*Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.*

*The assessment of young children's development and learning has recently taken on new importance. Private and government organizations are developing programs to enhance the school readiness of all young children, especially children from economically disadvantaged homes and communities and children with special needs. Well-planned and effective assessment can inform teaching and program improvement, and contribute to better outcomes for children. This book affirms that assessments can make crucial contributions to the improvement of children's well-being, but only if they are well designed, implemented effectively, developed in the context of systematic planning, and are interpreted and used appropriately. Otherwise, assessment of children and programs can have negative consequences for both. The value of assessments therefore requires fundamental attention to their purpose and the design of the larger systems in which they*

are used. *Early Childhood Assessment* addresses these issues by identifying the important outcomes for children from birth to age 5 and the quality and purposes of different techniques and instruments for developmental assessments.

***In the epic fifth installment in this “compulsively readable” (People) series, Galbraith’s “irresistible hero and heroine” (USA Today) take on the decades-old cold case of a missing doctor, one which may be their grisliest yet. Private Detective Cormoran Strike is visiting his family in Cornwall when he is approached by a woman asking for help finding her mother, Margot Bamborough—who went missing in mysterious circumstances in 1974. Strike has never tackled a cold case before, let alone one forty years old. But despite the slim chance of success, he is intrigued and takes it on; adding to the long list of cases that he and his partner in the agency, Robin Ellacott, are currently working on. And Robin herself is also juggling a messy divorce and unwanted male attention, as well as battling her own feelings about Strike. As Strike and Robin investigate Margot’s disappearance, they come up against a fiendishly complex case with leads that include tarot cards, a psychopathic serial killer and witnesses who cannot all be trusted. And they learn that even cases decades old can prove to be deadly . . .***

How can classroom teachers effectively differentiate learning and teaching programs to provide for the needs of every student in their class? This best-selling text begins by asking "Why include all students?" in regular classrooms and then shows how this can be done. It outlines the philosophy of inclusive education and focuses on the use of individualised planning and effective teaching practices to maximise learning outcomes within positive and productive environments. Vignettes and narratives provide real-life examples that help put the theory in context. This fifth edition includes broader coverage of issues to do with diversity and individual differences, particularly cultural and multicultural inclusion, linguistic diversity and giftedness. There is more throughout on the universal design for learning framework and on partnerships with families, while new pedagogical features encourage readers to reflect. Throughout, it emphasises a practical, research-based approach to teaching that can be applied to support students with a range of differences and additional needs.

The ebook edition of this title is Open Access and freely available to read online. Examining the impact of drug criminalisation on a previously overlooked demographic, this book argues that women are disproportionately affected by a flawed policy approach.

A New York Times bestseller! "A bewitching gem...I absolutely loved every moment of this story." —Stephanie Garber, #1 New York Times bestselling author of the Caraval series "If you loved the Hogwarts Library...you'll be right at home at Summershall." —Katherine Arden, New York Times bestselling author of The Bear and the Nightingale From the New York Times bestselling author of An Enchantment of Ravens comes an "enthraling adventure" (Kirkus Reviews, starred review) about an apprentice at a magical library who must battle a powerful sorcerer to save her kingdom. All sorcerers are evil. Elisabeth has known that as long as she has known anything. Raised as a foundling in one of Austermeer's Great Libraries, Elisabeth has grown up among the tools of sorcery—magical grimoires that whisper on shelves and rattle beneath iron chains. If provoked, they transform into grotesque monsters of ink and leather. Then an act of sabotage releases the

library's most dangerous grimoire, and Elisabeth is implicated in the crime. With no one to turn to but her sworn enemy, the sorcerer Nathaniel Thorn, and his mysterious demonic servant, she finds herself entangled in a centuries-old conspiracy. Not only could the Great Libraries go up in flames, but the world along with them. As her alliance with Nathaniel grows stronger, Elisabeth starts to question everything she's been taught—about sorcerers, about the libraries she loves, even about herself. For Elisabeth has a power she has never guessed, and a future she could never have imagined.

