

How To Write A Masters Thesis By Yvonne N Bui

A Course for Nonnative Speakers of English. Genre-based approach. Includes units such as graphs and commenting on other data and research papers.

"Magnificent . . . poems to inspire [with] brief and brilliant, offhand notes about how to read them."—Alan Cheuse, NPR Quick, joyful, and playfully astringent, with surprising comparisons and examples, this collection takes an unconventional approach to the art of poetry. Instead of rules, theories, or recipes, Singing School emphasizes ways to learn from great work: studying magnificent, monumentally enduring poems and how they are made—in terms borrowed from the "singing school" of William Butler Yeats's "Sailing to Byzantium." Robert Pinsky's headnotes for each of the 80 poems and his brief introductions to each section take a writer's view of specific works: William Carlos Williams's "Fine Work with Pitch and Copper" for intense verbal music; Emily Dickinson's "Because I Could Not Stop for Death" for wild imagination in matter-of-fact language; Robert Southwell's "The Burning Babe" for surrealist aplomb; Wallace Stevens's "The House Was Quiet and the World Was Calm" for subtlety in meter. Included are poems by Aphra Behn, Allen Ginsberg, George Herbert, John Keats, Mina Loy, Thomas Nashe, and many other master poets. This anthology respects poetry's mysteries in two senses of the word: techniques of craft and strokes of the inexplicable.

This Second Edition of Diana Ridley's bestselling guide to the literature review outlines practical strategies for reading and note taking, and guides the reader on how to conduct a systematic search of the available literature, and uses cases and examples throughout to demonstrate best practice in writing and presenting the review. New to this edition are examples drawn from a wide range of disciplines, a new chapter on conducting a systematic review, increased coverage of issues of evaluating quality and conducting reviews using online sources and online literature and enhanced guidance in dealing with copyright and permissions issues.

Over the past decade, the author has met with directors of R&D departments in large industrial firms, who are frustrated by the lack of coherent and consistent methodologies in R&D projects. As a direct result the author was asked to design and present a seminar to provide R&D engineers and scientists a standard methodology for conducting coherent, rigorous, comprehensible, and consistent R&D projects. The author also realized that this training should be included in engineering and science curricula in universities and colleges. To this end, he designed and presented a pilot course for his department that was received enthusiastically by students who participated. This course has now become a required course for all doctoral students in the author's department. This book has been designed to provide professional engineers, scientists, and students with a consistent and practical framework for the rigorous conduct and communication of complex research and development projects. Although courses and training in research methods are common and generally required of social science professionals, a vast majority of physical scientists and engineers have had no formal classroom training or on-the-job mentoring on proper procedures for research methods. Getting It Right emphasizes the comprehensive analysis of project problems, requirements, and objectives; the use of standard and consistent terminology and procedures; the design of rigorous and reproducible experiments; the appropriate reduction and interpretation of project results; and the effective communication of project design, methods, results, and conclusions. Presents a standard methodology for conducting coherent, rigorous, comprehensible, and consistent R&D projects

Thoroughly researched to appeal to the needs of R&D engineers and scientists in industry Will also appeal to students of engineering and science

Doing Your Master's Dissertation

An Easy-to-Use Guide with Clear Rules, Real-World Examples, and Reproducible Quizzes

How to Manage Your Time, Process, and Energy to Write Your Research Proposal, Thesis, and Dissertation and Get Published

The bestselling workbook and grammar guide, revised and updated! Hailed as one of the best books around for teaching grammar, The Blue Book of Grammar and Punctuation includes easy-to-understand rules, abundant examples, dozens of reproducible quizzes, and pre- and post-tests to help teach grammar to middle and high schoolers, college students, ESL students, homeschooled, and more. The learning English grammar and usage simple and fun. This updated 12th edition reflects the latest updates to English usage and grammar, and includes answers to all reproducible quizzes to facilitate self-assessment and learning. Clear and concise, with easy-to-follow explanations, offering "Just the facts" on English grammar, punctuation, and usage Fully updated to reflect the latest rules, along with help teach grammar ideal for students from seventh grade through adulthood in the US and abroad For anyone who wants to understand the major rules and subtle guidelines of English grammar and usage, The Blue Book of Grammar and Punctuation offers comprehensive, straightforward instruction.

