

Introduction To General Organic Biochemistry 9th Edition

Frost and Deal's General, Organic, and Biological Chemistry gives students a focused introduction to the fundamental and relevant connections between chemistry and life. Emphasizing the development of problem-solving skills with distinct Inquiry Questions and Activities, this text empowers students to solve problems in different and applied contexts relating to health and biochemistry. Integrated coverage of biochemical applications throughout keeps students interested in the material and allow for a more efficient progression through the topics. Concise, practical, and integrated, Frost's streamlined approach offers students a clear path through the content. Applications throughout the narrative, the visual program, and problem-solving support in each chapter improve their retention of the concepts and skills as they master them. General, organic, and biological chemistry topics are integrated throughout each chapter to create a seamless framework that immediately relates chemistry to students' future allied health careers and their everyday lives. Note: This is the standalone book, if you want the book/access card order the ISBN below: 0321802632 / 9780321802637 General, Organic, and Biological Chemistry Plus MasteringChemistry with eText -- Access Card Package Package consists of: 0321803035 / 9780321803030 General, Organic, and Biological Chemistry 0321833945 / 9780321833945 MasteringChemistry with Pearson eText -- ValuePack Access Card -- for General, Organic, and Biological Chemistry

Introduction to General, Organic and Biochemistry Cengage Learning

Intended for use in the two-term, freshman-level General, Organic, and Biochemistry course taken by Allied Health students, the Ninth Edition of this widely adopted text includes improved explanations, updated materials, cutting-edge developments, emerging technologies, and revisions to the popular Chemistry in Action sections. Hein, Pattison, Best, and Arena is a market-proven text that provides the most comprehensive coverage of general, organic, and biochemistry available at this level. Experienced authors, Hein, Pattison, Best, and Arena, recognize that both science and mathematics can be daunting subjects to students. They skillfully anticipate areas of difficulty and pace the text accordingly. Particular emphasis is placed on the understanding of how chemical principles relate to their lives and future careers. The authors focus on problem solving over rote memorization and provide a variety of exercises to aid in the development of this essential skill. While the authors have revised and updated sections on inorganic and organic chemistry throughout the text, they particularly focused on incorporating many of the recent developments in biochemistry.

General Organic and Biological Chemistry, an Integrated Approach

General, Organic, and Biochemistry

An Introduction to Agricultural Biochemistry

Concise, Practical, Integrated

This full-color, comprehensive, affordable manual is appropriate for two-semester introductory chemistry courses. It is loaded with clearly written exercises, critical thinking questions, and full-color illustrations and photographs, providing ample visual support for experiment set up, technique, and results.

"There is a continuing demand for up to date organic & bio-organic chemistry undergraduate textbooks. This well planned text builds upon a successful existing work and adds content relevant to biomolecules and biological activity".

-Professor Philip Page, Emeritus Professor, School of Chemistry University of East Anglia, UK "Introduces the key concepts of organic chemistry in a succinct and clear way". -Andre Cobb, KCL, UK Reactions in biochemistry can be explained by an understanding of fundamental organic chemistry principles and reactions. This paradigm is extended to biochemical principles and to myriad biomolecules. Biochemistry: An Organic Chemistry Approach provides a framework for understanding various topics of biochemistry, including the chemical behavior of biomolecules, enzyme activity, and more. It goes beyond mere memorization. Using several techniques to develop a relational understanding, including homework, this text helps students fully grasp and better correlate the essential organic chemistry concepts with those concepts at the root of biochemistry. The goal is to better understand the fundamental principles of biochemistry. Features: Presents a review chapter of fundamental organic chemistry principles and reactions. Presents and explains the fundamental principles of biochemistry using principles and common reactions of organic chemistry. Discusses enzymes, proteins, fatty acids, lipids, vitamins, hormones, nucleic acids and other biomolecules by comparing and contrasting them with the organic chemistry reactions that constitute the foundation of these classes of biomolecules. Discusses the organic synthesis and reactions of amino acids, carbohydrates, nucleic acids and other biomolecules.