The human race spends a disproportionate amount of attention, money, and expertise in solving, trying, and reporting homicides, as compared to other social problems. The public avidly consumes accounts of real-life homicide cases, and murder fiction is more popular still. Nevertheless, we have only the most rudimentary scientific understanding of who is likely to kill whom and why. Martin Daly and Margo Wilson apply contemporary evolutionary theory to analysis of human motives and perceptions of self-interest, considering where and why individual interests conflict, using well-documented murder cases. This book attempts to understand normal social motives in murder as products of the process of evolution by natural selection. They note that the implications for psychology are many and profound, touching on such matters as parental affection and rejection, sibling rivalry, sex differences in interests and inclinations, social comparison and achievement motives, our sense of justice, lifespan developmental changes in attitudes, and the phenomenology of the self. This is the first volume of its kind to analyze homicides in the light of a theory of interpersonal conflict. Before this study, no one had compared an observed distribution of victim-killer relationships to "expected" distribution, nor asked about the patterns of killer-victim age disparities in familial killings. This evolutionary psychological approach affords a deeper view and understanding of homicidal violence.

*This text offers a wealth of practical and proven strategies for successfully including students with disabilities in general education classrooms. The text provides targeted strategies for the subject and skill areas, as well as special needs of individual students, with a strong focus on instructional strategies applied to specific student need areas. An overall theme of "effective, differentiated instruction" is infused throughout the text, relating to those practices that are most closely aligned with academic success. The text is unique in its three-part coverage of 1). the fundamentals of teaching students with special needs, 2). effective general teaching practices, and 3). inclusive practices in specific subject areas. With a strong focus on instructional strategies and how they are applied to specific student need areas, the text goes further by featuring more specific strategies than any other text, and extensive information about the most effective strategies available, and when and how to use them.. This strong focus instructs pre-service teachers and other education personnel on how they can implement in the classroom specific strategies to address a very wide range of grade levels, skill levels, academic content areas; and extensive and very specific information on strategies teachers can use in the areas of most concern to them, e.g., behavior management, handling student confrontations, promoting literacy, memory for school content, motivation to learn, maintaining student attention, adapting assessment and improving test scores, and specific strategies for adapting specific lessons in math, science, social studies, and career and technical education. Specifically written for pre-service or in-service special education teachers who will work with general education teachers in K-12 classrooms, the text is also relevant for school psychologists, counselors, support staff, and other school personnel interested in helping all students succeed in the classroom. This Student Value Edition is a three-hole punched, loose-leaf version of the textbook and provides students the opportunity to personalize their book by incorporating their own notes and taking only the portion of the book they need to class - all at a fraction of the bound book price.*

*A must-read for parents, new teachers, and classroom veterans, Educating Esmé is the exuberant diary of Esmé Raji Codell's first year teaching in a Chicago public school. Fresh-mouthed and free-spirited, the irrepressible Madame Esmé—as she prefers to be called—does the cha-cha during multiplication tables, roller-skates down the hallways, and puts on rousing performances with at-risk students in the library. Her diary opens a window into a real-life classroom from a teacher's perspective. While battling bureaucrats, gang members, abusive parents, and her own insecurities, this gifted young woman reveals what it takes to be an exceptional teacher. Heroine to thousands of parents and educators, Esmé now shares more of her ingenious and yet down-to-earth approaches to the classroom*

The purpose of the Handbook of Special Education is to help profile and bring greater clarity to the already sprawling and continuously expanding field of special education. To ensure consistency across the volume, chapter authors review and integrate existing

strengths and weaknesses, note gaps in the literature, and discuss implications for practice and future research. The second fully updated throughout to take into account recent changes to federal laws as well as the most current academic research. A new section has been added on research methods in special education.

