The *Red Skelton Show* was on the air for 20 years, the longest-running primetime network comedy variety series on television. It was a top 10 series for nine years—an accomplishment surpassed only by *Gunsmoke* and *Home Improvement*. The series has a few unimpressive achievements, too, such as becoming the first top 10 series to be cancelled by a network. Here is the history of *The Red Skelton Show*, beginning with its debut in 1951, one of the top five that year. The show then declined in popularity, moved from CBS to NBC in 1953, slowly rose back to the top 10 in the days of the 1960s it became an hour long show and finished at number two in two different years. The cancellation of the show by CBS in 1971, despite its place in the top 10 was a surprise; the last season back with NBC was a failure. Appendices list cast and crew credits and salaries by season, and offer information on the post-*Red Skelton* lives of many of the principal players.

"Actor Pete Duel, most known for his starring role as outlaw Hannibal Heyes in *Alias Smith and Jones*, ending in a 1971 suicide. Organized chronologically, the biography includes interviews with Duel's closest family and friends, complete episode guides for his work.

This is the one indispensable book for today's PC novice.

Motion picture images have influenced the American mind since the earliest days of film, and many thoughtful people are becoming ever more concerned about that influence, as about the pervasive influence of television. In eras of economic instability and international conflict, the film industry has not hesitated to use motion pictures for definite propaganda purposes. During less troubled times, the American citizen's ability to deal with political and social issues has been enhanced or thwarted by images absorbed in the nation's theatres. *Hollywood As Historian* tracks the interaction of Americans with important motion picture productions. Considered are such topics as racial and sexual stereotyping, censorship of films, comedy as a tool for social criticism, the influence of great men and their screen images, and the use of film to interpret history. Opportunities for future study are suggested for those who wish to conduct their own examinations of American film in a cultural context. *Hollywood As Historian* benefits from a variety of approaches. Literary and historical influences are carefully related to *The Birth of a Nation* (1915) and *Apocalypse Now* (1979), two highly tendentious epics of war and cultural change. How political beliefs of filmmakers affected cinematic styles is illuminated in a short survey of documentary films made during the Great Depression. Historical distance has helped analysts to decode messages unintended by filmmakers in the study of *The Snake Pit* (1948) and *Dr. Strangelove* (1964). While pluralism of approach has been encouraged, balance has also been a goal: a concern for institutional and thematic considerations never obscures matters of film aesthetics. In twelve chapters dealing with more than sixteen films, *Hollywood As Historian* offers a versatile text for classes in popular culture, American studies, film history, or film as history. The visual awareness promoted by this text has immediate application, in that students can begin to consider the impact of motion pictures (and television) on their own lives. The films considered: *The Birth of a Nation* (1915), *The Plow that Broke the Plains* (1936), *The River* (1937), *March of Time* (1935-1953), *City Lights* (1931), *Modern Times* (1936), *The Great Dictator* (1940), *The Grapes of Wrath* (1940), *Native Land* (1942), *Wilson* (1944), *The Negro Soldier* (1944), *The Snake Pit* (1948), *On the Waterfront* (1954), *Dr. Strangelove* (1964), *Who's Afraid of Virginia Woolf?* (1966), and *Apocalypse Now* (1979).

The Internet didn't kill TV! It has become its best friend. Americans are watching more television than ever before, and we're engaging online at the same time we're tuning in. Social media has created a new and powerful "backchannel", fueling the renaissance of live broadcasts. Mobile and tablet devices allow us to watch and experience television whenever and wherever we want. And "connected TVs" blend web and television content into a unified big screen experience bringing us back into our living rooms. Social TV examines the changing (and complex) television landscape and helps brands navigate its many emerging and exciting marketing and advertising opportunities. Social TV topics include: Leveraging the "second screen" to drive synched and deeper brand engagement Using social ratings analytics tools to find and target lean-forward audiences Aligning brand messaging to content as it travels time-shifted across devices Determining the best strategy to approach marketing via connected TVs Employing addressable TV advertising to maximize content relevancy Testing and learning from the most cutting-edge emerging TV innovations The rise of one technology doesn't always mean the end of another. Discover how this convergence has created new marketing opportunities for your brand.

