*Critical Reading and Writing is a fully introductory, interactive textbook that explores the power relations at work in and behind the texts we encounter in our everyday lives. Using examples from numerous genres – such as popular fiction, advertisements and newspapers – this textbook examines the language choices a writer must make in structuring texts, representing the world and positioning the reader. Assuming no prior knowledge of linguistics, Critical Reading and Writing offers guidance on how to read texts critically and how to develop effective writing skills. Features include: * activities in analysis, writing and rewriting * an appendix of comments on activities * further reading sections at the end of each unit * a glossary of linguistics terms * suggestions for five extended writing projects. Written by an experienced teacher, Critical Reading and Writing has multidisciplinary appeal but will be particularly relevant for use on introductory English and Communications courses.*

This book introduces Critical Language Awareness (CLA) Pedagogy as a robust and research-grounded framework to engage and support students in critical examinations of language, identity, privilege and power. Starting with an accessible introduction to CLA, chapters cover key topics—including World Englishes, linguistic prejudice, news media literacy, inclusive language practices, and more—in an inviting and thought-provoking way to promote reflection and analysis. Part I provides an overview of the foundations of CLA pedagogy, while Part II highlights four instructional pathways for CLA pedagogy: Sociolinguistics, Critical Academic Literacies, Media/Discourse Analysis, and Communicating Across Difference. Each pathways chapter is structured around Essential Questions and Transferable Skills, and includes three thematic learning sequences. Part III offers tools and guidance for tailoring CLA pedagogy to the reader's own teaching context and to students' individual needs. The volume's wealth of resources and activities are a pedagogical toolkit for supporting and embracing linguistic diversity in the classroom. The cohesive framework, concrete strategies, engaging activities, and guiding questions in this volume allow for a deeper understanding of CLA, but also a clear roadmap for implementing CLA pedagogy in the classroom. Synthesizing relevant research from educational linguistics and writing studies, this book is ideal for courses in English/literary education, college composition, L2 writing instruction, and educational linguistics.

The book inquires into critical thinking through a cultural approach. Based on an ethnographic study, it compares Chinese postgraduate students' conceptualisations and applications of critical thinking in three different settings in China and the UK. From an insider's perspective, it analyses the intricate interplay of multiple cultural and individual factors that conditions students' critical thinking development as they learn to write an academic thesis and to manage postgraduate learning. The book offers insights into the nature of problems that Chinese students encounter with critical thinking and envisions possibilities for the ideas for critical thinking to have a transformative power in an intercultural space. The book will primarily be of interest to academics and educators who work on critical thinking and academic writing, especially those who work with Chinese students. Scholars interested in intercultural issues in higher education may also find it relevant.

Life writing projects have become part of the expanding field of qualitative research methods in recent years and advances in critical approaches are reshaping methodological pathways. Critical Approaches to Life Writing Methods in Qualitative Research gives researchers and students looking for a brief compendium to guide their methodological thinking a concise and working overview of how to approach and carry out different forms of life writing. It equips the reader with the tools to carry out life writing projects from start to finish, including choosing a topic or subject, examining lives as living data, understanding the role of documents and artifacts, learning to tell the story, and finally writing/performing/displaying through the voice of the life writer. The authors also address the ways a researcher can begin a project, work through the issues they might face along the journey, and arrive at a shareable product. With its focus on the plurality of life writing methodologies, Critical Approaches to Life Writing Methods in Qualitative Research occupies a distinct place in qualitative research scholarship and offers practical exercises to guide the researcher. Examples include exploring authorial voice, practical applications of reflexivity exercises, the relationship between the narrator and participants, navigating the use of public and private archives, understanding the processes of collaborative inquiry and collaborative writing, and writing for various audiences.

A “delightful reader’s companion” (The New York Times) to the great nineteenth-century British novels of Austen, Dickens, Trollope, the Brontës, and more, this lively guide clarifies the sometimes bizarre maze of rules and customs that governed life in Victorian England. For anyone who has ever wondered whether a duke outranked an earl, when to yell “Tally Ho!” at a fox hunt, or how one landed in “debtor’s prison,” this book serves as an indispensable historical and literary resource. Author Daniel Pool provides countless intriguing details (did you know that the “plums” in Christmas plum pudding were actually raisins?) on the Church of England, sex, Parliament, dinner parties, country house visiting, and a host of other aspects of nineteenth-century English life—both “upstairs” and “downstairs. An illuminating glossary gives at a glance the meaning and significance of terms ranging from “ague” to “wainscoting,” the specifics of the currency system, and a lively host of other details and curiosities of the day.

