(Book). More than a player's manual, this book portrays jazz bass as a vital element of 20th century American music. Citing examples from key recordings in the jazz canon, the book defines the essence of the musical contributions made by more than 70 important jazz bassists, including Ray Brown, Eddie Gomez, Charles Mingus, Milt Hinton and many others. Bassists get expert guidance on mastering proper technique, practice methods and improvisation, plus new insight into the theoretical and conceptual aspects of jazz. The companion audio featuring bass plus rhythm section allows readers to hear technical examples from the book, presented in slow and fast versions. It also offers play-along tracks of typical chord progressions and song forms.

Every mathematician (beginner, amateur, and professional alike) thrills to find simple, elegant solutions to seemingly difficult problems. Such happy resolutions are called "ahal solutions," a phrase popularized by mathematics and science writer Martin Gardner. Ahal solutions are surprising, stunning, and scintillating: they reveal the beauty of mathematics. This book is a collection of problems with ahal solutions. The problems are at the level of the college mathematics student, but there should be something of interest for the high school student, the teacher of mathematics, the "math fan," and anyone else who loves mathematical challenges. This collection includes one hundred problems in the areas of arithmetic, geometry, algebra, calculus, probability, number theory, and combinatorics. The problems start out easy and generally get more difficult as you progress through the book. A few solutions require the use of a computer. An important feature of the book is the bonus discussion of related mathematics that follows the solution of each problem. This material is there to entertain and inform you or point you to new questions. If you don't remember a mathematical definition or concept, there is a Toolkit in the back of the book that will help.

This long-awaited revision of the widely used classic text, first published as "Midwifery" by the late Pauline McCall Sellers, is a comprehensive textbook that covers every conceivable aspect of midwifery. It is relevant for use in southern African and other developing regions, updated and in line with the International Council of Midwives and International Council of Nursing guidelines and standards, and is fully updated and revised to deal with HIV/Aids in pregnancy, childbirth and post-partum care. Basic aspects that have guided this edition include: 'skilled attendance' making the book accessible for any health professional as described by WHO (nurses, midwives and doctors); the Saving Mothers and Babies reports in South Africa; international developments within the ICN and ICM, and the newly developed World Health Organisation: Partnership for Africa for maternal, new-born and child care (2008) attention to obstetric emergency care aspects, and focus on nutrition and pharmacology in obstetrics by nutritionists and pharmacologists.
