One of The New York Times 10 Best Books 10 Year National Book Award Finalist Finalist for the National Book Critics Circle John Leonard Prize Finalist for the Center for Fiction First Novel Prize Finalist for the New York Public Library's Young Lions Fiction Award National Best Seller "Splendidly imagined . . . Thrilling" --Simon Winchester "A genuine masterpiece" --Gary Shteyngart Spellbinding, moving--evoking a fascinating region on the other side of the world--this suspenseful and haunting story announces the debut of a profoundly gifted writer. One August afternoon, on the shoreline of the Kamchatka peninsula at the northeastern edge of Russia, two girls--sisters, eight and eleven--go missing. In the ensuing weeks, then months, the police investigation turns up nothing. Echoes of the disappearance reverberate across a tightly woven community, with the fear and loss felt most deeply among its women. Taking us through a year in Kamchatka, Disappearing Earth enters with astonishing emotional acuity the worlds of a cast of richly drawn characters, all connected by the crime: a witness, a neighbor, a detective, a mother. We are transported to vistas of rugged beauty--densely wooded forests, open expanses of tundra, soaring volcanoes, and the glassy seas that border Japan and Alaska--and into a region as complex as it is alluring, where social and ethnic tensions have long simmered, and where outsiders are often the first to be accused. In a story as propulsive as it is emotionally engaging, and through a young writer's virtuosic feat of empathy and imagination, this powerful novel brings us to a new understanding of the intricate bonds of family and community, in a Russia unlike any we have seen before.

The Need for a Cultural Landscape Theory

Iredale (human geography, U. of Wollongong, Australia), Naran Bilik (anthropology, Chinese Academy of Social Sciences) and Wang Su (Chinese National Institute of Educational Research, Beijing) address particular aspects of the mobility of minority populations within China. They begin with existing census data, and draw on a targeted survey in four regions: Inner Mongolia, Tibet, Xinjiang and Uyghur, and Beijing. They argue that while minorities have probably taken longer to start moving in significant numbers, they have now become part of the trend. The phenomena, they say, is manifestly urbanization. c. Book News Inc.

Introduces new approaches, theoretical trends, and understudied topics in Latinx Studies This groundbreaking work offers a multidisciplinary, social-science oriented perspective on Latinx studies, including the social histories and contemporary lives of a diverse range of Latina and Latino populations. Editors Ana Y. Ramos-Zayas and M érida M. R úa have crafted an anthology that is unique in both form and content. The book combines previously published canonical pieces with original, cutting-edge works created for this volume. The sections of the text are arranged thematically as critical dialogues, each with a brief preface that provides context and a conceptual direction for the scholarly conversation that ensues. The editors frame the volume around the “ humanistic social sciences, ” using the term to highlight the historical and social contexts under which expressive cultural forms and archival records are created. Critical Dialogues in Latinx Studies masterfully sheds light on the diversity and complexity of the everyday lives of Latinx populations, the political economic structures that shape enduring racialization and cultural stereotyping, and the continuing efforts to carve out new lives as diasporic, transnational, global, and colonial subjects.

The idea of “The Green Book” is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

How do we describe ourselves? Where have we, do we, will we, live our lives? Why are the differences between people a source of concern? How can social change occur? Social geography can assist in addressing these questions. It provides ways of understanding and living in our contemporary world. Providing students with the resources to understand both the theoretical and empirical approaches social geographers take when investigating social difference, this text outlines key theoretical approaches and traces the core geographies of difference: class, gender, race/ethnicity, and sexuality. It concludes by showing how geographers work across these ideas of difference to understand questions of identity, power and action. Using illustrative examples from around the world, Social Geographies includes: - Individual chapters on the main theoretical approaches to difference - Individual chapters on the key concepts of identity, power and action - Reviews of the core literature, with suggestions for further reading - Biographies of key contemporary social geographers - Glossary of key terms For students beginning human geography courses, or in social geography modules, this book is the essential primer.

Negotiating Boundaries in the City

AP Human Geography 2020 and 2021 Study Guide

La Belle and Ward address a major question confronting American higher education - How do colleges and universities best prepare students for common citizenship in a diverse, democratic state while also nurturing their groups' cultures, values, and institutional participation? The authors clarify current debates about diversity and the content of curriculum, what one commentator calls the "culture wars". The book includes an overview of ethnicity, intergroup relations, and related concepts; the history and development of multiculturalism and ethnic studies in higher education in the United States; and an analysis of the issues related to diversity in higher education, particularly as they relate to tensions between ethnic studies and multicultural efforts.

