Incommons Community Organizing

"Documents 44 years of the late Karl Linn's work creating neighborhood commons, such as community gardens, playgrounds and parks. Includes a dozen photographically-illustrated case studies. Offers practical advice on engaging professionals with local popu

A collection of essays on workers' efforts in the 19th and 20th centuries to assert control over the processes of production in US. It describes the development of management techniques and includes discussions of various worker and union responses to unemployment.

This book contains entries from thousands of publications whether in English, Hebrew, Yiddish, and German-books, research reports, educational and general periodicals, synagogue histories, conference proceedings, bibliographies, and encyclopedias-on all aspects of Jewish education from pre-school through secondary education.

The national recession forced many communities to examine new and innovative ways to promote local economic development, resulting in long-term community changes. New techniques and approaches were used to identify available opportunities and programs which could take advantage of development opportunities. A common theme among the contributions to this book is a focus on building leadership capacity, and several chapters discuss the successful practices which are aimed at bringing new leaders into local development efforts. Especially important are ways to identify youth and young adults, and designing programs that bring them into active leadership roles within community development efforts. On a broader scale, several authors present material regarding building local entrepreneurship capacity, and recognizing that entrepreneurs at different stages in their development have different training and support needs. The discussions in this book will help local policymakers and development practitioners better understand the various development techniques, and find ways to build capacity within their community, stimulating development. This information will be especially useful for groups interested in engaging youth and populations who, in the past, have not been especially active in discussions about community and economic development. This book was originally published as a special issue of Community Development.

Theorizing the Sharing Economy

Agriculture and food systems, including organic agriculture, are undergoing a technological and structural modernization strongly influenced by growing globalization. Organic agricultural movements can be seen as a tangible effort towards more sustainable development. However, there are large differences between, on the one hand, industrialized farming and consumption based on global food chains and, on the other, smallholder farmers and resource poor people primarily linked in local food markets in low-income countries. This book provides an overview of the potential role of organic agriculture in a global perspective. The book discusses in-depth political ecology, ecological justice, ecological economics and free trade with new insights on the challenges for organic agriculture. This is followed by the potential role of organic agriculture for improving soil fertility, nutrient cycling and food security and reducing veterinary medicine use, together with discussions of research needs and the importance of non-certified organic agriculture.

The two-volume set LNCS 9172 and 9173 constitutes the refereed proceedings of the Human Interface and the Management of Information thematic track, held as part of the 17th International Conference on Human-Computer Interaction, HCII 2015, held in Los Angeles, CA, USA, in August 2015, jointly with 15 other thematically similar conferences. The total of 1462 papers and 246 posters presented at the HCII 2015 conferences were carefully reviewed and selected from 4843 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. This volume contains papers addressing the following major topics: information visualization; information presentation; knowledge management; haptic, tactile and multimodal interaction; service design and management; user studies.

Based on a selection of 30 election campaign speeches during Obama's first run for the American presidency in 2008, this book investigates the Democratic presidential candidate's much celebrated rhetoric from a cognitive semantics point of view.

This thought-provoking book will appeal to both specialists and newcomers to Aristotle. Specialists will welcome the attention to original texts that underpin many of our ideas on politics, business studies, and other social sciences, whilst newcomers will appreciate the lucid summaries and applications that make Aristotle fascinatingly accessible.

This book is published open access under a CC BY 4.0 licence.The book offers a concise guide for librarians, helping them understand the challenges, processes and technologies involved in managing access to online resources. After an introduction the book presents cases of general authentication and authorisation. It helps readers unders authentication and provides the fundamentals of IP address recognition in an easy to understand manner. A special chapter is dedicated to Security Assertion Markup Language (SAML), followed by an overview of the key concepts of OpenID Connect. The book concludes with basic troubleshooting guidelines and recommendations for furth benefit from this quick and easy read, which demystifies the technologies used, features real-life scenarios, and explains how to competently employ authentication and access management.

