This book is the outcome of a bibliographical research and historical analysis of the evolution of the international literature on J.A. Schumpeter. The research has been carried out in the last few years with the organizational support of the "International Joseph A. Schumpeter Society" and through the establishment of connections with libraries, universities and research institutes throughout the world. Schumpeter's papers at the Harvard University archives have also been scrutinized. The volume includes a historical and critical assessment of the literature on the Austrian economist - according to the most important and specific Schumpeterian "categories": biography, methodology, development, money, cycle, sociology, politics, and history. The book is characterized by the completeness and richness of its information and by the homogeneous treatment of all the possible sources which could have provided news on Schumpeter. Besides Europe and the US, the research has been extended to the USSR, Latin America, Eastern Europe and, above all, to Japan where the Schumpeterian tradition is very deep-rooted.

Joseph A. Schumpeter (1883-1950) is one of the most celebrated authors on the economics and sociology of the twentieth century. Richard Swedberg's new biography provides an engaging and vivid account of Schumpeter's varied life, including his ventures into politics and private banking as well as his academic career. As a backdrop to these, Swedberg also discusses Schumpeter's tragic personal life. This book provides a thorough overview of Schumpeter's writings, and also introduces previously unpublished material based on his letters and interviews. Swedberg emphasizes that Schumpeter saw economics as a form of social investigation, consisting of four fields: economic theory, economic sociology, economic history and statistics. The author describes and analyses Schumpeter's theory of social classes and modern states as well as his more famous theory of the entrepreneur.
