This book contains a selection of articles from The 2013 World Conference on Information Systems and Technologies (WorldCIST'13), a global forum for researchers and practitioners to present and discuss the most recent innovations, trends, results, experiences and concerns in the several perspectives of Information Systems and Technologies. The main topics covered are: Information and Knowledge Management; Organizational Models and Information Systems; Intelligent and Decision Support Systems; Software Systems, Architectures, Applications and Tools; Computer Networks, Mobility and Pervasive Systems; Radar Technologies; and Human-Computer Interaction. Spanish explorer and historian PEDRO SARMIENTO DE GAMBOA (1532-1592) spent more than twenty years in Peru. During that time he collected what was, at the time of its writing in 1572, the most accurate history of Incan civilization. De Gamboa personally interviewed many Incas around Cuzco in order to hear the songs and stories of their ancestors. This history was not gathered without an ulterior motive, however. De Gamboa aimed to show that the Inca were cruel tyrants who had usurped the land they were living on when the Spaniards found them. By showing that the Inca deserved the treatment they got from the Spanish crown, De Gamboa hoped to save his country's reputation on the world stage. Scholars and amateur historians will find here fascinating Incan mythology as well as thorough explanations of Incan society. This replica of a 1907 British edition also includes The Execution of the Inca Tupac Amaru, by the 16th-century Spaniard CAPTAIN BALTASAR DE OCAMPO.

Use and Significance of the Sun and the Night Sky

"The Oxford Handbook of the Incas aims to be the first comprehensive book on the Inca, the largest empire in the pre-Columbian world. Using archaeology, ethnohistory and art history, the central goal of this handbook is to bring together novel recent research conducted by experts from different fields that study the Inca empire, from its origins and expansion to its demise and continuing influence in contemporary times"--Provided by publisher.

This lavishly illustrated volume, based on extensive archeological research and Spanish colonial documentation, provides important insights into many questions and contradictions regarding the Inca Empire. 337 illustrations, 106 color. 12 maps.

Regional Archaeology in the Inca Heartland

Astronomy in the Inca Empire was a robust and fundamental practice. The subsequent Spanish conquest of the Andes region disrupted

much of this indigenous culture and resulted in a significant loss of information about its rich history. Through modern archaeoastronomy, this book helps recover and interpret some of these elements of Inca civilization. Astronomy was intricately woven into the very fabric of Andean existence and daily life. Accordingly, the text takes a holistic approach to its research, considering first and foremost the cultural context of each astronomy-related site. The chapters necessarily start with a history of the Incas from the beginning of their empire through the completion of the conquest by Spain before diving into an astronomical and cultural analysis of many of the huacas found in the heart of the Inca Empire. Over 300 color images—original artwork and many photos captured during the author's extensive field research in Machu Picchu, the Sacred Valley, Cusco, and elsewhere—are included throughout the book, adding visual insight to a rigorous examination of Inca astronomical sites and history.

A Teachers' Handbook in Geography ...

This is an authoritative presentation and discussion of the most basic thematic elements universally found in folklore and literature. The reference provides a detailed analysis of the most common archetypes or motifs found in the folklore of selected communities around the world. Each entry is written by a noted authority in the field, and includes accompanying reference citations. Entries are keyed to the Motif-Index of Folk Literature by Stith Thompson and grouped according to that Index's scheme. The reference also includes an introductory essay on the concepts of archetypes and motifs and the scholarship associated with them. This is the only book in English on motifs and themes that is completely folklore oriented, deals with motif numbers, and is tied to the Thompson Motif-Index. It includes in-depth examination of such motifs as: Bewitching; Chance and Fate; Choice of Roads; Death or Departure of the Gods; the Double; Ghosts and Other Revenants; the Hero Cycle; Journey to the Otherworld; Magic Invulnerability; Soothsayer; Transformation; Tricksters.

