

Issues Of Halal Food Implementation In Malaysia

This book features 66 papers from the 2nd International Colloquium of Art and Design Education Research, i-CADER 2015. It illustrates the wide range of opinions and interpretations, mediums and technologies, policies and methodologies in this field. The papers, which have been reviewed by 380 experts from around the world, underline the latest trans-disciplinary research in art and design education. Coverage examines organization and sustainable issues, including: creative processes, knowledge and experience, design industrial applications, sustainable design, visual communication and new media, art education research, cultural studies, teaching and learning implications on art, traditional knowledge, and new technologies for industries. In addition, the volume also explores innovative research trends in cross-disciplinary findings, combining methodology and theory. Overall, readers are provided with an insightful analysis of the latest research and advances in art and design education.

Halal Development: Trends, Opportunities and Challenges Proceedings of the 1st International Conference on Halal Development (ICHaD 2020), Malang, Indonesia, October 8, 2020 Routledge

The convenience of online shopping has driven consumers to turn to the internet to purchase everything from clothing to housewares and even groceries. The ubiquity of online retail stores and availability of hard-to-find products in the digital marketplace has been a catalyst for a heightened interest in research on the best methods, techniques, and strategies for remaining competitive in the era of e-commerce. The Encyclopedia of E-Commerce Development, Implementation, and Management is an authoritative reference source highlighting crucial topics relating to effective business models, managerial strategies, promotional initiatives, development methodologies, and end-user considerations in the online commerce sphere.

Emphasizing emerging research on up-and-coming topics such as social commerce, the Internet of Things, online gaming, digital products, and mobile services, this multi-volume encyclopedia is an essential addition to the reference collection of both academic and corporate libraries and caters to the research needs of graduate-level students, researchers, IT developers, and business professionals. .

This book provides a comprehensive overview of Halal in logistics, supply chain management and the future implications for the Halal industry. It discusses a wide range of Halal logistics practices and theories in Japan, Korea, Spain, Oman, and SEA countries. The book examines technology applications, regulatory and certification procedure, Halal management system and quality control, sustainability and as well as challenges for the logistics and Halal supply chain in the pandemic context. The book also looks at how to navigate the complexity of the Halal logistics to achieve business sustainability. It uses a multidisciplinary approach to provide insights on the Halal logistics and supply chain study. This book hopes to fill an existing gap and enrich the literature on Halal logistics and supply chain management specifically in the West, Middle East and

regions in Asia. This will be a useful reference to those who would like to learn more about this industry.

ISRL 2020

The Process of Halal Food Certification in Malaysia

Halal Food Production

We are delighted to introduce Proceedings of the 3rd International Symposium On Religious Life (ISRL 2020). This conference has brought academicians, researchers, developers and practitioners around the world. In collaboration with Indonesian Consortium for Religious Studies (ICRS) and Indonesian Institute of Sciences (LIPI), the Agency for Research, Development and Training of the Ministry of Religious Affairs (MoRA) convened bi-annual symposium with the following main theme: “Religious Life, Ethics and Human Dignity in the Disruptive Era”. The 3rd ISRL highlighted the role of religion and ethics in the disruptive era that erode human values, civility, and dignity. In the processes of development and technological revolution, religion can play an essential role in providing spiritual, moral, and ethical guidance. In the context of the Covid-19 pandemic, religion is perceived in two ways: on the one hand, some faith communities have been willfully negligent and become ‘super-spreaders’ of the dangerous virus by defying stay-at-home orders. Yet, on the other hand, religion has also galvanized its adherents to support economically vulnerable and marginalized communities affected by the lockdown and social restrictions. Likewise, in democratization, religion gives society the necessary dynamic thrust to maintain its vibrancy, resiliency, and sustainability. This Symposium is therefore expected to delve into the complexity of how religion, religious values and faith communities confront the contemporary challenges to uphold ethics and human dignity. We strongly believe that ISRL conference provides a good forum for all academicians, researcher, developers and practitioners to discuss all religious Life, ethics and human dignity. We also expect that the future ISRL conference will be as successful and stimulating, as indicated by the contributions presented in this volume.