This bestselling text continues to lead the way with a strong focus on current issues, pedagogically rich framework, wide variety of medical and biological applications, visually dynamic art program, and exceptionally strong and varied end-of-chapter problems. Revised and updated throughout, the tenth edition now includes new biochemistry content, new Chemical Connections essays, new and revised problems, and more. Most end of chapter problems are now available in the OWL online learning system. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

General, Organic & Biochemistry

An Integrated Approach

Connecting Chemistry to Your Life

Essentials of General, Organic, and Biochemistry

Contains 25 experiments for the standard course sequence of topics.

For one-semester courses in General, Organic, and Biological Chemistry A friendly, engaging text that reveals connections between chemistry, health, and the environment Chemistry: An Introduction to General, Organic, and Biological Chemistry, 13th Edition is the ideal resource for anyone interested in learning about allied health. Assuming no prior knowledge of chemistry, author Karen Timberlake engages readers with her friendly presentation style, revealing connections between the structure and behavior of matter and its role in health and the environment. Aiming to provide a better learning experience, the text highlights the relevance of chemistry through real-world examples. Activities and applications throughout the program couple chemistry concepts with health and environmental career applications to help readers understand why the content matters. The text also fosters development of problem-solving skills, while helping readers visualize and understand concepts through its engaging figures, sample problems, and concept maps. The 13th Edition expands on Karen Timberlake's main tenets: relevance, a clinical focus, educational research, and learning design. New applications added to questions and problem sets emphasize the material's relevance, while updated chapter openers with follow-up stories help readers form a basis for making decisions about issues concerning health and the environment. New problem-solving tools in this edition, including Try it First and Connect, urge readers to think critically about problem-solving while learning best practices. Also available with Mastering Chemistry. Mastering(tm) Chemistry is the leading online homework, tutorial, and assessment system, designed to improve results by engaging students with powerful content. Instructors ensure students arrive ready to learn by assigning educationally effective content and encourage critical thinking and retention with in-class resources such as Learning Catalytics(tm). Students can further master concepts through homework assignments that provide hints and answer-specific feedback. The Mastering gradebook records scores for all automatically graded assignments in one place, while diagnostic tools give instructors access to rich data to assess student understanding and misconceptions. Note: You are purchasing a standalone product; Mastering(tm) Chemistry does not come packaged with this content. Students, if interested in purchasing this title with Mastering Chemistry, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. If you would like to purchase both the physical text and Mastering Chemistry, search for: 0134416791 / 9780134416793 Chemistry: An Introduction to General, Organic, and Biological Chemistry Plus Mastering Chemistry with eText -- Access Card Package, 13/e Package consists of: 0134421353 / 9780134421353 Chemistry: An Introduction to General, Organic, and Biological Chemistry 0134473124 / 9780134473123 Mastering Chemistry with Pearson eText -- ValuePack Access Card -- for Chemistry: An Introduction to General, Organic, and Biological Chemistry Student can use the URL and phone number below to help answer their questions: <http://247pearsoned.custhelp.com/app/home> 800-677-6337

For one-semester courses in General, Organic, and Biological Chemistry Show the importance of chemistry in the real world Chemistry: An Introduction to General, Organic, and Biological Chemistry, Twelfth Edition is the ideal resource for today's allied health students. Assuming no prior knowledge of chemistry, author Karen Timberlake engages students through her friendly presentation style and reveals connections between the structure and behavior of matter and its role in health and the environment. With a renewed focus on problem-solving skills, the Twelfth Edition encourages active learning through the new, interactive Pearson eText enhanced with media within MasteringChemistry (optional). New Interactive Videos, Sample Calculations, Problem Solving in Allied Health Tutorials, and Dynamic Study Modules bring chemistry to life and walk students through different approaches to problem solving, providing remediation where needed. This program provides a better teaching and learning experience-for you and your students. It will help you to: *Personalize learning with optional MasteringChemistry(R): This online homework, tutorial, and assessment program helps students master core concepts and problem-solving skills, thus freeing up time in the classroom for instructors to focus on complex topics. *Show the relevance of chemistry through real-world examples: Activities and applications throughout the program couple chemistry concepts with health and environmental career applications to help students understand why course content matters. *Foster development of problem-solving skills: The program introduces a variety of clear problem-solving strategies early in the text that are reinforced through Allied Health Tutorials in MasteringChemistry and revisited when needed. *Help students visualize and understand concepts: The text's engaging visual features, including macro-to-micro illustrations, a rich photographic program, and concept maps, help students understand chemistry by seeing chemistry. Note: You are purchasing a standalone product; MasteringChemistry does not come packaged with this content. MasteringChemistry is not a self-paced technology and should only be purchased when required by an instructor.