Videoland offers a comprehensive view of the "tangible phase" of consumer video, when Americans largely accessed movies as material commodities at video rental stores. Video stores served as a vital locus of movie culture from the early 1980s until the early 2000s, changing the way Americans socialized around movies and collectively made movies meaningful. When films became tangible as magnetic tapes and plastic discs, movie culture flowed out from the theater and the living room, entered the public retail space, and became conflated with shopping and salesmanship. In this process, video stores served as a crucial embodiment of movie culture's historical move toward increased flexibility, adaptability, and customization. In addition to charting the historical rise and fall of the rental industry, Herbert explores the architectural design of video stores, the social dynamics of retail encounters, the video distribution industry, the proliferation of video recommendation guides, and the often surprising persistence of the video store as an adaptable social space of consumer culture. Drawing on ethnographic fieldwork, cultural geography, and archival research, Videoland provides a wide-ranging exploration of the pivotal role video stores played in the history of motion pictures, and is a must-read for students and scholars of media history.

On September 19, 1962, The Virginian made its primetime broadcast premiere. The 1902 novel by Owen Wister had already seen four movie adaptations when Frank Price mentioned the story's series potential to NBC. Filmed in color, The Virginian became television's first 90-minute western series. Immensely successful, it ran for nine seasons—television's third longest running western. This work accounts for the entire creative history of The Virginian, including the original inspirations and the motion picture adaptations—but the primary focus is its transformation into television and the ways in which the show changed over time. An extensive episode guide includes title, air date, guest star(s), writers, producers, director and a brief synopsis of each of The Virginian's 249 episodes, along with detailed cast and production credits.

Aren't we all TV critics? It's a question that overlooks the importance of professional critics whose print and online columns reach large audiences. Their work helps viewers engage with programming and helps shape the conversations that arise. This book covers more than five decades of American criticism, from the early days to the present. Whether by praising or condemning programming trends, evaluating production and ratings, analyzing storylines or weighing in on policy decisions, a television critic's work is more than a consumer guide—it is part of a rich history that offers an insightful view of American culture.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we

might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

[What could there possibly be about Christmas that needs to be "saved"? Christmas isn't dead, not by a long shot. But when in the movies Santa Claus is in trouble, Christmas is in trouble and must be "saved." If bogeys or other circumstances prevent Santa from delivering the presents on Christmas Eve, there will be no Christmas because, as far as the movies are concerned, generally speaking, Santa IS Christmas. Explore 53 reasons for saving Christmas in this lighthearted collection of 228 films (over half of which are animated) from theatrical releases to television movies and specials to episodes of television series. The reasons for saving Christmas just may surprise you.]

A History

In the mid-20th century, Mickey Spillane was the sensation of not just mystery fiction but publishing itself. The level of sex and violence in his Mike Hammer thrillers (starting with I, the Jury in 1947) broke down long-held taboos and engendered a near hysterical critical backlash. Nonetheless, Spillane's influence has been felt—reflections of Hammer are visible in nearly every subsequent tough guy of fiction and film, including James Bond, Dirty Harry, Shaft, Billy Jack, and Jack Bauer. Spillane's fiction came to the screen in a series of films that include Kiss Me Deadly (1955) and The Girl Hunters (1963) with the author himself playing his private eye. These films, and television series starring Darren McGavin and Stacy Keach respectively, are examined in a lively, knowledgeable fashion by Spillane experts. Included are cast and crew listings, brief biographical entries on key persons, and a lengthy interview with Spillane.

Offers readers a comprehensive reference to the world of film, including more than ten thousand DVD titles, along with information on performers, ratings, running times, plots, and helpful features.

Do you remember the 1959 game show where ABC cancelled a tape featuring a female impersonator (Across the Board)? Ever heard of Snip, the 1976 sitcom starring David Brenner that NBC canned just before it debuted? Almost everyone who has worked on a successful television series has also been on one that flopped. Even during the first thirty years of broadcasting, when NBC, CBS, and ABC were the only networks and not quite so quick to cancel unsuccessful programs, hundreds of shows lasted less than one year. This work tells the stories of those ill-fated series that were cancelled within one year after their premieres. The entries are arranged chronologically from the 1948-1949 through the 1977-1978 seasons, and provide brief descriptions of the shows along with such facts as the type of program each series was; its times, dates, and network; its competition on other networks; and the names of the cast, producer, director and writer. The book also includes information from more than 100 interviews with actors, writers, directors, and producers who worked on the short-lived television series.