Islamic finance is the only example of a financial system directly based on the ethical precepts of a major religion, providing not only investment guidelines but also a set of unique investment and financing products. Islamic finance is based on Shari'a, the Islamic law that provides guidelines for multiple aspects of Muslim life. The Islamic financial industry is playing a pivotal role in the global economy in general, with assets exceeding \$ 2.9 trillion, and is projected to reach \$ 3.8 trillion by 2022. This book aims to outline some potential areas to consider for all sectors of Islamic finance. In addition, the book discusses the development of Islamic finance; Explore the challenges of Small and Medium Enterprises funding , Corporate governance and Corporate social responsibility in Islamic finance. The book also discusses the existing use of blockchains in Islamic finance.

Several factors contribute to the rapid development of tourism, such as strong economic growth. This result in more disposable income for travel, changing lifestyles and the expansion in transportation industry, which leads to cheaper travel costs and increased demand

for tourism products and services is one of the largest and fastest growing economic sectors in the world. The growing demand for products and services comply with Islamic law, or shariah law is obvious and substantial in financial, food and travelling industry. Many scholars have identified religion as a stable factors influencing consumer buying behavior resulting in more demand for religious related product and services. In hospitality industry, scholars have highlighted the growing demand on Islamic Friendly Hotel (IFH) by Muslim tourists causing high commitment in developing such industry. This study found organizational factors including innovation champion, organizational context, and tangible resources and marketing strategy and environmental factors such as demand of Islamic hospitality, government ruling and incentives and competitors strategy were the key drivers to the implementation. These key drivers of implementation provides guidelines for hotels that intend to implement new services, reduced the learning time and promote innovative activities within hotels in Malaysia. Nonetheless, IFH implementation was challenged with high cost to maintain Halal certification, capacity management and international chain hotel status issues. Hotels intend to implement IFH should pay careful attention to the initial consequences such as decreasing non-Muslim customers thus resulting in decrease income at the early stage of introduction. This study has contributed on the development of IFH literature specifically Malaysia by providing popular and unpopular attributes of IFH in Malaysia. Therefore, if Malaysian hotels are to succeed and achieve competitive advantage, being able to address growing Muslim tourists' needs are essential priorities.

[Foreword] The challenges in agriculture are rapidly increasing with the impact of climate change, land degradation and natural disasters. This is affecting the global food production and supply chain which has been aggravated due to Covid-19 pandemic and this calls for more resilient and sustainable food systems. The Asia-Pacific region which has the largest number of small holder farmers and is trying to meet the sustainable development goals of United Nations has lot of responsibilities to mitigate the challenges. In this scenario Blockchain Technology has come as a respite to contribute as one of the ways to mitigate the challenges. The benefits of Blockchain in agriculture include easy and cheap food batch recalls in case of emergencies, availability of the complete history of the product status, increased customer trust and loyalty, fairer payments, approved vendors, and proper compliance management. The global blockchain in agriculture and food supply chain market size estimated at USD 133 million in 2020 is expected to reach USD 948 million by 2025. Factors such as the increasing need to lower operational costs in financial transactions and the reduction of the number of layers required for data sharing and risk management and the regulatory compliances that automate and conduct only authorized transactions are driving the technology adoption. The key drivers to blockchain in agriculture and food supply chain market are an increase in demand for the agricultural produce output surge, the use of smart agriculture among the growers or producers, government initiatives to support modern techniques that can be used in agriculture, and rising concerns for food safety among the consumers driving the increase in demand for the transparency in the supply chain. Increase in the popularity of blockchain among retailers/ distributors is due to rise in the tracking and tracing of various food products. Data management and data aggregation are major challenges in the precision farming market. The lack of standardization of the communication interfaces and protocols may result in the misrepresentation of the data. The present volume is intended to collate the information on the status of

**blockchain in the Asian region with various case studies. APAARIRI is grateful to its member the International Association of Agricultural Sustainability for joining hands in this venture and sincerely acknowledge all the contributors for their excellent chapters on various aspects of blockchain. We also acknowledge the support of Dr KS Varaprasad in his meticulous support in editing of the chapters. We also hope that the present volume will bring more awareness on the status and challenges of blockchain technology in the region to various stakeholders and may help in increased application of the technology. --Ravi Khetarpal, Executive Secretary, APAARI [Contents] Foreword Foreword Preface Preface Chapter 1: Halal Supply Chain 4.0 with Big Data and Blockchain - Rika Ampuh Hadiguna Chapter 2: The Application of Blockchain in Food Safety, Production and Marketing: Taiwan Perspective - Tzong-Ru Lee / Lee-Chung Chen Chapter 3: The Challenges of Agricultural Blockchain: A Review of Policy Steering and Actions in Thailand - Nirote Sinnarong / Olalekan Israel Aikulola / Thanakorn Sirisugandha Chapter 4: Using Block Chain & Internet of Things (IoT) in Agri-Food Supply Chain Traceability - Lin Jun Chapter 5: Blockchain Technology for Inclusive Development of Agrarian Rural Economy - Sharbendu Banerjee