Leaders in Christian communities are all asking the same question: How can we bring the generations back together? InterGenerate addresses important questions of why we should bring the generations back together, but even more significantly, how we can bring generations back together. In this edited collection, ministers, church lead will find valuable, new generational theory perspectives, fresh biblical and theological insights, and practical outcomes backed by current research. InterGenerate offers important guidance on topics including •intergenerational spiritual disciplines, •transitioning from multigenerational to intergenerational, •new research that focuses directly and offers practical outcomes to implement, and •benefits of intergenerational ministry for the most marginalized generations. An exciting and distinctive aspect of InterGenerate is the vast diversity of voice —men and women ranging in age from millennials to baby boomers, representing multiple countries and over a dozen denominations— more intentionally intergenerational in their outlook and practice.

Humanists and Reformers

The persistent failure of public schooling in low-income communities constitutes one of our nation's most pressing civil rights and social justice issues. Many school reformers recognize that poverty, racism, and a lack of power held by these communities undermine children's education and development, but few know what to do about it. A Match on Dry Grass argues that community organizing represents a fresh and promising approach to school reform as part of a broader agenda to build power for low-income communities and address the profound social inequalities that affect the education of children. Based on a comprehensive national study, the book presents rich and compelling case studies of prominent organizing efforts in Chicago, New York City, Los Angeles, Denver, San Jose, and the Mississippi Delta. The authors show how organizing groups build the participation and leadership of parents and students so they can become powerful actors in school improvement efforts. They also identify promising ways to overcome divisions and create the collaborations between educators and community residents required for deep and sustainable school reform. Identifying the key processes that create strong connections between schools and communities, Warren, Mapp, and their collaborators show how community organizing builds powerful relationships that lead to the transformational change necessary to advance educational equity and a robust democracy.

This book introduces a Digital Social System Praxis Framework (DSSPF) integrating Computational Media, Evolutionary Systems Thinking and Design Thinking approaches to E-transformation practice, also called Community Informatics Design (CID). The DSSPF framework is intended to create communication spaces dedicated to knowledge production and sharing for social and organizational change. It allows social systems researchers and practitioners to recognize their synergistic roles in the praxis process to shape their future through social innovation projects. This transdisciplinary text provides potential students and practitioners fundamental concepts and tools for such design. It offers resources from the Pragmatic and Systemic philosophy of science for the co-construction of social architectures and infrastructures, and multi-aspectual design methodologies by which government, organizations and civil society can learn to ethically co-design common ground. This approach provides complementary and common patterns from known methods, models, and theories of social systems interventions that could support a generic framing of large scale sociotechnical systems: digital social innovation ecosystem, living Labs, Fab Labs, enterprise collaborative networks. There will be a particular focus on understanding and addressing the dimensions that make people from different communities of practice able to communicate and collaborate through multiple digital media, design platforms, worldviews and modeling approaches.

Living wage activism has spanned time and space, reaching across decades and national boundaries. Conditions generating living wage movements early in the twentieth century have resurfaced in the twenty-first century, only on a global scale: 'sweated' labour, macroeconomic instability, and job insecurity. Upon reviewing the empirical evidence, the book's contributors make strong cases both for and against living wage activism. The effective blend of historical, contemporary, and global perspectives provides opportunities for teachers, scholars, and activists to evaluate how we can address low pay at the organizational and macroeconomic levels.

This volume provides a unique perspective on the social, cultural and political situation of the Jewish population in postwar Soviet Ukraine. It is based on declassified collections of documents from the Ukrainian central and regional archives.

The Euro-Mediterranean Partnership was formed in 1995 in Barcelona. In this volume, concepts of democracy, civil society, human rights and dialogue among civilizations in the Mediterranean region are addressed in the context of the new Euro-Mediterranean Partnership.

