Professor Chen Ning Yang, an eminent contemporary physicist, was Professor at the Institute for Advanced Study, Princeton, New Jersey, from 1955 to 1966, and Albert Einstein Professor of Physics at the State University of New York at Stony Brook until his retirement in 1999. He has been Distinguished Professor-at-Large at the Chinese University of Hong Kong since 1986 and Professor at Tsinghua University, Beijing, since 1998. Since receiving his PhD from the University of Chicago in 1948, Prof Yang has made great impacts in both abstract theory and phenomenological analysis in modern physics. In 1983, he published “Selected Papers (1945–1980), With Commentary”. It has been considered by Freeman Dyson as one of his favorite books. The present book is a sequel to that earlier volume. It is a collection of his personally selected papers (1971–2012) supplemented by his insightful commentaries. Its contents reflect Professor Yang’s changing interests after he reached age sixty. It also includes commentaries written by him in 2011 when he is 89 years old. The papers and commentaries in this unique collection comprise a remarkable personal and professional chronicle, shedding light on both the intellectual development of a great physicist and on the nature of scientific inquiry. In the contemporary world, we can see the increasing risk of crises. In the second half of the first decade of the 21st century the most serious consequences were caused by the economic and financial crisis, the eruption of which in 2007 shattered the foundations of the global economy and revealed the need to include the emerging powers within the framework of global economic governance. One of the centres of a global network structure being the forum for a dialogue between states and non-state entities in the sphere of global governance is the group of twenty (G20). This book is devoted to the analysis of functioning of the G20 at the leaders’ level as a relatively new international cooperation club existing since 2008 where top-level representatives of systemically significant countries meet, authorised to make decisions which are of key importance for the international community. The book is divided in two parts. The first part shows the origin, course and meaning of specific historical/political processes which led to the emergence of G20 Leaders’. Also, cause and effect relationships have been indicated and conclusions drawn with regard to the significance and further functioning of the group. Part two is the analysis of preparation, course and effects of subsequent G20 summits in the years 2008-2013.

A Student Guide to Critical Approaches and Skills

Written by a combination of top academics, industry experts and leading practitioners, this book offers a detailed insight into both unimodal and multimodal carriage of goods. It provides a comprehensive and thoroughly practical guide to the issues that matter today on what is a very complex area of law. From the papers delivered at the 8th International Colloquium organised by Swansea Law School’s prestigious Institute of International Shipping and Trade Law, this original work considers current opinions, trends and issues arising from contracts of carriage of goods by sea, land, air, and multi-modal combinations of these, not to mention the legal position of vital participants such as freight forwarders, terminal operators and cargo insurers. The topics under discussion range through issues such as paperwork, piracy, liability for defective containers, damage in transit, the CMR Convention, and the possible effects of the Rotterdam Rules. An indispensable resource for transport lawyers, industry professionals, academics and post-graduate students of maritime law.

“We’re becoming like Europe.” This expression captures many Americans’ sense that something has changed in American economic life since the Great Recession’s onset in 2008: that an economy once characterized by commitments to economic liberty, rule of law, limited government, and personal responsibility has drifted in a distinctly “European” direction. Americans see, across the Atlantic, European economies faltering under enormous debt; overburdened welfare states; governments controlling close to fifty percent of the economy; high taxation; heavily regulated labor markets; aging populations; and large numbers of public-sector workers. They also see a European political class seemingly unable—and, in some cases, unwilling—to implement economic reform, and seemingly more concerned with preserving its own privileges. Looking at their own society, Americans are increasingly asking themselves: “Is this our future?” In *Becoming Europe*, Samuel Gregg examines economic culture—the values and institutions that inform our economic priorities—to explain how European economic life has drifted in the direction of what Alexis de Tocqueville called “soft despotism,” and the ways in which similar trends are manifesting themselves in the United States. America, Gregg argues, is not yet Europe; the good news is that economic decline need not be its future. The path to recovery lies in the distinctiveness of American economic culture. Yet there are ominous signs that some of the cultural foundations of America’s historically unparalleled economic success are being corroded in ways that are not easily reversible—and the European experience should serve as the proverbial canary in the coal mine.