Director, producer and screenwriter Joss Whedon is a creative force in film, television, comic books and a host of other media. This book provides an authoritative survey of all of Whedon's work, ranging from his earliest scriptwriting on Roseanne, through his many movie and TV undertakings--Toy Story, Buffy the Vampire Slayer, Angel, Firefly/Serenity, Dr. Horrible, The Cabin in the Woods, and Agents of S.H.I.E.L.D.--to his forays into the Marvel Cinematic Universe. The book covers both the original texts of the Whedonverse and the many secondary works focusing on Whedon's projects, including about 2000 books, essays, articles, documentaries and dissertations.

Robert Young began his prolific filmmaking career while a student at Harvard University, where he majored in English literature, founded the Harvard Film Society, and, with the help of several colleagues, put together his first film (about a Boston factory worker). His reputation as a documentary filmmaker earned him a prestigious position with NBC, and he has since worked within and without the Hollywood production system for five decades. At age 80, Robert M. Young continues to be actively involved in a variety of projects as a commercially successful filmmaker and an independent artist. In this compilation of 15 essays, scholars of both English literature and film analyze the aesthetic and thematic elements of Young's many works. Among the films examined are Nothing But a Man, Triumph of the Spirit, Cortile Cascino, ALAMBRISTA!, Short Eyes, Ballad of Gregorio Cortez, Extremities, Dominick and Eugene, Talent for the Game, Roosters, Caught, and Human Error. The book includes an extensive interview with Young that provides a retrospect of Young's life as a director, cinematographer, writer and producer. A filmography of Young's work and a chronology of his life are also provided.

This volume, one of a two volume set, is from the August 1999 HCI International conference papers presented in Munich, Germany. Human Computer Interaction: Communication, Cooperation, and Application Design focuses on the informative and communicative aspects of computer use. A larger number of contributions is concerned with computer-supported cooperation using a wide variety of different techniques. In keeping with the increased focus of HCI International '99 on internet issues and aspects of the global information society, many papers in this volume are centered around information and communication networks and their implications for work, learning, and every-day activities. Due to the growing number and diversity of groups utilizing modern information technologies, issues of accessibility and design for all are becoming more and more pertinent. A range of papers in this volume address these issues and provide the latest research and development results.

The V-chip is a highly significant part of the discussion about whether television (or broadcasting in general) deserves some special attention in terms of its accessibility to children, its particular power to affect conduct, and its invasiveness. But as this notion of filtering and labeling has caught the imagination of the regulator, the legislator, and all those who wish to consider new ways to alter bargaining over imagery in society, the very idea of the V-chip or its equivalent is moving across other technologies, including the Internet. The V-chip issue has also fueled the ongoing debate about violence and sexual practices in society, and how representations on television relate to those practices. Although the initial concept of the V-chip is simple, its flow into the public realm raises so many extraordinary questions that the introduction and production of the chip virtually serves as a case study in problems of law and public policy. The very conceptualization of speech in society is being affected by this issue. Accordingly, the place of the V-chip in this debate is increasingly important; indeed, it may be argued that the V-chip's contribution to legal argumentation may be greater than its ultimate contribution to the relationship between children and imagery. Among the questions the contributors address are: *What research basis is necessary to require a framework for labeling and rating? *What relationship between government and the image-producing industries can be characterized--for constitutional and other reasons--as voluntary as opposed to coercive? *Who should evaluate these images? *To what extent should the evaluation process be centralized and/or distributed? *What assessment is appropriate to evaluate whether the experiment is "successful?" In addition to the V-chip's origin's in Canada and its further evolution in the United States, this book discusses the development of the V-chip and television rating systems in Europe, Australia, and throughout the world. It also includes essays which contrast the very different approaches in Canada and the United States in terms of the role of regulatory agency, industry, and government.
