
- untangle the mental and emotional burden of student loans to pay them off
- use a gratitude practice to help you think differently about spending
- break out of the debt cycle and begin building wealth

This book is for anyone who feels unseen, ignored, or bored to death by the way personal finances are approached and taught, and is ready to go on a journey of self-discovery and step into their financial power.