Students completing this course will learn to express their feelings in writing, organize their thoughts into cohesive sentences, develop outlines, organize specific writing prompts, and more. Topics addressed in this one-year course include: Recognizing and listing the main parts of story structureOrganizing information in paragraphs and writing topic sentencesTurning an image into a verbal descriptionEarning how the attitudes of narrative voices affect a reader's reactionsControlling sentence length to help readers understand material. A suggested daily schedule is provided, as well as worksheets that are three-hole punched and perforated, and the addition of a reading and literature component that helps students look more deeply into the Bible and other books they select.

How to Write a Master's ThesisSAGE

Every year almost half a million people start a graduate program of some sort. For many, grad school is the critical step toward a career as a researcher or teacher in higher education. Others might be pursuing a masters or a doctorate for personal fulfillment or to obtain the skills and credentials for a career outside the academy. No matter which group you are in, this book provides brilliant an out of graduate school.Kevin D. Haggerty and Aaron Doyle--two veteran directors of graduate programs and recipients of mentoring awards--have seen it all, the good and the bad. Here in this funny and shrewd book they lay out the fifty-seven ways to screw up grad school...so that you can avoid them. Their litany of foul-ups are organized by theme and cover the grad school experience from program, to your interactions with your advisor, committee, and fellow students, to balancing your personal and academic lives, through the pitfalls of completing your thesis and hunting for a job or postdoctoral fellowship. Although the authors guarantee that following their 57 step program will result in a spectacular crash and burn, their primary goal is to breathe some life and humor into students and potential students on how to navigate and ultimately succeed in graduate school.

Write Like the Masters

How One of the World's Bestselling Authors Fixed My Book and Changed My Life

Pinochio, the Tale of a Puppet

Want To Live Your Best? Learn from the Best. Time and time again you've been told to find your own unique writing style, as if it were as simple as pulling it out of thin air. But finding your voice isn't easy, so where better to look than to the greatest writers of our time? Write Like the Masters analyzes the writing styles of twenty-one great novelists, including Charles Dickens, Edith Wharton, Franz Kafka, Flannery O'Connor, and Ray Bradbury. This fascinating and insightful guide shows you how to imitate the masters of literature and, in the process, learn advanced writing secrets to fire up your own work. You'll discover: • Herman Melville's secrets for creating characters as memorable as Captain Ahab • How to master point of view with techniques from Fyodor Dostoevsky • Ways to pick up the pace by keeping your sentences lean like Ernest Hemingway • The importance of sensual details from James Bond creator Ian Fleming • How to add suspense to your story by following the lead of the master of horror, Stephen King Whether you're working on a unique voice for your next novel or you're a composition student toying with different styles, this guide will help you gain insight into the work of the masters through the rhetorical technique of imitation. Filled with practical, easy-to-apply advice, Write Like the Masters is your key to understanding and using the proven techniques of history's greatest authors.

Pinochio, The Tale of a Puppet follows the adventures of a talking wooden puppet whose nose grew longer whenever he told a lie and who wanted more than anything else to become a real boy. As carpenter Master Antonio begins to carve a block of pinewood into a leg for his table the leg shouts out, "Don't strike me too hard!" Frightened by the talking leg, Master Cherry does not know what to do until his neighbor Geppetto drops by looking for a piece of wood to build a marionette. Antonio gives the block to Geppetto. And thus begins the life of Pinochio, the puppet that turns into a boy.Pinochio, The Tale of a Puppet is a novel for children by Carlo Collodi it about the mischievous adventures of Pinochio, an animated marionette, and his poor father and woodcarver Geppetto. It is considered a classic of children's literature and has spawned many derivative works of art. But this is not the story we've seen in film but the original version full of humor and suspense faced by Pinochio. It includes 40 illustrations.

What is expected? What should the thesis consist of? How can the whole process be made a bit easier? How to achieve the best possible result? Working within strict time limits, and under pressure right from the start, what does the student need to do to ensure that the thesis is finished? In How to Write a Better Minor Thesis, experienced advisors Dr Paul Gruba and Professor Justin Zobel lay out step-by-step guidelines for writing a minor thesis. Based on decades of working with students undertaking their first piece of research, they take novice researchers through the process of completing a minor thesis from initial steps to final on-time submission. Written in a friendly manner, this concise book—a companion to their senior text on the challenges of research writing, How To Write A Better Thesis—will help you to successfully tackle this fresh challenge. How to Write a Better Minor Thesis contains sections of condensed material from How To Write A Better Thesis, complementing the entirely new material written for minor thesis students.

