Edward McKendree Bounds (August 15, 1835 - August 24, 1913) prominently known as E.M. Bounds, was an American author, attorney, and member of the Methodist Episcopal Church South clergy. He is known for writing 11 books, nine of which focused on the subject of prayer. Only two of Bounds' books were published before he died. After his death, Rev. Claudius (Claude) Lysias Chilton, Jr., grandson of William Parish Chilton and admirer of Bounds, worked on preserving and preparing Bounds' collection of manuscripts for publication. By 1921, Homer W. Hodge completed additional editorial work. Edward McKendree Bounds was born on August 15, 1835, in Shelbyville, Missouri. He is the son of Thomas Jefferson and Hester A. (née Purnell) Bounds. In the preface to E.M. Bounds on Prayer, published by Hendrickson Christian Classics Series over 90 years after Bounds' death, it is surmised that young Edward was named after the evangelist, William McKendree, who planted churches in western Missouri and served as the fourth bishop of the Methodist Episcopal Church. He was the fifth child, in a family of three sons and three daughters.

Ethical practice in engineering is critical for ensuring public trust in the field and in its practitioners, especially as engineers increasingly tackle international and socially complex problems that combine technical and ethical challenges. This report aims to raise awareness of the variety of exceptional programs and strategies for improving engineers' understanding of ethical and social issues and provides a resource for those who seek to improve ethical development of engineers at their own institutions. This publication presents 25 activities and programs that are exemplary in their approach to infusing ethics into the development of engineering students. It is intended to serve as a resource for institutions of higher education seeking to enhance their efforts in this area.

In 1950, when he commissioned the first edition of The Armed Forces Officer, Secretary of Defense George C. Marshall told its author, S.L.A. Marshall, that "American military officers, of whatever service, should share common ground ethically and morally." In this new edition, the authors methodically explore that common ground, reflecting on the basics of the Profession of Arms, and the officer's special place and distinctive obligations within that profession and especially to the Constitution.

White Frost has only ever known the darkness. Everything outside of her closed society is The Unknown - a strange and dangerous place accessible to only a chosen few. White's only glimpse of the world beyond comes from her beloved cousin in the form of mysterious collections of words that hint at astonishing wonders. When an accident upends her simple

existence, she's given an unlikely chance to see the truth for herself. What she finds is greater and more terrible than she could have imagined, and before long she is forced to make the most important choice of her life: does she accept her safe, limited world that she's known or take a desperate gamble in a world not meant for her with the Boy with Words?

A new and expanded edition of a highly successful textbook on world religions with a comparative approach which explores how six major religions are lived and expressed through their customs, rituals and everyday practices. A new edition of this major textbook, exploring the world's great religions through their customs, rituals and everyday practices by focusing on the 'lived experience' This comparative study is enriched and broadened with the inclusion of a sixth religion, Daoism Takes a thematic, comparative and practical approach; each chapter explores a series of key themes including birth, death, ethics, and worship across all six religions at each time Broadens students' understanding by offering an impartial discussion of the similarities and differences between each religion Includes an increased range of student-friendly features, designed to allow students to engage with each religion and extend their understanding

It is the best known book about American slavery, and was so incendiary upon its first publication in 1852 that it actually ignited the social flames that led to Civil War less than a decade later. What began as a series of sketches for the Cincinnati abolitionist newspaper The National Era scandalized the North, was banned in the South, and ultimately became the bestselling novel of the 19th century. Today, controversy over this melodramatic tale of the dignified slave Tom, the brutal plantation owner Simon Legree, and Stowe's other vividly drawn characters continues, as modern scholars debate the work's newly appreciated feminist undertones and others decry it as the source of enduring stereotypes about African Americans. As one of the most influential books in U.S. history, it deserves to be read by all students of literature and of the American story. American abolitionist and author HARRIET BEECHER STOWE (1811-1896) was born in Connecticut, daughter of a Congregationalist minister and sister to abolitionist

theologian Henry Ward Beecher. She wrote more than two dozen books, both fiction and nonfiction.

