Word Play is a riveting book regarding an interactive game played with words and God. Inside its pages are the clues to understanding the game. The desired result from playing is to know God better. This book addresses confusion generated by the daily use of words without concern for their actual meanings, more specifically, the words used by Christians. It is a book about God and not religion. Some may discover the contents of Word Play strenuous. Word Play is designed to make readers think. There is a good chance your brain will hurt while reading Word Play. If so then I fulfilled my mission.

Enlightenment from critical thinking opens the gateway to the heart. When there is clarity there is understanding and where there is understanding there is power. Word Play was written as a tool to access Gods power through words. It is not a book to be taken lightly. Word Play

has a new and different approach for understanding more regarding the power of words. Anyone who desires to know more about this power from God should read *Word Play*. The lessons learned took over two decades to receive. It took almost two years to write about them. Warning: The awareness resulting from reading *Word Play* may be overwhelming to some. This is not a book for children.

In an era of digital capture, digital darkrooms, and online galleries, serious photographers still have a deep respect for the photographic print. There is a profound difference between posting your image to a website and printing and sharing your photographic work. For many, the photographic print is the only way to complete the photographic process that begins with the image's capture. In *Fine Art Inkjet Printing: The Craft and the Art of the Fine Digital Print*,

For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh"*
