Business continuity planning is a process of continual improvement, not a matter of writing a plan and

Attempting to validate every aspect of your plan, however – particularly in a live rehearsal situation – could create a disaster of your own making. Validating Your Business Continuity Plan

Online Library Implementing Iso 22301 Business Continuity Management Systems

examines the three essential components of validating a business continuity plan – exercising, maintenance and review – and outlines a controlled and systematic approach to BCP validation while considering each