What if writing scientific papers was faster, easier, and a bit less painful? This book provides a step-by-step, top-down approach that makes it easier to turn your hard-won results into research papers that your fellow scientists want to read and cite. "I just wrote a (rough) first draft of a paper during a 3-hour flight, and if it wasn't for these teachings, this would have taken me days (if not weeks)!" —Talayeh Aleidawod, James S. McDonnell Postdoctoral Fellow, University of Illinois The book's unique approach builds on what I've learned through coauthoring close to 100 research papers with students. You'll learn how to outline your paper from top to down, how to develop your story, and how to think about what to write before you write it. You'll also learn how to deal with many issues that writers of science commonly face, from the fear of the blank page to dealing with critical reviews. Here's what you get: A complete step-by-step plan for writing scientific papers, from choosing which results to include to wrapping up the paper in the Discussion section Concrete, actionable, and practical advice, from a paragraph-level template for the Introduction to guidance on preparing plots and figures Lots of writing tips, from placing signposts in your text to shortening and straightening your sentences This book has been written for the PhD student who is aiming to write a journal article on her research results, but it should also be useful to any scientist who has ever found writing difficult. Whatever the stage of your career, if you'd like to learn how to write research papers systematically and efficiently, this is the book for you! The book includes PART I: STORY 1. How To Choose The Key Point Of Your Paper 2. How To Choose The Supporting Results 3. How To Write The Abstract 4. How To Choose The Title PART II: OUTLINE 5. The Power Of Outlining 6. How To Write The Introduction, Part I: Structure 7. How To Write The Introduction, Part II: A Four-Paragraph Template 8. How To Write The Introduction, Part III: The Lede 9. How To Write The Materials And Methods 10. How To Write The Results, Part I: Figures 11. How To Write The Results, Part II: Text 12. How To Write The Discussion PART III: WORDS 13. How Does Your Reader Read? 14. How To Write Your First Draft 15. How To Edit Your First Draft 16. Tips For Revising Content And Structure 17. Tips For Editing Sentences PART IV: ITS NOT OVER YET 18. How To Write The Cover Letter 19. How To Deal With Reviews About the author I am a professor of computational science and an experienced academic with around 100 published papers. My research is interdisciplinary, to say the least: I have studied the social fabric of smartphone users, the genetic structure of ant supercolonies, the connectome of the human brain, networks of public transport, and the molecular biology of the human immune system, to name a few. So one could say that I have a broad range of scientific interests (or that I simply cannot choose). But that's exactly the way I like it!

How to Succeed in School Without Spending All Your Time Studying: A Guide for Kids and Teens

Emulating the Best of Hemingway, Faulkner, Salinger, and Others

Succeeding with Your Master's Dissertation

Writing with the Master

Reverse Professional Lessons for Graduate Students

A Master's dissertation is very different from an academic essay, yet all too often post-graduate students are expected to make the transition without guidance. This guide brings together advice from a team of experts on how to plan, draft, write and revise a thesis.

The Writing Master, a work of historical fiction set in 1856 in New Haven, Connecticut, is about Charles Cooper, a penman-teacher of handwriting who is attempting to come to terms with his tragic past, and Lily Prescott, an unconventional woman with her own troubled story. When a brutal murder takes place just outside the city, Charles becomes involved in its investigation. From one of America's great professors, author of Why Teach? and Why Read?--an inspiring exploration of the importance of writing well, for creators, educators, students, and anyone who writes. Why write when it sometimes feels that so few people really read--read as if their lives might be changed by what they're reading? Why write, when the world wants to backbreak, mindbreaking, lonely work. So why? Because writing, as celebrated professor Mark Edmundson explains, is one of the greatest human goods. Real writing can do what critic R. P. Blackmur said it could: add to the stock of available reality. Writing teaches us to think: it can bring our minds to birth. And once we're at home with words, there are few more something he believes everyone ought to know. Edmundson offers us Why Write?, essential reading--both practical and inspiring--for anyone who yearns to be a writer, anyone who simply needs to know how to get an idea across, and anyone in between--in short, everyone.

