An investigative approach to Cambridge IGCSE Geography, written in partnership with the Geographical Association. Encourage students to make links between case studies and their own local contexts as well as exploring the core themes and skills of the 0460 syllabus in the context of global case studies and processes. Prepare for exam success with full coverage of the core themes of Paper 1 (Population and Settlement, The Natural Environment, Economic Development and the Use of Resources) as well as the geographical and fieldwork skills elements of Papers 2, 3 and 4. Help students focus on achieving the best grades with excellent exam support for each Paper, with exam-style questions, answers at different levels and accompanying comments. Be confident in the content and approach - this resource is written by highly experienced Geography teachers, consulted edited by a CIE Principal Examiner, and produced in partnership with the UK Geographical Association - the home of best practice in Geography teaching.

An examination of how language functions in CLIL, based on a corpus of

classroom interactions. Drawing on their wide experience as CLIL educators and researchers, the authors explore data collected in real CLIL classrooms from two interrelated perspectives: the CLIL classroom as an interactional context for developing language and content, and the genres and registers through which the meanings of the different academic subjects are enacted. From the analysis of this corpus of data, the authors provide a rich description of how CLIL students' language works and may be expected to develop. Also available separately as a paperback.

Fully mapped to the latest Cambridge syllabus, this rigorous and stretching approach strengthens foundations for Cambridge exam achievements, with support for the updated assessments. Prepare students for the transition to further study with plenty of enrichment material.

*Assessment and evaluation are two concepts at the core of schooling which are also central to other forms of education worldwide. In an international context, assessment and*

*evaluation data are increasingly widely used for accountability and quality assurance purposes at individual student, institutional, national and global levels. This book does not attempt to include consideration of all the issues that could possibly be covered in a title that addresses assessment and evaluation in education internationally. Nor has it set out to cover the myriad technical issues with which assessment and evaluation are inevitably concerned. Rather, a number of authors working within different contexts of international education (whether as teachers or leaders in international schools, administrators in international examination bodies, or researchers in international educational research organisations) have been invited to share ideas arising from their own experiences of what might be interpreted as assessment or evaluation, be that assessment of student achievement, evaluation of teacher effectiveness or evaluation of school quality. The international dimension presents a range of challenges to those with responsibility for implementing assessment and evaluation strategies in widely diverse linguistic, cultural, social and personal contexts, and in this book valuable contributions are shared by colleagues who are authorities in the field. It is their personal views on assessment and evaluation, derived from professional practice in the international sphere, that have been brought together here.*