The demonstrations and occupations that emerged across Europe in 2011-12 struck a chord in public opinion in a way that has not been true for many years. Based on research carried out across the continent, this volume investigates why this is occurring now and what they tell us about the future of the European project.

This book examines the multiple relationships between education, pedagogy, and social change in Latin America and beyond through a discussion of critical theory in education and its uses in Latin American society today. An international group of contributors discuss both individual countries and the region as a whole.

Artistic practices have long been disturbing the relationships between art and space. They have challenged the boundaries of performer/spectator, of public/private, introduced intervention and installation, ephemerality and performance, and constantly sought out new modes of distressing expectations about what is construed as art. But when we expand the world in which we look at art, how does this change our understanding of critical artistic practice? This book presents a global perspective on the relationship between art and the city. International and leading scholars and artists themselves present critical theory and practice of contemporary art as a politicised force. It extends thinking on contemporary arts practices in the urban and political context of protest and social resilience and offers the prism of a 'critical artscape' in which to view the urgent interaction of arts and the urban politic. The global appeal of the book is established through the general topic as well as the specific chapters, which are geographically, socially, politically and professionally Contributing authors come from many different institutional and anti-institutional perspectives from across the world. This will be valuable reading for those interested in cultural geography, urban geography and urban culture, as well as contemporary art theorists, practitioners and policymakers.

Canada and the Third World

To symbolize the power of the go the extra mile message, Shawn Anderson pedaled a bicycle from ocean to ocean - solo. Along the way, he interviewed over two hundred inspirational Americans who had demonstrated a remarkable ability to overcome personal setback and accomplish something extraordinary. A blind woman who climbed one of the world's tallest mountains, a triathlete who was born a congenital amputee, a 95-year-old who has been volunteering at the same hospital for 49 years, a corporate executive who gives away 82% of his company's profits - these are a few of the inspirational profiles highlighted in Extra Mile America. The stories in this book have the power to inspire your spirit, challenge you to reevaluate your own life setbacks, and motivate you to take a deep breath of courage in order to get back on your own metaphorical bike with a renewed passion and purpose.

Ten activists, scholars, and writers analyze contemporary development issues linking Canada and the Third World.

This volume takes advantage of this opportunity by presenting a collection of empirical and conceptual work that explores the variety and the trajectories of new forms of organizing in the sharing economy, and in doing so builds on, rejuvenates, and refines existing organization theories.

This book brings together the research into regional development and social change carried out in highland Peru by a team of British and Latin American social anthropologists and sociologists. The area studied—the Mantaro Valley of central Peru—is one of the most densely populated and economically differentiated of highland zones; it is also notable for its community-based forms of cooperation and its high level of peasant political activity. The book presents a series of case studies that examine cooperative forms of organization in relation to developments in the regional economy and to changes in national policy. The analysis attempts to avoid interpreting local processes merely as responses to externally initiated change. It stresses instead the need to consider the interplay of local and national forces, because local groups and processes themselves affect the pattern of regional and national development. The case studies cover a range of political and economic topics, from peasant movements to the achievements and shortcomings of government-sponsored agricultural and manufacturing cooperatives. The concluding chapter, by the editors, explores the theoretical implications of these studies.

The two-volume set, LNCS 13325 and 13326, are conference proceedings that constitutes the refereed proceedings of the 10th International Conference on Distributed, Ambient and Pervasive Interactions, DAPI 2022, held as part of the 24th International Conference, HCI International 2022, which took place during June-July 2022. The conference was held virtually due to the COVID-19 pandemic. The 58 papers of DAPI 2022 are organized in topical sections named for each volume: Part I: User Experience and Interaction Design for Smart Ecosystems; Smart Cities, Smart Islands, and Intelligent Urban Living; Smart Artifacts in Smart Environments; and Opportunities and Challenges for the Near Future Smart Environments Part II: Smart Living in Pervasive IoT Ecosystems; Distributed, Ambient, and Pervasive Education and Learning; Distributed, Ambient, and Pervasive Well-being and Healthcare; and Smart Creativity and Art.