This book studies young people who are Not in Education, Employment, or Training (NEET); a prime concern among policymakers. Moving past common interpretations of NEETs as a homogeneous group, it asks why some youth become NEET, whereas other do not. The authors analyse diverse school-to-work patterns of young NEETs in five typical countries and investigate the role of individual characteristics, countries’ institutions and policies, and their complex interplay. Readers will come to understand youth marginalization as a process that may occur during the transition from school, vocational college, or university to work. By studying longitudinal analyses of processes and transitions, readers will gain the crucial insight that NEETs are not equally vulnerable, and that most NEETs will find their way back to the labour market. However, they will also see that in all countries, a group of long-term NEETs exists. These exceptionally vulnerable young people are sidelined from society and the labour market. The country cases and cross-national studies illustrate that policies intended to help long-term NEETs to find their way in society are very limited. The book provides useful theoretical and empirical insights for scholars interested in the school-to-work transition and marginalized youth. It also provides helpful insights in vulnerability to policymakers who aim to combat youth marginalization.

‘Globalization, the Human Condition and Sustainable Development in the Twenty-first Century: Cross-national Perspectives and European Implications’ is a cross-national, 175-nation-based exploration of the deep crisis in which Europe currently finds itself. Investigating the effects of dependency theory and world-systems theory upon the global success of eight dimensions of development - including democracy, environmental sustainability, employment, social cohesion, high-quality tertiary education and gender justice - this study argues

that the current European crisis has been precipitated by the pro-globalist policies of the European Commission, and that in the near future these policies threaten to enter Europe into a destructive ‘race to the bottom’.

Perspectives from China, India, and the United States

The Great Surge

From Washington to St. Petersburg

The Miracle of China

From a leading scholar of the Middle East and North Africa comes a new way of thinking about the Arab Spring and the meaning of revolution. From the standpoint of revolutionary politics, the Arab Spring can seem like a wasted effort. In Tunisia, where the wave of protest began, as well as in Egypt and the Gulf, regime change never fully took hold. Yet if the Arab Spring failed to disrupt the structures of governments, the movement was transformative in farms, families, and factories, souks and schools. Seamlessly blending field research, on-the-ground interviews, and social theory, Asef Bayat shows how the practice of everyday life in Egypt and Tunisia was fundamentally altered by revolutionary activity. Women, young adults, the very poor, and members of the underground queer community can credit the Arab Spring with steps toward equality and freedom. There is also potential for further progress, as women’s rights in particular now occupy a firm place in public discourse, preventing retrenchment and ensuring that marginalized voices remain louder than in prerevolutionary days. In addition, the Arab Spring empowered workers: in Egypt alone, more than 700,000 farmers unionized during the years of protest. Labor activism brought about material improvements for a wide range of ordinary people and fostered new cultural and political norms that the forces of reaction cannot simply wish away. In Bayat’s telling, the Arab Spring emerges as a paradigmatic case of *Örevolution*—revolution that engenders reform rather than radical change. Both a detailed study and a moving appeal, *Revolutionary Life* identifies the social gains that were won through resistance.

‘Biodiversity’ at its simplest, refers to the variety of species inhabiting Planet Earth. It is essential to the well-being of the planet. There is now a scientific consensus around the current ongoing crisis in biodiversity arising from both climate change and human activities. Experts believe we are in the middle of a mass extinction of biodiversity with devastating consequences for our planet. Accounting for Biodiversity explores the need for companies to actively protect, conserve and improve biodiversity within their sphere of operation. The 14 chapters written by a selected team of experts investigate the ways in which companies are embracing their responsibility through a variety of biodiversity initiatives and innovative models designed to improve the recording, reporting and valuing of biodiversity. Global case studies look at biodiversity accounting in Africa, Asia, Australasia, Europe and South America. Overall, this book provides a comprehensive set of reflections on accounting for biodiversity and recommendations for the future. "The Great Surge tells the remarkable story of this unprecedented economic, social, and political transformation. It shows how the end of the Cold War, the development of new technologies, globalization, courageous local leadership, and in some cases, good fortune, have combined to dramatically improve the fate of hundreds of millions of people in poor countries around the world. Most importantly, The Great Surge reveals how we can fight the changing tides of climate change, resource demand, economic and political mismanagement, and demographic pressures to accelerate the political, economic, and social development that has been helping the poorest of the poor around the world,"--Amazon.com.
