The censorship and surveillance of individuals, societies, and countries have been a long-debated ethical and moral issue. In consequence, it is vital to explore this controversial topic from all angles. Censorship, Surveillance, and Privacy: Concepts, Methodologies, Tools, and Applications is a vital reference source on the social, moral, religious, and political aspects of censorship and surveillance. It also explores the techniques of technologically supported censorship and surveillance. Highlighting a range of topics such as political censorship, propaganda, and information privacy, this multi-volume book is geared towards government officials, leaders, professionals, policymakers, media specialists, academicians, and researchers interested in the various facets of censorship and surveillance.
Kozier and Erb's Fundamentals of Nursing prepares students for practice in a range of diverse clinical settings and help them understand what it means to be a competent professional nurse in the twenty-first century. This third Australian edition has once again undergone a rigorous review and writing process. Contemporary changes in the regulation of nursing are reflected in the chapters and the third edition continues to focus on the three core philosophies: Person-centred care, critical thinking and clinical reasoning and cultural safety. Students will develop the knowledge, critical thinking and clinical reasoning skills to deliver care for their patients in ways that signify respect, acceptance, empathy, connectedness, cultural sensitivity and genuine concern.
This book provides a practical definition and explanation of “communicative behavior” for use in understanding interaction in work settings. It clearly presents a model of the elements of a work system, and summarizes theories that explain how organizations function and how managers work within the work system. It also describes how to recognize and solve both communication and organization problems. Furthermore, the volume analyzes various processes that occur in the work system, such as disseminating and retrieving information, energizing employees to work smarter, using power and empowering others, facilitating groups and work teams, managing conflict and stress, and how to manage knowledge in the organization, among others. The book describes some of the most likely careers that graduates might enter upon graduation. It also highlights a variety of explanations of organization theory, management theory, culture theory, postmodern theory and critical theory so that the full range of ideas about communication and the places where people work and interact are explored.

An increasing number of novel psychoactive drugs are currently available and sold as 'legal highs' or 'research chemicals'. These New Psychoactive Substances (NPS) constitute a broad range of hundreds of natural and synthetic drugs, including synthetic cannabinoids, synthetic cathinones, synthetic opioids and other classes, which use has resulted in a significantly growing number of intoxication and mortality, as reported by emergency and poison centres from all over the world. Definition of “NPS” includes any substance that has recently become available and has been d illegal drugs, although not necessarily of new synthesis. Use of NPS is dramatically increased in the last decade and represents a serious risk for the public health. Their ever-evolving chemical structure, the possibility to distribute in real time through the Internet and social networks information about their use and effects have dramatically challenged public health and drug policies internationally. NPS recently attracted great attention, but most are still unregulated and proposed online as legal alternatives to traditional illicit drugs. Unfortunately, this area is still poorly investigat information are available so far on their nature and potential risks. The phenomenon of NPS requires multi-national and multi-disciplinary collaborations to improve our knowledge on this changing drug market, to share information and define good practices at a global level. Political and educational efforts are indispensable to regulate this mutable scenario and to inform the public about health consequences of NPS use. Clinicians and emergency staff should be aware that NPS may cause severe health consequences and unexpected adverse effects, and be informed on how intoxication cases. Considering the widespread use of NPS and paucity of information about their toxicology and pharmacology, this Research Topic will be useful to understand the new trends in the scenario of drug use, abuse and addiction to inform professionals and general public about the health problems caused by NPS and to help drug-control policies to adopt suitable control measures.

The digitization of healthcare has become almost ubiquitous in recent years, spreading from healthcare organizations into the homes and personal appliances of practically every citizen. Thanks to the collective efforts of health professionals, patients and care providers as well as systems developers and researchers, the entire population of Europe is able to participate in and enjoy the benefits of digitized health information. This book presents the proceedings of the 26th Medical Informatics in Europe Conference (MIE2015), held in Madrid, Spain, in May 2015. The conference brings together participants who share their latest achievements in biomedical and health Informatics, including the role of the user in digital healthcare, and provides a forum for discussion of the inherent challenges to design and adequately deploy ICT tools, the assessment of health IT interventions, the training of users and the exploitation of available information and knowledge to further the continuous and ubiquitous availability and interoperability of medical information systems. Contributions address methodologies and applications, success stories and lessons learned as well as an overview of on-going projects and directions for the future. The book will be of interest to all those involved in the development, delivery and consumption of health and care information.