Mobilities within the European Union (EU) have changed significantly since the classical intra-regional migrations of the 1950s–1970s. After a period of reduced, less visible flows in the 21st century mobilities increased again, first linked to EU expansion towards the East, and from 2008, with renewed South-North flows following the impact of the Great Recession on Southern European countries. It is in this context that the current volume explores how these recent migrations reflect new and more complex patterns of mobility, increasingly uncertain and unstable, involving both natives and naturalised migrants. It also seeks to unpack the multiple connections between these new migration systems and other systems affecting social protection, gender and citizenship, and how these intersect with other factors such as class, age, race and ethnicity. The different chapters of the book examine this covering a wide variety of cases, including intra-EU flows from Portugal and Spain, recent Spanish and Latin American migrants in London, Paris and Brussels, and Romanian migration to the UK and France, thus adding to its richness. This book will be of interest to academics, researchers and advanced students of Sociology, Anthropology, Geography, Gender Studies, Public Policy, and Politics. It was originally published as a special issue of Ethnic and Racial Studies.

Critical Pedagogy, Race, and Media investigates how popular media offers the potential to radicalise what and how we teach for inclusivity. Bringing together established scholars in the areas of race and pedagogy, this collection offers a unique approach to critical pedagogy by analysing current and historical iterations of race onscreen. The book forms theoretical and methodological bridges between the disciplinary fields of pedagogy, equality studies, and screen studies to explore how we might engage in and critique screen culture for teaching about race. It employs Critical Race Theory and paradigmatic frameworks to address some of the social crises in Higher Education classrooms, forging new understandings of how notions of race are buttressed by popular media. The chapters draw on popular media as a tool to explore the social, economic, and cultural dimensions of racial injustice and are grouped by Black studies, migration studies, Indigenous studies, Latinx studies, and Asian studies. Each chapter addresses diversity and the necessity for teaching to include visual media which is reflective of a myriad of students' experiences. Offering opportunities for using popular media to teach for inclusion in Higher Education, this critical and timely book will be highly relevant for academics, scholars, and students across interdisciplinary fields such as pedagogy, human geography, sociology, cultural studies, media studies, and equality studies.

Captures the rich diversity of human life as it examines more than two hundred ethnic groups, large and small, around the world, through a visual study of beliefs, traditions, lifestyles, and environmental conditions.

A People's Guide to Los Angeles

An Introduction to Human Geography

Introduction to Human Geography

The Human Mosaic Student Study Guide

Human Mosaic Study Guide

A People’s Guide to Los Angeles offers an assortment of eye-opening alternatives to L.A.’s usual tourist destinations. It documents 115 little-known sites in the City of Angels where struggles related to race, class, gender, and sexuality have occurred. They introduce us to people and events usually ignored by mainstream media and, in the process, create a fresh history of Los Angeles. Roughly dividing the city into six regions—North Los Angeles, the Eastside and San Gabriel Valley, South Los Angeles, Long Beach and the Harbor, the Westside, and the San Fernando Valley—this illuminating guide shows how power operates in the shaping of places, and how it remains embedded in the landscape.

"This is history as it should be written. In When Ethnicity Did Not Matter in the Balkans, a logical advancement on his earlier studies, Fine has successfully tackled a fascinating historical question, one having broad political implications for our own times. Fine's approach is to demonstrate how ideas of identity and self-identity were invented and evolved in medieval and early-modern times. At the same time, this book can be read as a critique of twentieth-century historiography-and this makes Fine's contribution even more valuable. This book is an original, much-needed contribution to the field of Balkan studies." -Steve Rapp, Associate Professor of Caucasian, Byzantine, and Eurasian History, and Director, Program in World History and Cultures Department of History, Georgia State University Atlanta When Ethnicity Did Not Matter in the Balkans is a study of the people who lived in what is now Croatia during the Middle Ages (roughly 600-1500) and the early-modern period (1500-1800), and how they identified themselves and were identified by others. John V. A. Fine, Jr., advances the discussion of identity by asking such questions as: Did most, some, or any of the population of that territory see itself as Croatian? If some did not, to what other communities did they consider themselves to belong? Were the labels attached to a given person or population fixed or could they change? And were some people members of several different communities at a given moment? And if there were competing identities, which identities held sway in which particular regions? In When Ethnicity Did Not Matter in the Balkans, Fine investigates the identity labels (and their meaning) employed by and about the medieval and early-modern population of the lands that make up present-day Croatia. Religion, local residence, and narrow family or broader clan all played important parts in past and present identities. Fine, however, concentrates chiefly on broader secular names that reflect attachment to a city, region, tribe or clan, a labeled people, or state. The result is a magisterial analysis showing us the complexity of pre-national identity in Croatia, Dalmatia, and Slavonia. There can be no question that the medieval and early-modern periods were pre-national times, but Fine has taken a further step by demonstrating that the medieval and early-modern eras in this region were also pre-ethnic so far as local identities are concerned. The back-projection of twentieth-century forms of identity into the pre-modern past by patriotic and nationalist historians has been brought to light. Though this back-projection is not always misleading, it can be; Fine is fully cognizant of the danger and has risen to the occasion to combat it while frequently remarking in the text that his findings for the Balkans have parallels elsewhere. John V. A. Fine, Jr. is Professor of History at the University of Michigan.

