perform procedures such as instrument processing, follow-up on a sterilization failure, and the use of surface covers. Appendix C, CDC guidelines for infection control in dental health care settings 2003, reflects the most up-to-date information available. Added is Appendix G, on the Health Insurance Portability and Accountability Act (HIPAA) of 1996. Review questions are added at the end of each chapter with answers in the back of the book. A detailed outline is now included at the beginning of each chapter. Key terms are included at the beginning of each chapter, and bolded upon first mention. New illustrations and a two-color design have been added.

These guidelines provide recommendations that outline the

critical aspects of infection prevention and control. The recommendations were developed using the best available evidence and consensus methods by the Infection Control Steering Committee. They have been prioritised as key areas to prevent and control infection in a healthcare facility. It is recognised that the level of risk may differ according to the different types of facility and therefore some recommendations should be justified by risk assessment. When implementing these recommendations all healthcare facilities need to consider the risk of transmission of infection and implement according to their specific setting and circumstances.