Gender Equality, the fifth UN Sustainable Development Goal (SDG 5), aims for the elimination of all forms of discrimination against women and girls. It thereby addresses all forms of violence, unpaid and unacknowledged care and domestic work, as well as the need to ensure equal opportunities for leadership at all levels of decision-making in political, economic and public life. Thus, the areas in which change to gender equality on a global scale are needed are very broad. In this volume, we focus on three main areas of inquiry, 'Sexual and Gender Equality', 'Gender Equality in the Workplace', and 'Care, Work and Family', and raise the following transversal questions: How can gender be addressed in an international perspective, linking gender to further categories of difference, which are involved in discrimination? In which ways are binary gender taking part in inequality regimes and by which means can these binaries be questioned? How can we measure, control and promote progress with regard to gender equality and how do we, in doing so, define gender? Which multi-, inter- or transdisciplinary approaches are needed for understanding the diversity of gender, in order to support a transition to 'gender equality'? Transitioning to Gender Equality is part of MDPI's new Open Access book series Transitioning to Sustainability. With this series, MDPI pursues environmentally and socially responsible research which contributes to efforts toward a sustainable world. Transitioning to Sustainability aims to add to the conversation on local and global sustainable development according to the 17 SDGs. Set to be published in 2020/2021, the book series is intended to transcend disciplinary, even academic boundaries. MDPI supports the United Nations Sustainable Development Goals. The development of entrepreneurial abilities in people with dyslexia is a subject of great interest. It has gained increasing importance in economically difficult times because of its potential for the development of new business opportunities. This book brings together contributions from researchers, educators, and entrepreneurs with dyslexia, investigating this subject from many perspectives. Is there something different in the profile of a person with dyslexia that supports the development of entrepreneurship? This book aims to draw out key themes which can be used in education to

motivate, mentor, and create the business leaders of tomorrow. It offers a fundamental text for this area of study with a comprehensive, international examination of its topic. It includes views by new and established international writers and researchers, providing up-to-date perspectives on entrepreneurship, dyslexia, and education. It is accessible to read, to understand, and to learn from, and is suitable for recommended reading for graduate and postgraduate students. The diverse views and perspectives demonstrated in this book make it as relevant as possible for a wide group of readers. It informs study in the fields of business and dyslexia, and will be of interest to educators, researchers, and to anyone interested in the overlap of entrepreneurship and dyslexia. Based on the New York Times bestselling book and the Academy Award-nominated movie, author Margot Lee Shetterly and Coretta Scott King Illustrator Honor Award winner Laura Freeman bring the incredibly inspiring true story of four black women who helped NASA launch men into space to picture book readers! Dorothy Vaughan, Mary Jackson, Katherine Johnson, and Christine Darden were good at math...really good. They participated in some of NASA's greatest successes, like providing the calculations for America's first journeys into space. And they did so during a time when being black and a woman limited what they could do. But they worked hard. They persisted. And they used their genius minds to change the world. In this beautifully illustrated picture book edition, we explore the story of four female African American mathematicians at NASA, known as "colored

computers," and how they overcame gender and racial barriers to succeed in a highly challenging STEM-based career. "Finally, the extraordinary lives of four African American women who helped NASA put the first men in space is available for picture book readers," proclaims Brightly in their article "18 Must-Read Picture Books of 2018." "Will inspire girls and boys alike to love math, believe in themselves, and reach for the stars."

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

confidence, enhances classroom community, and increases achievement. Leslie Montgomery and Margot Holmes Smith weave vocabulary into each school day using multisensory instruction that includes music, art, literature, movement, games, drama, writing, test-taking skills, and technology. Along the way, they turn every student into a lover of language. With support from literacy specialist Brenda Overturf, Leslie and Margot have developed a five-part plan--introducing new words in context, adding related synonyms and antonyms, engaging students in several days of active learning, celebrating new words, and assessing vocabulary development--that teaches all students to learn and love vocabulary. This easy-to-read reference explains how to plan, teach, and assess based on the latest research in vocabulary instruction and learning. Forget copying definitions from the dictionary and completing boring worksheets! Word mastery comes from intimate knowledge of language. From prediction to practice to performance, students from all backgrounds can discover how to make words their own. After incorporating Leslie's and Margot's vocabulary plan into your daily instruction, you and your students can become word nerds, too!