REA's AP Human Geography Crash Course is the first book of its kind for the last-minute studier or any AP student who wants a quick refresher on the course. /Written by an AP teacher, the targeted review chapters prepare students for the test by only focusing on the important topics tested on the AP Human Geography exam. /A student-friendly review in outline format covers everything AP students need to know for the exam: models in AP human geography, population, cultural patterns and processes, agriculture and rural land use, industrialization, and economic development. /With our Crash Course, students can study the subject faster, learn the crucial material, and boost their AP score all in less time. The author includes test-taking strategies for the multiple choice and free response exam questions, so students can build their point scores and get a 5!

As political, economic, and environmental issues increasingly spread across the globe, the science of geography is being rediscovered by scientists, policymakers, and educators alike. Geography has been made a core subject in U.S. schools, and scientists from a variety of disciplines are using analytical tools originally developed by geographers. Rediscovering Geography presents a broad overview of geography's renewed importance in a changing world. Through discussions and highlighted case studies, this book illustrates geography's impact on international trade, environmental change, population growth, information infrastructure, the condition of cities, the spread of AIDS, and much more. The committee examines some of the more significant tools for data collection, storage, analysis, and display, with examples of major contributions made by geographers. Rediscovering Geography provides a blueprint for the future of the discipline, recommending how to strengthen its intellectual and institutional foundation and meet the demand for geographic expertise among professionals and the public.

Critical Perspectives on Racial and Ethnic Differences in Health in Late Life

From the visionary bestselling author of The Second World and How to Run the World comes a bracing and authoritative guide to a future shaped less by national borders than by global supply chains, a world in which the most connected powers—and people—will win. Connectivity is the most revolutionary force of the twenty-first century. Mankind is reengineering the planet, investing up to ten trillion dollars per year in transportation, energy, and communications infrastructure linking the world’s burgeoning megacities together. This has profound consequences for geopolitics, economics, demographics, the environment, and social identity. Connectivity, not geography, is our destiny. In Connectography, visionary strategist Parag Khanna travels from Ukraine to Iran, Mongolia to North Korea, Pakistan to Nigeria, and across the Arctic Circle and the South China Sea to explain the rapid and unprecedented changes affecting every part of the planet. He shows how militaries are deployed to protect supply chains as much as borders, and how nations are less at war over territory than engaged in tugs-of-war over pipelines, railways, shipping lanes, and Internet cables. The new arms race is to connect to the most markets—a race China is now winning, having launched a wave of infrastructure investments to unite Eurasia around its new Silk Roads. The United States can only regain ground by fusing with its neighbors into a super-continental North American Union of shared resources and prosperity. Connectography offers a unique and hopeful vision for the future. Khanna argues that new energy discoveries and technologies have eliminated the need for resource wars; ambitious transport corridors and power grids are unscrambling Africa’s fraught colonial borders; even the Arab world is evolving a more peaceful map as it builds resource and trade routes across its war-torn landscape. At the same time, thriving hubs such as Singapore and Dubai are injecting dynamism into young and heavily populated regions, cyber-communities empower commerce across vast distances, and the world’s ballooning financial assets are being wisely invested into building an inclusive global society. Beneath the chaos of a world that appears to be falling apart is a new foundation of connectivity pulling it together. Praise for Connectography “Incredibly . . . With the world rapidly changing and urbanizing, [Khanna’s] proposals might be the best way to confront a radically different future.”—The Washington Post “Clear and coherent . . . a well-researched account of how companies are weaving ever more complicated supply chains that pull the world together even as they squeeze out inefficiencies. . . . [He] has succeeded in demonstrating that the forces of globalization are winning.”—Adrian Woolridge, The Wall Street Journal “Bold . . . With an eye for vivid details, Khanna has . . . produced an engaging geopolitical travelogue.”—Foreign Affairs “For those who fear that the world is becoming too inward-looking, Connectography is a refreshing, optimistic vision.”—The Economist “Connectivity has become a basic human right, and gives everyone on the planet the opportunity to provide for their family and contribute to our shared future. Connectography charts the future of this connected world.”—Marc Andreessen, general partner, Andreessen Horowitz “Khanna’s scholarship and foresight are world-class. A must-read for the next president.”—Chuck Hagel, former U.S. secretary of defense This title has complex layouts that may take longer to download.

