Written by an experienced teacher and senior examiner with an in-depth understanding of teaching and assessments for the IB psychology SL and HL courses. This new TestPrep book helps students to familiarise themselves with the psychology SL and HL exams. It provides information about the approach of the papers and the types of exam questions they will come across. Students can practice answering the questions by writing directly into the book, just like they do in the exam. And, as they work through, there are strategies, hints and support for answering the questions PLUS fully worked solutions at the end. From some excellent and unique practice questions for Paper 1 to invaluable advice from the experts on how to tackle Paper 2 (plus some unseen stimulus material for HL students for Paper 3), this book provides essential exam practice support for students revising for their psychology exams. Students will: understand what to expect from the psychology exam papers - with a breakdown of the format of Paper 1 (SL and HL), Paper 2 (SL and HL) and Paper 3 (HL only), the command terms and the assessment objectives see example answers to Paper 1, Paper 2 and Paper 3-style questions - with brand new, unseen sample answers to exam-style questions and answer analysis from the point of view of an examiner test themselves - with three complete sets of exam-style psychology practice papers (the first set includes loads of additional tips, examiner commentary and support to guide students to achieve high marks; the second set has fewer helpful prompts; the last set has no additional help and is designed so students can have a go at it themselves!) check answers - with fully-worked solutions in the back of the book.

Oxford IB Diploma Programme: Psychology Course Companion

Business Management 2014

This unique book closes the gap between psychology books and the research that made them possible. Its journey through the "headline history" of psychology presents 40 of the most famous studies in the history of the science, and subsequent follow-up studies that expanded their findings and relevance. Readers are granted a valuable insider's look at the studies that continue to be cited most frequently, stirred up the most controversy when they were published, sparked the most subsequent related research, opened new fields of psychological exploration, and changed most dramatically our knowledge of human behavior. For individuals with an interest in an introduction to psychology.

A New York Times Notable Book of 2020 A Bloomberg Best Non-Fiction Book of 2020 A Behavioral Scientist Notable Book of 2020 A Human Behavior & Evolution Society Must-Read Popular Evolution Book of 2020 A bold, epic account of how the co-evolution of psychology and culture created the peculiar Western mind that has profoundly shaped the modern world. Perhaps you are WEIRD: raised in a society that is Western, Educated, Industrialized, Rich, and Democratic. If so, you're rather psychologically peculiar. Unlike much of the world today, and most people who have ever lived, WEIRD people are highly individualistic, self-obsessed, control-oriented, nonconformist, and analytical. They focus on themselves—their attributes, accomplishments, and aspirations—over their relationships and social roles. How did WEIRD populations become so psychologically distinct? What role did these psychological differences play in the industrial revolution and the global expansion of Europe during the last few centuries? In The WEIRDest People in the World, Joseph Henrich draws on cutting-edge research in anthropology, psychology, economics, and evolutionary biology to explore these questions and more. He illuminates the origins and evolution of family structures, marriage, and religion, and the profound impact these cultural transformations had on human psychology. Mapping these shifts through ancient history and late antiquity, Henrich reveals that the most fundamental institutions of kinship and marriage changed dramatically under pressure from the Roman Catholic Church. It was these changes that gave rise to the WEIRD psychology that would coevolve with impersonal markets, occupational specialization, and free competition—laying the foundation for the modern world. Provocative and engaging in both its broad scope and its surprising details, The WEIRDest People in the World explores how culture, institutions, and psychology shape one another, and explains what this means for both our most personal sense of who we are as individuals and also the large-scale social, political, and economic forces that drive human history. Includes black-and-white illustrations.

IB Psychology (SL and HL) Examination Secrets Study Guide

IB Physics

Comprehensively updated for the latest syllabus, for first teaching September 2017, and developed directly with the IB, the second edition of this popular Psychology Course Book provides thorough coverage of all core and optional units at Standard and Higher Level, as well as assessment preparation support. Engaging, full-colour activities and in-depth, international case studies bring the theory to life, while structured opportunities for critical thinking and concept-based learning help to develop enquiring and independent learners. Clear and accessible language, a robust reference section, support for the Internal Assessment and TOK links ensure that all learners progress through the DP Psychology course with confidence.

In this accessible student's guide, an experienced professor examines the study of psychology from a distinctly Christian perspective, introducing readers to key issues such as the origins of morality, nature vs. nurture, the relationship between the mind and the brain, and the concept of personal identity. Whether examining the history of psychological reflection, the legacy of the Enlightenment and Darwinism, or the development of modernist psychology, this volume will help students think carefully about the influential ideas that continue to shape discussions about what it means to be human.

Comprehensively updated to match the new DP Psychology syllabus, for first teaching September 2017, the second edition of this assessment-focused study tool presents all the key concepts covered at Standard and Higher Level, building learners' confidence and promoting long-term achievement in examinations. Key concepts are broken down into manageable segments as part of a concise, accessible format, reinforcing understanding and facilitating effective revision. Rigorous extension material provides opportunities for learners to be stretched, whilst clear, straightforward language and visual aids support EAL learners.

This Psychology for the IB Diploma series is for examination from 2019. Delve into human behaviour by studying real cases in this coursebook for the IB Psychology syllabus. Through studies of famous psychologists, students learn about the diversity of human behaviour and the factors that influence our decisions. International case studies and concise definitions of important concepts make this an ideal resource for learners whose first language is not English. Exam-style questions at the end of every chapter help students prepare for assessment. The coursebook covers both Standard and Higher Level content and suggested answers to the coursebook questions are at the back of the book.

Explorations Into the History of Psychological Research

With more practice than any other resource, unrivalled guidance straight from the IB and the most comprehensive and correct syllabus coverage, this student book will set your learners up to excel. The only resource written with the IB curriculum team, it fully captures the IB philosophy and integrates the most in-depth assessment support.

Everything you need to navigate the IB Diploma Psychology course: ensure full coverage of the syllabus with a comprehensive guide to all the concepts, theories and research into approaches to understanding behaviour, presented with a cross-cultural focus for global thinkers. · Develop critical analysis skills with critical thinking boxes to draw out methodological you recognise debates and issues. · Apply new skills and knowledge to everyday life with examples and case studies. · Navigate your way seamlessly through the course with key studies and terms highlighted. · Assess your progress and learning with summaries at the end of each chapter.

Written by two experienced psychology teachers, this is the second edition of Psychology Sorted Book 1, in the recent series for students and teachers. It is structured to help them understand and select from the wealth of psychological research that is relevant to the IB Diploma Psychology syllabus. The book has been developed independently of the International Baccalaureate and is endorsed by the IB. However, the topics and content are especially chosen to be relevant to the 2019 IB Diploma psychology curriculum, while also providing useful support to teachers and students of other curricula, including those taught as part of university courses. This second edition has been updated to include new material suggested by the IB in December 2017, suggesting classic and recent key studies for the core biological, cognitive and sociocultural approaches. Links are made between content and studies from other areas, including the options. There are hyperlinks and details for further relevant resources, journal articles and media talks and summaries of every study, written in clear language and including evaluation

critical thinking suggestions for each topic and a full bibliography and author index. Further support is available from the authors' Psychology Sorted blog and their Psychology Sorted Facebook page

This guide provides crisp revision of all syllabus topics with detailed support for constructing, analysing and labelling diagrams to assist with complete understanding. In addition, students will learn how to design, select and use diagrams to explain concepts while answering examination questions. A 'tips' section provides practical suggestions and a complete glossary for easy reference. In addition, there are guidelines on examiner recommendations along with exam practice and a selection of past questions.