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators. Advances in knowledge of effective strategies for the treatment of learning and behavioral disabilities are of little use without highly trained and effective personnel to implement these strategies. This volume discusses a wide range of important issues in the preparation of those personnel.

What does it actually mean to teach an inclusive mixed-ability class? From the author of the classic teacher text Commonsense Methods for Children with Special Needs this new book from Peter Westwood fully acknowledges what is feasible and useful to teachers in today's inclusive classroom. This insightful

teaching resource promotes a fully inclusive approach to teaching the common curriculum to all, while acknowledging differences among learners in relation to intelligence, gender, socioeconomic background, cultural background, language skills and disabilities. Drawing on the underlying principles of inclusive education, and on curriculum and learning theories, Westwood discusses in detail the challenge of diversity in the classroom. The author presents in practical terms an adaptive approach to teaching that can respond, when necessary, to differences among students. Accessible chapters in this book present: sound pedagogical practice linked with adapting curriculum content; helpful teaching methods; a range of resource materials; useful assessment procedures; support for learning. The writer draws appropriately on international research and current learning theories to support this approach, whilst each chapter contains an up-to-date list of online and print resources easily available to teachers who wish to pursue topics in greater depth. This book will be of interest to both practising and trainee teachers and teaching assistants, as well as school principals, school counsellors and educational psychologists.

Tender Morsels is a dark and vivid story, set in two worlds and worrying at the border between them. Liga lives modestly in her own personal heaven, a world given to her in exchange for her earthly life. Her two daughters grow up in this soft place, protected from the violence that once harmed their mother. But the real world cannot be denied forever—magicked men and wild bears break down the borders of Liga's refuge. Now, having known Heaven, how will these three women survive in a world where beauty and brutality lie side by side?

This open access book makes a case for a socially inclusive energy transition and illustrates how engineering and public policy professionals can contribute to shaping an inclusive energy transition, building on a socio-technical systems engineering approach. Accomplishing a net-zero greenhouse gas emissions economy in 2050 is a daunting challenge. This book explores the challenges of the energy transition from the perspectives of technological innovation, public policy, social values and ethics. It elaborates on two particular gaps in the design of public policy interventions focused on decarbonization of the energy system and discusses how both could be remedied. First, the siloed organization of public administration fails to account for the many interdependencies between the energy sector, the mobility system, digital infrastructure and the built environment. Cross-sector

coordination of policies and policy instruments is needed to avoid potentially adverse effects upon society and the economy, which may hamper the energy transition rather than accelerate it. Second, energy and climate policies pay insufficient attention to the social values at stake in the energy transition. In addressing these gaps, this book intends to inspire decision makers engaged in the energy transition to embrace the transition as an opportunity to bring a more inclusive society into being.

How can today's teachers, whose classrooms are more culturally and linguistically diverse than ever before, ensure that their students achieve at high levels? How can they design units and lessons that support English learners in language development and content learning—simultaneously? Authors Amy Heineke and Jay McTighe provide the answers by adding a lens on language to the widely used Understanding by Design® framework (UbD® framework) for curriculum design, which emphasizes teaching for understanding, not rote memorization. Readers will learn \* the components of the UbD framework; \* the fundamentals of language and language development; \* how to use diversity as a valuable resource for instruction by gathering information about students' background knowledge from home, community, and school; \* how to design units and lessons that integrate language development with content learning in the form of essential knowledge and skills; and \* how to assess in ways that enable language learners to reveal their academic knowledge. Student profiles, real-life classroom scenarios, and sample units and lessons provide compelling examples of how teachers in all grade levels and content areas use the UbD framework in their culturally and linguistically diverse classrooms. Combining these practical examples with findings from an extensive research base, the authors deliver a useful and authoritative guide for reaching the overarching goal: ensuring that all students have equitable access to high quality curriculum and instruction.
