From the mid-1980s to the turn of the 1990s the international HRfield was considered to be in its infancy. There continues to be both an evolution of territory covered by the field - a series of successively evolving cultural, geographical and institutional challenges faced by the multinational corporation (MNC) - as well as more critical questioning whether this has created an expanded or a fragmented field. This book brings together the latest research on important "issues-driven" concerns that the field of IHRM now has to face, absorb, interpret then reanalyse through international lenses. This volume gives attention to those aspects of MNC behaviour - choices about location, how they organize local subsidiaries, choices made about technology, capital and labour, and

choices made about investments and strategies - that are subject to institutional influences. It also gives voice to a number of contemporary issues - reverse knowledge flows, skill supply strategies, employer branding, e-enablement, outsourcing, global networks - that now need to be accommodated within the field. Broadens the IHRM field to cover comparative and institutional perspectives Provides a multi-level analysis of globalization phenomena at the individual, organization, and macro level Focuses on the current problems and issues driving the attention of IHRM Directors The link between HRM and performance has become an important policy issue at both a national and a corporate level. HRM and Performance draws on the knowledge and expertise of a number of leading international scholars in the field of HRM to provide a comprehensive overview of the current state of HRM and identify fruitful directions for theory, research and practice. A central question throughout is - what's next for HRM and what are the keys to the future of managing people and

This volume of the series Research in Human Resource Management (HRM) focuses on a number of important issues in HRM and OB including performance appraisal, political skill, gratitude, psychological contracts, the philosophical underpinnings of HRM, pay and compensation messages, and electronic human resource management. For example, the first article by Cleveland and Murphy considers a very controversial issue (i.e., the reasons that organizations are abandoning the use of performance appraisal). The next article by Harris, Ferris, Summers, and Munyon is extremely interesting, and focuses on how composite political skills (e.g., social astuteness, interpersonal influence) helps individuals develop productive work relationships in organizations. The third article by Scandura and Sharif presents a very innovative model of gratitude in organizations, and the authors argue that gratitude is essential for maintaining positive social relations in organizations. The fourth article by Suazo and Stone-Romero provides an extremely comprehensive review of the theory and research on psychological contracts in organizations from 1960-2015. The subsequent article by Bae, Kang and Kim presents a very unique perspective on HRM, and considers the philosophical underpinnings of the field. The sixth article by Murray, Dulebohn, Roehling, and Werling presents a very innovative model to explain the role that organizational messages about changes in pay or compensation systems have on anticipatory pay satisfaction. The final article in the series by Johnson, Thatcher, and Burleson presents a thought-

provoking framework for understanding the key role that information technology (IT) plays in the field of HRM. The series should be useful to researchers and doctoral students in the fields of HRM, OB, and Industrial and Organizational Psychology. It should also be relevant for doctoral courses and scientist-practitioners in these fields.

The book begins with a focus on negative workplace green behaviours (e.g. toxic chemical leaks, air pollution, contaminated waste etc.), and what such environmental problems mean for workers, managers and society as a whole. This book outlines relevant, underpinning academic theory and research literature on how HRM is 'going green', and details real-life organisational examples derived from original and secondary empirical research to illuminate the implications of adopting Green HRM practices for relevant stakeholders. In doing so, the book offers a new, academic contribution to both the HRM and environmental management literatures.

What is human resource strategy? How are human resources strategies formulated and how can we explain the variance between what is espoused and what is actually implemented? What impact – if any – does human resource strategy have on the organization ' s "bottom line," and how can this impact be explained? Is there one best HR strategy for all firms, or is the impact of HR strategy on performance contingent on some set of organizational, technological or environmental factors? Human Resource Strategy, 2nd edition, provides an overview of the academic and practitioner responses to these and other questions. Applying an integrative framework, the authors review 30 years ' worth of empirical and theoretical research in an attempt to reconcile often-conflicting conceptual models and competing empirical results. Complex theoretical models and scientific findings are presented in an accessible and relevant way, in the context of the strategic decisions that executives are forced to

make on a regular basis. This new edition features an updated literature review, coverage of the latest challenges to HR strategy, new mini-cases, discussion questions, additional examples, and an emphasis on the strategic implications of the research, making it an ideal resource for students and practitioners alike.