The International Encyclopedia of Human Geography provides an authoritative and comprehensive source of information on the discipline of human geography and its constituent, and related, subject areas. The encyclopedia includes over 1,000 detailed entries on philosophy and theory, key concepts, methods and practices, biographies of notable geographers, and geographical thought and praxis in different parts of the world. This groundbreaking project covers every field of human geography and the discipline's relationships to other disciplines, and is global in scope, involving an international set of contributors. Given its broad, inclusive scope and unique online accessibility, it is anticipated that the International Encyclopedia of Human Geography will become the major reference work for the discipline over the coming decades. The Encyclopedia will be available in both limited edition print and online via ScienceDirect - featuring extensive browsing, searching, and internal cross-referencing between articles in the work, plus dynamic linking to journal articles and abstract databases, making navigation flexible and easy. For more information, pricing options and availability visit http://info.sciencedirect.com/content/books/ref_works/coming/ Available online on ScienceDirect and in limited edition print format Broad, interdisciplinary coverage across human geography: Philosophy, Methods, People, Social/Cultural, Political, Economic, Development, Health, Cartography, Urban, Historical, Regional Comprehensive and unique - the first of its kind in human geography

Promoting Community Change: Making It Happen in the Real World

This book contains powerful, true stories of transformation in the lives of people and communities that have been discounted and impacted by many forms of injustice and violence. Communities create remarkable change using an organizing and action process rooted in deep listening, compassion and grassroots empowerment. Change is revealed through transformation in people's lives, and people working together to create peace and justice.

With an emphasis on the challenges of sustaining the commons across local to global scales, Making Commons Dynamic examines the empirical basis of theorising the concepts of commonisation and decommonisation as a way to understand commons as a process and offers analytical directions for policy and practice that can potentially help maintain commons as commons in the future. Focusing on commonisation—decommonisation as an analytical framework useful to examine and respond to changes in the commons, the chapter contributions explore how natural resources are commonised and decommonised through the influence of multi-level internal and external drivers, and their implications for commons governance across disparate geographical and temporal contexts. It draws from a large number of geographically diverse empirical cases – 20 countries in North, South, and Central America and South- and South-East Asia. They involve a wide range of commons – related to fisheries, forests, grazing, wetlands, coastal-marine, rivers and dams, aquaculture, wildlife, tourism, groundwater, surface freshwater, mountains, small islands, social movements, and climate. The book is a transdisciplinary endeavour with contributions by scholars from geography, history, sociology, anthropology, political studies, planning, human ecology, cultural and applied ecology, environmental and development studies, environmental science and technology, public policy, Indigenous/tribal studies, Latin American and Asian studies, and environmental change and governance, and authors representing the commons community, NGOs, and policy. Contributors include academics, community members, NGOs, practitioners, and policymakers. Therefore, commonisation—decommonisation lessons drawn from these chapters are well suited for contributing to the practice, policy, and theory of the commons, both locally and globally. This beautifully produced volume presents a fascinating survey of two great traditions in human history--the Italian Renaissance and the age of the Reformation. Thomson's description of these periods and their major figures is illustrated with numerous images of personalities, art, and architecture of the times. What can we learn when we listen closely to and engage in dialogue with social movement activists? Social Movements and Activism in the USA addresses this question for a group of progressive activists in Hartford, Connecticut, who do community, labor, feminist, gay and lesbian, peace, and anti-racist organizing. Situated within the twenty-first-century landscape of post-industrialism and neo-liberalism and drawing on oral histories, the book argues for a dialogic and integrative approach to social movement activism. The dialogue between scholar and activist captures the interpretive nature of activists' identity, the variable ways activists decide on strategies and goals, the external constraints on activism, and the creative ways activists manoeuvre around these constraints. This dialogic approach makes the book accessible and useful to students, scholars, and activists alike. The integrative nature of the text refers to its theoretical approach. Rather than advancing a new theory of social movements, it uses existing approaches as a tool kit to examine the what, how, who, and why of social movement activism.