A Guide to Qualitative Field Research provides readers with clear, practical, and specific instructions for conducting qualitative research in the field. In the expanded Third Edition, Carol A. Bailey gives increased attention to the early and last stages of field research, often the most difficult: selecting a topic, deciding upon the purpose of your research, and writing the final paper, all in her signature reader-friendly writing style. This edition features research examples from graduate and undergraduate students to make examples meaningful to fellow students; a new "Putting It All Together" feature, with examples of how different parts of the research process interact; and more emphasis on the "nuts and bolts" of research, such as what to include in an informed consent form, a proposal, and the final paper.
This book constitutes the proceedings of the 15th IFIP WG 11.12 International Symposium on Human Aspects of Information Security and Assurance, HAISA 2020, held virtually in July 2021. The 18 papers presented in this volume were carefully reviewed and selected from 30 submissions. They are organized in the following topical sections: attitudes and perspectives; cyber security education; and people and technology.

This book tells the story of an unprecedented experiment in public participation: the government-sponsored debate on the possible commercialization of 'GM' crops in the UK. Giving a unique and systematic account of the debate process, this revealing volume sets it within its political and intellectual contexts, and examines the practical implications for future public engagement initiatives. The authors, an experienced team of researchers, produce a conceptually-informed and empirically-based evaluation of the debate, drawing upon detailed observation of both public and behind-the-scenes aspects of the process, the views of participants in debate events, a major MORI-administered survey of public views, and details of media coverage. With innovative methodological work on the evaluation of public engagement and deliberative processes, the authors analyze the design, implementation and effectiveness of the debate process, and provide a critique of its official findings. The book will undoubtedly be of interest to a wide readership, and will be an invaluable resource for researchers, policy-makers and students concerned with cross-disciplinary aspects of risk, decision-making, public engagement, and governance of technology.

Despite the growing national and international regulatory framework to support cross-border mediation, the use of such mediation appears to remain stubbornly low. This book focuses in particular on the European Union's (EU's) continued efforts to encourage the use of cross-border mediation and examines why such efforts have had a limited impact. It does so by drawing on rare, and at times surprising, detailed insights from in-house counsel of multinational companies regarding their use of EU cross-border commercial mediation. By viewing mediation through the lens of disputants, new and important findings regarding why disputants do, and do not, use cross-border mediation have emerged. While these findings are of primary relevance to EU policy and practice, they have implications far beyond the EU context at a time of increasing international interest in cross-border mediation. The analysis of the insights provided by the disputants reveals, for example: the prominent role played by negotiation as a cross-border dispute resolution process; that negotiation is a key comparator for disputants when considering whether to use mediation; how the EU's continued focus on understanding and presenting mediation as an alternative to litigation has resulted in measures which are insufficient to address fully the barriers to the use of mediation; intriguing barriers to the use of mediation which arise from the association which disputants draw between mediation and negotiation; how the relationship which disputants draw between mediation and negotiation paradoxically raises both opportunities for, and obstacles to, the increased use of mediation; and what disputants need in order to increase their use of cross-border mediation. The qualitative nature (by way of interviews) of the research conducted for this book has enabled the identification of nuanced and novel findings regarding mediation's position and potential in cross-border dispute resolution. These findings, together with a detailed examination of the EU Directive on Certain Aspects of Mediation in Civil and Commercial Matters and the EU's continued initiatives to foster the use of mediation, form the foundation upon which this book's recommendations are built. Changing the frame to view the use of mediation through the disputants' perspective, as this book does, provides the opportunity for the EU to promote cross-border mediation in a way which resonates more deeply with disputants and responds more fully to their concerns and needs. This thought-provoking book will be of interest not only to European and national bodies seeking to promote the use of mediation but clearly also to dispute resolution academics, in-house counsel, and of course mediators and dispute resolution practitioners in general.

The family justice system in England and Wales has undergone radical change over the past 20 years. A significant part of this shifting landscape has been an increasing emphasis on settling private family disputes out of court, which has been embraced by policy-makers, judges and practitioners alike and is promoted as an unqualified good. Mapping Paths to Family Justice: Resolving Family Disputes in Neoliberal Times examines the experiences of people taking part in out-of-court family dispute resolution in England and Wales. It addresses questions such as how participants experiences match up to the ideal; how recent changes to the legal system have affected people ability to access out-of-court dispute resolution; and what kind of outcomes are achieved in family dispute resolution. This book is the first study systematically to compare different forms of family dispute resolution. It explores people experiences of solicitor negotiations, mediation and collaborative law empirically by analyzing findings from a nationally representative survey, individual in-depth interviews with parties and practitioners, and recorded family dispute resolution processes. It considers these in the context of ongoing neoliberal reforms to the family justice system, drawing out conclusions and implications for policy and practice.