"From finding a research topic through to the final write up, this clear guide takes the mystery out of graduate-level research. This book will help your project succeed." James V. Spickard, Professor of Sociology, University of Redlands. US Just starting your Master's? Worried about your dissertation? This book is an indispensable guide to writing a successful Master's early stages of writing a dissertation, such as deciding on what to research, planning your project and searching for literature online. It then guides you through different aspects of carrying out your research and writing up, helping you to: write a research proposal choose one or more methods write the introduction and conclusion discuss the literature analyse your argument. The book offers guidance that other books often miss, from dealing with emotional blocks, to ways of identifying your strengths and weaknesses, and improving your writing. It addresses the social aspects of the writing process, such as choosing and working with an advisor, using social media and forming student work groups for added help and inspiration. The book closes with reflection questions designed to help you apply what you've read to your own work. SAGE Study Skills are essential study guides for students of all levels. From how to write great essays and succeeding at university, to writing your undergraduate dissertation and doing postgraduate research, SAGE Study Skills help you get the best from your studies.

Why Write?

A Master Class on the Art of Writing and Why It Matters

From Start to Finish

Your future as a writer is in your hands. Whether you are a newcomer or an accomplished professional, a novelist, story writer, or a writer of nonfiction, you will find this book a wealth of immediately useful guidance not available anywhere else. As Sol Stein, renowned editor, author, and instructor, explains, "This is not a book of theory. It is a book of useable solutions-- how to fix writing that is flawed, how to fix writing that is good but not in the first place." You will find out the great unspoken secrets of craftsmanship in Chapter 5, called "Markers: The Key to Swift Characterization." In Chapter 7, Stein reveals for he first time in print the wonderful system for creating instant conflict developed in the Playwrights' Group of the Actors Studio, of which he was a founder. In "Secrets of Good Dialogue," the premier teacher of dialogue gives you the instantly usable techniques that not only make verbal exchanges exciting but that move the story forward immediately. You won't need to struggle with flashbacks or background material after you've read Chapter 14, which shows you how to bring background into the foreground. Writers of both fiction and nonfiction will relish the amphetamines for speeding up pace, and the many ways to liposuction flab, as well as how to tap originality and recognize what successful titles have in common. You'll discover literary values that enhance writing, providing depth and resonance. You'll bless the day you read Chapters 32 and 33 and discover why revising by starting at page one can be a serious mistake, and how to revise without growing cold on your manuscript. In the pages of this book, nonfiction writers will find a passport to the new revolution in journalism and a guide to using the techniques of fiction to enhance nonfiction. Fresh, useful, informative, and fun to read and reread, Stein on Writing is a book you will mark up, dog-ear, and cherish.

"Margaret Carrill's background as a linguist and research communications educator and Patrick O'Connor's experience as both research scientist and educator synergize to improve both the science and art of scientific writing. If the authors' goal is to give scientists the tools to write and publish compelling, well documented, clear narratives that convey their work honestly and in proper context, they have succeeded admirably." Veterinary Pathology, July 2009 "[The book is] clearly written, has a logical step-by-step structure, is easy to read and contains a lot of sensible advice about how to get scientific work published in international journals. The book is a most useful addition to the literature covering scientific writing." Aquaculture International, April 2009 Writing Scientific Research Articles: Strategy and Steps guides authors in how to write, as well as what to write, to improve their chances of having their articles accepted for publication in international, peer reviewed journals. The book is designed for scientists who use English as a first or an additional language; for research students and those who teach them paper writing skills; and for early-career researchers wanting to hone their skills as authors and mentors. It provides clear processes for selecting target journals and writing each section of a manuscript, starting with the results. The stepwise learning process uses practical exercises to develop writing and data presentation skills through analysis of well-written example papers. Strategies are presented for responding to referee comments, as well as ideas for developing discipline-specific English language skills for manuscript writing. The book is designed for use by individuals or in a class setting. Visit the companion site at www.writersresearch.com.au for more information.

Expert writing advice from the editor of the Boston Globe best-seller, The Writer's Home Companion Dissertation writers need strong, practical advice, as well as someone to assure them that their struggles aren't unique. Joan Bolker, midwife to more than one hundred dissertations and co-founder of the Harvard Writing Center, offers invaluable suggestions for the graduate-student writer. Using positive and relevant, she begins by reminding thesis writers that being able to devote themselves to a project that truly interests them can be a pleasurable adventure. She encourages them to pay close attention to their writing method in order to discover their individual work strategies that promote productivity; to stop feeling fearful that they may disappoint their advisors or family members; and to tailor their theses to their own writing style and personality needs. Using field-tested strategies she assists the student through the entire thesis-writing process, offering advice on choosing a topic and an advisor, on disciplining one's self to work at least fifteen minutes each day; setting short-term deadlines, on revising and defing the thesis, and on life and publication after the dissertation. Bolker makes writing the dissertation an enjoyable challenge.

