The fantastic has been particularly prolific in Hispanic countries during the twentieth and twenty-first centuries, largely due to the legacy of short-story writers as well as the Latin-American boom that presented alternatives to the model of literary realism. While these writers' works have done much to establish the Hispanic fantastic in the international literary canon, women authors from Spain and Latin America are not always acknowledged, and their work is less well known to readers. The aim of this critical anthology is to render Hispanic female writers of the fantastic visible, to publish a representative selection of their work, and to make it accessible to English-speaking readers. Five short stories are presented by five key authors. They attest to the richness and diversity of fantastic fiction in the Spanish language, and extend from the early twentieth to the twenty-first century, covering a range of nationalities, cultural references and language specificities from Spain, Mexico, Puerto Rico and Argentina.

In Glimpsing Resurrection, Deanna A. Thompson combines recent trauma research with compelling first-person narrative to provide insight into the traumatic dimensions of living with a serious illness. Her aim is to help those who are ill and those who care for and minister to them of how best to offer support. "The tendency for Christians to move almost immediately from death to proclamations of new life risks alienating those for whom healing and new life seem out of reach," says Thompson. Glimpsing Resurrection focuses less on the "why" to help with the "how" of living with a serious disease. In particular, Thompson provides a framework and concrete suggestions for how to be a church where those who are undone by illness can be undone, as well as a place that can love and support them to hope.

Glimpsing Resurrection

Since the early 1990s, tens of thousands of memoirs by celebrities and unknown people have been published, sold, and read by millions of American readers. The memoir boom, as the explosion of memoirs on the market has come to be called, has been welcomed, vilified, and dismissed in the popular press. But is there really a boom in memoir production in the United States? If so, what is causing it? Are memoirs all written by narcissistic hacks for an unthinking public, or do they indicate a growing need to understand world events through personal experiences? This study seeks to answer these questions by examining memoir as an industrial product like other products, something that publishers and booksellers help to create. These popular texts become part of mass culture, where they are connected to public events. The genre of memoir, and even genre itself, ceases to be an empty classification category and becomes part of social action and consumer culture at the same time. From James Frey's controversial *A Million Little Pieces* to memoirs about bartending, Iran, the liberation of Dachau, computer hacking, and the impact of 9/11, this book argues that the memoir boom is more than a publishing trend. It is becoming the way American readers try to understand major events in terms of individual experiences. The memoir boom is one of the ways that citizenship as a category of belonging between private and public spheres is now articulated.