In Fred Chappell's introduction to *The Kelly Cherry Reader*, he writes, "Cherry is a flambeau example of the extremely conscious artist, a writer who mediates ceaselessly upon the problems and possibilities of the poem, the novel, the short story and the essay. She ponders what she has done and how she has done it; she thinks about the approaches and techniques she has employed, and she labors to extend and expand them. This kind of effort is not common to all writers, many of whom will write this year pretty much the same novel they wrote year before last, the same poem they wrote twenty years ago." Cherry has long been a writer whose work has remained vital and, due to her diligence, fresh. Here, in *theReader*, she collects a body of work, much of it no longer in print, and permits us to remap and re-explore where her writing has come from, where it has gone, and where it is bound yet to go; it reacquaints long-time fans and invites new readers to discover the importance of her work.

The Aquarian Gospel of Jesus the Christ is Levi's most famous work, published in 1907. In it, he fills in the missing years of Jesus' life with reports on his early education with Jewish rabbis, a trip to India where he learned about Hinduism and the Vedas, and his further travels to Tibet, Persia, Assyria, Greece, and Egypt. The historical accuracy of Levi's writing is questionable, and the work is considered apocryphal by all but the Church Universal and Truimphant, but his message bolsters the heroic image of Jesus as a savior of men everywhere. American preacher and author LEVI H. DOWLING (1844-1911) was a dedicated ascetic who observed intense meditation and fasting in order to strengthen his spiritual power and understanding. With this practice, he claimed to have gotten access to God's Book of Remembrance, which contains all knowledge of history, and wrote a number of histories based the revelations within that book.

An Introduction to Corpus-Based Language Analysis

Real estate investing is a risk, no matter what you are considering to purchase or how experienced you are. Real estate note investing is no small purchase and not devoid of risk either, but if you talk to an investor that has "been there, done that," you are bound to hear the same thing you will hear in this book: It is worth it! Real estate note investing means you purchase the loan from a lender, essentially making you the bank. You are not a landlord and do not own the property (yet...), so you do not need to do any maintenance or physical labor to flip it for profit, like a hard real estate investment requires. Instead, you collect the mortgage payments and enjoy the monthly passive income for the duration of the note. But what happens when the note is not performing? You can still make money there, and in some cases, more than you would if you bought the loan that has a faithful borrower. There are several considerations you need to review before you dive into an investment this size. Once you have done your due diligence and developed a strategy for success, you can expect to see returns on your investment up to 20% in as little as a few months. When you are playing with the big numbers, this can mean some serious income for you! It is not easy finding these notes to buy or working with borrowers sometimes, so make sure to commit to memory the phrases and tips outlined in this book to make the interactions and processes smooth and effective. In the chapters of this book, enjoy learning the "secrets" note investors live by to create a wealth that boosts their bank accounts immediately and over time, you can achieve this with less effort than a "traditional" real estate investment requires. Highlights of the book include: A brief overview of exactly what a mortgage note is and how it is sold Strategize how to invest in notes for the largest return options How to make money from non-performing liens by making sound investments and clever strategies Discover how to buy notes and who sells them A unique return calculator you can use to determine the profit potential of a note quickly, and also help determine the action you would take to exit the investment Confront the challenges of investing in notes by understanding the concerns and how you can mitigate your risk for the best and highest yield Determine if investing in commercial real estate notes is for you by learning about the different nuances and similarities with residential notes Reference if a state you are considering investing in is a judicial or non-judicial state to help you identify the time it would take for you to see a return on your investment during the foreclosure process Recognize the difference between investing in a rental property and in a

mortgage note. You will be surprised at how attractive the note is compared to a hard asset! Learn the difference between buying a junior lien and a senior lien and how to make either work for you. And much, much more!

