No matter where we live or what language we speak, food is an essential factor that shapes the way we think, feel, act, and respond to one another. In this milestone book, Michio Kushi presents his vision for building world peace through a sane way of eating. As the leader of the modern-day international macrobiotic movement, Michio has taught, lectured, written, and worked steadily to achieve his view of the future a

world in which all people can live in harmony with nature and with one another. In 1987, he launched his One Peaceful World society, a worldwide educational organization devoted to bringing about world peace through a new awareness of the links between food and the emotions, natural law, history, and international order. This book lays the foundation for One Peaceful World. It includes case studies throughout history in which macrobiotic diets relieved conflict and sickness. It traces the rise of the organic and natural foods

industry, to which Kushi has been a notable contributor. It offers menus and recipes, reference sources, and a wealth of information that point the way to a new approach to diet and thought. And it recommends additional actions that we can take to bring unity to the world. The book is divided into four parts. In Part 1, Kushi details his early life in Japan during World War II, and his journey to macrobiotics under the guidance of George Ohsawa. Part 2 delves into the cosmological and universal concepts behind macrobiotics, including the

importance of yin and yang. In Part 3, Kushi discusses the values that are essential to creating One Peaceful World in modern times. And in Part 4, the author looks forward to a new world government. One Peaceful World is an important and fascinating book for anyone committed to good health, whole foods, and world peace.

Australia has some of the world's largest and most labor-efficient farms, and tractors are an essential part of their operations. The average Australian farm has three or

more tractors. In this historical overview, the author documents the development of the indigenous tractor industry, from the McDonald Imperial of 1909 to more recent cane, olive, and grape harvesters.

Australian Tractors puts the industry in an economic and social history context.

The Ferguson TE-20 is the most iconic of all tractors - the small, unobtrusive grey tractor which many people will recognize.

The TE-20 replaced the horse on many farms after WWII, and paved the way for the mechanization of farming. Over 500,000

We often hear these expressions. But faith is not enough. We need Applied Faith. In three hard-hitting chapters, motivational master Napoleon Hill teaches you how to transform belief to action, and faith into real-life plans. Application. Enthusiasm. Action. These are the three keys required to do more than just "believe in yourself"--but to actually BE the person you want to be.