Halal Matters

Research and Innovations

Proceedings of the 3rd International Halal Conference (INHAC 2016)

This book features more than 50 papers presented at the International Halal Conference 2014, which was held in Istanbul and organised by the Academy of Contemporary Islamic Studies of Universiti Teknologi MARA. It addresses the challenges facing Muslims involved in halal industries in meeting the increasing global demand. The papers cover topics such as halal food, halal pharmaceuticals, halal cosmetics and personal care, halal logistics, halal testing and analysis and ethics in the halal industry. Overall, the volume offers a comprehensive point of view on Islamic principles relating to the halal business, industry, culture, food, safety, finance and other aspects of life. The contributors include experts from various disciplines who apply a variety of scientific research methodologies. They present perspectives that range from the experimental to the philosophical. This volume will appeal to scholars at all levels of qualification and experience who seek a clearer understanding of important issues in the halal industry.

From food products to fashions and cosmetics to children's toys, a wide range of commodities today are being marketed as "halal" (permitted, lawful) or "Islamic" to Muslim consumers both in the West and in Muslim-majority nations. However, many of these products are not authentically Islamic or halal, and their producers have not necessarily created them to honor religious practice or sentiment. Instead, most "halal" commodities are profit-driven, and they exploit the rise of a new Islamic economic paradigm, "Brand Islam," as a clever marketing tool. Brand Islam investigates the rise of this highly lucrative

marketing strategy and the resulting growth in consumer loyalty to goods and services identified as Islamic. Faegheh Shirazi explores the reasons why consumers buy Islam-branded products, including conspicuous piety or a longing to identify with a larger Muslim community, especially for those Muslims who live in Western countries, and how this phenomenon is affecting the religious, cultural, and economic lives of Muslim consumers. She demonstrates that Brand Islam has actually enabled a new type of global networking, joining product and service sectors together in a huge conglomerate that some are referring to as the Interland. A timely and original contribution to Muslim cultural studies, Brand Islam reveals how and why the growth of consumerism, global communications, and the Westernization of many Islamic countries are all driving the commercialization of Islam.

Innovation and Best Practices in Hospitality and Tourism Research contains 71 accepted papers from the Hospitality and Tourism Conference (HTC 2015, Melaka, Malaysia, 2-3 November, 2015). The book presents the up-and-coming paradigms and innovative practices within the hospitality and tourism industries, and covers the following topics: Mana

The proceedings volume focuses on halal management and science topics. Issues related to business model, management, marketing, finance, food security, lifestyle, hospitality, tourism, cosmetics, personal care, legal aspects, technologies and sciences are presented in the chapters. In addition, the book also covers comprehensive areas of halal and haram chains of production from raw materials, ingredients, planning, manufacturing, packaging, logistics, delivery, warehousing, marketing to consumption. Various survey results and few cases explore practical solutions to these issues of interest to academics in university settings as well as practitioners in different industries and government agencies.

Food Authentication

Exploring the question in detail Kamali explains the basic principles of halal and haram and discusses, particularly in relation to the meat industry, key issues surrounding their implementation. In doing so he gives important insights into, and relevant understanding of, many of the misconceptions and challenges confronting Muslims today. The issue of additives for instance has caused considerable confusion in food consumption. Not surprisingly, perceptions of what constitutes halal also vary among the schools and scholars of Islam. Other factors such as custom and climate also tend to be influential. In addition the work at hand examines issues in halal certification procedures, and matters of concern to uniformity in halal industry practices.

