

Improvising Jazz A Fireside Book

"Meticulously researched, detailed and documented, this long awaited overview justly establishes Konitz as one of the most consistently brilliant, adventurous and original improvisers in the jazz tradition—a genius as rare as Bird himself." —John Zorn "Hamilton's work may well mark the inception of a format new to writing on Western music, one which avoids both the self-aggrandizing of autobiography and the stylized subjectification of biography." —The Wire "An extraordinary approach to a biography, with the man himself speaking for extended sessions. The main vibration I felt from Lee's words was total honesty, almost to a fault. Konitz shows himself to be an acute observer of the scene, full of wisdom and deep musical insights, relevant to any historical period regardless of style. The asides by noted musicians are beautifully woven throughout the pages. I couldn't put the book down—it is the definition of a living history." —David Liebman

The preeminent altoist associated with the "cool" school of jazz, Lee Konitz was one of the few saxophonists of his generation to forge a unique sound independent of the influence of Charlie Parker. In the late 1940s, Konitz began his career with the Claude Thornhill band, during which time he came into contact with Miles Davis, with whom he would later work on the legendary Birth of the Cool sessions. Konitz is perhaps best known through his association with Lennie Tristano, under whose influence much of his sound evolved, and for his work with Stan Kenton and Warne Marsh. His recordings have ranged from cool bop to experimental improvisation and have appeared on such labels as Prestige, Atlantic, Verve, and Polydor. Crafted out of numerous interviews between the author and his subject, the book offers a unique look at the story of Lee Konitz's life and music, detailing Konitz's own insights into his musical education and his experiences with such figures as Miles Davis, Stan Kenton, Warne Marsh, Lennie Tristano, Charles Mingus, Bud Powell, and Bill Evans. Andy Hamilton is a jazz pianist and contributor to major jazz and contemporary music magazines. He teaches philosophy, and the history and aesthetics of jazz, at Durham University in the United Kingdom. He is also the author of the book *Aesthetics and Music* (Continuum 2007). Joe Lovano is a Grammy Award-winning tenor saxophonist. His most recent album is *Streams of Expression*.

PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes.

The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is dependent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...

Thinking Literature across Continents finds Ranjan Ghosh and J. Hillis Miller—two thinkers from different continents, cultures, training, and critical perspectives—debating and reflecting upon what literature is and why it matters. Ghosh and Miller do not attempt to formulate a joint theory of literature; rather, they allow their different backgrounds and lively disagreements to stimulate generative dialogue on poetry, world literature, pedagogy, and the ethics of literature. Addressing a varied literary context ranging from Victorian literature, Chinese literary criticism and philosophy, and continental philosophy to Sanskrit poetics and modern European literature, Ghosh offers a transnational theory of literature while Miller emphasizes the need to account for what a text says and how it says it. Thinking Literature across Continents highlights two minds continually discovering new paths of communication and two literary and cultural traditions intersecting in productive and compelling ways.

Jerry presents an easy-to-understand, no-nonsense approach for quickly analyzing any tune to make it easier to understand, transpose, and improvise over. Thinking in Roman numerals, recognizing the common elements from which nearly all tunes are derived, and knowing the traditional road maps will make you more prepared, and therefore---a more confident improviser.

Published to coincide with the band's 50th anniversary, a memoir by one of the Grateful Dead's founding members shares insights into their improvisational style, their survival of shared and personal tragedies and their collaborations with a wide range of fellow artists. Illustrations.

This book will greatly increase your understanding of the most essential jazz concepts all improvisers need to master.

Any listener knows the power of music to define a place, but few can describe the how or why of this phenomenon. In Lonesome Roads and Streets of Dreams: Place, Mobility, and Race in Jazz of the 1930s and '40s, Andrew Berish attempts to right this wrong, showcasing how American jazz defined a culture particularly preoccupied with place. By analyzing both the performances and cultural context of leading jazz figures, including the many famous venues where they played, Berish bridges two dominant scholarly approaches to the genre, offering not only a new reading of swing era jazz but an entirely new framework for musical analysis in general, one that examines how the geographical realities of daily life can be transformed into musical sound. Focusing on white bandleader Jan Garber, black bandleader Duke Ellington, white saxophonist Charlie Barnet, and black guitarist Charlie Christian, as well as traveling from Catalina Island to Manhattan to Oklahoma City, Lonesome Roads and Streets of Dreams depicts not only a geography of race but how this geography was disrupted, how these musicians crossed physical and racial boundaries—from black to white, South to North, and rural to urban—and how they found expression for these movements in the insistent music they were creating.

