It's 2248, and in a society so electronically wired-up that everyone is obliged to be imprinted with their own personal circuitry, it takes a pretty sharp operator to beat the system. Joster Rack is such an operator. He is a unique and special kind of thief: an electronic chameleon who can penetrate and manipulate any computer going. For years he has been just one step ahead of the all-powerful corporations whose empire stretches from Earth to the moons of Jupiter and back - but now they are finally closing in on him. For Joster has made a serious mistake: in pulling off his most

audacious heist yet, he has revealed an Achilles heel. But even worse, he has unwittingly sparked off the most terrifying threat the human race has ever had to face - The Opoponax Invasion.

within the industry, need to know about maritime logistics, including shipping lines, containers, tankers, dry bulk, port-centric logistics, and much more.

resolved to master a big-hollow wave—that is, to go from kook (surfese for beginner) to shredder—in a single year, Heller travels from Southern California down the coast of Mexico in the company of his girlfriend and the eccentric surfers they meet. Exuberant and fearless, Heller explores the technique and science of surfing the secrets of its culture, and the environmental ravages to the stunning coastline he visits.
