`Written primarily for the employee, this book is a gold mine of easily assimilated information and ideas which should also be of value to anyone working in human resources' - Personnel Today`Much of the literature on stress tends to be either academic or research-based, or otherwise focuses on the more practical aspects of stress management. Managing Workplace Stress strikes a balance between the two in providing background and discussion that puts many areas of work-related stress into context, as well as giving helpful practical advice on managing particular stressors' - People Management`Stress in the workplace is an ever-increasing problem and its consequences, such as higher rates of absenteeism, reduced productivity and increased health compensation claims, are widespread. This book examines the causes of the increase in work-related stress. Susan Cartwright and Cary L Cooper focus particularly on the stress created by organizational changes including job redesign, reallocation of roles and responsibilities, and the accompanying job insecurities. They highlight the everyday stressors likely to impact upon managers and employees - for example, working with difficult people and managing increased work loads - and offer useful strategies for dealing with these various situations.

This book gathers state-of-the-art research in computational engineering and bioengineering to facilitate knowledge exchange between various scientific communities. Computational engineering (CE) is a relatively new discipline that addresses the development and application of computational models and simulations often coupled with high-performance computing to solve complex physical problems arising in engineering analysis and design in the context of natural phenomena. Bioengineering (BE) is an important aspect of computational biology, which aims to develop and use efficient algorithms, data structures, and visualization and communication tools to model biological systems. Today, engineering approaches are essential for biologists, enabling them to analyse complex physiological processes, as well as for the pharmaceutical industry to support drug discovery and development programmes.

Explores the long-standing contact between American Indian tribes and extraterrestrial visitors through interviews with the tribes' spiritual leaders

- Shares the wisdom and ET experiences of Dawnland founder Dana Pictou, Mayan daykeeper Hunbatz Men, Choctaw wisdomkeeper Sequoyah Trueblood, and Creek healer and artist Shona Bear Clark**
- Includes color photos of ET-inspired work by prominent Indian artists as well as traditional Indian art depicting contact with "Sky Elders"**

As humanity stands at the crossroads between the Fifth and the Sixth Worlds, American Indian wisdomkeepers have recognized signs that they must now speak their closely held knowledge about extraterrestrial contact, their original instructions from the Sky Elders. These ET relationships have existed since the beginning of time. They have been depicted on ancient rocks and hides, embedded in creation stories, choreographed in sacred dances, beaded on wampum belts, and continued to this day through rituals and the tobacco blessing. They show that with the vital support of our Star Ancestors, we can bring our planet back into balance with natural laws. Exploring the unifying "Sky Elder" theme found in virtually every Indian culture, Nancy Red Star shares her profound interviews with wisdomkeepers from several

Native traditions, including Mayan elder and daykeeper Hunbatz Men, Stargate International CEO and UFO researcher Cecilia Dean, and Choctaw medicine man Sequoyah Trueblood, and offers their teachings on taking our rightful place among the peoples of the universe. Laying out a path for rebuilding our world, the Sky Elders' original instructions initiate us into the possibility of a coming time of peace. Inviting all peoples to realize their Star ancestry, the women and men of proud lineage and inspiring wisdom who share their experiences here offer us a survival plan for walking into the next world.

How do you achieve great things? How do you create unstoppable momentum in your life and business? By doing. ERIK KRUGER is a high-performance coach and founder of the Mental Performance Lab. He writes an email early each morning which he sends to many thousands of subscribers. The aim of his daily message is to inspire people, asking them to reflect and act. Packed with more than 160 thoughtful reflections on what it takes to live a life of action and not words, Acta Non Verba 's purpose is to get people moving, creating, and generating an unstoppable drive in both their business and personal journeys. The words Acta Non Verba is the sign-off Erik uses in all his emails. This simple Latin phrase, meaning ' Actions Not Words ', has started a movement. It ' s a plea; a call to create your life instead of living it by default, a call to show your intentions instead of merely speaking about them. It ' s a call to live to your fullest potential. This is not a book to read from cover to cover, in one sitting. Each day there is a new chapter waiting to be read. Put your e.reader on your bedside table, and read a new chapter with your first cup of coffee every morning. Each message is short so you can read it quickly, in the moment, and then reflect and act on it for the entire day. It ' s a book that demands action. ACTIONS, NOT WORDS Remember, it ' s not about the words on these pages; it ' s about what you do with them.