Organic and Biochemistry

Exploring General, Organic, & Biochemistry in the Laboratory

equilibrium

Introduction to General, Organic, and Biochemistry

This text is different-by design. By relating fundamental concepts of general, organic, and biological chemistry to the everyday world, Jan Smith effectively engages students with bulleted lists, extensive illustrations, and step-by-step problem solving. Smith writes with an approach that delivers need-to-know information in a succinct style for today's students. Armed with an excellent illustration program full of macro-to-micro art, as well as many applications to biological, medical, consumer, and environmental topics, this book is a powerhouse of learning for students.

General, Organic and Biochemistry is praised for the way it gives students the tools they need to develop a working understanding of chemical principles—rather than just asking them to memorize facts. The new edition brings forward the same clear explanations, quality problem-solving support, helpful pedagogy, and applications coverage, adding new features and content to make the text even more accessible, effective, and relevant to its student audience. In order to motivate and thoroughly prepare students, particular attention is paid to relating the chemistry concepts to the human body, health, nutrition, and other important areas important to the student audience. Available in three versions: • General, Organic, and Biochemistry, Second Edition, 0-7167-4375-2—A hardback text of 26 chapters. • Organic and Biochemistry, Second Edition, 0-7167-7072-5—A paperback text containing all organic and biochemistry chapters, plus two general chemistry chapters not included in the GOB version. • An Introduction to General Chemistry, 0-7167-7073-3—A paperback text containing all 10 general chemistry chapters.

NOTE: You are purchasing a standalone product; MasteringChemistry does not come packaged with this content If you would like to purchase MasteringChemistry search for ISBN-10:03219669291/ISBN-13: 9780321966926. That package includes ISBN-10: 0133858413/ISBN-13: 9780133858419 and ISBN-10: 0321967461/ISBN-13: 9780321967466. General, Organic, and Biological chemistry (2-semester). Give allied health students the chemistry they need...how and when they need it! Designed to prepare students for health-related careers, General, Organic, and Biological Chemistry: Structures of Life breaks chemical concepts and problem solving into clear, manageable pieces, ensuring students follow along and stay motivated throughout their first, and often only, chemistry course. Karen Timberlake's friendly writing style, student focus, vetted and refined clinical chemistry problems, and engaging health-related applications help today's students make connections between chemistry and their intended careers as they develop the problem-solving skills they'll need beyond the classroom. The Fifth Edition fully integrates the text with MasteringChemistry to provide an interactive and engaging experience. New Construct a Concept Map activities help students connect ideas through video solutions and live demonstrations, while the text and media establish a clinical focus that ties chemistry directly to allied health. Instructors can also assign MasteringChemistry's new Dynamic Study Modules, which enable students to remediate core math and chemistry skills outside of class, freeing professors to focus on GOB Chemistry concepts and problem solving during class. Also available with MasteringChemistry MasteringChemistry from Pearson is the leading online homework, tutorial, and assessment system, designed to improve results by engaging students before, during, and after class with powerful content. Instructors ensure students arrive ready to learn by assigning educationally effective content before class, and encourage critical thinking and retention with in-class resources such as Learning Catalytics. Students can further master concepts after class through traditional and adaptive homework assignments that provide hints and answer-specific feedback. The Mastering gradebook records scores for all automatically graded assignments in one place, while diagnostic tools give instructors access to rich data to assess student understanding and misconceptions. Mastering brings learning full circle by continuously adapting to each student and making learning more personal than ever-before, during, and after class.

