Introducing a new version of Jamey's world famous Volume 1: How to Play Jazz and Improvise, completely revised and specifically tailored for you by jazz pianist Luke Gillespie of the prestigious IU school of music. The musical examples have been rewritten, as well, in grand staff format and include suggested left-hand and two had voicing examples to be played with the CD tracks. The first play-a-long/demonstration CD includes special stereo separations, allowing the piano to be eliminated so that the student can play along with bassist Rufus Reid and drummer Jonathan Higgins. *Interaction, Improvisation, and Interplay in Jazz Performance offers a new and exciting way to listen to and understand jazz. When describing a performance, most jazz writers focus on the improvised lines of the soloist and their underlying harmonic progressions. This approach overlooks the basic fact that when you listen to jazz, you almost never hear a single line, but rather a musical fabric woven by several musicians in real time. While it is often pragmatic to single out an individual solo line, it is important to remember that an improvised solo is but one thread in that fabric; and it is a thread supported by, responded to, and responsive of the parts being played by the other musicians in the group. Interaction, Improvisation, and Interplay in Jazz Performance explores the process of player interaction in jazz, and the role this interaction plays in creating improvised music, including: jazz improvisation through theory and analysis musical roles, behaviours and relationships harmony, interaction and performance Interaction, Improvisation, and Interplay in Jazz Performance will appeal to students of jazz history, composition, and performance, as well as to the general jazz audience.*

*Music education is evolving rapidly. Artistic and scientific developments have broadened our view of musicality. Does the traditional repertoire on tonal music still have any relevance in this context? Of course it does! Recent musicological research has shed new light on the way musicians from the baroque era to the nineteenth century acquired their skills. As a result, fascinating correlations between baroque partimento practice and the lead sheet approach common in jazz and pop music have emerged. Tonal tools is an inspirational book and app (Android, iOS) that blends old and current approaches. Nine 'components' serve as keys for a more aural, creative and tangible approach to tonal music form the very start. Tonal tools is applicable to any tonal idiom and spans the baroque, classical, romantic, jazz and pop repertoire by means of common improvisational and compositional principles. Don't expect a straightforward method; interweave Tonal Tools with your usual didactics according to your own pace and needs. Expect a better integration of musical understanding an skill from your pupils, a more reliable memory and better sight-reading ability, not to mention a broadened musical imagination, enhanced expressiveness and a joy for playing tonal music. As a valuable extension to keyboard teachers' existing professional expertise, Tonal Tools opens new artistic and (auto)didactic perspectives. CONNECT, Musica's educational series for music schools and conservatories, builds bridges between the past and present, practice and theory, creativity and skill. It translates proven but sometimes forgotten expertise into a contemporary approach. An artistic view of musical development is central; the series deals with current artistic and educational needs and offers original, consistent and workable solutions.*

**The non-jazz improvisation series is a concept that germinated in Dick Weissman's mind while he was attending music school. He wrote a 15-piece arrangement of the old square dance tune, Cripple Creek, and wanted the trombone to take a solo as part of the arrangement. When the trombonist kept playing a bebop solo that was totally unsuitable for the chart, Dick realized that - in addition to the many musicians who do not improvise - there are even jazz musicians who don't know how to improvise outside the limits of their own stylistic backgrounds. The non-jazz improvisation series mostly includes new original tunes that are intended to show how to improvise in many musical styles, including:BluesCountryAmerican folkLatin-AmericanWorld music including South American, Eastern European and AsianOdd meters (playing in a variety of time signatures)New AgeClassicalFolk-RockIn short, the books are an encyclopedia of virtually every musical style, excluding jazz.**
