Transnational commercial law represents the outcome of work undertaken to harmonize national laws affecting domestic and cross-border transactions and is upheld by a diverse spectrum of instruments. Now in its second edition, this authoritative work brings together the major instruments in this field, dividing them into thirteen groups: Treaty Law, Contracts, Electronic Commerce, International Sales, Agency and Distribution, International Credit Transfers and Bank Payment Undertakings, International Secured Transactions, Cross-Border Insolvency, Securities Custody, Clearing and Settlement and Securities Collateral, Conflict of Laws, Civil Procedure, Commercial Arbitration, and a new section on Carriage of Goods. Each group of instruments is preceded by linking text which provides important context by identifying the key instruments in each group, discussing their purposes and relationships, and explaining the major provisions of each instrument, thus setting them in their commercial context. This volume is unique in providing the full text of international conventions, including the preamble - which is important for interpretation - and the final clauses and any annexes. In addition, each instrument is accompanied by a complete list of dates of signature and ratification by all contracting states, all easily navigated through the detailed tables of contents which precedes it. This fully-indexed work provides an indispensable guide for the practitioner or academic to the primary transnational commercial law instruments.

*This book offers the first comparative monograph on the management of elections. The book defines electoral management as a new, inter-disciplinary area and advances a realist sociological approach to study it. A series of new, original frameworks are introduced, including the PROSeS framework, which can be used by academics and practitioners around the world to evaluate electoral management quality. A networked governance approach is also introduced to understand the full range of collaborative actors involved in delivering elections, including civil society and the international community. Finally, the book evaluates some of the policy instruments used to improve the integrity of elections, including voter registration reform, training and the funding of elections. Extensive mixed methods are used throughout including thematic analysis of interviews, (auto-)ethnography, comparative historical analysis and, cross-national and national surveys of electoral officials. This text will be of key interest to scholars, students and practitioners interested and involved in electoral integrity and elections, and more broadly to comparative politics, public administration, international relations and democracy studies.*