General, Organic, & Biological Chemistry

Introduction to General, Organic & Biochemistry

Essential Lab Manual for Chemistry

Biochemistry

The 48 experiments in this well-conceived manual illustrate important concepts and principles in general, organic, and biochemistry. As in previous editions, three basic goals guided the development of all the experiments: (1) the experiments illustrate the concepts learned in the classroom; (2) the experiments are clearly and concisely written so that students will easily understand the task at hand, will work with minimal supervision because the manual provides enough information on experimental procedures, and will be able to perform the experiments in a 2-1/2 hour laboratory period; and (3) the experiments are not only simple demonstrations, but also contain a sense of discovery. This edition includes many revised experiments and two new experiments. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

NOTE: This edition features the same content as the traditional text in a convenient, three-hole-punched, loose-leaf version. Books a la Carte also offer a great value; this format costs significantly less than a new textbook. Before purchasing, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of MyLab(tm)and Mastering(tm) platforms exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a Course ID, provided by your instructor, to register for and use MyLab and Mastering products. For one-semester courses in General, Organic, and Biological Chemistry A friendly, engaging text that reveals connections between chemistry, health, and the environment Chemistry: An Introduction to General, Organic, and Biological Chemistry, 13th Edition is the ideal resource for anyone interested in learning about allied health. Assuming no prior knowledge of chemistry, author Karen Timberlake engages readers with her friendly presentation style, revealing connections between the structure and behavior of matter and its role in health and the environment. Aiming to provide a better learning experience, the text highlights the relevance of chemistry through real-world examples. Activities and applications throughout the program couple chemistry concepts with health and environmental career applications to help readers understand why the content matters. The text also fosters development of problem-solving skills, while helping readers visualize and understand concepts through its engaging figures, sample problems, and concept maps. The 13th Edition expands on Karen Timberlake's main tenets: relevance, a clinical focus, educational research, and learning design. New applications added to questions and problem sets emphasize the material's relevance, while updated chapter openers with follow-up stories help readers form a basis for making decisions about issues concerning health and the environment. New problem-solving tools in this edition, including Try it First and Connect, urge readers to think critically about problem-solving while learning best practices. Also available with Mastering Chemistry. Mastering(tm) Chemistry is the leading online homework, tutorial, and assessment system, designed to improve results by engaging students with powerful content. Instructors ensure students arrive ready to learn by assigning educationally effective content and encourage critical thinking and retention with in-class resources such as Learning Catalytics(tm). Students can further master concepts through homework assignments that provide hints and answer-specific feedback. The Mastering gradebook records scores for all automatically graded assignments in one place, while diagnostic tools give instructors access to rich data to assess student understanding and misconceptions. Note: You are purchasing a standalone product; Mastering(tm) Chemistry does not come packaged with this content. Students, if interested in purchasing this title with Mastering Chemistry, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. If you would like to purchase both the loose-leaf version of the text and MyLab and Mastering, search for: 0134557336 / 9780134557335 Chemistry: An Introduction to General, Organic, and Biological Chemistry, Books a la Carte Plus MasteringChemistry with Pearson eText -- Access Card Package Package consists of: 0134473124 / 9780134473123 MasteringChemistry with Pearson eText -- ValuePack Access Card -- for Chemistry: An Introduction to General, Organic, and Biological Chemistry 0134554639 / 9780134554631 Chemistry: An Introduction to General, Organic, and Biological Chemistry, Books a la Carte Edition

The most comprehensive book available on the subject, Introduction to General, Organic, and Biochemistry, 11th Edition continues its tradition of fostering the development of problem-solving skills, featuring numerous examples and coverage of current applications. Skillfully anticipating areas of difficulty and pacing the material accordingly, this readable work provides clear and logical explanations of chemical concepts as well as the right mix of general chemistry, organic chemistry, and biochemistry. An emphasis on real-world topics lets readers clearly see how the chemistry will apply to their career.