Irreverent, satirical and uninhibited, The Reluctant Passenger is a hugely entertaining and intelligent comic novel set in contemporary Cape Town. Nicholas Morris is a fundamentally decent chap who likes order, and isn't given to messy emotions. He and his 'sort-of' girlfriend Leonora share a relationship that is comforting in its sameness, and he is ensconced in a well-paid career as an environmental lawyer. When he takes on a case to save the baboons of Cape Point from developers, he becomes drawn into intrigues involving a charismatic liberal judge, dinosaurs from the old regime and the full cast of the wealthy Tomlinson family, not to mention its golden boy heir. The rainbow nation begins to unravel in a hilarious riot of traffic chaos, ecological mayhem (including a troop of baboons rampaging through a shopping mall) and sexual discovery. Michiel Heyns is one of South Africa's most acclaimed authors, and was until recently Professor of English at the University of Stellenbosch. He is the author of The Typewriter's Tale, The Children's Day, Bodies Politic, Lost Ground and Invisible Furies.

The auhtor describes the synergy of two people, being an intimate relationship or one at work or in business, as the 'chemical reaction' between them.

"In recent times, the self-help industry has exploded into a multi-billion dollar global industry - and along with it has

come every imaginable type of therapy, healing or general woo-woo. ... [The author] decided that over the course of a year, she would embark on a quest for personal wellness, spiritual enlightenment and good old-fashioned happiness. ... She would open herself to even the most outlandish contemporary fads in self-improvement. What followed was a twelve-month immersion in the world of auras, chakras, hallucinogenic drugs, sweat lodges, sangomas, past lives and more."--Back cover.

4 STAR DOODY'S REVIEW! "The book can serve as an introduction, a refresher, or a supplement, depending on the experience and background of the reader. The authors are well regarded for their teaching, research, and clinical abilities....The book covers basic and advanced regional anesthesia techniques. It includes mostly classic approaches, but also offers some novel techniques for both single shot and continuous nerve blockade. The illustrations are superb, especially those that reveal the underlying structures, providing an almost three-dimensional view of the relevant anatomy."--Doody's Review Service Authored by the world's leading authorities, this is an authoritative, full-color instructional manual for mastering nerve block techniques. Beautifully illustrated with 350 color illustrations, including 175 clinical photographs of actual patients.

As a religious institution consecrated by and literally acknowledging the Prince of Darkness, the Church of Satan enjoyed an inspiring, and occasionally either thrilling or terrifying, existence from 1966 to 1975. Beginning as a whimsical and satirical countercultural statement against the social and institutionally-religious hypocrisy of the 1960s, the Church of Satan proceeded to evolve into a positive, sincere, and [to its own surprise] virtuous organization, though not without periodic individual and group growing pains: the consequence of allegiance to a supernatural entity only dimly apprehended and understood by Western Judæo-Christianized civilization. From its 1979 1st Edition to this 2013 8th, *The Church of Satan* remains the only complete documentary history of that fascinating and bizarre adventure, from Anton & Diane LaVey's founding of the Church in their San Francisco home to its surprising dissolution into a secular business a decade later and metaphysical supersession by the Temple of Set. Ever since its 1981 2nd Edition, *The Church of Satan*'s growing size made it impossible to print. Volume I of this 8th Edition finally fits all of the text and plates into fewer than 500 pages: 285,300 words, 39 chapters, 73 color plates. This companion Volume II contains all 161 Appendices (247,000 words, 460 pages, B&W). Both volumes should be acquired and read together.]

2011 Honorable Mention for the American Sociological Association Community and Urban Section's Robert E. Park Book Award The color of clothing, the width of shoe laces, a pierced ear, certain brands of sneakers, the braiding of hair and many other features have long been seen as indicators of gang involvement. But it's not just what is

worn, it's how: a hat tilted to the left or right, creases in pants, an ironed shirt not tucked in, baggy pants. For those who live in inner cities with a heavy gang presence, such highly stylized rules are not simply about fashion, but markers of "who you claim," that is, who one affiliates with, and how one wishes to be seen. In this carefully researched ethnographic account, Robert Garot provides rich descriptions and compelling stories to demonstrate that gang identity is a carefully coordinated performance with many nuanced rules of style and presentation, and that gangs, like any other group or institution, must be constantly performed into being. Garot spent four years in and around one inner city alternative school in Southern California, conducting interviews and hanging out with students, teachers, and administrators. He shows that these young people are not simply scary thugs who always have been and always will be violent criminals, but that they constantly modulate ways of talking, walking, dressing, writing graffiti, wearing make-up, and hiding or revealing tattoos as ways to play with markers of identity. They obscure, reveal, and provide contradictory signals on a continuum, moving into, through, and out of gang affiliations as they mature, drop out, or graduate. *Who You Claim* provides a rare look into young people's understandings of the meanings and contexts in which the magic of such identity work is made manifest.
