In *Negro Soy Yo* Marc D. Perry explores Cuba's hip hop movement as a window into the racial complexities of the island's ongoing transition from revolutionary socialism toward free-market capitalism. Centering on the music and lives of black-identified raperos (rappers), Perry examines the ways these young artists craft notions of black Cuban identity and racial citizenship, along with calls for racial justice, at the fraught confluence

of growing Afro-Cuban marginalization and long held perceptions of Cuba as a non-racial nation. Situating hip hop within a long history of Cuban racial politics, Perry discusses the artistic and cultural exchanges between raperos and North American rappers and activists, and their relationships with older Afro-Cuban intellectuals and African American political exiles. He also examines critiques of Cuban patriarchy by female raperos, the competing rise of reggaetón, as well as state efforts to incorporate

hip hop into its cultural institutions. At this pivotal moment of Cuban-U.S. relations, Perry's analysis illuminates the evolving dynamics of race, agency, and neoliberal transformation amid a Cuba in historic flux.

Despite the Mexican government's projected image of prosperity and modernity in the years following World War II, workers who felt that Mexico's progress had come at their expense became increasingly discontented. From 1948 to 1958, unelected and often corrupt officials of STFRM, the

railroad workers' union, collaborated with the ruling Institutionalized Revolutionary Party (PRI) to freeze wages for the rank and file. In response, members of STFRM staged a series of labor strikes in 1958 and 1959 that inspired a nationwide working-class movement. The Mexican army crushed the last strike on March 26, 1959, and union members discovered that in the context of the Cold War, exercising their constitutional right to organize and strike appeared radical, even subversive.

examines a pivotal moment in post-World War II Mexican history. The railroad movement reflected the contested process of postwar modernization, which began with workers demanding higher wages at the end of World War II and culminated in the railway strikes of the 1950s, a bold challenge to PRI rule. In addition, Robert F. Alegre gives the wives of the railroad workers a narrative place in this history by incorporating issues of gender identity in his analysis.

*The study of institutions, a core concept in comparative politics, has produced many rich and influential theories on the economic and political effects of institutions, yet it has been less successful at theorizing their origins. In Fixing Democracy, Javier Corrales develops a theory of institutional origins that concentrates on constitutions and levels of power within them. He reviews numerous Latin American constituent assemblies and constitutional amendments to explore why some democracies expand rather than restrict presidential powers and*

*why this heightened presidentialism discourages democracy. His signal theoretical contribution is his elaboration on power asymmetries. Corrales determines that conditions of reduced power asymmetry make constituent assemblies more likely to curtail presidential powers, while weaker opposition and heightened power asymmetry is an indicator that presidential powers will expand. The bargain-based theory that he uses focuses on power distribution and provides a more accurate variable in predicting actual constitutional outcomes than other approaches based on functionalism or ideology.*

### The Right to Nature

This issue of International Development Policy looks at recent paradigmatic innovations and development trajectories in Latin America, focusing on the Andean region. It aims to enrich our understanding of recent development debates and processes in Latin America, and what the rest of the world can learn from them.

What determines the capacity of countries to design, approve and implement effective public policies? To address this question, this book builds on the results of case studies of political institutions, policymaking processes, and policy outcomes in eight Latin American countries. The result is a volume that benefits from both micro detail on the intricacies of policymaking in individual countries and a broad cross-country interdisciplinary analysis of policymaking processes in the region.

The State of Social Safety Nets 2018 Report examines global trends in the social safety net/social assistance coverage, spending, and program performance based on the World Bank Atlas of Social Protection Indicators of Resilience and Equity (ASPIRE) updated database. The report documents the main social safety net programs that exist globally and their use to alleviate poverty and to build shared prosperity. The 2018 report expands on the 2015 edition, both in administrative and household survey data coverage. A distinct mark of this report is that, for the first time, it tells the story of what happens with SSN/SA programs spending and coverage over time, when the data allow us to do so. This 2018 edition also features two special themes †“ Social Assistance and Ageing, focusing on the role of old-age social pensions, and Adaptive Social Protection, focusing on what makes SSN systems/programs

Seus treze ensaios apresentam uma reflexão crítica ao modelo de integração subordinada da América Latina no mercado global neoliberal — que não foi abandonado após a ascensão dos governos progressistas. Mais do que isso, os textos fomentam, assim, um diálogo urgente sobre a necessidade de construir um horizonte renovado para superar as contingências típicas do Estado patriarcal, colonial e classista.

The book also discusses topics such as habitat transformation and hunting as these species are an important source of food in many places. Addressing ungulate natural communities in diverse ecosystems and countries, the book provides information on specific aspects of each of the most representative species, and highlights topics to help readers better understand these species and develop effective management and conservation strategies. The editors contend that with the strengthening of democracy, the rule of law, and human rights, common problems such as the exclusion of wide sectors of the population from having a say in government, as well as corruption, hyper-presidentialism, and the weak normativity of the law can be combatted more effectively in future.

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have

increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers. attention among policymakers and the media as a way to create jobs and help lift people out of poverty. Through extensive interviews and case studies of five diverse microenterprise programs in different U.S. regions, Lisa J. Servon examines the potential and limits of these programs. In the late 1980s, the microenterprise strategy came to the United States from less-developed countries such as Bangladesh, where the Grameen Bank flourishes. Since then over 200 programs have opened their doors in nearly every state. This book identifies the current discourse on microenterprises, discusses how this approach

represents a departure from traditional economic development and social welfare strategies, and examines the wide range of results. Boot strap Capital tells the story of both the programs and the people who use them. One program, Women's Initiative, targets very low income women in the San Francisco Bay Area and requires all clients to undergo three months of training before they can apply for a loan. Some of the participants are true entrepreneurs; others pursue self-employment because the mainstream economy has failed them. Servon finds that microenterprise programs combat the problem

of persistent poverty by serving a broad socioeconomic group and by focusing on the goals of empowerment, economic literacy, and community organization. She shows that microenterprise programs do more to help those who exist at the margins of the mainstream economy than those who are completely cut off from it. She calls for a rethinking of expectations for this strategy, based on the experience of programs and entrepreneurs in this country. This book provides the basis for reframing policy support for these programs.