Understanding Cultural Geography: Places and Traces offers a comprehensive introduction to perhaps the most exciting and challenging area of human geography. By focusing on the notion of ‘place’ as a key means through which culture and identity is grounded, the book showcases the broad range of theories, methods and practices used within the discipline. This book

not only introduces the reader to the rich and complex history of cultural geography, but also the key terms on which the discipline is built. From these insights, the book approaches place as an 'ongoing composition of traces', highlighting the dynamic and ever-changing nature of the world around us. The second edition has been fully revised and updated to incorporate recent literature and up-to-date case studies. It also adopts a new seven section structure, and benefits from the addition of two new chapters: Place and Mobility, and Place and Language. Through its broad coverage of issues such as age, race, scale, nature, capitalism, and the body, the book provides valuable perspectives into the cultural relationships between people and place. Anderson gives critical insights into these important issues, helping us to understand and engage with the various places that make up our lives. Understanding Cultural Geography is an ideal text for students being introduced to the discipline through either undergraduate or postgraduate degree courses. The book outlines how the theoretical ideas, empirical foci and methodological techniques of cultural geography illuminate and make sense of the places we inhabit and contribute to. This is a timely update on a highly successful text that incorporates a vast foundation of knowledge; an invaluable book for lecturers and students.

The research in this book was born from an intellectual curiosity regarding the concept of 'cultural landscape.' The study resulted from a desire to clarify and expand the understanding of the term, as the starting point was the idea that a good practice is always based on a well-built theory. Thus, the purpose is to establish the importance of theoretical knowledge of the concept of 'cultural landscape.' (*Series: Urban and Spatial Planning / Stadt- und Raumplanung - Vol. 12*)

In their later years, Americans of different racial and ethnic backgrounds are not in equally good--or equally poor--health. There is wide variation, but on average older Whites are healthier than older Blacks and tend to outlive them. But Whites tend to be in poorer health than Hispanics and Asian Americans. This volume documents the differentials and considers possible explanations. Selection processes play a role: selective migration, for instance, or selective survival to advanced ages. Health differentials originate early in life, possibly even before birth, and are affected by events and experiences throughout the life course. Differences in socioeconomic status, risk behavior, social relations, and health care all play a role. Separate chapters consider the contribution of such factors and the biopsychosocial mechanisms that link them to health. This volume provides the empirical evidence for the research agenda provided in the separate report of the Panel on Race, Ethnicity, and Health in Later Life.

ASAP Human Geography: A Quick-Review Study Guide for the AP Exam

The Geography of Ethnic Violence is the first among numerous distinguished books on ethnic violence to clarify the vital role of territory in explaining such conflict. Monica Toft introduces and tests a theory of ethnic violence, one that provides a compelling general explanation of not only most ethnic violence, civil wars, and terrorism but many interstate wars as well. This understanding can foster new policy initiatives with real potential to make ethnic violence either less likely or less destructive. It can also guide policymakers to solutions that endure. The book offers a distinctively powerful synthesis of comparative politics and international relations theories, as well as a striking blend of statistical and historical case study methodologies. By skillfully combining a statistical analysis of a large number of ethnic conflicts with a focused comparison of historical cases of ethnic violence and nonviolence—including four major conflicts in the former Soviet Union—it achieves a rare balance of general applicability and deep insight. Toft concludes that only by understanding how legitimacy and power interact can we hope to learn why some ethnic conflicts turn violent while others do not. Concentrated groups defending a self-defined homeland often fight to the death, while dispersed or urbanized groups almost never risk violence to redress their grievances. Clearly written and rigorously documented, this book represents a major contribution to an ongoing debate that spans a range of disciplines including international relations, comparative politics, sociology, and history.