There's growing interest in learning how to analyze streaming data in large-scale systems such as web traffic, financial transactions, machine logs, industrial sensors, and many others. But analyzing data streams at scale has been difficult to do well—until now. This practical book delivers a deep introduction to Apache Flink, a highly innovative open source stream processor with a surprising range of capabilities. Authors Ellen Friedman and Kostas Tzoumas show technical and nontechnical readers alike how Flink is engineered to overcome significant tradeoffs that have limited the effectiveness of other approaches to stream processing. You'll also learn how Flink has the ability to handle both stream and batch data processing with one technology. Learn the consequences of not doing streaming well—in retail and marketing, IoT, telecom, and banking and finance Explore how to design data architecture to gain the best advantage from stream processing Get an overview of Flink's capabilities and features, along with examples of how companies use Flink, including in production Take a technical dive into Flink, and learn how it handles time and stateful computation Examine how Flink processes both streaming (unbounded) and batch (bounded) data without sacrificing performance

This book succinctly describes how a large hydro dam in a poor country with weak capacity was successfully prepared by a truly global financial partnership, by turning the natural resource curse on its head and tapping the state of the art to mitigate environmental and . . . the four books comprising the series would certainly be a valuable addition to any entrepreneurship library. However, each book also

an individual purchase. Lorraine Warren, International Journal of Entrepreneurial Behaviour and Research The book delivers what it promises: the uses of narrative methods in entrepreneurship studies. It is both an interesting contribution to the field and an important methodological text for all entrepreneurship researchers who are thinking of adopting qualitative methods in their inquiries. However, it may also be read with interest by researchers using ethnography as their main methodological approach to social studies. . . The aim of the book is to show how narrative methods in entrepreneurship studies, a goal that in my opinion is aptly fulfilled. Monika Kostera, Scandinavian Journal of Management . . . the contributors breathe fresh and imaginative linguistic resources and narrative/discursive frames of reference into the inquiry of entrepreneurial activity. The narrative, the metaphorical, the discursive and the dramaturgical are significant therefore, not only because they bring to the surface hidden processes and the relationality of (everyday) entrepreneurial activity that have possibly been previously silenced. But also, to paraphrase the editors, the approaches highlight the controversial and interactive aspects of the research process. . . The text is welcome because it treats narrative in a scholarly way. Denise Fletcher, International Small Business Journal In their edited book Narrative and Discursive Approaches in Entrepreneurship, Daniel Hjorth and Chris Steyaert provide a fascinating glimpse into a perspective on entrepreneurship that will be enlightening for many. Entrepreneurship authors typically talk about theory, methods, and data as if a straight-forward linear process united them all, and make it seem as if entrepreneurship was simply a matter of knowing how to interpret one's findings. By contrast, the authors in this volume propose narrative and discursive approaches in which the contributing authors emphasize rich description, reflexive conceptualization, and interpretations offered as partial and provisional. They draw upon an international set of cases, including Russia, Sweden, Denmark, Norway, Venezuela, and North America. The cases they present are a fascinating reading, quite apart from what we learn about the difficulties of imposing a particular interpretation on a given story. For example, the case in Caracas, management consultants in Denmark, and women entrepreneurs in northern Norway all make for fascinating narratives from which we can begin to understand the entrepreneurial process. Unlike many edited books which have no plot, the editors have included opening and closing sections for each chapter, offer alternative readings of them, and propose new and expansive ways of thinking about entrepreneurship. Howard Aldrich, University of North Carolina at Chapel Hill, US Daniel Hjorth and Chris Steyaert set out to advance the study of entrepreneurship by refocusing the lens of entrepreneurship from economics, management and marketing to other paradigmatic stances in social sciences and humanities like anthropology and literary studies. This is a provocative collection of chapters that inspire the reader to consider and explore new ideas and research practice that incorporate both the social and the place of entrepreneurship. From the perceptive insights of the editors to the rigorous and provocative discourse of the chapters and their conclusions, the conclusion emerges a story, in the best of storytelling tradition, about how a linguistic turn can rouse new insights. The editors ask questions that move you? they entice, provoke, challenge, stimulate and guide. Their implications should be far reaching and required reading for any student of entrepreneurship. This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. We have represented this book in the same form as it was first published. Hence any marks seen are left intentional and are of the original nature.