A unique handbook providing a set of good practice standards for both producers and consumers of Halal food This accessible,

authoritative book covers all aspects of Halal from its origins through to how we expect Halal to develop in the coming years. It explains what Halal is, where it came from, how it is practiced, and by whom. In addition to putting Halal in a religious and cultural context, the book provides practical standards for those working in the Halal trade. It explains why there are so many different interpretations of Halal and why this needs to be resolved if international trade is to be developed. Each chapter in *The Halal Food Handbook* is written by leading experts in their particular field of study. The first one discusses how regulatory bodies have failed to stem the miss selling and adulteration of Halal foods. The next chapters cover the slaughter process and issues around good practice. The book then looks at regulators—covering Sharia law, UK national laws, and the EU—and outlines the legal framework for enforcing the law. It also compares and contrasts different types of religious slaughter for faith foods; examines attempts to set an international standard for trade; and discusses pork adulteration in Halal foods. The final chapter covers other aspects of Halal, including cosmetics, tourism, lifestyle, and banking, and finishes with a look at what the future holds for Halal. Written and edited by leading international experts in Halal who are backed by the Muslim Council of Britain Presents a set of good practice standards for both producers and consumers of Halal food Covers the complexity of the political, legal, and practical dimensions of Halal food production *The Halal Food Handbook* will appeal to a wide audience, including abattoirs, manufacturers, retailers, regulators, academics, public bodies catering for Muslims, and the broader Muslim community.

Konferensi ini secara khusus mendorong interaksi antara para pakar terkemuka dalam Isu, Kebijakan, dan Isu Halal tidak hanya dari Asia Tenggara seperti Brunei Darussalam, Malaysia, dan Thailand tetapi juga dari negara lain seperti Kanada, Turki, Bahrain, Mesir, Pakistan. Presentasi mereka telah memberikan kontribusi yang luar biasa pada pengetahuan paling ilmiah di bidang isu halal, kebijakan, dan keberlanjutan. Selain itu, konferensi ini diselenggarakan tidak hanya untuk berbagi penelitian dan temuan teoritis tetapi juga mendorong kolaborasi antara peneliti dari Indonesia dan peneliti dari negara lain. Konferensi ini dimaksudkan untuk menghasilkan dosen, pendidik dan peneliti yang berkualitas dan berdaya saing tinggi melalui kegiatan konferensi, untuk menghasilkan tulisan-tulisan internasional, untuk mengembangkan wawasan pengetahuan yang dapat mengarahkan seluruh peserta untuk sadar dan menerapkan konsep-konsep luas tentang masalah halal. Ada 300 abstrak yang diterima dari peneliti, profesional, dan dosen dari seluruh dunia. Semuanya telah dirangkum dalam Prosiding *The Second International Conference on Halal Issue, Policy, and Sustainability UMI 2020 (IC-HalalUMI2020)*. Semoga buku lanjutan ini bermanfaat bagi penulis, pembaca, dan semua orang yang membacanya.

Globally the hospitality and tourism industry is evolving and undergoing radical changes. The past practices are now advancing through the rapid development of knowledge and skills acquired to adapt and create innovations in various ways. Hence, it is imperative that we have an understanding of the present issues so that we are able to remedy problems on the horizon. *Current Issues in Hospitality and Tourism: Research and Innovations* is a compilation of research in the broad realm of hospitality and tourism. This book is

divided into eight sections covering the following broad themes: – Training and education (hospitality students learning); – Organization and management (practical issues and current trends in the hotel, catering and tourism industry); – Product and food innovation; – Marketing; – Islamic hospitality and tourism issues; – Gastronomy; – Current trends; – Tourism The contributions, from different parts of the globe, present a new outlook for future research, including theoretical revelations and innovations, environmental and cultural exploration aspects, tourist destinations and other recreation and ecotourism aspects of the hospitality and tourism industry. Current Issues in Hospitality and Tourism: Research and Innovations will be useful as a reference for academics, industry practitioners and policy makers, and for those with research interests in the fields of hotels, tourism, catering and gastronomy.

Preparation and Processing of Religious and Cultural Foods

Halal Food Certification and Business Performance in Malaysia

Current Issues in Hospitality and Tourism

Hospitality and Tourism 2015

Proceedings of the 2nd International Conference on Halal Development (ICHaD 2021), Malang, Indonesia, 5 October 2021

The development of Islamic banking and finance (IBF) previously centred around three regions of the world: the Middle East, Southeast Asia, and South Asia. However, in recent years, this has expanded, as interest in IBF has gained momentum in Australia, the USA, and Europe, especially in the UK. Several Western market players have established their own Islamic window or subsidiaries to cater to the need of growing Muslim populations in these regions. This book examines the recent developments in IBF, particularly in the context of Islamic social finance instruments, such as Islamic microfinance, halal education, takaful, mutual funds, and waqf. It covers the religiosity, spirituality, and tawhid index, which promotes social well-being and empowerment. The book is interdisciplinary, and theories, practice, and key issues are presented simultaneously, introducing new ideas and techniques to the IBF community. Moreover, the book examines topics such as innovation in Islamic social finance instruments, advanced techniques of risk mitigation in Islamic capital markets, marketing and the halal industry, and shari'ah-compliant instruments, which are critical to Islamic finance. The book is an essential reference text for academics and research students at the master's and doctorate levels in IBF.

