A guide to putting cognitive diversity to work Ever wonder what it is that makes two people click or clash? Or why some groups excel while others fumble? Or how you, as a leader, can make or break team potential? Business Chemistry holds the answers. Based on extensive research and analytics, plus years of proven success in the field, the Business Chemistry framework provides a simple yet powerful way to identify meaningful differences between people's working styles. Who seeks possibilities and who seeks stability? Who values challenge and who values connection? Business Chemistry will help you grasp where others are coming from, appreciate the value they bring, and determine what they need in order to excel. It offers practical ways to be more effective as an individual and as a leader. Imagine you had a more in-depth understanding of yourself and why you thrive in some work environments and flounder in others. Suppose you had a clearer view on what to do about it so that you could always perform at your best. Imagine you had more insight into what makes people tick and what ticks them off, how some interactions unlock potential while others shut people down. Suppose you could gain people's trust, influence them, motivate them, and get the very most out of your work relationships. Imagine you knew how to create a work environment where all types of people excel, even if they have conflicting perspectives, preferences and needs. Suppose you could activate the potential benefits of diversity on your teams and in your organizations, improving collaboration to achieve the group's collective potential. Business Chemistry offers all of this--you don't have to leave it up to chance, and you shouldn't. Let this book guide you in creating great chemistry!

Teaching models that focus on blended and virtual learning have become important during the past year and have become integral for the continuance of learning. The i²Flex classroom model, a variation of blended learning, allows non-interactive teaching activities to take place without teachers' direct involvement, freeing up time for more meaningful teacher-student and student-student interactions. There is evidence that i²Flex leads to increased student engagement and motivation as well as better exploitation of teachers' and classroom time leading to the development of higher order cognitive skills as well as study skills for students' future needs related to citizenship, college, and careers. The Handbook of Research on K-12 Blended and Virtual Learning Through the i²Flex Classroom Model focuses not only on how to design, deliver, and evaluate courses, but also on how to assess teacher performance in a blended i²Flex way at the K12 level. The book will discuss the implementation of the i²Flex (isquareFlex), a non-traditional learning methodology, which integrates

internet-based delivery of content and instruction with faculty-guided, student-independent learning in combination with face-to-face classroom instruction aiming at developing higher order cognitive skills within a flexible learning design framework. While highlighting new methods for improving the classroom and learning experience in addition to preparing students for higher education and careers, this publication is an essential reference source for pre-service and in-service teachers, researchers, administrators, educational technology developers, and students interested in how the i2Flex model was implemented in classrooms and the effects of this learning model.

Updated and fully aligned with the Cambridge International AS & A Level English Language 9093 syllabus for examination 2021. Besides the M_o_R® Management of Risk Practitioner Courseware -2010 Edition English (ISBN: 978.940.180.421.9) publication you are advised to obtain the corresponding publication Management of Risk: Guidance for Practitioners - 2010 Edition (ISBN: 978 0 11 331274 0). M_o_R® Practitioner Certifications is suitable for individuals wanting to demonstrate they have achieved sufficient understanding of how to apply and tailor the M_o_R® methodology to a given scenario. M_o_R® is an Enterprise wide risk management methodology, based on ISO 31000;2018. The method provides practical guidelines and (managerial) structures for controlling risks in organisations. M_o_R® is directed at 4 levels: strategic, programme, project and operational level. M_o_R® describes all activities necessary to regularly and integrally identify, quantify, address and control risks that influence organisational objectives. It also provides a score of relevant management documents to support the approach and an extensive list of techniques to help execute the activities. Key benefits: A certain amount of risk taking is part of any organisation's activity in meeting its objectives. Risk management can contribute to: • Improved decision making and less (unexpected) surprises; • Improved corporate governance by improved decision making and compliancy; • Reduction of fraud, more efficient and effective management and

extra value for money; • Innovation; • Improved Business Continuity Management. This Courseware is suited to prepare for the M_o_R® 2010 Practitioner exam. There is also a sample Foundation exam added in case the participant want to refresh that knowledge. To be eligible for the M_o_R® Practitioner level exam, one must have passed the M_o_R® Foundation level exam.