One of the outstanding problems of the biologist, whether he be beginning student or specialists, is that of understanding technical terms. The best way to understand and remember technical terms is to understand first their component parts, or roots. This dictionary has been designed primarily to meet the needs of the beginning student, the medical student, and the taxonomist, but it should be of value to all biologists.

This is the second of two collections of correspondence written by early modern English women philosophers. In this volume, Jacqueline Broad presents letters from three influential thinkers of the eighteenth century: Mary Astell, Elizabeth Thomas, and Catharine Trotter Cockburn. Broad provides introductory essays for each figure and explanatory annotations to clarify unfamiliar language, content, and historical context for the modern reader. Her selections make available many letters that have never been published before or that live scattered in various archives, obscure manuscripts, and rare books. The discussions range in subject from moral theology and ethics to epistemology and metaphysics; they involve some well-known thinkers of the period, such as John Norris, George Hickes, Mary Chudleigh, John Locke, and Edmund Law. By centering epistolary correspondence, Broad's anthology works to reframe early modern philosophy, the foundation for so much of twentieth-century philosophy, as consisting of collaborative debates that women actively participated in and shaped. Together with its companion volume, *Women Philosophers of Eighteenth-Century England: Selected Correspondence* is an invaluable primary resource for students, scholars, and those undertaking further research in the history of women's contributions to the formation and development of early modern thought.

The infrastructure-as-code revolution in IT is also affecting database administration. With this practical book,

developers, system administrators, and junior to mid-level DBAs will learn how the modern practice of site reliability engineering applies to the craft of database architecture and operations. Authors Laine Campbell and Charity Majors provide a framework for professionals looking to join the ranks of today's database reliability engineers (DBRE). You'll begin by exploring core operational concepts that DBREs need to master. Then you'll examine a wide range of database persistence options, including how to implement key technologies to provide resilient, scalable, and performant data storage and retrieval. With a firm foundation in database reliability engineering, you'll be ready to dive into the architecture and operations of any modern database. This book covers: Service-level requirements and risk management Building and evolving an architecture for operational visibility Infrastructure engineering and infrastructure management How to facilitate the release management process Data storage, indexing, and replication Identifying datastore characteristics and best use cases Datastore architectural components and data-driven architectures

Love. Magic. Faith. By the autumn of 537 AD, all who are loyal to King Arthur have retreated to a small parcel of land in north Wales. They are surrounded on all sides, heavily outnumbered, and facing near certain defeat. But Myrddin and Nell, two of the king's companions, have a secret that neither has ever been able to face: each has seen that on a cold and snowy day in December, Saxon soldiers sent by Modred will ambush and kill King Arthur. And together, they must decide what they are willing to do, and to sacrifice, to avert that fate. Cold My Heart is the first book in the Lion of Wales series. Complete series reading order: Cold My Heart, The Oaken Door, Of Men and Dragons, A Long Cloud, Frost Against the Hilt. Full color publication with photographs. A first of its kind, this book-of, by, and for the noncommissioned officer and petty officer-is a comprehensive explanation of the enlisted leader across the U.S. Armed Services. It complements The Armed Forces Officer, the latest edition of which was published by NDU Press in 2007, as well as the Services' NCO/PO manuals and handbooks. Written by a team of Active, Reserve, and retired senior enlisted leaders from all Service branches, this book defines and describes how NCOs/POs fit into an organization, centers them in the Profession of Arms, explains their dual roles of complementing the officer and enabling the force, and exposes their international engagement. As Chairman of the Joint Chiefs of Staff General Martin E. Dempsey writes in his foreword to the book, "We know noncommissioned officers and petty officers to have exceptional competence, professional character, and soldierly grit-they are exemplars of our Profession of Arms." Aspirational and fulfilling, this book helps prepare young men and women who strive to become NCOs/POs, re-inspires serving enlisted leaders, and stimulates reflection by those who have retired from or left active service. It also gives those who have never worn the uniform a better understanding of who

these exceptional men and women are, and why they are properly known as the "Backbone of the Armed Forces."