A surprisingly simple way for students to master any subject--based on one of the world's most popular online courses and the bestselling book A Mind for Numbers and its wildly popular online companion course "Learning How to Learn" have empowered more than two million learners of all ages from around the world to master subjects that they once struggled with. Fans often wish they'd discovered these learning strategies earlier and ask how they can help their kids master these skills as well. Now in this new book for kids and teens, the authors reveal how to make the most of time spent studying. We all have the tools to learn what might not seem to come naturally to us at first--the secret is to understand how the brain works so we can unlock its power. This book explains: Why sometimes letting your mind wander is an important part of the learning process How to avoid "rut thinking" in order to think outside the box Why having a poor memory can be a good thing The value of metaphors in developing understanding A simple, yet powerful, way to stop procrastinating Filled with illustrations, application questions, and exercises, this book makes learning easy and fun.

Jensen's Format Writing is concerned with developing expository writing skills for high school students. This type of writing exposes, puts forth, explains, reveals, or exhibits in detail about something. It has a purpose to inform, clarify, and perhaps even to persuade. Such writing may simply describe, or it may give a series of reasons. In any case, there is a fundamental point that is made. How that point is made may often determine whether the piece is accepted or rejected. Students completing this course will learn valuable skills. the secret of cutting your work in half when it comes to writing a paper.how to order your presentation for its most powerful effect on the reader.a technique for getting the essence of what you read down on paper for future reference.how to stack up your ideas so that they flow together in a natural fashion.how to move ideas from sentence to sentence by following a simple rule.all about what and how to document your sources when doing research and writing.

"I have been publishing novels wasting away on his hard drive, Tony Vanderwarker is astonished when John Grisham offers to take him under his wing and teach him the secrets of thriller writing. "The beginning and the end are easy," Grisham tells him. "It's the three hundred pages in the middle that's the hard part."To ensure his plot doesn't run out of gas, Grisham puts Tony through his outline process. Tony does one, and then Grisham asks for another ? and another ? and another. As they work together, Grisham reveals the techniques that have helped him create compelling bestsellers for more than two decades?For instance, "You've got to hook your reader in the first forty pages or you'll lose them."After a year of constructing outlines, Grisham finally gives Tony the go-ahead to start writing.Withing with the Master immerses the reader in the creative process as Tony struggles to produce a successful thriller. It's a roller coaster ride, sometimes hilarious, and often full of ups and downs. Grisham's critiques and margin notes to Tony reveal his nimble imagination and plot development genius. For Grisham fans, Vanderwarker's memoir pulls back the curtain on his writing secrets, and for aspiring writers, it's a master class in thriller writing.In the end, Tony resolves to take Grisham's teachings to heart and eventually decides to write what he thinks he was meant to: a book about the creative process and his incredible two years working with John Grisham.

Yvonne N. Bui's How to Write a Master's Thesis is a step-by-step guidebook that demystifies a process that can often prove to be overwhelming and confusing to graduate students. The tone and format of this applied book is reader-friendly and includes practical suggestions that go beyond informing what "should" be done. It is chock full of detailed explanations, examples, and supplemental materials that have been used successfully in advising students in completing their master's theses.

This book explores creative writing and its various relationships to education through a number of short, evocative chapters written by key players in the field. At times controversial, the book presents issues, ideas and pedagogic practices related to creative writing in and around education, with a focus on higher education. The volume aims to give the reader a sense of contemporary thinking and to provide some alternative points of view, offering examples of how those involved feel about the relationship between creative writing and education. Many of the contributors play notable roles in national and international organizations concerned with creative writing and education. The book also includes a Foreword by Philip Gross, who won the 2009 TS Eliot Prize for poetry.