Using in-depth life-story interviews and oral history archives, this book explores the impact of South Asian migration from the 1950s onwards on both the local white, British-born population and the migrants themselves. Taking Leicester as a main case study – identified as a European model of multicultural success – Negotiating Boundaries in the City offers a historically grounded analysis of the human experiences of migration. Joanna Herbert shows how migration created challenges for both existing residents and newcomers – for both male and female migrants – and explores how they perceived and negotiated boundaries within the local contexts of their everyday lives. She explores the personal and collective narratives of individuals who might not otherwise appear in the historical records, highlighting the importance of subjective, everyday experiences. The stories provide valuable insights into the nature of white ethnicity, inter-ethnic relations and the gendered nature of experiences, and offer rich data lacking in existing theoretical accounts. This book provides a radically different story about multicultural Britain and reveals the nuances of modern urban experiences which are lost in prevailing discourses of multiculturalism.

Carrying forward the legacy of original author Terry Jordan-Bychkov, Mona Domosh and new coauthors Roderick Neumann and Patricia Price offer this thoroughly updated new edition of the acclaimed introduction to the cultural geography of the world today. The result is a text that maintains its original distinctive style while addressing contemporary issues and situations that students care about, most importantly, the continuing phenomenon of globalization. The Thematic Approach of The Human Mosaic The Human Mosaic introduces five themes in the opening chapter—culture region, cultural diffusion, cultural ecology, cultural interaction, and cultural landscape—then uses those themes as a framework for the topical chapters that follow. Each theme is applied to a variety of geographical topics: demography, agriculture, the city, religion, language, ethnicity, politics, industry, folk and popular culture. Through this organization, students are able to relate to the most important aspects of cultural geography at every point in the text.

This study guide and book of mapping exercises was designed to hone student skills in geographic analysis in the context of the main themes of each chapter. Mapping exercises are designed to help the students understand and explain geographic patterns through the use of skills geographers would use.

World Regional Geography Study Guide with Mapping Workbook

Race, Ethnicity, and Gender

" Democratization processes create opportunities for some, but cause economic and psychological hardship - whether perceived or real - for others. For the latter, transformation situations may strengthen a sense of group belonging, may foster the emergence of a new group identity. After 1990, some media and scholars observed a new ethnic assertiveness among persons classified as "'coloured'" in apartheid South Africa. As a majority in the Western Cape, yet a minority on the national level, they expressed fear of being discriminated against under black majority rule: "'In the past we were not white enough, today we are not black enough.'" In this statement resonates a sense of exclusion from the democratic process. By evaluating a quantitative survey, this book analyses how a minority perceives the South African transformation process. The author examines attitudes towards the old regime, towards new government policies and intergroup relations as well as their impact on the self-perception and the political behaviour of coloured people in South Africa. "

Adapted from Joseph F. Healey and Eileen O'Brien's bestselling Race, Ethnicity, Gender, and Class, this brief and accessible text presents a unified sociological frame of reference to help students analyze minority-dominant relations in the U.S. Diversity and Society: Race, Ethnicity, and Gender, Fifth Edition explores the history and contemporary status of racial and ethnic groups in the U.S., including differences between the experiences of minority men and women. In addition, the book includes comparative, cross-national coverage of group relations.

This book explores an innovative set of critical narratives, accounts and engagements by different authors about their professional mobility and how that relates to the discipline and their life experiences. Human Geography and Professional Mobility seeks to encourage, influence, and help students understand geographic concepts based on critical reflections, international experiences, and practical insight laid out in stories of real people, real geographers, and real college faculty, that students can relate to. This volume is less theoretical and more personal insight-based, wherein first-hand and personal accounts of practical experiences are explored, which renders the text supplementary reading for human geography, population geography, world geography, and migration/mobility classes. With critical navigation of spaces in response to several geographical questions, this book offers a novel perspective on professional mobility of geographers which will be of interest to students and academics in the fields of geography, tourism, sociology, and anthropology.

Taking the possibility of change in ethnic identity into account, this book shows and dismantles the theoretical logics linking ethnic diversity to negative outcomes and processes such as democratic destabilisation, clientelism, riots and state collapse. Even more importantly, it changes the questions we can ask about the relationship between ethnicity, politics and economics.

