*One of the main features of the world economy since the late nineteenth century has been the growing dominance of the American economy in both quantitative and qualitative terms. Aspects of this development - e.g. rationalization or the world-wide diffusion of Coca-Cola - have been researched, but largely in isolation. Americanization of the European Economy provides a comprehensive yet compact survey of the growth of American economic influence in Europe since the 1880s. Three distinct but cumulative waves of Americanization are identified. Americanization was (and still is) a complex process of technological, political, and cultural transfer, and this overview explains why and how the USA and the American model of industrial capitalism came to be accepted as the dominant paradigm of political economy in today's Europe. Americanization of the European Economy summarizes the ongoing discussion by business historians, sociologists, and political scientists and makes it accessible to all types of readers who are interested in political and economic development.*

Organisation and Administration for Business (RLE: Organizations)

Mastering Business Administration in Education and African Politics (the Sierra Leone Chapter) This is a revised and improved edition of your book, and as I have already been told, it is quite up-to-date with far more relevant information that address education, educational business, and political issues in Africa in particular, and how these are disturbing educational developments, especially in sub-Saharan and also with suggestions for improvements. According to Mochan Kaul, the co-chairman of Commonwealth Business Council, "giving the challenges ahead, governments have realized that it is beyond their capacity and means to achieve the task of improving education for all." However, Patrick Dlamini, Chief Executive of Development Bank of South Africa, siled what has gone wrong with sudden growth of private schooling outside state control. "The government is having problems of retaining seasoned teachers. Private schooling is poaching the best of brains from the public schooling system, and the government is left with poor-quality teaching and inexperienced teachers because now the private sector has taken the 'crème de la crème.' How do you balance that?" But business is business, and business is about getting the customers what they want and satisfying them most. If African governments are unable to provide what people prefer most, people have the right to choose from existing alternatives so that they can spend their hard earnings on what they want and what can satisfy them most as long as they have the ability and willingness to pay for them. That is the dictation of free-market philosophy. Mohamed Sannoh, Methodist Boys' High School, Kissy Mess Mess, Freetown.

This is the first book to establish a theoretical framework for commercial management. It argues that managing the contractual and commercial issues of projects – from project inception to completion – is vital in linking operations at the project level and the multiple projects (portfolios/ programmes) level to the corporate core of a company. The book focuses on commercial management within the context of project oriented organisations, for example: aerospace, construction, IT, pharmaceutical and telecommunications – in the private and public sectors. By bringing together contributions from leading researchers and practitioners in commercial management, it presents the state-of-the-art in commercial management covering both current research and best practice. Commercial Management of Projects: defining the discipline covers the external milieu (competition, culture, procurement systems); the corporate milieu (corporate governance, strategy, marketing, trust, outsourcing); the projects milieu (management of uncertainty, conflict management and dispute resolution, performance measurement, value management); and the project milieu (project governance, contract management, bidding, purchasing, logistics and supply, cost value reconciliation). Collectively the chapters constitute a step towards the creation of a body of knowledge and a research agenda for commercial management.

**Commercial Management: theory and practice defines the role of commercial management within project-oriented organisations, providing a framework for and helping to develop a critical understanding of the factors that influence commercial management practice. It also identifies generic aspects of this practice and provides a theoretical foundation to these activities, by reference to existing and emergent theories and concepts, as well as to relevant management best practice. The book is structured into four parts: Part 1 Introduction - Commercial Management in Project Environments explores the nature of commercial practice within project-oriented organisations at the buyer-seller interface. It presents a Commercial Management framework, which illustrates the multiple interactions and connections between the purchaser's procurement cycle and a supplier's bidding and implementation cycles. Additionally, it outlines the principle activities undertaken by the commercial function, identifies the skills and abilities that support these activities and reviews the theories and concepts that underpin commercial practice. Finally, it identifies areas of commonality of practice with other functions found within project-oriented organisations, plus sources of potential conflict and misunderstanding. Part 2 - Elements of Commercial Theory and Practice covers commercial leadership; exploring strategy; risk and uncertainty management; financial decision-making; and key legal issues. Part 3 - Approaches to Commercial Practice addresses best practice management; and commercial and contracting strategies and tactics. Finally, Part 4 - Case Studies offers two extended case studies: Football Stadia (the Millennium Stadium, Cardiff; the Emirates Stadium, Islington; and Wembley Stadium, London); and Heathrow Terminal 5. The book provides a one-stop-shop to the many topics that underpin commercial management practice from both a demand (buy-side) and a supply (sell-side) perspective. It will help develop an understanding of the issues influencing commercial management: leadership, strategy, risk, financial, legal, best practice management and commercial and contracting strategy and tactics. This book's companion website is at [www.wiley.com/go/lowecommercialmanagement](http://www.wiley.com/go/lowecommercialmanagement) and offers invaluable resources for both students and lecturers: • PowerPoint slides for lecturers on each chapter • Sample exam questions for students to practice • Weblinks to key journals and relevant professional bodies**
