TRIBUTO DI VARJ OSSEQUII IN ONORE DI S. GIUSEPPE Proposto a' suoi Divoti DA GIUSEPPE MARIA PROLA della Compagnia di Giesù

**This volume is a collection of new writings dealing with some of the Balkan linguistic varieties spoken in north-eastern, central and southern Italy. It brings together twenty-two papers, some of which investigate the mutual influences between each of these Balkan and South Slavic language varieties and their neighbouring Italian dialects. Other contributions study common tendencies which do not just pertain to local contacts, but which are of greater significance for the history of linguistic and cultural contacts in Italy. All of the chapters here present new empirical findings and reflect the breadth and diversity of current research in the fields of areal linguistics, language variation, Balkan dialectology, language contact, types of Balkan convergences, types of structure transfers, the borrowing of structural patterns, and directions of grammaticalisation.**

**Bibliografia Italiana Anno V**

Drawing on the wealth of the Church's living tradition, Fr. Donald Calloway, MIC, calls on all of us to turn to St. Joseph, entrust ourselves, our Church, and our world to our spiritual father's loving care, and then watch for wonders when the Universal Patron of the Church opens the floodgates of Heaven to pour out graces into our lives today. Definitely a book for our time, Consecration to St. Joseph is dedicated to meeting the challenges of the present moment and restoring order to our Church and our world, all through the potent paternal intercession and care of St. Joseph. This book has everything you need to take your love and devotion to St. Joseph to a whole different level: a thorough program of consecration to St. Joseph; information on the 10 wonders of St. Joseph; and prayers and devotions to St. Joseph. Accessible, motivating, this book will kick off a great movement of consecration to our spiritual father and change the world.

Balkan and South Slavic Enclaves in Italy

This is the compelling and inspirational true story of a twentieth-century doctor saint. Giuseppe Moscati, born of an aristocratic family in Naples, Italy, devoted his medical career to serving the poor. He was also a medical school professor and pioneer in the field of biochemistry, whose research led to the discovery of insulin, a cure for diabetes. Moscati regarded his medical practice as an apostolate, a ministry to his suffering fellowmen. Before examining a patient or engaging in research he would place himself in the presence of God. Moscati treated poor patients free of charge, and he would often send them home with an envelope containing a prescription and a fifty-lire note. He could have pursued a brilliant academic career, taken a professorial chair, and devoted more time to research, but he continued to serve his beloved patients and to train dedicated interns. By the witness of his example, he taught his many medical students to practice their profession in a spirit of service, saying that "suffering should be treated not as pain of the body, but as the cry of a soul, to whom another brother, the doctor, responds with the ardent love of charity. . . [The sick] are the faces of Jesus Christ, and the Gospel precept urges us to love them as ourselves."

Sacro Manto in Onore Di San Giuseppe

Languages, Dialects and Identities

Novena ed altri ossequi al glorioso patriarca San Giuseppe

In his latest book Dr. Pieraccini makes a major contribution not only to the annals of the Franciscan Order but also to the history of Cyprus, a Greek-speaking island off the coast of Turkey that had long provided port facilities for trade with the East and that was an important staging post on the sea route for pilgrims to the Holy Land. After the waning of the Crusades at the end of the 13th century it became "the most important Christian outpost in the Mediterranean". Even so, Catholics – whether Latins or Maronites – never made up more than 1% of the overall population of the island. In essence this is a tale of survival against the odds over the centuries, thanks to the stubborn resilience of the Franciscan friars and the Catholic faithful, especially the Maronites, in the face of great human and natural adversity. Among the perennial challenges the Order faced were those of a shortage of water, barren soil, "bad air" – malaria – a poor climate, and the hostility of the majority population of Greeks and Muslims.

"When All of Rome was Under Construction"

## La buona settimana foglio periodico religioso popolare

This is the compelling and inspirational true story of a medical doctor who lived in the 20th century and is now a canonized saint. Giuseppe Moscati, physician, medical researcher, and teacher in Naples, Italy, came from an aristocratic family and devoted his medical career to serving the poor. He was also a medical school professor, and a pioneer in the field of biochemistry whose research led to the discovery of insulin as a cure for diabetes. Moscati regarded his medical practice as a lay apostolate, a ministry to his suffering fellowmen. Before examining a patient or engaging in research he would place himself in the presence of God. Moscati treated poor patients free of charge, and would often send them home with an envelope containing a prescription and a 50-lire note. He could have pursued a brilliant academic career, taken a professorial chair and devoted more time to research, but he preferred to continue working with his beloved patients and to train dedicated interns. To his many medical students he taught by the witness of his life to practice their profession in a spirit of service, because "suffering should be treated not as just pain of the body, but as the cry of a soul, to whom another brother, the doctor, runs to with the ardent love of charity . . . They are the faces of Jesus Christ, and the Gospel precept urges us to love them as ourselves." "This man whom we will invoke as a saint of the universal Church appears to us as a concrete realization of the ideal of the Christian layman. Giuseppe Moscati, head physician of a hospital, a renowned researcher, a university instructor of human physiology and chemistry, performed his many and various tasks with all the commitment and seriousness that the practice of these delicate lay professions requires." - Pope John Paul II, Homily at the Canonization of Giuseppe Moscati

Doctor of the Poor

Giuseppe Moscati

il medico dei poveri

Published in conjunction with an exhibit which opened in Venice in 1996 and at the Metropolitan Museum of Art in New York during the first part of 1997. The exhibit organizers aimed to show Tiepolo as one of the presiding geniuses of the European imagination. In essays and entries on every work shown, the text illuminates his formation; his mastery of mythological and poetic subjects; his religious pictures; his excursions into portraiture and studies of ideal heads; and the process by which he proceeded from initial ideas--small- scale sketches--to large canvases and frescoes. Beautifully produced, the volume makes a stunning impact, and will have to suffice for those who can't make it to the exhibit itself.