Coloured Ethnicity and Identity

The Columbia Guide to Asian American History

The idea that humankind constituted a unity, albeit at different stages of 'development', was in the 19th century challenged with a new way of thinking. The 'savagery' of certain races was no longer regarded as a stage in their progress towards 'civilisation', but as their permanent state. What caused this shift? In Kay Anderson's provocative new account, she argues that British colonial encounters in Australia from the late 1700s with the apparently unimproved condition of the Australian Aborigine, viewed against an understanding of 'humanity' of the time (that is, as characterised by separation from nature), precipitated a crisis in existing ideas of what it meant to be human. This lucid, intelligent and persuasive argument will be necessary reading for all scholars and upper-level students interested in the history and theories of 'race', critical human geography, anthropology, and Australian and environmental studies.

Developed from the critically acclaimed and commercially successful Dictionary of Race and Ethnic Relations, now in its fourth edition, Encyclopedia of Race and Ethnic Studies has been assembled by a world-class team of international scholars led by Ellis Cashmore to provide an authoritative, single-volume reference work on all aspects of race and ethnic studies. From Aboriginal Australians to xenophobia, Nelson Mandela to Richard Wagner, sexuality to racial profiling, the Encyclopedia is organized alphabetically and reflects cultural diversity in a global context. The entries range from succinct 400 word definitions to in-depth 2000 word essays to provide comprehensive coverage of: all the key terms, concepts and debates important figures, both historical and contemporary landmark cases historical events Although unafraid to engage with cutting-edge theory, the Encyclopedia is uncluttered by jargon and has been written in a lucid, 'facts-fronted' style to offer an accessible introduction to race and ethnic studies. The Encyclopedia is also fully cross-referenced and thoroughly indexed with most entries followed by annotated up-to-date suggestions for further reading to guide the user to the key sources. It is destined to become an essential resource for scholars and students of race and ethnic studies, as well as a handy reference for journalists and others working in the field.

A comprehensive reference to Asian American history reveals the key events and personalities while also exploring the historical debates that rage around their interpretation.

Looking for sample exams, practice questions, and test-taking strategies? Check out our extended, in-depth prep guide, Cracking the AP Human Geography Exam! LIKE CLASS NOTES—ONLY BETTER. The Princeton Review's ASAP Human Geography is designed to help you zero in on just the information you need to know to successfully grapple with the AP test. No questions, no drills: just review. Advanced Placement exams require students to have a firm grasp of content—you can't bluff or even logic your way to a 5. Like a set of class notes borrowed from the smartest student in your grade, this book gives you exactly that. No tricks or crazy stratagems, no sample essays or practice sets: Just the facts, presented with lots of helpful visuals. Inside ASAP Human Geography, you'll find:
• Essential facts, movements, and theories for AP Human Geo—all explained clearly & concisely
• Lists, charts, and graphs for quick visual reference
• A three-pass icon system designed to help you prioritize learning what you MUST, SHOULD, and COULD know in the time you have available
• "Ask Yourself" questions to help identify areas where you might need extra attention
• A resource that's perfect for last-minute exam prep and for daily class work
Topics covered in ASAP Human Geography include:
• Geography: nature & perspectives
• Population & migration
• Cultural patterns & processes
• Political organization of space, agriculture, and rural land use
• Cities & urban land use
• Industrialization & economic development ... and more!

The Cultural Landscape

Understanding Cultural Geography

Constructivist Theories of Ethnic Politics

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

This Handbook offers a comprehensive overview of media geography, focusing on a range of different media viewed through the lenses of human geography and media theory. It addresses the spatial practices and processes associated with both old and new media, considering "media" not just as technologies and infrastructures, but also as networks, systems and assemblages of things that come together to enable communication in the real world. With contributions from academics specializing in geography and media studies, the Routledge Handbook of Media Geographies summarizes the recent developments in the field and explores key questions and challenges affecting various groups, such as women, minorities, and persons with visual impairment. It considers geographical aspects of disruptive media uses such as hacking, fake news, and racism. Written in an approachable style, chapters consider geographies of users, norms, rules, laws, values, attitudes, routines, customs, markets, and power relations. They shed light on how mobile media make users vulnerable to tracking and surveillance but also facilitate innovative forms of mobility, space perception and placemaking. Structured in four distinct sections centered around "control and access to digital media," "mass media," "mobile media and surveillance" and "media and the politics of knowledge," the Handbook explores digital divides and other manifestations of the uneven geographies of power. It also includes an overview of the alternative social media universe created by the Chinese government. Media geography is a burgeoning field of study that lies at the intersections of various social sciences, including human geography, political science, sociology, anthropology, communication/media studies, urban studies, and women and gender studies. Academics and students across these fields will greatly benefit from this Handbook.

The updated Student Study Guide provides a tremendous learning advantage for students using The Human Mosaic.