Poetry. Literary Nonfiction. African American Studies. Harmony Holiday's tête-bêche book-length lyric essay collection *GO FIND YOUR FATHER/A FAMOUS BLUES* immerses itself and its readers in a deeply personal interrogation of perhaps the most difficult subjects of all: love and family legacy. Holiday addresses these topics in verse, prose, and, most affectingly, in letters to her father—the late singer-songwriter Jimmy Holiday. Through these notes as well as her poems bearing long, ambitious, uncompromising lines, Holiday explores how we distill our own identities from memories and responsibilities bound up in tenderness and violence. "Do any black children grow up casual? Naw, we grow up shipped, knowing that we are loved but knowing more than that, that terror, that knowing is scrawled money for our bank. We're sure-shot and avoided, singing blue devil blues like a black and blue disciple, out from Sallis, Attala off delta, change-played, flowed to that subcommon up-river fate, our Waterloo and phonic quarry, step-sharp, sharp-squared, strait-shawled, boot-sharp visitor, made for walking, talking remnant of an extra-impossible accord, then Los Angeles. Resonances and renaissance of everywhere we come from, Harmony, deepest Holiday since Jason, since Jimmy, having gone to find him, makes these missive runs, assured of her allure but running from and in that into open, unsure dream. She sees it's getting late. Her archive has a microtonal blush. Sightsound, as Russell Atkins says. Can you say what it is to sing a song of love I can show you, right here, ask me now."—Fred Moten

This book examines the relationship between narrative film and reality, as seen through the lens of on-screen classical concert performance. By investigating these scenes, wherein the performance of music is foregrounded in the narrative, Winters uncovers how concert performance reflexively articulates music's importance to the ontology of film. The book asserts that narrative film of a variety of aesthetic approaches and traditions is no mere copy of everyday reality, but constitutes its own filmic reality, and that the music heard in a film's underscore plays an important role in distinguishing film reality from the everyday. As a result, concert scenes are examined as sites for provocative interactions between these two realities, in which real-world musicians appear in fictional narratives, and an audience's suspension of disbelief is problematized. In blurring the musical experiences of onscreen observers and participants, these concert scenes also allegorize music's role in creating a shared subjectivity between film audience and character, and prompt Winters to propose a radically new vision of music's role in narrative cinema wherein musical underscore becomes part of a shared audio-visual space that may be just as accessible to the characters as the music they encounter in scenes of concert performance.

Cities shape the lives and outlooks of billions of people, yet they have been overshadowed in contemporary political thought by nation-states, identity groups, and concepts like justice and freedom. The Spirit of Cities revives the classical idea that a city expresses its own distinctive ethos or values. In the ancient world, Athens was synonymous with democracy and Sparta represented military discipline. In this original and engaging book, Daniel Bell and Avner de-Shalit explore how this classical idea can be applied to today's cities, and they explain why philosophy and the social sciences need to rediscover the spirit of cities. Bell and de-Shalit look at nine modern cities and the prevailing ethos that distinguishes each one. The cities are Jerusalem (religion), Montreal (language), Singapore (nation building), Hong Kong (materialism), Beijing (political power), Oxford (learning), Berlin (tolerance and intolerance), Paris (romance), and New York (ambition). Bell and de-Shalit draw upon the richly varied histories of each city, as well as novels, poems, biographies, tourist guides, architectural landmarks, and the authors' own personal reflections and insights. They show how the ethos of each city is expressed in political, cultural, and economic life, and also how pride in a city's ethos can oppose the homogenizing tendencies of globalization and curb the excesses of nationalism. The Spirit of Cities is unreservedly impressionistic. Combining strolling and storytelling with cutting-edge theory, the book encourages debate and opens up new avenues of inquiry in philosophy and the social sciences. It is a must-read for lovers of cities everywhere. In a new preface, Bell and de-Shalit further develop their idea of "civicism," the pride city dwellers feel for their city and its ethos over that of others.

Whether for weavers at the handloom, laborers at the plough, or factory workers on the assembly line, music has often been a key texture in people's working lives. This book is the first to explore the rich history of music at work in Britain and charts the journey from the singing cultures of pre-industrial occupations, to the impact and uses of the factory radio, via the silencing effect of industrialization. The first part of the book discusses how widespread cultures of singing at work were in pre-industrial manual occupations. The second and third parts of the book show how musical silence reigned with industrialization, until the carefully controlled introduction of Music While You Work in the 1940s. Continuing the analysis to the present day, Rhythms of Labor explains how workers have clung to and reclaimed popular music on the radio in desperate and creative ways.