In print since 1924, and known as the travel bible to South America, "Footprint South American Handbook" is the longest-running travel guide in the English language. Covering the entire continent, from Colombia to the tip of Argentina, this updated guide provides the adventurous traveler with everything needed to plan a trip. Two-color art throughout. 30 full-color photos. 230 maps.

The ceque system of Cusco, the ancient capital of the Inca empire, was perhaps the most complex indigenous ritual system in the pre-Columbian Americas. From a center known as the Coricancha (Golden Enclosure) or the Temple of the Sun, a system of 328 huacas (shrines) arranged along 42 ceques (lines) radiated out toward the mountains surrounding the city. This elaborate network, maintained by ayllus (kin groups) that made offerings to the shrines in their area, organized the city both temporally and spiritually. From 1990 to 1995, Brian Bauer directed a major project to document the ceque system of Cusco. In this book, he synthesizes extensive archaeological survey work with archival research into the Inca social groups of the Cusco region, their land holdings, and the positions of the shrines to offer a comprehensive, empirical description of the ceque system. Moving well beyond previous interpretations, Bauer constructs a convincing model of the system's physical form and its relation to the social, political, and territorial organization of Cusco.

Operator's Manual

The Oxford Handbook of the Archaeology of Death and Burial reviews the current state of mortuary archaeology and its practice, highlighting its often contentious place in the modern socio-politics of archaeology. It contains forty-four chapters which focus on the history of the discipline and its current scientific techniques and methods. Written by leading, international scholars in the field, it derives its examples and case studies from a wide range of time periods, such as the middle palaeolithic to the twentieth century, and geographical areas which include Europe, North and South America, Africa, and Asia. Combining up-to-date knowledge of relevant archaeological research with critical assessments of the theme and an evaluation of future research trajectories, it draws attention to the social, symbolic, and theoretical aspects of interpreting mortuary archaeology. The volume is well-illustrated with maps, plans, photographs, and illustrations and is ideally suited for students and researchers.

Archetypes and Motifs in Folklore and Literature: A Handbook

Dive into a world of bold pre-Columbian women and goddesses! The book is my humble contribution to “herstory”- the history of women, the history of our foremothers, the women who made history yet were edited out of traditional textbooks. This is Inca history with the women edited back in, a book for anyone who is curious about historical women and ready to explore the world of powerful goddesses and strong Inca women, who lived before and during the Spanish Conquest. Well-researched historical reading that isn't heavy going. Praise for part 1: “I love the concept of this book.” “An interesting and unique read!” “A really good read for anyone interested in how women can survive.” “The originality is refreshing- accessible, interesting books about the lives of Inca women and goddesses are hard to come by.” Includes a discussion guide.

In *The Shape of Inca History*, Susan Niles considers the ways in which the Inca concept of history informed their narratives, rituals, and architecture. Using sixteenth-century chronicles of Inca culture, legal documents from the first generation of conquest, and field investigation of architectural remains, she strategically explores the interplay of oral and written histories with the architectural record and provides a new and exciting understanding of the lives of the royal families on the eve of conquest. Niles focuses on the life of Huayna Capac, the Inca king who ruled at the time of the first European incursions on the Andean coast. Because he died just a few years before the Spaniards overturned the Inca world, eyewitness accounts of his deeds as recorded by the invaders can be used to separate fact from propaganda. The rich documentary sources telling of his life include extraordinarily detailed legal records that inventory lands on his estate in the Yucay Valley. These sources provide a basis—unique in the Andes—for reconstructing the social and physical plan of the estate and for dating its construction exactly. Huayna Capac's country palace shows a design different from that devised by his ancestors. Niles argues that the radical stylistic and technical innovations documented in the buildings themselves can be understood by referring to the turbulent political atmosphere prevalent at the time of his accession. Illustrated with numerous photographs and reconstruction drawings, *The Shape of Inca History* breaks new ground by proposing that Inca royal style was dynamic and that the design of an Inca building can best be interpreted by its historical context. In this way it is possible to recreate the development of Inca architectural style over time.
