Investments sets the standard as a graduate (MBA) text intended primarily for courses in investment analysis.

The guiding principle has been to present the material in a framework that is organized by a central core of

consistent fundamental principles and will introduce students to major issues currently of concern to all investors. In an effort to link theory to practice, the authors make their approach consistent with that of the CFA Institute. Many features of this text make it consistent with and relevant to the CFA curriculum. The common unifying theme is that security markets are nearly efficient, meaning that most securities are priced appropriately given their risk and return attributes. Investments is also organized around several important themes: The central theme is the near-informational-efficiency of well-developed security markets and the general awareness that competitive markets do not offer "free lunches" to participants. A second theme is the

risk–return trade-off. Also, this text places great emphasis on asset allocation. Finally, this text offers a broad and deep treatment of futures, options, and other derivative security markets.

In Asset Management: A Systematic Approach to Factor Investing, Professor Andrew Ang presents a comprehensive, new approach to the age-old problem of where to put your money. Years of experience as a finance professor and a consultant have led him to see that what matters aren't asset class labels, but instead the bundles of overlapping risks they represent. Factor risks must be the focus of our attention if we are to weather market turmoil and receive the rewards that come with doing so. Clearly written yet full of the latest

research and data, Asset Management is indispensable reading for trustees, professional money managers, smart private investors, and business students who want to understand the economics behind factor risk premiums, to harvest them efficiently in their portfolios, and to embark on the search for true alpha.

Bodie, Kane, and Marcus' Investments sets the standard for graduate/MBA investments textbooks. It blends practical and theoretical coverage, while maintaining an appropriate rigor and a clear writing style. Its unifying theme is that security markets are nearly efficient, meaning that most securities are priced appropriately given their risk and return attributes. The text places greater emphasis on asset allocation and offers a much
