

Introductory Algebra An Applied Approach 9th Ninth Edition By Aufmann Richard N Lockwood Joanne Published By Cengage Learning 2013

Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Combining Aufmann's acclaimed interactive approach with an engaging worktext format, Algebra: Introductory and Intermediate provides unparalleled reinforcement for students of lower-level algebra. Using matched-pair examples, students first study a problem and then work through the second You-Try-It problem on their own.

As in previous editions, the focus in PREALGEBRA & INTRODUCTORY ALGEBRA remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. Student engagement is crucial to success. Presenting students with worked examples, and then providing them with the opportunity to immediately solve similar problems, helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key concepts and promote skill building. This clear, objective-based approach allows students to organize their thoughts around the content, and supports instructors as they work to design syllabi, lesson plans, and other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding to strengthen the foundation of student success. The Third Edition also features a new design, enhancing the Aufmann Interactive Method and making the pages easier for both students and instructors to follow. Available with InfoTrac Student Collections <http://goengage.com/infotrac>. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Studyguide for Prealgebra and Introductory Algebra

An Applied Approach by Aufmann, Richard N. , ISBN 9781285473147

As a best-selling text for developmental first-year algebra courses, Introductory Algebra: An Applied Approach, Sixth Edition, continues to provide mathematically sound and comprehensive coverage of key topics. The Aufmann Interactive Method ensures that students master concepts by actively practicing them as they are introduced. This approach is ideal for traditional and returning students in both classroom and distance-learning environments. The Aufmann Interactive Method helps students learn and understand math concepts by doing the math. Every objective contains one or more sets of matched-pair examples. Students first walk through a worked-out example and then solve a similar "You Try It" example. Complete solutions to these examples are available in an appendix. An Integrated Learning System organizes by objectives helps students understand what they're learning and why as they apply new concepts throughout the chapter.Each chapter begins with a list of goals that form the framework for a complete learning system. These objectives are woven throughout the text, in Exercises, Chapter Tests, Cumulative Reviews, as well as the print and multimedia ancillaries. Eduspace is Houghton Mifflin's online learning tool. Powered by Blackboard, Eduspace is a customizable, powerful and interactive platform that provides instructors with text-specific online courses and content. The Aufmann/Barker/Lockwood Introductory Algebra course features even-numbered questions from the book and test bank content in question pools.

Never HIGHLIGHT a Book Again! Includes all testable terms, concepts, persons, places, and events. The Student Support Edition of Introductory Algebra: An Applied Approach, 7/e, brings comprehensive study skills support to students and the latest technology tools to instructors. In addition, the program now includes concept and vocabulary review material, assignment tracking and time management resources, and practice exercises and online homework to enhance student learning and instruction. With its interactive, objective-based approach, Introductory Algebra provides comprehensive, mathematically sound algebra course. The Seventh Edition features chapter-opening Prep Tests, real-world applications, and a fresh design--all of which engage students and help them succeed in the course. The Aufmann Interactive Method (AIM) is incorporated throughout the text, ensuring that students interact with and master concepts as they are presented. Students save money by purchasing this bundle which includes Intermediate Algebra: An Applied Approach, 9th Edition and access to WebAssign with eBook Printed Access Card for Single-Term Math and Science. ♦This access is for Developmental Math courses only including Basic Math, Prealgebra, Elementary Algebra, Introductory Algebra, Intermediate Algebra or Elementary & Intermediate Algebra as using with a different course may cause complications with access. WebAssign engages you with immediate feedback, rich tutorial content, and an interactive, fully customizable eBook. Cengage YouBook helping you to develop a deeper conceptual understanding of your subject matter. This access code includes access to WebAssign and life-of-edition access to the eBook for the registered edition of that text. If you need to retake the course and your instructor is using the same book AND edition then you will not need to buy a new code.