Halal food certification plays a pivotal role in both consumers food purchase and consumption, and food manufacturers business conducts. The growing trends of Halal food have encouraged firms to implement Halal food certification. Numerous studies have recognized the importance of Halal food certification to consumers rather than Halal food manufacturers. However, Halal food certificate motivations, implementation, and the impact on firm performance, particularly the Malaysia Standard on Halal Food (MS1500:2009) are hardly examined. Therefore, this study aims to investigate the motivations behind Halal food certification and its

impact on food manufacturers operational, marketing, and financial performances. Resource-based view and institutional theory underpin the proposed conceptual framework of the study. Five hypotheses were proposed to determine the relationships between certification motivations and firm performances. A quantitative methodology was adopted and data were collected using self-administered questionnaires. A total of 210 Halal-certified food manufacturing companies in Peninsular Malaysia participated in the survey. A partial least square structural equation modeling was conducted for data analysis. A key finding is that both the external and internal motivations positively influence Halal food certificate implementation. Moreover, it was also found that implementing Halal food certification has a positive relationship with firm performance. Further findings indicated that government intervention, consumer demand, industry competition, employee commitment, operation improvement, and marketing return are significant motivators for Halal food certificate implementation. Results also revealed that Halal food certification has a significant impact on the respondents operation, marketing, and financial performances. Theoretically, this study offers insights to the significance of consumer pressure as a normative isomorphism in the institutional theory. Additionally, this study reinforces the understanding of Halal food certification as a significant and relevant strategic tool to remain competitive within the profoundly homogenous and saturated food industry. Practically, the information gained from this research could potentially be beneficial to encourage non-certified firms to become Halal-certified. Future research are encouraged to study the motives and impact of Halal food certification from various countries, as well as apply this research across other industries like pharmaceutical, tourism, or cosmetic.

Until now, books addressing Halal issues have focused on helping Muslim consumers decide what to eat and what to avoid among products currently on the marketplace. There was no resource that the food industry could refer to that provided the guidelines necessary to meet the Halal requirements of Muslim consumers in the U.S. and abroad. Halal Preparation and Processing of Religious and Cultural Foods covers the production and processing of foods from major religions, focusing on the intersection of religion, science and cultural perceptions in the production and processing of modern religious and vegetarian foods. Quality control and authentication technologies are looked at in-depth, while nutrition, antioxidants, aging, hygiene and other long-term health factors are presented from a scientific standpoint. Bringing together the top scientific researchers on this essential topic of importance to a huge percentage of the world's population, this book is ideal for food company innovation and R&D managers, producers and processors of religious foods. Religious groups have often been slow in implementing recent science and technology breakthroughs employed in the preparation, processing and packaging of various foods. This book provides a culturally sensitive coverage of these areas with an aim to encourage advancement. Covers the production and processing of major religious foods, namely Muslim, Christian, Jewish, Hindu and Buddhist Presents nutritional, antioxidant, aging, hygiene and other long-term health factors from a scientific standpoint Encourages advancement in the preparation, processing and packaging of religious foods using information cultivated from top scientific researchers in the field

HALAL LIFESTYLE: Theory and Practice in Indonesia

In today's globalized world, halal (meaning 'permissible' or 'lawful') is about more than food. Politics, power and ethics all play a role in the halal industry in setting new standards for production, trade, consumption and regulation. The question of how modern halal markets are constituted is increasingly important and complex. Written from a unique interdisciplinary global perspective, this book demonstrates that as the market for halal products and services is expanding and standardizing, it is also fraught with political, social and economic contestation and difference. The discussion is illustrated by rich ethnographic case studies from a range of contexts, and consideration is given to both Muslim majority and minority societies. Halal Matters will be of interest to students and scholars working across the humanities and social sciences, including anthropology, sociology and religious studies.