Framing the Rhetoric of a Leader

Organizational leaders, governments and trade unions all agree that learning is fundamental to organizational and economic success. The question is how it should best be supported. The Handbook of Work Based Learning delivers a compelling answer to this question. Learning needs to be based in the realities of organizational life. This unique, groundbreaking handbook provides a definitive guide to the set of strategies, tactics and methods for supporting work based learning. The three main parts of the Handbook, which focus in turn on strategies, tactics and methods, are written for both the learner and the professional developer alike. Each includes a description of the process (strategy, tactic or method), provides examples of what it looks like in action, explains the benefits and the likely limitations and provides a set of operating hints for applying the process. Nothing has been neglected, so alongside detailed descriptions of what to do and how to do it, the authors have included the Declaration on Learning, created by thirteen of the major figures in the field of organizational learning, a section guiding you towards routes for gaining qualifications, along with a well-researched set of references and further reading.

This book constitutes the proceedings of the 7th International ICST Conference, TridentCom 2011, held in Shanghai, China, in April 2011. Out of numerous submissions the Program Committee finally selected 26 full papers and 2 invited papers. They focus on topics as future Internet testbeds, future wireless testbeds, federated and large scale testbeds, network and resource virtualization, overlay network testbeds, management provisioning and tools for networking research, and experimentally driven research and user experience evaluation.

Cultures, Communities, Competence, and Change provides a transcultural psychosocial conception of the nature of individual and social activity. The author presents an integrated view of how people develop a psychosocially-based awareness of themselves and their milieus to shape what he refers to as their `internested' social systems. In so doing he challenges current deficit/prevention emphases in the helping disciplines and promotes a constructive, prosocial model of individual and social approaches to change.

Governments and nonprofits exist to create public value. Yet what does that mean in theory and practice? This new volume brings together key experts in the field to offer unique, wide-ranging answers. From the United States, Europe, and Australia, the contributors focus on the creation, meaning, measurement, and assessment of public value in a world where government, nonprofit organizations, business, and citizens all have roles in the public sphere. In so doing, they demonstrate the intimate link between ideas of public value and public values and the ways scholars theorize and measure them. They also add to ongoing debates over what public value might mean, the nature of the most important public values, and how we can practically apply these values. The collection concludes with an extensive research and practice agenda conceived to further the field and mainstream its ideas. Aimed at scholars, students, and stakeholders ranging from business and government to nonprofits and activist groups, Public Value and Public Administration is an essential blueprint for those interested in creating public value to advance the common good.

Designed for students who want to move beyond the theoretical discussion of community and become effective agents of change, PROMOTING COMMUNITY CHANGE, 6th Edition addresses the real-world issues facing professionals in social work, human services, and community health. By emphasizing the role a strengthened community can play in preventing and solving the problems commonly experienced by individuals and families, the author gives students the tools they need to improve the lives of individual clients as well as entire communities. Students will learn to identify the issues related to change so that they can bring clients, families, and other community members together to build a healthier community for themselves, their families, and their neighbors. The twentieth century cannot be properly understood unless we understand communism: its origins, growth, demise and legacy. This brief overview of the history of communism challenges us to think about its role in shaping the contemporary world. This book shows how the modern communist movement emerged out of radical millenarian movements of the Middle Ages and the English Civil War, becoming a mass movement of industrial society, seeking to overturn capitalism and replace it with a society of equality, justice, harmony and co-operation. It traces the growth of modern communism from its beginnings in the early nineteenth century to its position of global power at the end of the Second World War. Why did communism grow so quickly? Why did it spread to turn almost half of the world red by the mid-1970s? What impact did it have upon capitalism and capitalist society?