Should we stop teaching critical thinking? Meant as a prompt to further discussion, Critical Condition questions the assumption that every student should be turned into a “critical thinker.” The book starts with the pre-Socratics and the impact that Socrates’ death had on his student Plato and traces the increasingly violent use of critical “attack” on a perceived opponent. From the Roman militarization of debate to the medieval Church’s use of defence as a means of forcing confession and submission, the early phases of critical thinking were bound up in a type of attack that Finn suggests does not best serve intellectual inquiry. Recent developments have seen critical thinking become an ideology rather than a critical practice, with levels of debate devolving to the point where most debate becomes ad hominem. Far from arguing that we abandon critical inquiry, the author suggests that we emphasize a more open, loving system of engagement that is not only less inherently violent but also more robust when dealing with vastly more complex networks of information. This book challenges long-held beliefs about the benefits of critical thinking, which is shown to be far too linear to deal with the twenty-first century world. Critical Condition is a call to action unlike any other.

Description: Students often face a daunting dilemma in academia when it comes to writing. In their composition courses they are encouraged to express their emotions, find themselves, construct their own meanings, discover their voices, and own their identities through writing. But when they are asked to write lab reports, history papers, sociological studies, or to write discipline specific documents for their majors, their professors aren't much interested in self-expression, self-esteem, identity politics, or endlessly open-ended non-answers in search of a question. Their professors want clear writing that makes sense and that evidences critical thinking. What are students to do? Writing That Makes Sense takes students through the basics of the writing process and critical thinking, and it teaches them how to write various types of academic essays they are likely to encounter in their academic careers. Drawing on nearly twenty years of experience in teaching college composition and professional writing, David S. Hogsette combines relevant writing pedagogy and practical assignments with the basics of critical thinking and logical thought to provide students with step-by-step guides for successful writing in academia. Writing That Makes Sense includes many professional essays and articles from a variety of voices often underrepresented in academia today, thus introducing students to a wider intellectual diversity. Students will also benefit from a chapter on information literacy that provides practical tips on engaging the research process and writing research papers. About the Contributor(s): David S. Hogsette is Associate Professor of English and Writing Coordinator at the Old Westbury campus of the New York Institute of Technology, where he teaches composition, professional writing, and various upper-level literature courses. His teaching directly impacts his scholarship, and he has published articles and delivered lectures at national and international conferences on literary topics related to English Romanticism, Gothic literature, fantasy literature, science fiction, and theocentric approaches to literary studies.

Practicing scientists know that the quality of their livelihood is strongly connected to the quality of their writing, and critical thinking is the most necessary and valuable tool for effectively generating and communicating scientific information. Writing in the Life Sciences is an innovative, process-based text that gives beginning writers the tools to write about science skillfully by taking a critical thinking approach. Laurence Greene emphasizes "writing as thinking" as he takes beginning writers through the important stages of planning, drafting, and revising their work.

Throughout, he uses focused and systematic critical reading and thinking activities to help scientific writers develop the skills to effectively communicate. Each chapter addresses a particular writing task rather than a specific type of document. The book makes clear which tasks are important for all writing projects (i.e., audience analysis, attending to instructions) and which are unique to a specific writing project (rhetorical goals for each type of document). Ideal for Scientific Writing courses and writing-intensive courses in various science departments (e.g., Biology, Environmental Studies, etc.), this innovative, process-based text goes beyond explaining what scientific writing is and gives students the tools to do it skillfully.

CRITICAL THINKING, THOUGHTFUL WRITING begins with the premise that thinking well involves using language well, and vice versa. This rhetoric with readings—written by critical-thinking scholar John Chaffee and English professors Christine McMahon and Barbara Stout—provides thorough coverage of the writing process, going beyond the traditional rhetoric to teach students how to evaluate sources, images, and arguments.

Each chapter focuses on a critical-thinking skill--such as problem solving or analysis of complex issues--that is explored through "Thinking-Writing Activities" and thematically linked readings. The text helps students develop these skills through carefully sequenced pedagogy and a cross-disciplinary approach that asks them to complete writing assignments and critically evaluate readings drawn from a variety of disciplines. The Fifth Edition offers new readings, a new "Thinking Critically About New Media" feature in each chapter, and more photos, which emphasize visual rhetoric.