The concept of Halal defines what adheres to Islamic law and is so comprehensive that it goes beyond food to include processes. The Halal industry has allowed many business firms a competitive advantage and is integral in its support for industries from food, tourism, banking and hospitality to medical. This book gives an overview of what Halal is in logistics and supply chain management, and discusses related issues and challenges in Southeast Asia. The book also examines Halal logistics and supply chain in reference to global trends and practices. It attempts to integrate theoretical and methodological aspects of Halal logistics and supply chain study in different geographical areas across industries. This will be a useful reference for those who wish to understand the Halal ecosystem and Halal logistics supply chain development. We proudly present the proceedings of 2nd International Conference on Law, Economic and Governance 2021 (ICOLEG 2021). It focuses on how the wave of digitalization influences the ethics and law, especially in Law and Democracy, Law and Indigenous People, Law in Contemporary Issues, Law and Economics, Digital Economics, Good Governance etc. As we know, the world today is changing and the world we are facing now is the one where everything is connected. The

contemporary social issues based on complex problems, complex interest, beyond borders and powers. More than 125 manuscripts from various countries were presented at this conference with around 66 of them selected to be published in proceedings. We hope by this conference, discussions on how research on Law, Economic and Government is possible in a disruptive era will give a perspective for the social and humanities studies development.

The increasing demand for halal products, including goods and services, every year, especially for food and beverages, has resulted in a growing need for products with halal guarantees. Along with the increasing trend of the global demand, it has resulted in an increase in producers of halal food and beverages in both Muslim and non-Muslim countries. In addition the demand for halal tourism is also increasing. Indonesia is one of the largest Muslim countries in the world. However, there are still many Muslim consumer actors and Muslim producer actors who do not yet have an awareness of the importance of complying with the provisions of Islamic law in consuming and producing goods and services. There are still many restaurants and hotels that serve food and drinks that are not certified halal. There are still many food, medicinal and cosmetic products that are not halal certified. But now many secular countries such as France, Canada, Australia, the United States, Britain are also halal certified with the aim of meeting the Muslim demand for halal products for food and beverage, including for halal tourism. Starting from the development of the halal industry both in the fields of food, beverages and services, an International Seminar was held, which provides a more complete understanding of halal products, current halal developments and can serve as motivation to produce halal products, providing research results from the topic of halal development. The international seminar, entitled International Conference on Halal Development, listed speakers from several countries able to provide an overview of the halal development of several countries. This book contains a selection of papers from the conference.

This book constitutes the refereed proceedings of the 5th International Conference on User Science and Engineering, i-USEr 2018, held in Puchong, Malaysia, in August 2018. The 32 papers accepted for i-USEr 2018 were selected from 72 submissions with a thorough double-blind review process. The selected papers illustrate how HCI is inclusive and omnipresent within the domains of informatics, Internet of Things, Quality of Life, and others. They are organized in the following topical sections: design, UX and usability; HCI and underserved; technology and adoption; human centered computing; HCI and IT infrastructure; and HCI and analytics.

This research attempts to study and understand the issues on Malaysian Halal food certification from both Shariah and technical perspectives. It involves the discussion on the internal and external factors that influence the implementation of Malaysian Halal food certification. In fact, the process of Halal certification and the misuse of the Halal logo and certificate have significant relationship with the authenticity of the Halal food itself. Overall, the process of Malaysian Halal certification complies with the Shariah, however some weaknesses should be overcome. The finding shows that the application of Malaysian Halal certification must be seriously implemented by all parties, whether the authorities, consumers or manufacturers. In other words, it is high time to enforce Halal certification usage on those who want to be involved in food business in order to give full confidence to consumer and preserve Maqâ'id Shariah. This is because the food industry is often unaware of the requirements of the Muslim consumers. Moreover, it is relevant as an alternative to solve recent issues on food products. As a result, the knowledge of Fiqh consumerism is needed to practice as a new mechanism to cope with Halal issues. Then, Muslim researchers should be urged to explore this area of study in order to protect Muslim consumers when choosing food for their consumption.