Now in Mass Market, An Epic Battle Against Mind-Controling Alien Invaders as Only Robert A. Heinlein, the Best-Selling Grand Master of Science Fiction, Could Tell It. " One of the most influential writers in American literature. " —The New York Times Book Review. First came the news that a flying saucer had landed in Iowa. Then came the announcement that the whole thing was a hoax. And then, Cess close to two agents of the most secret intelligence agency in the U.S. government were on the scene and disappeared without reporting in. And four more agents who were sent in also disappeared. So the head of the agency and his two top agents went in and managed to get out with their discovery: an invasion is underway by stop-like aliens who can talk to a human and completely control his or her mind. What the humans know, they know. What the slugs want, no matter what, the human will do. And most of Iowa is already under their control. Sam Cavanaugh was one of the agents who discovered the truth. Unfortunately, that was just before he was taken over by one of the aliens and began working for the invaders, with no will of his own.

And he has just learned that a high official in the Treasury Department is now under control of the aliens. Since the Treasury Department includes the Secret Service, which safeguards the President of the United States, control of the entire nation is near at hand. This book on Thesis Writing for Master ' and Ph.D. program focuses on the difficulties students encounter with regard to choosing a guide; selecting an appropriate research title considering the available resources; conducting research; and ways to overcome the hardships they face while researching, writing and preparing their dissertation for submission. Thesis writing is an essential skill that medical and other postgraduates are expected to learn during their academic career as a mandatory partial requirement in order to receive the Master ' s degree. However, at the majority of medical schools, writing a thesis is largely based on self-learning, which adds to the burden on students due to the tremendous amount of time spent learning the writing skills in addition to their exhausting clinical and academic work. Due to the difficulties faced during the early grooming years and lack of adequate guidance, acquiring writing skills continues to be a daunting task for most students. This book addresses these difficulties and deficiencies and provides comprehensive guidance, from selecting the research title to publishing in a scientific journal. Perhaps the most daunting graduate school requirement is the development of an action research Master ' s thesis. This capstone task requires unprecedented amounts of time, energy, and verbiage. Designed to take stress out of the thesis-writing equation, this student-friendly comprehensive handbook glides the reader through a 28-step process from developing a focal topic to defending a scholarly thesis. Framing each chapter as a one-week action assignment, the authors have broken down the process into manageable chunks to enable students writers to achieve an immediate sense of completion at every step. By using this scaffolding approach the authors encourage the student researcher to focus on one part of the process rather than the total, sometimes overwhelming, final product. With the exception of the " Review of the Literature " section which takes several weeks to complete, all other thesis sections can and should be timed out for seven days. The Authors primary objective was to empower the student researcher to accomplish each of the steps in the process while never losing sight on the product that will help the children in their classrooms. Whether developing an Abstract or writing in-text citations, student researchers are guided throughout he nuances of the Publication Manual of the American Psychological Associations, 6th Edition.

From how to write great essays and succeeding at university, to writing your undergraduate dissertation and doing postgraduate research, SAGE Study Skills help you get the best from your time at university. Visit the SAGE Study Skills hub for tips, resources and videos on study success!

This book is for graduate students--and others--who want to become more productive writers. It's especially written for those who want to: • increase their motivation, focus, and persistence to move a project to completion • overcome procrastination and perfectionistic tendencies • reduce (or write in spite of) their anxiety and fear of writing • manage their time, work, energy (and advisor) for greater productivity The process or craft of sustained writing is not a matter that's taught to undergraduate or graduate students as part of their studies, leaving most at sea about how to

start a practice that is central to a career in academe and vital in many other professional occupations. This book grew out of conversations Jan Allen has held with her graduate students for over 30 years and reflects the fruit of the writing workshops and boot camps she has conducted at three universities, her own and numerous colleagues' experiences with writing and advising, as well as the feedback she receives from her popular Productive Writer listserv. While Jan Allen recognizes that writing is not an innate talent for most of us, she demonstrates that it is a process based on skills which we can identify, learn, practice and refine. She focuses both on the process and habits of writing as well as on helping you uncover what kind of writer are you, and reflect on your challenges and successes. With a light touch and an engaging sense of humor, she proposes strategies to overcome procrastination and distractions, and build a writing practice to enable you to become a more productive and prolific writer. Jan Allen proposes that you read one of her succinct chapters – each devoted to a specific strategy or writing challenge – each day, or once a week. When you find one that increases your concentration, motivation or endurance, make it a habit. Try it for two weeks, charting the resulting increased productivity. It will become part of your repertoire of writing and productivity tools to which you can progressively add.
