A twisty psychological thriller with "the ingenious structure and leaps in time and memory of a Christopher Nolan movie" from an award-winning director (Camden New Journal). Ross Blackleigh is on trial for four crimes which he insists he didn't commit. A detective inspector and a thoughtful self-reflective man, he goes against his counsel's advice and takes the stand in court. This is his story. Ross found himself wandering the streets one night, bleeding from the head and unable to remember the past year and a half. But before he could make sense of it, he was summoned to a crime scene where a nurse had been brutally murdered. His amnesia unnerved him and, fearing the worst, Ross allowed himself to be taken to hospital, only to be viciously attacked by a stranger with a knife. Suspecting that the attack was connected with the nurse's murder and that his own police colleagues were behind it, Ross set out on two parallel investigations: one into the killing and the other into his own mind. But when he digs into his own psyche, he is scared by what he finds . . . Is Ross being set up or is something far more disturbing behind the killings? "Profoundly creepy in the best way, and the desperation of the haunted protagonist makes it a compellingly nightmarish journey." —Life in Sci-Fi "These changes of gear, the mix of brutal realism and a sense of darker, inexplicable forces are what give Room 15—I won't reveal the significance of the title—its power, as the novel hurtles back to the courtroom and the jury's verdict." —Camden New Journal

Wherever we look today, popular culture greets us with "texts" that make implicit arguments; this book helps students to think and write critically about these texts. The World Is a Text teaches critical reading, writing, and argument in the context of pop-culture and visual examples, showing students how to "read" everyday objects and visual texts with basic semiotics. The book shows how texts of all kinds, from a painting to a university building to a pair of sneakers, make complex arguments through their use of signs and symbols, and shows students how to make these arguments in their own essays. This new edition is rich with images, real-world examples, writing and discussion prompts, and examples of academic and student writing. The first part of the book is a rhetoric covering argumentation, research, the writing process, and adapting from high-school to college writing, while the second part explores writing about specific cultural topics. Notes, instruction, and advice about research are woven into the text, with research instruction closely tied to the topic being discussed. New to the updated compact edition are chapters on fashion, sports, and nature and the environment.

The visual plays a central role in multimediated, computerized culture. The question is: how can we exploit the intersections between the visual and the verbal to improve learning? This text explores

ways to capitalize on visually connected pedagogy.

Writing can be a challenge, especially for artists and designers who tend to be more visual than verbal. Writing for Visual Thinkers: A Guide for Artists and Designers is designed to help people who think in pictures—a segment of learners that by some estimates includes almost 30 percent of the population—gain skills and confidence in their writing abilities. Writing for Visual Thinkers approaches the craft of writing from many directions, all with the ultimate goal of unblocking the reader's verbal potential. It offers a guide to mind mapping, concept mapping, freewriting, brainwriting, word lists and outlines, as well as provides student examples, tips on writing grant proposals, reasons for keeping a blog and more. Critique methods, criticism, narrative and storytelling, hypertext, editing, graphic novels and comics, and many more topics round out this groundbreaking book. Both experimental and pragmatic, Andrea Marks's methods will result in stronger, more verbally confident artists and designers. Developed in partnership with AIGA, this book is for the visual learners everywhere who have always wanted--or needed!--to improve their writing skills, whether they specialize in graphic design, web design, industrial design, interior design, allied design, or fashion design. All of Peachpit's eBooks contain the same content as the print edition. You will find a link in the last few pages of your eBook that directs you to the media files. "This is the most practical, hard-nosed, generous, direct, and useful guide to writing fiction." —Brad Watson Finally, a truly creative—and hilarious—guide to creative writing, full of encouragement and sound advice. Provocative and reassuring, nurturing and wise, *The Lie That Tells a Truth* is essential to writers in general, fiction writers in particular, beginning writers, serious writers, and anyone facing a blank page. John Dufresne, teacher and the acclaimed author of *Love Warps the Mind a Little* and *Deep in the Shade of Paradise*, demystifies the writing process. Drawing upon the wisdom of literature's great craftsmen, Dufresne's lucid essays and diverse exercises initiate the reader into the tools, processes, and techniques of writing: inventing compelling characters, developing a voice, creating a sense of place, editing your own words. Where do great ideas come from? How do we recognize them? How can language capture them? In his signature comic voice, Dufresne answers these questions and more in chapters such as "Writing Around the Block," "Plottery," and "The Art of Abbreviation." Dufresne demystifies the writing process, showing that while the idea of writing may be overwhelming, the act of writing is simplicity itself.