The issue of food authenticity is not new. For centuries unscrupulous farmers and traders have attempted to 'extend', or otherwise alter, their products to maximise revenues. In recent years the subject has reached new prominence and there even have been situations where food authenticity has featured as a newspaper headline in various countries. Food legislation covering the definition, and in some cases composition, of various commodities has been in place in developed countries for many years and paradoxically it is the legislative trend away from emphasis on composition and more on accurate and truthfullabeliing that has been one driving force for the authenticity issue. Another, and many would speculate as the more potent, driving force is the move towards fewer and larger supermarket chains in many countries. Such trading companies with their images of quality products, buying power and commercial standing, exercise considerable commercial power which has been claimed as a significant source of financial pressure on food prices and food commodity product quality. For whatever reason, recent food authenticity issues have become news and consumers, the media and enforcement authorities are showing more interest than ever before in the subject. The Halal certification process is one of the significant factors in the developing Halal food industry. The Halal certification process verifies Halal food production and also establishes trust with consumers. This research focuses on the implementation of the Halal certification process for selected Halal chicken slaughterhouses in Thailand. There are two main objectives of the research. The

first objective is to study the process of Halal certification in chicken slaughterhouses in Thailand. The second objective is to study the problems in implementing the Halal certification process in selected Halal chicken slaughterhouses in Thailand. This research used a qualitative method, the data being divided into two types: primary and secondary. Primary data were collected through in-depth interviews and direct observation. Secondary data were collected from textbook, documents and published reports. The research found that the Halal certification process in chicken slaughterhouses in Thailand consists of five steps: 1. preparation; 2. application submission and consideration; 3. appointment of a Halal slaughtering supervisor to the chicken slaughterhouse to undertake the duties; 4. result analysis and approval of Halal certification; and 5. follow up and evaluation. For the implementation of the Halal certification process in selected Halal chicken slaughterhouses, the research found that the problems in implementing the process are divided into six categories: 1. problems caused by the Halal slaughtering supervisors; 2. problems caused by the employees in the factory; 3. problems in the slaughterhouses; 4. problem related to the checklist documents; 5. problem of incomplete auditing; and 6. problem of financial support. Based on the findings of this study, the suggestions are also divided into six categories: 1. improving the effectiveness of the Halal slaughtering supervisors; 2. improving the effectiveness of the employees in the chicken slaughterhouses; 3. improving the communication between the Halal slaughtering supervisors and the executive managers; 4. improving the Halal audit checklist and other documents especially reminder posters or notice boards at every critical point; 5. providing the Halal slaughtering supervisor with assistants or supporters; and 6. obtaining more financial support for the Halal certification process from the government sector. The suggestions form the basis of developing the Halal certification process, especially for chicken slaughterhouses in Thailand.

Strategic Islamic Marketing

Halal Logistics and Supply Chain Management in Southeast Asia

Contemporary Issues and Development in the Global Halal Industry

Muslims constitute about half a million or 15 percent of Singapore's multiracial and multireligious population. In 1968, the Singapore Parliament passed the Administration of Muslim Law Act (AMLA), which led to the formation of Muis or the Majlis Ugama Islam Singapura (Islamic Religious Council of Singapore). The formation of Muis has brought about better administration of Muslim affairs in Singapore in meeting the religious needs of the Muslim community in areas like the issuance of fatwa (religious rulings), provision of halal food, management of haj (religious pilgrimage), collection and disbursement of zakat (charity tithe), running of madrasahs (religious schools) and having access to sound Islamic education. This was achieved

with Muis having earned the trust and confidence of the community and ensuring the mutual facilitation of the community's, state's and society's needs. *Fulfilling the Trust: 50 Years of Shaping Muslim Religious Life in Singapore* is the first book that comprehensively studies the development of Muis' policies over the last 50 years since its founding in 1968. It offers an insight into the multi-faceted considerations and the overall context of the development of such policies, providing a wide-ranging and evaluative analyses of their evolution in the various work domains. The book argues that in order to better appreciate Muis' policies, one has to also understand the critical junctures, socio-historical context, diverse stakeholders and decision-makers' perspectives that led Muis to respond to issues and challenges in a certain way. This book is a valuable contribution to the community's cultural and experiential heritage, providing an indispensable resource for anyone or any institution wishing to pursue a constructive role for religious communities to equally contribute towards the betterment of a thriving plural society ensconced within a secular-based polity.