Introduction to General, Organic, and Biochemistry Laboratory Manual

Introduction to General Organic Biochemistry

Introduction to General, Organic and Biochemistry

Focusing on the needs of allied health and nursing majors, this engaging book is ideal for students who have had no prior exposure to chemistry. The author takes the time to explain how to do tasks that students find difficult, rather than just providing terse descriptions. Emphasizing problem-solving techniques without skipping steps and using terms students can grasp, the book takes the most direct path to biomolecules and metabolic processes, provides a wealth of worked examples to help students understand key chemical concepts, includes novel and relevant Health Notes in the margins, and weaves biological and medical applications throughout. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. -- Fundamentals of General, Organic, and Biological Chemistry by McMurry, Ballantine, Hoeger, and Peterson provides the background in chemistry and biochemistry essential for allied health students, while ensuring students in other disciplines gain an appreciation of chemistry's significance in everyday life. Unlike many texts on this subject, it is clear and concise, punctuated with practical and familiar examples from students' personal experiences. An exceptional balance of chemical concepts explains the quantitative aspects of chemistry, and provides deeper insight into theoretical chemical principles. It also sets itself apart by requiring students to master concepts before they can move on to the next chapter. The Seventh Edition focuses on making connections between General, Organic, and Biological Chemistry with a number of new and updated features—including all-new Mastering Reactions boxes, new and updated Chemistry in Action boxes (formerly titled Applications), new and revised chapter problems that strengthen the ties between major concepts in each chapter and practical applications, and much more. 032175011X / 9780321750112 Fundamentals of General, Organic, and Biological Chemistry with MasteringChemistry® Package consists of: 0321750837 / 9780321750839 Fundamentals of General, Organic, and Biological Chemistry 0321776461 / 9780321776464 MasteringChemistry® with Pearson eText -- Access Card -- for Fundamentals of General, Organic, and Biological Chemistry The most comprehensive General, Organic, and Biochemistry book available, this tenth edition continues its tradition of a solid development of problem-solving skills, numerous examples and practice problems, along with coverage of current applications. Written by an experienced author team, they skillfully anticipate areas of difficulty and pace the book accordingly. Readers will find the right mix of general chemistry compared to the discussions on organic and biochemistry. Introduction to General, Organic, and Biochemistry, Tenth Edition has clear & logical explanations of chemical concepts and great depth of coverage as well as a clear, consistent writing style which provides great readability. An emphasis on Real-World aspects of chemistry makes the reader comfortable in seeing how the chemistry will apply to their career.

An Introduction to General, Organic, and Biological Chemistry

Organic chemistry

Chemistry

An Essay On Patriotism and Nationalism

easy equilibrium equation

Agricultural Biochemistry will provide an introduction to the subject of biochemistry from a perspective that will be particularly applicable to agricultural scientists. It will focus on the chemistry of plant and animal metabolism and the biomolecules that are involved in these pathways and then go on to discuss strategies plants and animals adopt for processing of nutrients, the adaptation of these organisms to environmental conditions and the ways in which new genetic engineering techniques can be used to manipulate growth.

Master problem-solving and prepare for exams using the complete worked-out solutions to all in-text and odd-numbered end-of-chapter questions provided in this manual. Connect Chemistry in Your Life

Laboratory Experiments for General, Organic & Biochemistry

Exercises for the General, Organic, and Biochemistry Laboratory

This full-color, comprehensive, affordable manual is intended for a one-semester general, organic, and biochemistry course, preparatory/basic chemistry course, liberal arts chemistry course, or allied health chemistry course. The procedures are written with the goal of simplifying a complicated and often challenging subject for students by applying concepts to everyday life. The first half of the lab manual covers general topics such as chemical and physical properties, elements of the periodic table, types of bonds, empirical formulas, and reaction stoichiometry. These labs form the foundation for future labs, which cover the basics of organic and biological chemistry. Experiments include the classification of organic compounds and the determination of biomolecules. By the end of this course, students should have a solid understanding of the basic concepts of chemistry, which will give them confidence as they embark on various allied health careers. Features: ?Initiate the study of basic concepts in the general, organic, and biochemistry laboratory by reading through concise introductory material and answering pre-lab questions that familiarize students with the concepts presented in each exercise. The inclusion of color photography and high-quality art promotes engagement and comprehension of the more difficult concepts. ?Investigate the mysteries of matter by following the clearly written procedures and recording data and observations on the provided data sheets. Common techniques are reviewed as needed in Technique Tips boxes to reinforce the development of basic laboratory skills. OSHA pictograms, and Lab Safety boxes are provided to help students understand any risks associated with specific chemicals and equipment. ?Integrate knowledge of each laboratory topic by making sense of the data that has been collected. Reflective Exercises galvanize critical thinking and scientific analysis skills to take shape as students make connections between what has been learned and practiced in the hands-on lab and how this knowledge can be applied to a relevant, real-world context.