The Street of Crocodiles in the Polish city of Droghobych is a street of memories and dreams where recollections of Bruno Schulz's uncommon boyhood and of the eerie side of his merchant family's life are evoked in a startling blend of the real and the fantastic. Most memorable - and most chilling - is the portrait of the author's father, a maddened shopkeeper who imports rare birds' eggs to hatch in his attic, who believes tailors' dummies should be treated like people, and whose obsessive fear of cockroaches causes him to resemble one. Bruno Schulz, a Polish Jew killed by the Nazis in 1942, is considered by many to have been the leading Polish writer between the two world wars.

Practical information for artists trying to sell their work. Formatted in a workbook style with fill exercises and examples.

Tonfoni (linguistics, U. of Bologna, Italy) has published many books in Italian and in English, has been a visiting scholar at MIT and Harvard University, and has presented her methodology in many settings. Here she describes a highly developed approach to writing that quite specifically involves drawing, painting, and visual symbols as a means of representing the structure of various kinds of writing. With these structures in mind, she suggests that students can improve, vary, and significantly expand their writing repertoire. The bibliographic history of this book is somewhat elusive: It is a paperbound edition of a work first published in Britain by Intellect Books (UK), apparently in 1993 (from the date on the author's preface). James Richardson is credited with "abridging" the volume, but the original source volume is not identified (or perhaps it was not published). Marvin Minsky, famed as a founder of artificial intelligence, provides a lengthy foreword.

Robert Olen Butler, winner of the Pulitzer Prize in Fiction, teaches graduate fiction at Florida State University — his version of literary boot camp. In *From Where You Dream*, Butler reimagines the process of writing as emotional rather than intellectual, and tells writers how to achieve the dreamspace necessary for composing honest, inspired fiction. Proposing that fiction is the exploration of the human condition with yearning as its compass, Butler reinterprets the traditional tools of the craft using the dynamics of desire. Offering a direct view into the mind and craft of a literary master, *From Where You Dream* is an invaluable tool for the novice and experienced writer alike.

This book takes a fresh look at approaches to teaching reading, writing and communication skills. It presents a wealth of innovative ideas specifically designed to support visual learners, including those with autism spectrum conditions and special educational needs. using strategies that cover everything from the latest assistive technology to getting creative on a limited budget. There are tips for sharing stories with children who find it hard to sit still, supporting reluctant writers, enabling the pre-verbal child to answer questions and helping the child who never stops talking to develop listening skills. The strategies are supported by practical resources, examples and case studies, to show how to instill in children the confidence to create and share their thoughts. This is a must-have resource for special education teachers and coordinators, as well as speech and language therapists, looking for new strategies for teaching literacy.

"All the cutting edge technology I learned in college—typewriters, film splicers, glue—is now in a museum; the one thing that hasn't changed is how to tell a visual story."—Bob Dotson *Make It Memorable* provides a distinctly different, hands-on introduction to the craft of visual storytelling. Many texts have been written to help people master the changing technology of journalism; here, Bob Dotson teaches readers how best to tell a story once they do. This second edition of Dotson's classic book offers dozens of new tips for the digital age and a step-by-step explanation of how to find and create all kinds of visual stories under tight deadlines. In addition to new scripts annotated with behind-the-scenes insights and structural comments, the book includes links to online videos of all the story examples. There is no other text quite like it. Considering the fact that the academic essay continues to be widely used as an assessment tool within education, there is a need for students to develop their skills in this area. However, it is often the case that students perceive instruction in academic writing, if it is offered at all, as boring. This book addresses these two issues. First, the book can be used by students themselves, even in the absence of academic writing classes, as a self-help guide, from which they can develop their knowledge of academic writing and subsequent proficiency. Second, by discussing the components of academic writing in terms—such as film—which are familiar to today's generation, students are enabled to relate to the material better and see what might have been perceived as dull from a brand new perspective. Visual learners in particular will enjoy the analogous link between films and essays, and students today are arguably more visually literate than previous generations, being exposed to visuals on a daily basis through text message iconography, computer games and the Internet. The visual instruction provided in turn helps to facilitate mental visuals in students' minds, from which their knowledge of essay writing can start to develop.