Marketing in the emerging Islamic markets is a challenging business function since international companies must contend with unfamiliar customs, cultural differences, and legal challenges. This book provides marketers who want to reach this emerging and very lucrative consumer base with essential, research-based insights on these aspects and how to deal with them. This book redefines marketing practice and conduct and challenges conventional marketing wisdom by introducing a religious-based ethical framework to the practice of marketing. The framework opens a whole new array of marketing opportunities and describes the behavior of the consumer, community, and companies using a different approach than conventional marketing thought. The emergence of a Halal industry in the past decade in the fields of food, beverages, and services, emphasizes the importance of providing a more complete understanding of Halal products, current Halal developments and other topics of Halal development. This groundbreaking volume provides theoretical and empirical studies on the Halal industry. This book explores critical issues, best practice examples, and draws on a range of international case studies to demonstrate theory in practice of the Halal industry. Emphasizing the Halal industry, the chapters address a number of important issues such as Halal assurance system, Halal product certification, Halal tourism, Human Resources of Halal Certification, supply chain of Halal products, and other related subjects. This book will be of interest to students, scholars, and practitioners who have a deep concern and interest in the Halal industry. It is futuristic with

a lot of practical insights for students, faculty members, and practitioners. Since the contributors are from across the globe, it is fascinating to see the global benchmarks. Until now, books addressing Halal issues have focused on helping Muslim consumers decide what to eat and what to avoid among products currently on the market. There was no resource that the food industry could refer to that provided the guidelines necessary to meet the Halal requirements of Muslim consumers in the United States and abroad. Handbook of Halal Food Production answers this need by summarizing the fundamentals of Halal food production, serving as a valuable reference for food scientists, food manufacturers, and other food industry professionals. This text delivers a wealth of information about Halal food guidelines for food production, domestic and international food markets, and Halal certification. Among chapters that cover production requirements for specific foods such as meat and poultry, fish and seafood, and dairy products, there are other chapters that address global Halal economy, Muslim demography and global Halal trade, and comparisons among Kosher, Halal and vegetarian. In addition, the book presents Halal food laws and regulations, HACCP and Halal and general guidelines for Halal food Production. For persons targeting the Halal food market for the first time, this book is particularly valuable, providing understanding of how to properly select, process, and deliver foods. In light of the increasing worldwide demand for Halal food service, branded packaged food, and direct-marketed items, this volume is more than an expert academic resource; it is a beneficial tool for developing new and promising revenue streams. Both editors are food scientists who have practical experience in Halal food requirements and Halal certification and the contributors are experts in the Halal food industries.

Halal Development: Trends, Opportunities and Challenges

Islamic Finance

This book contains selected papers which were presented at the 3rd International Halal Conference (INHAC 2016), organized by the Academy of Contemporary Islamic Studies (ACIS), Universiti Teknologi MARA (UiTM) Shah Alam, Malaysia. It addresses halal-related issues that are applicable to various industries and explores a variety of contemporary and emerging issues. Highlighting findings from both scientific and social research studies, it enhances the discussion on the halal industry (both in Malaysia and at the international level), and

serves as an invitation to engage in more advanced research on the global halal industry.

In today ' s increasingly connected business world, there is new pressure for local brands to go global, and a need for already global corporations to cater to new audiences that were previously ignored. *Islamic Perspectives on Marketing and Consumer Behavior: Planning, Implementation, and Control* brings together the best practices for entry and expansion of global brands into Islamic countries. This book is an essential reference source for professionals looking to incorporate the laws and practices of Islam into the global presence of their company and presents a cutting edge look at worldwide retail for marketing researchers and academics.

This special 100th edition of *Contemporary Issues in Economic and Financial Analysis* dedicates 14 chapters to contemporary issues in business and financial management in Eastern Europe by authors invited mainly from the Rostov State University of Economics.

The implications of the “ halalization ” phenomenon in Indonesia today involve not only the food sector but also other sectors. Starting with travel, medication in case of illness, fashion, make-up equipment for women to support their appearance, and other lifestyle models. A person ' s habit of consuming goods/services oriented towards a halal frame of mind is also known as a halal lifestyle. Practising a halal lifestyle can ensure and manage the morality of everything that is done by someone involved in it. At the same time, the halal lifestyle also maintains human self-esteem, dignity, and respect; human self-control; and maintaining human integrity and individuality. Practising the halal lifestyle in this life is every Muslim ' s right, but it is a privilege for any non-Muslim. Therefore, let ' s start a halal lifestyle from an early age because halal is good for oneself and others.
