Indigo in the Fabric of Colonial South

Carolina Life

The Blue Mutiny

The year is 1739. Eliza Lucas is sixteen years old when her father leaves her in charge of their family's three plantations in rural South Carolina and then proceeds to bleed the estates dry in pursuit of his military ambitions. Tensions with the British, and with the Spanish in Florida, just a short way down the coast, are rising, and slaves are starting to become restless. Her mother wants nothing more than for their South Carolina

endeavor to fail so they can go back to England. Soon her family is in danger of losing everything. Upon hearing how much the French pay for indigo dye, Eliza believes it's the key to their salvation. But everyone tells her it's impossible, and no one will share the secret to making it. Thwarted at nearly every turn, even by her own family, Eliza finds that her only allies are an aging horticulturalist, an older and married gentleman lawyer, and a slave with

whom she strikes a dangerous deal: teach her the intricate thousand-year-old secret process of making indigo dye and in return-against the laws of the day-she will teach the slaves to read. So begins an incredible story of love, dangerous and hidden friendships, ambition, betrayal, and sacrifice. Based on historical documents, including Eliza's letters, this is a historical fiction account of how a teenage girl produced indigo dye, which became one of the largest exports

out of South Carolina, an export that laid the foundation for the incredible wealth of several Southern families who still live on today. Although largely overlooked by historians, the accomplishments of Eliza Lucas influenced the course of US history. When she passed away in 1793, President George Washington served as a pallbearer at her funeral. This book is set between 1739 and 1744, with romance, intrigue, forbidden friendships, and political and financial

threats weaving together to form the story of a remarkable young woman whose actions were before their time: the story of the indigo girl.

How the extraordinary multisensory phenomenon of synesthesia has changed our traditional view of the brain. A person with synesthesia might feel the flavor of food on her fingertips, sense the letter "J" as shimmering magenta or the number "5" as emerald green, hear and taste her husband's voice as buttery golden brown. Synesthetes rarely talk

about their peculiar sensory gift—believing either that everyone else senses the world exactly as they do, or that no one else does. Yet synesthesia occurs in one in twenty people, and is even more common among artists. One famous synesthete was novelist Vladimir Nabokov, who insisted as a toddler that the colors on his wooden alphabet blocks were “all wrong.” His mother understood exactly what he meant because she, too, had synesthesia. Nabokov's son Dmitri, who recounts this tale in the

afterword to this book, is also a synesthete—further illustrating how synesthesia runs in families. In *Wednesday Is Indigo Blue*, pioneering researcher Richard Cytowic and distinguished neuroscientist David Eagleman explain the neuroscience and genetics behind synesthesia's multisensory experiences. Because synesthesia contradicted existing theory, Cytowic spent twenty years persuading colleagues that it was a real—and important—brain phenomenon rather than a

mere curiosity. Today scientists in fifteen countries are exploring synesthesia and how it is changing the traditional view of how the brain works. Cytowic and Eagleman argue that perception is already multisensory, though for most of us its multiple dimensions exist beyond the reach of consciousness. Reality, they point out, is more subjective than most people realize. No mere curiosity, synesthesia is a window on the mind and brain, highlighting the

amazing differences in the way people see the world.

Places with a Past

Alex feels like a fish out of water in her new hometown - the sleepy little lakeside village of Boreen Point where she is reluctantly sent to live with her

slightly eccentric aunt for her final year of high school. None of Alex's classmates could care less about the new girl, so Alex couldn't care less about them . . . or so she tries to tell herself. As a distraction from what is quickly shaping up to be a very lonely year, Alex spends her savings on a rundown little yacht and throws herself into restoring it. A curious discovery leads to the beginnings of a friendship, but it's Sam - the sailmaker's apprentice - and his mysterious ways that capture Alex's attention and force her to question what is real and what matters most. A captivating novel about fate, friendship and finding yourself from Young Australian of the Year 2011, Jessica Watson.

Indigo

The Colour that Changed the World

Red, White, and Black Make Blue

Ann Hamilton

Like cotton, indigo has defied its humble origins. Left alone it might have been a regional plant with

minimal reach, a localized way of dyeing textiles, paper, and other goods with a bit of blue. But when blue became the most popular color for the textiles that Britain turned out in large quantities in the eighteenth century, the South Carolina indigo that colored most of this cloth became a major component in transatlantic commodity chains. In *Red, White, and Black Make Blue*, Andrea Feeser tells the stories of all the peoples who made indigo a key part of the colonial South Carolina experience as she explores indigo's relationships to land use, slave labor, textile production and use, sartorial expression, and fortune building. In the eighteenth century, indigo played a central role in the development of South Carolina. The popularity of the color blue among the upper and

lower classes ensured a high demand for indigo, and the climate in the region proved sound for its cultivation. Cheap labor by slaves—both black and Native American—made commoditization of indigo possible. And due to land grabs by colonists from the enslaved or expelled indigenous peoples, the expansion into the backcountry made plenty of land available on which to cultivate the crop. Feeser recounts specific histories—uncovered for the first time during her research—of how the Native Americans and African slaves made the success of indigo in South Carolina possible. She also emphasizes the material culture around particular objects, including maps, prints, paintings, and clothing. *Red, White, and Black Make Blue* is a fraught and compelling history of

both exploitation and empowerment, revealing the legacy of a modest plant with an outsized impact. Experience the thrill of an unexpected love that defies all boundaries in the third historical romance in New York Times bestselling author Catherine Anderson ' s Comanche series... Torn between the white and Comanche worlds of her parents, Indigo Wolf has grown up estranged from the townspeople of Wolf ' s Landing, Oregon. No decent woman calls her a friend, and no man understands her strange, elusive spirit—until rugged Jake Rand comes to town. Jake offers to act as foreman of the family mine after a series of mysterious accidents have left Indigo ' s father seriously injured. But Jake ' s real motives are as secret as his true identity, and as personal as his growing attraction to
