Using Dan Brown's book as a jumping off point, Inferno Revealed will provide readers of Brown's Inferno with an engaging introduction to Dante and his world. Much like the books on Leonardo that followed the release of the Da Vinci Code, this book will provide readers with more information about the ever-intriguing Dante. Specifically, Inferno Revealed explores how Dante made himself the protagonist of The Divine Comedy, something no other epic poet has done, a move for which the ramifications have not yet been fully explored. The mysteries and puzzles that arise from Dante's choice to personalize the epic, along with his affinity for his local surroundings and how that affects his depiction of the places, Church, and politics in the poem are considered--along with what this reveals about Brown's own usage of the work. The authors will focus on and analyze how Dan Brown has repurposed Inferno in his newest book--noting what he gets right and what errors are made when he does not. Of course, Dan Brown is not the first author to base his work on Dante. The Comedy has elicited many adaptations from major canonical writers such as Milton and Keats to popular adaptations like David Fincher's Se7en and Tim Burton's Beetlejuice-- all of which will be discussed in detail within Inferno Revealed.

Happiness is on China’s agenda. From Xi Jinping’s “Chinese Dream” to online chat forums, the conspicuous references to happiness are hard to miss. This groundbreaking volume analyzes how different social groups make use of the concept and shows how closely official discourses on happiness are intertwined with popular sentiments. The Chinese Communist Party’s attempts to define happiness and well-being around family-focused Han Chinese cultural traditions clearly strike a chord with the wider population. The collection highlights the links connecting the ideologies promoted by the government and the way they inform, and are in turn informed by, various deliberations and feelings circulating in the society. Contributors analyze the government’s “happiness maximization strategies,” including public service advertising campaigns, Confucian and Daoist-inflected discourses adapted for the self-help market, and the promotion of positive psychology as well as “happy housewives.” They also discuss forces countering the hegemonic discourse: different forms of happiness in the LGBTQ community, teachings of Tibetan Buddhism that subvert the material culture propagated by the government, and the cynical messages in online novels that expose the fictitious nature of propaganda. Collectively, the authors bring out contemporary Chinese voices engaging with different philosophies, practices, and idealistic imaginings on what it means to be happy. Gerda Wielander is a professor of Chinese studies at the University of Westminster. Her research focuses on the link between the spiritual and the political in contemporary China. Derek Hird is a senior lecturer in Chinese studies at Lancaster University, UK. His research interests include gender and masculinities and mental health needs of Chinese migrants in London. “This distinctive volume creates sustained dialogues around a substantive debate. Rejecting the conventional contrasts between China and the West, and yet deeply immersed in sinophone media, the authors understand Chinese discourse on happiness as multiple but interconnected conversations within a globally shared production of knowledge. Equally concerned with text and image, they exhibit an ethnographic eye as sharp as any orthodox ethnography.” —Deborah Davis, Yale University “Wielander and Hird have put together a superbly researched and thoughtfully written set of essays on the multiple ways in which that most elusive of all states—happiness—is understood and pursued in contemporary China. A volume that should become required reading for all interested in Chinese society today.” —Julia C. Strauss, SOAS, University of London