This bestselling text continues to lead the way with a strong focus on current issues, pedagogically rich framework, wide variety of medical and biological applications, visually dynamic art program, and exceptionally strong and varied end-of-chapter problems. Revised and updated throughout, the eleventh edition now includes new biochemistry content, new Chemical Connections essays, new and revised problems, and more. Most end of chapter problems are now available in the OWLv2 online learning system. - See more at:

within the product description or the product text may not be available in the ebook version. This edition is designed to help undergraduate health-related majors, and students of all other majors, understand key concepts and appreciate the significant connections between chemistry, health, disease, and the treatment of disease.

General, Organic, and Biological Chemistry

Student Solutions Manual for Bettelheim/Brown/Campbell/Farrell/Torres' Introduction to General, Organic and Biochemistry, 10th

For Love of Country

An Introduction to General, Organic, and Biological Chemistry, Books a la Carte Edition

Nationalism and patriotism are two of the most powerful forces shaping world history. Though seen by many as two sides of the same coin, they have developed widely different connotations. Nationalism is increasingly seen as destructive, and at the root of the world's bloodiest conflicts; patriotism seems something more benign, a political virtue. How are we to mark the distinction between these two phenomena? How can we rescue patriotism from the tainted grasp of nationalism? Reconstructing the historical meaning of the terms, Maurizio Viroli shows how the two concepts have been used within specific cultural and ideological contexts. He reviews the political thought of Italy, England, and Germany and shows how patriotism and nationalism have fundamentally different roots. Professor Viroli concludes that it is morally unacceptable, and indeed unnecessary, to be a nationalist to defend the values that nationalists hold dear. Patriotism, however, is a valuable source of civic responsibility.

Timberlake's Chemistry: An Introduction to General, Organic, and Biological Chemistry is designed to help prepare students for health-related careers, such as nursing, dietetics, respiratory therapy, and environmental or agricultural science. Assuming no prior knowledge of chemistry, it aims to make this course an engaging and positive experience by relating the structure and behavior of matter to its role in health and the environment. Timberlake maintains the clear, friendly writing style and the real-world, health-related applications that have made this text a leader in the discipline. The Eleventh Edition introduces more problem-solving strategies--including new Concept Checks, more Guides to Problem Solving, and more conceptual, challenge, and combined problems.

For courses in General, Organic, and Biological Chemistry Make connections between chemistry and future health-related careers General, Organic, and Biological Chemistry: Structures of Life engages students by helping them see the connections between chemistry, the world around them, and future health-related careers.

Known for its friendly writing style, student focus, robust problem-solving pedagogy, and engaging health-related applications, the text prepares students for their careers. The text breaks chemical concepts and problem solving into clear, manageable pieces to ensure students stay on track and motivated throughout their first, and often only, chemistry course. With the newly revised 6th Edition, best-selling author Karen Timberlake and new contributing author MaryKay Orgill connect chemistry to real-world and career applications. Their goal is to help students become critical thinkers by understanding scientific concepts that will form a basis for making important decisions about issues concerning health and the environment and their intended careers. The new edition introduces more problem-solving strategies, more problem-solving guides, new Analyze the Problem with Connect features, new Try It First and Engage features, conceptual and challenge problems, and new sets of combined problems--all to help students develop the problem-solving skills they'll need beyond the classroom. Also available with Mastering Chemistry or as an easy-to-use, standalone Pearson eText Mastering(tm) is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools developed to engage students and emulate the office-hour experience, Mastering personalizes learning and often improves results for each student. Students can further master concepts after class through traditional and adaptive homework assignments that provide hints and answer-specific feedback.

Pearson eText allows educators to easily share their own notes with students so they see the connection between their reading and what they learn in class--motivating them to keep reading, and keep learning. Portable access lets students study on the go, even offline. And, reading analytics offer insight into how students use the eText, helping educators tailor their instruction. Note: You are purchasing a standalone product; Mastering Chemistry and Pearson eText do not come packaged with this content.
